A detailed account was given of the conferences held between officers of the American Federation of Labor and officers of the Committee for Industrial Organization, following the Denver, Colorado convention of the former body.

In dealing with the subject of "Unemployment" the executive officers claimed that in September, 1937, the number of unemployed had reached the lowest point since recovery started, there being 7,530,000 out of work. According to the report this number had risen to 11,445,000 by June, 1938, but a considerable improvement was shown for the month of July and continued into August.

In referring to the "Shorter Work Week" the executive cited figures taken from the report of the United States Department of Labour to show that in the manufacturing industries the hours actually worked per week when part time is included have averaged thirty-nine or less in each year since 1931. For the first seven months in 1938, the average hours worked per week were 34·3.

Reference was made to the restoration of the basic rates of Canadian railroad workers as of April 1, 1938.

Considerable criticism against the administration of the National Labor Relations Act was voiced by the executive who claimed "that the National Labor Relations Board has administered the Act contrary to its letter, spirit and intent, with manifest bias and prejudice against the American Federation of Labor and in favour of dual and rival organizations."

Some of the other subjects dealt with in the executive report were: Social Security; Housing; Labour Standards Under Government Contracts; National Legislation; State Labour Legislation; Credit Unions; Consumers' Co-operation; Education; Child Labour; and International Labour Organization.

President Roosevelt's Message

A message was received from Franklin D. Roosevelt, President of the United States, in which he expressed "the hope that the convention will leave open every possible door of access to peace and progress in the affairs of organized labour in the United States."

Addresses of Fraternal Delegates

Before extending cordial greetings to the convention from the British Trades Union Congress, Mr. Joseph Jones, fraternal delegate, thanked the American labour movement for their generous contribution of $207,000 towards the alleviation of acute distress prevailing in the British coal-fields in 1926. In speaking of the progress being made by trade unionists in Great Britain, the fraternal delegate informed the convention that the returns based upon membership at the end of December, 1937, for the British Trades Union Congress showed a total of 4,460,417 members and that increases during the present year would place the membership at approximately 5,500,000. The major objectives of the Congress were: establishment of public ownership and control of natural resources and services; extension of state and municipal enterprise for the provision of social necessities and communal services; a legal minimum wage for every industry; a legal maximum working week; adequate maintenance of the unemployed; establishment of training centres for juveniles; extension of training facilities for adults during periods of depression; the provision of hygienic and adequate housing accommodation; full and free educational facilities from the elementary schools to the universities; adequate maintenance and compensation in respect of all forms of industrial accident or occupational disease; State pensions for all at 60, together with pensions for widowed mothers and dependent children. The delegates were informed that by joint activity and unified effort the trade unionists of Great Britain were able to secure the enactment of such beneficial legislation as The Factory Act of 1937, providing for the safety, health and general welfare of factory workers; The Coal Act, 1938, unification of royalties under the ownership and control of a local Commission and amendment of the Coal (Registration of Ownership) Act, 1937. In concluding his address Mr. Jones urged unity within the ranks of organized labour and stated that "the crying need of the world to-day is for a strengthening of democratic trade union internationalism."

In similar vein, Mr. J. W. Stephenson, the the other fraternal delegate from the British Trades Congress conveyed the friendship of British workers and affirmed the "identity of their interests with those of the toilers of America."

He stated that although the armament program of the British government has made a considerable contribution toward keeping certain industries busy, nevertheless, the trend is toward increased unemployment, there being more than 1,700,000 workers unemployed out of an insured working population of 11,370,000. The speaker dealt principally with the world problems, more especially the European situation and stated that "you cannot now live in isolation and you cannot remain outside of, or be indifferent to, what is taking place in Britain, in Europe, in the Far East, or in any part of the world." The speaker made a closing appeal for all to rally to the new birth of freedom so that "government of the people, by the people, for the people, shall not perish from the earth."

Fraternal greetings on behalf of the Trades and Labour Congress of Canada were extended by Mr. William J. Russell, a member of the Toronto local No. 91, International Typographical Union. He reminded the delegates of the arrest of certain members of his local when they advocated a nine-hour working day back in 1871 but to-day he stated "we have within the law certain rights and privileges as trade unionists in the Dominion of Canada whereby we can negotiate with employers, and can also strike and picket." It

was the contention of the speaker that wages and working conditions in the United States are reflected in the economic prosperity of the worker in Canada, and can best be translated into action by international trade unionism. The unity resolution passed at the Niagara Falls convention of the Trades and Labour Congress of Canada was read to the convention and an explanation made why it was essential that in Canada unity should be maintained. In concluding his address the fraternal delegate said:

"We in Canada do not desire a secession movement in the ranks of the international trade union movement of America of which we are a part. We desire to progress economically with the workers in the United States of America. As trade unionists in Canada we maintain that the Trades and Labour Congress of Canada is supreme as the legislative mouthpiece of organized labor and we would regret it if anything was done to weaken that structure by our international headquarters in the U.S.A. We appreciate the fact that the majority must rule in every democratic country. But it is an axiom of government that majority rule by its appointed leaders must be based on the public opinion of its membership."

Seating of Typographical Union Delegates

The question of seating the elected delegates representing the International Typographical Union was brought up by the Credential Committee, the secretary explaining that the Typographical Union had paid its per capita tax in full and up to date but the special assessment as levied by the Denver convention had not been paid. A statement from the executive of the Typographical Union was read in which it was stated that a referendum vote of the membership would be necessary before compliance with the Federation's demand could be met. In view of this fact the credential committee recommended the seating of the delegation.

Unity Appeal of D. J. Tobin

During the fifth day's session, President Green called on Judge Joseph A. Padway, legal counsel for the American Federation of Labor to addresses the convention. In the course of his speech he touched on the more important legal cases which had claimed the attention of certain international unions and the Federation, and reviewed the stand taken by the National Labor Relations Board in respect to some of these cases. In subscribing to the correctness of the statements made by Judge Padway, D. J. Tobin, president of the International Teamsters' Union and vice-president of the Federation, made further reference to the National Labor Relations Board, and to the constitutionality of the Wagner Act. In speaking of division in the ranks of labour, the vice-president stated:

"We have a division in labour that is serious, and all the legislation they can enact in Washington cannot straighten out these questions of bitterness until labour is cemented into one body and one fold, as it should be. I don't say you should sacrifice any of your principles that govern your organization and the constitution upon which you have been elected. You have no right to do that. I don't say that I have the right to surrender jurisdiction, but I do say we should not leave this convention, with all of the misery that is going on, without making some further attempt to come together with the contending parties in the labour movement."

Later, in speaking to a substitute resolution on "secession and dualism" submitted by the Committee on Resolutions, Mr. Tobin made the following statement: "I think you should go further in the report or re-submit it to the executive council. If you don't we can get along without either the C.I.O., or the A.F. of L.—I don't want to tear down the work we have given our life to, I want to build it up, but if one or the other side refuses to let us build it up, we will try to build our own house in the Teamsters Union."

Report of the Committee on Executive Council's Report

The recommendation of the executive that the charter of the International Seamen's Union be revoked and the organization and establishment of a new international union of seamen, was concurred in by the committee and adopted by the convention. The committee's recommendation, that the application of the Upholsterers' International Union for extension of jurisdiction to include workers employed in upholstered furniture, bedding, mattress and casket factories be referred to the executive, was adopted. The chartering of certain national unions and the revoking of other charters as contained in the executive council's report was approved. The committee asked the executive to continue its endeavour to settle amicably the several jurisdictional matters still in dispute. The termination of the Journeymen Tailors' Union's affiliation with the Federation and the granting of that organization's jurisdiction to the United Garment Workers of America was concurred in by the committee and the recommendation was adopted by the convention. The favourable report of the committee, on

the action of the executive in granting jurisdiction over Gasoline Service Station Employees to the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, was adopted. The executive were commended for arranging competent legal counsel for the American Federation of Labor.

Committee on Education

In reporting to the convention, this committee made certain recommendations regarding the present educational policy of the United States and observed "that this machinery as outlined will not produce the necessary results unless organized labour everywhere is alive to its responsibility and informed of its duties."

In regard to vocational education, the members of the American Federation of Teachers were asked to develop a plan of co-operation between its members in the vocational field and the local (labour) committees on education. The committee were unanimous in their opinion that the government should have both an adequate program for youth and the machinery for carrying it out. The convention was asked to re-affirm its approval of the Committee on Apprenticeship Training, and continued support of the Workers Education Bureau. The committee concurred in the proposal that all international unions where apprenticeship is applicable be urged to co-operate with the Federal Committee on apprenticeship in the development of national standards. A resolution, urging all affiliated bodies to co-operate with officers or committees of local teachers unions in their program of determining how the schools may be of greater service to the nation and how to provide for more adequate training for citizenship in a democracy, was approved. The committee recommended that the convention urge the United States Department of Education to use its good offices in arranging an international conference on technical education at the time of the World's Fairs at New York and San Francisco in 1939. The report of the committee as a whole was adopted.

Report of Committee on International Labour Relations

In discussing the subject of world peace, especially the European situation and its developments, the concluding paragraph of the committee's report is as follows: "We believe the labour movements of the democracies should work in harmony for the protection of and relief of the helpless refugees from the barbarism of the race-hating policies of the dictator states of Europe; we can offer no semblance of friendship to nations that defy all the laws of decency; we can have no tolerance of intolerance. We commend the officers for their work in the past year in helping to ease the burden of the refugee multitudes and for their part in helping to arouse the conscience of civilization against this most revolting expression of dictatorial barbarism."

The following subjects reviewed in the executive officers report were also dealt with by the committee: International Labour Organization; Pan-American Federation of Labor; International Labour Organization Treaties Ratified; and the International Federation of Trade Unions. The committee's report was adopted.

Report of Committee on Shorter Work Day

After reviewing many of the factors relative to the shorter work day, the committee recommended that the convention strongly reaffirm its endorsement of the five-day week and the six-hour day without any reduction in the hourly, daily or weekly pay. The committee further recommended "that this purpose be declared the paramount objective of this convention, and that the officers of the American Federation of Labor be instructed to spare no effort to insure steady and certain progress toward the attainment of this great objective, and of enlisting the support of all the people in its behalf." The report of the committee was adopted.

Resolutions Regarding Trades and Labour Congress of Canada

Among the large number of resolutions submitted to the convention of the American Federation of Labor four dealt specifically with Canadian matters and were presented by John F. Cauley, representing the Trades and Labour Council (A.F. of L.), Hamilton, Ont. Considered jointly the first two resolutions were: (1) Protesting issuance of charters by the Trades and Labour Congress of Canada, and (2) protesting infringement upon jurisdiction of affiliated international unions by the Trades and Labour Congress of Canada. The Committee on Resolutions in reporting to the convention stated that the testimony given to the committee indicated (1) "that for over a year it had been practically impossible to secure consideration of labour legislation due to the attitude of the provincial legislatures to give consideration to legislation which, in their opinion, was fostered and shaped by C.I.O., and Communist sources," (2) "that the Canadian Trades and Labour Congress had issued the equivalent of national charters to groups of

workmen in Canada in conflict with the jurisdiction of existing international unions affiliated with the American Federation of Labor."

Continuing the committee stated: "It has also developed it (the Congress) was issuing charters to central labour councils without consultation, advice or approval of the American Federation of Labor. This has raised the serious question of the control of such central labour councils, as well as the national unions chartered by the Canadian Trades and Labour Congress."

"Your committee believes that under existing conditions in Canada, the executive council should issue instructions that every central labour union composed of unions of affiliated organizations must hold a charter from the American Federation of Labor in addition to such charters as it may hold from the Canadian Trades and Labour Congress."

"These instructions embrace likewise instructions to the Canadian Trades and Labour Congress that it cannot issue charters to any local or federal union, or charters of any kind, without such application for charter first having received the approval of the executive council of the American Federation of Labor."

"And with the further understanding that all charters heretofore issued by the Canadian Trades and Labour Congress, or those hereafter to be issued, may be suspended or revoked at any time by the executive council of the American Federation of Labor under conditions and circumstances which would justify such action."

These recommendations were submitted in lieu of the above resolutions and unanimously adopted.

Of the two other resolutions, one asked for adequate taxation against shipping companies to pay operating costs of canals and harbours in the Dominion of Canada and the other protested the tax exemption of inter-urban trucks and buses operating in Canada.

The committee recommended that the resolutions relating to Canadian legislation be referred to the Trades and Labour Congress of Canada. In speaking to the motion, Mr. Cauley said in part "I would request in order that it go in the record that we be allowed to at least say to the Ontario government that the American Federation of Labor and the international unions in affiliation with it support us in this legislation, and we sincerely hope before another convention of this body rolls around that the Canadian situation will be straightened up. Other than that you will have to set up a new Congress, the same as we had to set up a new central body in Hamilton."

The committee's recommendation was adopted.

Other Resolutions Adopted

The recommendations contained in some of the other resolutions adopted were as follows:—

Protesting constitutional provisions of trade unions barring Negro membership.

Requesting an A. F. of L. organizer for Western Canada.

Advocating amendments to the National Labor Relations (Wagner) Act.

Protesting re-appointment of D. W. Smith as member of the National Labor Relations Board.

Recommending social security protection for seamen.

Favouring the establishment of a marine hospital at Port of Los Angeles.

Pledging fullest co-operation with the United States Conciliation Service.

Seeking aid for the whaling industry.

Favouring single wage rate for each classification of labour of civilian employees in navy yards.

Recommending amendments to the Wages-Hours Act.

Proposing the appointment of an American Federation of Labor committee to make a study of effects of public works programs upon unemployment conditions.

Advocating an incorporated territorial form of government for Puerto Rico.

Requesting protection for the American sugar industry.

Seeking prevailing wage scales for labour employed in industries producing material for W.P.A. projects.

Protesting compulsory arbitration clauses in C.I.O. agreements.

Pledging assistance to railroad labour organizations in resistance to wage cut.

Asking all Americans to refuse to buy goods manufactured in Japan until the war lords and autocrats of Japan learn to respect the rights and liberties of the Chinese people.

Endorsing the legislative program of the American Federation of Government Employees.

Seeking clarification of the Annual and Sick Leave Laws as they affect federal employees of the United States.

Re-affirming unqualified endorsement of the extension of the merit system to all employees of the United States Government except those in policy-determining positions.

Advocating the thirty-year optional retirement for government employees.

Favouring the maintaining of the United States Employees' Compensation Commission as an independent body.

Urging legislation to establish recognition of seniority among postal employees.

Recommending court of appeals for government employees.

Proposing legislation to improve standards of employment of rural mail carriers.

Advocating amendments to the United States Employment Service Act and Social Security Act to place administration of Public Employment Offices and unemployment insurance under United States Department of Labor.

Election of Officers

The officers elected were: President, William Green, Washington; first vice-president, Frank Duffy, Indianapolis; second vice-president,

Thomas A. Rickert, New York; third vice-president, Matthew Woll, Washington; fourth vice-president, John Coefield, Washington; fifth vice-president, Arthur O. Wharton, Washington; sixth vice-president, Joseph N. Weber, New York; seventh vice-president, G. M. Bugniazet, Washington; eighth vice-president, George M. Harrison, Cincinnati; ninth vice-president, Daniel J. Tobin, Indianapolis; tenth vice-president, Harry C. Bates, Washington; eleventh vice-president, Edward J. Gainor, Washington; twelfth vice-president, William D Mahon, Detroit; thirteenth vice-president, Felix H. Knight, Kansas City; fourteenth vice-president, George E. Browne, New York; fifteenth vice-president, Edward Flore, Buffalo; secretary-treasurer, Frank Morrison, Washington.

Fraternal delegates to the British Trades Union Congress, John Coefield, president of the United Association of Journeymen Plumbers, Gas Fitters, Steam Fitters and Steam Fitters' Helpers, and Felix H. Knight, president of the Brotherhood of Railway Carmen.

Fraternal delegate to the Trades and Labour Congress of Canada, E. L. Wheatley, vice-president, National Brotherhood of Operative Potters.

San Francisco, Cal., was selected as convention city for 1939.

Analysis of Health Insurance Plans of Mutual Benefit Association in U.S.A.

In Bulletin No. 9 of its Studies in Personnel Policy, the National Industrial Conference Board (United States) deals with Health Insurance plans. This bulletin in particular analyzes mutual benefit associations and discusses their framework, administration, relationship to group insurance and experience from 1929 to 1938.

In a summary of the results of its survey as applied to mutual benefit associations, the following were among the more important findings:

The mutual benefit association is the earliest form of group health insurance among industrial workers.

Until 1929 the rate of growth of new associations, remained fairly constant, but since that time fewer associations have been formed.

In only one out of every eight companies are workers required to join the association as a condition of employment.

The percentage of participation of employees in the benefit association is over 75 per cent in the companies furnishing comparable data.

Approximately 30 per cent of the companies contribute regularly to the association, usually giving a specified percentage of the dues collected.

An increasing number of associations have been discontinuing death benefits. Only 72·9 per cent of the associations covered in the present survey provided for such benefits, compared with 85·9 per cent found in the 1923 survey. On the other hand, the percentage of associations furnishing hospital benefits has increased sharply during this period.

Disability benefits have shown a tendency to increase in amount.

Approximately half of the companies exercise some supervision over the benefit societies of their employees, usually by appointing a management representative as one of the officers.

Less than a quarter of the societies studied, 23·7 per cent have incorporated industrial relations activities of any kind in their programs.

Only a small percentage of the associations co-operate in safety campaigns and in health promotion programs.

Over two-thirds of the companies with mutual benefit associations have group life insurance which supplements the benefits offered by the society.

INDUSTRIAL RELATIONS IN SWEDEN

Findings of Commission Appointed by President Roosevelt to Study Employer—Employee Relationships in Industry

FOLLOWING its study of industrial relations in Great Britain, the United States Commission appointed by President Roosevelt, conducted a similar inquiry into employer-employee relationships in Sweden. The findings of the Commission as regards Great Britain were released early in September and were reviewed in the Labour Gazette for October (pages 1117-1123). The report of the Commission in regard to the situation in Sweden has recently been received in the Department. As in the case of the report on industrial relations in Great Britain, President Roosevelt recommended "the same thoughtful and thorough reading," and observed:

"Although differences between the practices within the two countries are apparent, the striking fact emerging from a study of the two documents is the similarity of approach and the widespread satisfaction with the procedures adopted. In Sweden, as in Great Britain, employers generally have fully accepted a program of collective bargaining; there is extensive independent organization of both groups and all concerned live up to the rules of the game, participating with restraint and mutual respect in the processes of collective bargaining."

In outlining the industrial background of the country, the report states Sweden has a population of six and one-quarter millions of people. "Not so many years ago, Sweden, long agricultural, began to develop industrially, especially in forest products and metals, of which they have great natural resources. Later came metal fabrications. One-third to 40 per cent of its total industrial output is now exported, 50 per cent of the exports being in forestry products and 35 per cent in metals and metal fabrications."

Organization of Workers

The report traced the national organization of workers in Sweden to 1888 when a small federation of unions in the metal industry was established. In 1898 several national unions combined to form a national confederation of Swedish trade unions with the object of uniting the interests of workers in all trades and industries. In June, 1938, the Confederation included 42 trade union federations with 7,135 local unions having a total membership of about 850,000 workers. This represents approximately 65 per cent of all manual workers and persons in similar positions (excluding domestics). The Confederation has accumulated a reserve fund of approximately one hundred and twenty million crowns. From this fund benefit payments are made to its members, in case of a strike or lockout.

Dealing with the structure of the Swedish labour organization, the report continues:

Originally many constituent unions of the National Confederation were craft unions. Since 1909 the Confederation has frequently expressed a preference for organization and collective bargaining on an industry basis and most of the constituent unions to-day are of the industrial type. Each of these carries on collective bargaining for all of the workers in its own industry. However, craft unions exist in the building, printing and other trades. These craft unions frequently negotiate jointly as a group or federation with the employers' organization in their industries.

The degree of organization varies in different occupations. It is higher in industry, handicrafts, commerce and communications and lower in agriculture and forestry. Among manual workers in the manufacturing industries it is estimated to be approximately 90 per cent. Although the Confederation unites most of the Swedish organized workers, there are some five small unions not affiliated with it and having a combined membership of about 150,000. Most of these co-operate with the Confederation on a variety of common issues.

Organization of Employers

The set-up and objectives of employers organizations are thus reviewed:

The oldest of the more important employers' associations—the Swedish Engineering Employers' Association (which includes the manufacturers of machinery products, such as automobiles, ball bearings, electrical apparatus and appliances, machine tools, and so forth) was formed in 1896 to protect the employers' interests against the organized workers. After the general strike in 1902, the Swedish Employers' Federation was organized. In 1917, the Engineering Employers' Association joined the Federation. The Federation now includes 37 associations of employers in particular industries, with 5,000 employer members employing nearly 400,000 workers. The Employers' Federation has a reserve fund of approximately twenty-five million crowns, and in addition a guarantee fund of approximately sixty-five million crowns. Each employer member makes himself individually responsible for the guarantee fund in the amount (subject to some exceptions) of not less than two hundred crowns per adult male worker in his employ. The Federation dues from which the reserve fund has been accumulated are 10 per cent of the employers' guarantee, normally twenty crowns per year per adult male worker employed. If a member engages in a strike or lockout approved by the Federation, he is entitled to benefit payments from the Federation. The Federation has power to order a lockout, and every member in the industry affected is bound to obey the

order "on pain of damages" and of forfeiting his rights in the Federation.

The Employers' Federation is not so broadly inclusive as the Confederation of Trade Unions. Because of the very considerable financial burden of membership in the Federation, many of the smaller employers prefer to stay out of it, but nevertheless follow the agreements it makes with the unions as to hours, wages and working conditions. The majority of the members of the Federation belong to the manufacturing industries; no state or municipal employers are affiliated with it. For agriculture, forestry, shipping and private railways, hotels and restaurants and a number of minor handicrafts, there are independent employer organizations, covering employers of somewhat more than 50,000 workers. There is a certain amount of co-operation between the Federation and these smaller and specialized employers' organizations through the Advisory Council of Swedish Employers. The policy of the Federation with respect to collective regulation of labour conditions is the dominant influence on the employer side.

The Employers' Federation, soon after it was organized, decided that the course of events provided sufficient ground for the recognition of trade unions and the regulation of conditions of employment by collective agreement. At the end of 1906 an agreement was reached between the Employers' Federation and the Confederation of Trade Unions whereby the employers undertook to respect the workers right to organize, while the workers recognized the employers' right to manage the undertaking and to engage and dismiss workers without regard to whether they were union members or not.

This agreement between the Employers' Federation and the Confederation of Trade Unions, the substance of which is incorporated in the basic agreements for the several industries, excludes the closed shop in plants belonging to members of the Employers' Federation, and we found no closed shop contracts with employers not members of the Federation. We found no instances of the check-off. The closed shop is not a significant issue in Sweden because of the very large proportion of workers who are union members and because the employers no longer try to break down union organization, preferring to deal with their workers through strong trade unions. On the other hand, the employers are not asked by the unions to exercise, and they do not exercise, pressure upon their employees to make them join the unions.

The incorporation of these provisions in the basic agreements is also effective to protect the workers from discrimination because of union activity. We were told that under these agreements discrimination is not a significant problem. If it does occur, or is charged to occur, and the charge cannot be amicably adjusted by the conciliation machinery established for the industry, then the dispute goes to the Labour Court, which has power to decide it and to order reinstatement and back pay if discrimination is established.

Collective Agreements

The nature of collective agreements as they were found to operate in Sweden are reviewed by the Commission as follows:

At the end of 1936 there were 7,044 agreements covering 769,172 workers in the employ of organized and unorganized employers. The basic agreements between the employers' associations and the unions are voluntary, and collective in the sense in which that word is used in England. That is, they are not agreements between a single employer and a union. They are agreements negotiated collectively by representatives of a group or association of employers (commonly an industry-wide association) and representatives of a union or a group or association of unions. The agreements apply to the unorganized workers, as well as to the organized workers, in the plants of the employers covered by such agreements. The agreements are binding upon any one who joins the contracting federation or association during the term of the contract, and they remain binding upon persons who leave the association or Federation during that time.

The method of reaching collective agreements is by informal discussion by joint committees of the trade unions and employers' associations. The workers' representatives and employers' representatives, members of such joint committees, were outspoken in their respect for each other. The principal officers and negotiators of the employers' association and the Confederation of Trade Unions gave us an agreed joint statement on industrial relations in Sweden and met with us jointly in a very frank discussion of the subject during which all the questions we had to ask were answered without hesitation. The entire process of collective bargaining is voluntary and both workers and employers prefer this method to any kind of compulsion on the part of the Government, or even to arbitration. The value attached by both sides to this voluntary system, and to the collective machinery which they have developed is great enough to engender a strong and mutual tendency to seek peaceful solutions.

The collective agreements are for a definite period, usually for one or two years, with provision for notice of desire to change or terminate. If such notice is not given, the agreement is extended, usually for a year. During the contract, a strike or lockout is prohibited by law, except a sympathetic strike or lockout entered upon to assist another lawful strike or lockout. A collective agreement may exclude such sympathetic action, but such provisions are not frequent, both sides preferring to retain that power. A union that asks another union to strike in sympathy must contribute to the strike benefits, to members of the responding union.

There are a great many local and district agreements, many of them supplementary to the national agreements. The local agreements, even those between employers outside the Federation and their workers, generally follow the standards set for that particular industry by the national agreements. We were informed that the trade unions prefer to negotiate for their membership on a national basis in order that the national standards may not be impaired, and with the same object of maintaining standards, agreements with unions negotiated by members of the Employers' Federation must be approved by the Federation.

Minimum Wages and Hours

Minimum time wage rates, states the report, are specified for eight areas into which the country is divided, on a cost of living basis determined by the Government. In each area the specified minima differ according to the age, experience and skill of workers, and between male and female. The minimum wages

for skilled male workers (those after an apprenticeship of four years, or who have been in the trade for four years, and are twenty years of age), vary from ·86 crown per hour, in the lowest district, 1·26 crowns in the highest. The minimum wages for skilled female workers (who have been in the trade for three years and are twenty years of age), vary from ·57 crown in the lowest district, to ·84 crown in the highest. The minimum wages for other male workers, not apprentices, vary with the age of the worker, from fifteen to nineteen years, and vary by districts, from the lowest of ·25 crown to the highest of 1·18 crowns.

Provisions as regards piece-work hours, overtime, etc., are dealt with in the following paragraphs:

Piece-work rates are established locally by "price lists" agreed upon for the period of the agreement. Additional price lists when established must be fixed at the beginning of the work or not later than three days thereafter, by negotiations between the employer or his representative and the workers. The workers are to be given due notice in writing of a piece-work price thus agreed upon. Should the introduction of new machinery or new methods affect the piece-work price, the new price is to be settled as soon as possible, and until then the work is to be executed for time wages.

The specified basic weekly hours are forty-eight. Overtime rates, calculated on the worker's time wage basis, are 35 per cent for the first two hours and 70 per cent thereafter, with 100 per cent for Sundays and holidays. This fixed overtime increment is paid to piece-workers in addition to the piece-work price. Annual vacations of five working days with pay are provided for.

With respect to conduct of the work and the right to organize, the contract provides that "the employer is entitled to lead and allot the work, to engage and dismiss workers at his own discretion and to employ workers belonging to any labour union or unorganized workers. The right of organizing shall on both sides be respected. If a dispute arises between the parties, no disturbing of the process of the work may be made before the dispute has been discussed at first between the parties themselves and, if necessary, between the parties' organizations"; and the contract makes note of the fact that if no agreement is reached, any dispute concerning the interpretation or application of the agreement must be referred to the Labour Court.

Agreements for Settlement of Disputes Without Stoppage of Work

The Commission reported that the arrangement and the agreed procedure in Sweden for settling basic terms of employment and for settling disputes and grievances without strikes or lockouts have certain common characteristics which were found also in the collective bargaining arrangements in Great Britain. These were as follows:

First: Basic changes in wages and hours are commonly negotiated by the national unions, not with each employer individually, but with associations of employers.

Second: If negotiations on these basic subjects fail the gravity of the situation, involving the whole or a considerable portion of an industry, leads the parties to seek the help of an impartial agency. In Sweden the impartial agency is commonly a government conciliator.

Third: Local disputes as to the application or interpretation of an agreement, and grievances, are first negotiated between the particular worker or his union representative and the employer, and if not settled in this way are referred to a joint body composed of representatives of the national union and the employers' association, who are not themselves directly concerned in the controversy and who can bring to bear upon it an informed and relatively detached judgment.

Fourth: Under the agreements there can be no strikes or lockouts until the procedure for negotiating basic changes, or for settling local disputes and grievances has been completed. In England enforcement of the provisions of the collective agreements rests upon moral force rather than upon legal compulsion. In Sweden, however, the collective agreements are legally enforceable in the Labour Court.

Interunion disputes among members of the Confederation with consequent stoppages of work do not present any significant problem, and the Commission found no evidence of interunion disputes between the confederated unions and the relatively small unions not affiliated with the Confederation.

Legal Status of Associations for Collective Bargaining

The Commission's study indicated that since 1865 there have been no laws in Sweden restricting concerted action of the workers in labour unions or of the employers in trade associations, and labour union activity is substantially free from regulations so long as it does not violate the ordinary police regulations that apply to all citizens. There is no obligation to register or to account for funds. Labour unions and employers' associations voluntarily publish statements of income, expenditures and reserves.

For manual workers the right to organize has been well established in practice for over twenty years, and the employers prefer to deal with strong and responsible organizations of these workers, but there has been no such agreement as to the organization of salaried employees. Controversy about this led to the passage, in 1936, of a law (effective January 1, 1937) defining for the first time the right of association and of collective bargaining. Although the law applies to all workers except civil servants, we were informed that it was intended to protect primarily "white collar" workers. The right of collective bargaining is defined to include the obligation of the opposite party to enter into negotiations, to attend joint meetings, and, where necessary, to make "proposals supported by reasons for the settlement of the question concerning which negotiations were instituted." This same Act also sets up a

novel system of conciliation, which may be invoked by the workers and which involves certain obligations to keep the peace. We do not discuss it here because it has not, as yet, been practically applied.

Government Agencies

The report deals with the services provided by the Government for conciliation and records that that since 1906, the Government has placed conciliators and arbitrators at the disposal of the parties in industrial disputes. The conciliators are appointed for the several conciliation districts into which the country is divided. The duty of the conciliator is to follow the conditions of work in his district, to lend his assistance in the settlement of trade disputes arising therein, *and, on request,* to assist workers and employers to conclude agreements likely to establish good relations between them and prevent strikes and lockouts. The conciliator's primary object is to bring about an agreement in accordance with the proposals made by the parties themselves in the course of the negotiations. If unsuccessful he may urge arbitration, with the parties pledging themselves to observe the award, but he cannot compel arbitration and he must not himself act as arbitrator. If a dispute arises, the conciliator calls upon the parties to meet together for negotiations before him and urges the parties to find a settlement without a stoppage of work. Both the employers and the workers are bound to respond to the conciliator's summons, but not bound to yield to his urging that they refrain from hostile action. If a dispute is likely to be serious in extent, the Crown may, and usually does appoint a conciliation commission, or special conciliator.

Right to Strike and to Lockout

Beyond these provisions for conciliation, continues the report, there are not provisions for intervention by the Government; there is no provision in the law for compulsory arbitration. The right to strike and to lockout is fully retained with respect to all matters not already covered by written agreement, except that an act of 1935 provides that before a stoppage of work takes place seven days notice thereof must be given to the other party and to the district conciliator, and the notice must state the reasons for the proposed stoppage.

By a law of 1928 strikes and lockouts are prohibited in connection with any dispute (1) as to the validity, existence or correct interpretation of a written collective agreement; (2) as to whether a particular act constitutes an infringement of it; (3) in order to enforce a provision which is to come into operation on the expiration of the agreement; or (4) in order to assist others by sympathetic strike or lockout or other hostile action *unless the original strike or lockout was itself legal.* If the dispute has been unsuccessfully negotiated by the machinery provided under the agreement, and only after that has occurred, provision is made for a final and binding decision by the Labour Court, from which there is no appeal.

Labour Court

The functions of other Governmental agencies are dealt with as follows:

The Labour Court was established by the Act of June, 1928. It is composed of a President and six members, who are appointed by the Crown. The President and two members are selected from the public, not directly representing the interest of the worker or employer. The President and one of the members, who is appointed Vice-President, must be trained in the law and experienced in judicial procedure, and the second member must possess special knowledge and experience of labour conditions and industrial relations. Of the four remaining members, who must have experience and knowledge of labour conditions, two are appointed on the recommendation of the Swedish Confederation of Trade Unions, and two on the recommendation of the Swedish Employers' Federation. It is the duty of the Labour Court to see that the cases brought before it are concluded without unnecessary delay, and, if possible, decided after only one day in court. In the seven years from 1929 to 1935 inclusive, 1,272 cases were handled by the Labour Court.

Basic Hours and the Labour Council

Basic hours of work are fixed by the law of 1919 for most industrial workers at 8 hours per day, or forty-eight hours per week. The eight-hour day may be extended to nine within the forty-eight hour week, and beyond this, two hundred hours of overtime per year are allowed, not more than forty-eight of which shall be in any four weeks. The Labour Council is authorized to grant further overtime hours up to a total of one hundred and fifty per year, but the Council in its procedure has made it a rule that no more than thirty of such extra hours shall be given per month. This makes an allowable maximum of approximately fifty-five hours per week. In 1937, the Council permitted additional overtime work for almost eight thousand workers for a total of almost five hundred thousand hours, or an average of over sixty-three hours per year per worker.

The Labour Council consists of a fulltime President and staff. Upon the Council are representatives of the national organizations of workers and employers, recommended by their respective associations. When a case is brought before the Council, the representatives of the organizations of workers and employers appear. The Council endeavours to bring the representatives of workers and employers to an agreement, and in over 90 per cent of the cases they do agree. The scope of the Council's work, from which no appeal is permitted, is (*a*) to decide whether the particular workers come under the Hours Act, and (*b*) to pass upon applications for extensions of both normal and overtime hours. The overtime rates depend upon the terms of the collective agreements. They are usually one and one-third to one and one-half times the hourly rate.

Picketing

There are no special laws with regard to picketing. The conduct of pickets is, of course, subject to the general police regulations with respect to keeping the peace. The conduct of

both sides in strikes and lockouts is tempered by the fact that the established collective relations, which both parties expect to resume at the end of the dispute, have real weight and value.

Social Legislation and Other Factors

After reviewing the evolution of existing methods of settling industrial disputes, the Commission concluded its report by a reference to social legislation in Sweden. These paragraphs follow:—

Old-age pensions, unemployment insurance and health insurance are provided and all adult citizens contribute, irrespective of the character of their work. The contributions are made entirely by the individual, supplemented by the Government. Workmen's compensation for industrial injuries is borne entirely by the employers.

The National and in some instances local governments pay much attention to housing, both as to flats and individual houses. The subsidies for flat building are made both by the National Government and the local, or communal, governments. In addition, subsidies are made to individual families having more than a certain number of children. Individual houses of a semi-prefabricated character are promoted by Government loans.

Co-operatives in Sweden are well established and have been effective in reducing the cost of necessaries to the workers.

Another contributing factor to improved industrial relations has been the better understanding of economic problems brought about by the Workers' Educational Association, formed in 1912 to educate the workers and working class leaders.

The hours of work per week are now much less than they were, generally 48 hours, with provision for overtime work at overtime pay. Vacations with pay, after being rather widely adopted in the voluntary agreements, have now been established by law, effective in 1940, at one day for each month during which the employee has worked throughout the year. The unions have placed no obstacles in the way of labour saving machinery, but insist that part of the benefit of these improvements in method should go to the workers. Since 1924 the power per worker has increased some 25 per cent, and production per worker 33⅓ per cent. Increases in wages have been such that in the manufacturing industries, real wages in 1936 were some 21 per cent above those in 1924.

Although strikes and lockouts still occur in Sweden they occur within the framework of a voluntary system of collective bargaining in which the settlement of differences by methods of persuasion rather than by force has become the order of the day. The endeavour of the representatives of both workers and employers representatives is to bring about, by objective factual consideration, an understanding of the problems, with respect for each other's motives and the adoption of policies and agencies which make for peaceful solutions.

LEAGUE OF NATIONS' INTERNATIONAL LABOUR ORGANIZATION

Iran and the Organization

THE Minister of Foreign Affairs of Iran, Mr. Mozaffar Aalam, accompanied by members of the Iranian delegation in Geneva, visited the International Labour Office, and was welcomed by the Director, Mr. Harold Butler.

Mr. Butler called attention to the fact that fifteen years ago the Iranian Government, at the suggestion of the Office, had promulgated an Order regulating the employment of children in the carpet industry. After referring to the industrialization of Iran, the Director discussed the new social problems raised by industrialization, especially in the Asiatic countries, and said that if the Office could assist in their study and solution in Iran, it would do so with pleasure.

In reply to the Director, Mr. Aalam said:—

The Government of Iran attaches the greatest importance to the creation of an industrial system which, by utilizing the productive forces of the country, will further strengthen our economic independence. The efforts made in this direction by the State and, under its guidance, by the section of the population representing capital, have so far been crowned with success. Without sacrificing any of its agricultural traditions, Iran now possesses industries with the most modern equipment which are in process of constant expansion. Nor have the handicrafts, a source of artistic wealth of the highest quality, been neglected. We endeavour to maintain harmony in the various branches of our economic life. In order to facilitate the transport of the wealth derived from our soil and extractive industries, we have built a railway of 1,400 kilometres across Iran, this scheme owing its successful termination to the unswerving determination of our great Sovereign. I take this opportunity to express my thanks to the Director for the friendly interest which he showed in my country by telegraphing to congratulate me on the opening of the railway.

We are perfectly aware of the important part that the regulation of working conditions can play in our social and economic development. In 1936, as you all know, my country introduced regulations for factories and industrial establishments which are in perfect agreement with the principles laid down by the Labour Charter and the Conventions and Recommendations of the International Labour Organization. We intend to complete our industrial legislation progressively but even as it is, we appreciate at its real worth the very valuable co-operation which the International Labour Office offers us in the fulfilment of this task.

Publications of the International Labour Office

The twelfth issue of the "International Survey of Legal Decisions on Labour Law," containing judgments delivered in 1936-1937, has just appeared.

As in previous years, the "Survey" contains a selection of decisions on cases in England, France, Germany, Italy, and the United States, with a subject index and an introductory note on the competent authorities having jurisdiction in labour matters in these countries. The cases chosen are arranged under the following headings: International Labour Law; General Principles of Labour Law; Occupational Organization; Organization of Industrial Undertakings; Conditions of Employment and Protection of the Individual Worker; and Social Welfare and Insurance.

Labour Courts

Under the above title the Office has just published an international survey of judicial systems for the settlement of disputes.

It may be remembered that in 1933 the Office published a report on conciliation and arbitration as a means for the settlement of collective disputes about interests. Another form of collective dispute is that commonly referred to as disputes about rights, and these fall within the competence of the labour courts in countries where such special courts are to be found. The present Study of such courts may be regarded as supplementing the Study on conciliation and arbitration.

The first part of the present report gives a comparative analysis of the judicial labour systems in existence, with the object of drawing attention to points of similarity or differences in the constitution and working of the various labour judiciaries. It is divided into six chapters, dealing respectively with the history of labour courts, the constitution of such courts, their composition, their jurisdiction, the procedure, and conclusions. The second part contains a series of national monographs arranged in alphabetical order, and describing various phases of the development and operation of the special procedure in force in each country for the judicial settlement of labour disputes. The number of countries dealt with is 23. An appendix contains a list of the laws on labour courts in the different countries up to December 31, 1937.

Industrial Accident Statistics

Industrial Accident Statistics is the title of a report issued recently by the International Labour Office. The report is based on an examination of data on industrial accidents in some 30 countries and has been made with special reference to the comparability of data. The statistics given in the report are presented in a series of tables accompanied by explanatory notes and supplementary comment for each country. Data are shown for mines, railways, agriculture and industry (manufacturing) and in a few cases for certain other groups such as public services.

The scope of the report is well indicated in the chapter headings which are as follows: Difficulties of International Comparison of Accident Risks; and Industrial Accident Rates in Principal Industrial Branches. These two chapters are sub-divided into sections dealing with The Risk of Accident, The Accidents, Man-hours of Employment, Differences in Groups Compared; and under the following industrial classifications: Mining and Quarrying, Industry and Agriculture, and Railways.

There is also an appendix to the report in which available data on industrial accidents are given for 33 countries for the period 1927-1936.

According to a report entitled *The Farm Implements and Machinery Industry in Canada 1937*, issued by the Dominion Bureau of Statistics, the farm implements and machinery industry employed an average of 6,446 workers in 1937, compared with 5,508 in 1936. The 917 salaried employees were paid $1,538,-918 during the year and the 5,529 wage-earners were paid $5,811,125. The total of $7,350,043 for salaries and wages was 22 per cent higher than the amount distributed for this purpose in 1936.

According to a bulletin issued by the Ontario Industrial Accident Prevention Associations, a total of 5,008 accidents were reported to the Workmen's Compensation Board during October compared with a total of 6,556 accidents so reported in October of last year. Of the accidents reported for October 1938, fatalities numbered 28 as against 29 in 1937. Total awards for compensation and medical aid amounted to $594,318.85 of which medical aid constituted $93,168.80 of the total.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, SEPTEMBER, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on October 1 was 10,983, the employees on their payrolls numbering 1,119,291 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for September was 1,860, having an aggregate membership of 223,876 persons, 10·4 per cent of whom were without employment on October 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of October, 1938, as Reported by Employers

Industrial employment at the beginning of October showed further substantial improvement, according to statements received by the Dominion Bureau of Statistics from 10,983 firms, whose staffs aggregated 1,119,291 persons, as compared with 1,104,865 in the preceding month. This increase of 14,426 workers is smaller than that noted at October 1, 1937, but exceeds the average gain indicated between September and October in the years, 1921-1937. The crude index of employment, based on the 1926 average as 100, advanced from 115·1* at September 1 to 116·7 at the beginning of October, but there was a decline of 7·2 per cent from October 1, 1937, figure of 125·7, the highest recorded in any autumn for which data are available. Employment at the date under review, however, was in greater volume than at October 1 in any of the years, 1931-1936; the index was also fractionally higher than at October 1, 1930.

Since the increase at the latest date was larger than usual at the beginning of October in earlier years of the record, the seasonally-adjusted index advanced slightly, standing at 111·0 at October 1, as compared with the revised figure of 110·6 at September 1, 1938.

The unadjusted index, (based upon the average for the calendar year 1926 as 100) has been as follows at October 1 in recent years; 1938, 116·7; 1937, 125·7; 1936, 110·1; 1935, 106·1; 1934, 100·0; 1933, 90·4; 1932, 86·7; 1931, 103·9; 1930, 116·2; 1929, 125·6; 1928, 118·8 and 1927, 110·3.

*Revised.

Manufacturing was quieter at October 1 than in the preceding month, the greatest losses in employment being those of a seasonal character in lumber and food canning; on the other hand, textiles showed further pronounced improvement. Among the non-manufacturing industries, logging, mining, transportation, and trade reported considerably increased activity, while communications and services showed seasonal curtailment. The expansion in logging operations was less than normal, according to the experience of past years; the improvement in construction, on the other hand, was contra-seasonal.

The records show that for October 1, 1937, 10,398 employers had reported pay-rolls aggregating 1,197,647 workers, or 23,351 more than at September 1; the most marked improvement had then been in logging, although the trend was also favourable in most of the main industrial groups.

Employment by Economic Areas

Considerable improvement was shown in Nova Scotia, New Brunswick, Quebec, Ontario and Saskatchewan; in Alberta, there was no general change from the preceding month, while firms in Prince Edward Island, Manitoba and British Columbia reported reduced activity. Except in Prince Edward Island and the three Prairie Provinces, employment was at a lower level than at October 1, 1937. In the Maritime Provinces, the index was also lower than at the same date in 1936, but

elsewhere employment was in greater volume, while the situation generally was better than at the beginning of October of other years since 1930.

Maritime Provinces.—Further moderate improvement was indicated in the Maritime Provinces, where the 799 co-operating employers enlarged their payrolls from 82,979 persons at September 1, to 83,810 at the beginning of October. The general gain compares favourably with the small loss reported, on the average, at October 1 in the years since 1920. However, the index, at 114·5 at the latest date, was over 20 points lower than at October 1, 1937, although the trend had then been downward. Manufacturing as a whole showed a falling-off at the beginning of October, 1938, from the preceding month, mainly in animal food, lumber and iron and steel plants, while vegetable food, pulp and paper, electric light and power and some other lines were busier. Among the non-manufacturing groups, logging afforded rather more employment, and there were larger gains in mining, transportation, trade and construction. On the other hand, hotels and restaurants released help as the tourist season drew to a close.

The 719 firms furnishing data for October 1, 1937, had employed 97,378 persons, or 384 fewer than in the preceding month.

Quebec.—A considerable increase was indicated in Quebec. The expansion took place chiefly in logging and construction, with smaller gains in trade and transportation. On the other hand, manufacturing and services reported reduced activity; within the former, there were large increases in textiles, but food, lumber and iron and steel works showed important curtailment, and there were also losses on a smaller scale in pulp and paper, beverage, clay, glass and stone and some other plants. Statistics were compiled from 2,730 firms in Quebec with 342,801 workers, compared with 333,158 at the beginning of September. The improvement at the latest date was decidedly greater-than-average, according to the experience of the years since 1920, and also exceeded that noted at the beginning of October last year. The index rose from 118·1 at September 1, 1938, to 121·6 at the date

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

under review, when it was, however, nearly six points lower than at October 1, 1937. Returns were then tabulated from 2,484 establishments having 354,662 men and women in their employ, as compared with 346,936 in the preceding report.

Ontario.—The trend was again upward in Ontario, according to 4,780 employers of 452,944 persons, or 3,269 more than at the beginning of September. A much greater gain over the preceding month had been indicated at October 1, 1937, when the index, at 130·4, was decidedly higher than that of 115·8 at the latest date. The movement in employment has usually been favourable at the beginning of October in past years; the expansion at the date under review was not equal to the average increase between September 1 and October 1, 1921-1937. Textile and iron and steel factories, logging, mining, trade and construction and maintenance showed heightened activity at the date under review, as compared with September 1, 1938. On the other hand, food, lumber, tobacco, electrical apparatus, non-ferrous metal and some other classes of manufacturing, and services released employees, the losses in some cases being of a seasonal character.

For October 1, 1937, 4,601 firms had reported a staff of 508,066, as compared with 487,011 in the preceding month.

Prairie Provinces.—There was an increase in employment in the Prairie Provinces as a unit at the beginning of October; substantial improvement was indicated in Saskatchewan; in Alberta, little general change took place, and the trend in Manitoba was unfavourable. An analysis of the returns by industry in the Prairie Provinces shows heightened activity in mining, transportation, building and highway construction and trade, while manufacturing was quieter, the losses being mainly in lumber and iron and steel plants; services and railway construction also released help. Returns for the date under review were received from 1,538 establishments with an aggregate working force of 144,434 employees, compared with 143,149 at September 1. The index at the latest date, 113·2, was 5·6 points higher than at the beginning of October in 1937, when the 1,489 co-operating employers had reported 137,302 persons on their payrolls, compared with 139,499 in the preceding month.

British Columbia.—Employment in British Columbia showed moderate curtailment, chiefly in the lumber and fish-canning divisions of manufacturing, and in shipping, construction and services. On the other hand, trade, logging, metallic ore mining, local transportation and storage and highway construction reported greater activity, and, within the group of factory employment, there were advances in fruit and vegetable canneries and in pulp and paper and iron and steel works. Data were tabulated from 1,136 firms, whose staffs declined from 95,904 at September 1, to 95,302 at the beginning of October. Losses on a much larger scale had been registered at October 1, 1937, but the index, at 117·9, was then decidedly higher than at the date under review, when it stood at 111·3. An aggregate working force of 100,239 men and women was reported by the 1,105 employers furnishing statistics for October 1, 1937; this was a decline of some 2,850 from their September 1 staffs.

Table 1 gives indexes by economic areas.

Employment by Cities

The trend at the beginning of October was upward in Montreal, Quebec, Toronto, and Windsor, while activity declined in Ottawa, Hamilton, Winnipeg, and Vancouver. The index of employment in Montreal was fractionally higher than at October 1, 1937, and improvement in that comparison was also shown in Quebec city, but elsewhere the situation was less favourable.

Montreal.—There was a further increase in employment in Montreal, where the 1,582 co-operating establishments employed 165,547 persons, or 2,245 more than at September 1. Manufacturing on the whole was quieter, losses in iron and steel, tobacco and some other factories more than offsetting gains in textiles and some other lines. Transportation, construction, services and trade also afforded more employment. Curtailment had been noted at the beginning of October of last year, when the index of employment stood at 107·4, compared with 108·2 at the latest date. For October 1, 1937, data had been furnished by 1,419 firms having 161,536 employees, a decline of 320 from their staffs in the preceding month.

Quebec.—Employment in Quebec advanced at the date under review, according to information from 191 establishments having 15,992 employees at October 1. There were seasonal losses in services, and manufacturing was also slacker, but transportation and construction reported heightened activity. The index was nearly ten points higher than at the beginning of October, 1937, when 178 establishments had employed 14,312 men and women.

Toronto.—Continued expansion was indicated in Toronto, according to 1,620 firms employing 137,285 workers, compared with 135,707 in their last report. Manufacturing showed improvement, particularly in the textile and leather divisions; building construction and retail trade also absorbed more workers. On

the other hand, transportation was quieter. Larger additions to staffs had been made at October 1 of a year ago, when employment was at a rather higher level; 1,552 employers had then reported a combined working force of 140,209 persons, and the index had stood at 112·6, compared with 109·4 at the latest date.

Ottawa.—Trade and transportation were rather more active, while construction and manufacturing showed a decline. The forces of the 204 employers furnishing data aggregated 14,343 men and women, or 113 fewer than at September 1. The index of employment was over six points lower than at the same date in 1937, when a minor increase had been indicated by the 202 co-operating establishments, whose payrolls had included 15,175 workers.

Hamilton.—Curtailment was noted in Hamilton, mainly in manufacturing, where there were losses in the clay, glass and stone, electrical apparatus and iron and steel divisions. Other industries reported little general change; building and trade were rather more active, while road work and transportation were quieter. Statements were tabulated from 302 firms with 33,318 employees, compared with 34,983 in the preceding month. Employment at the beginning of October of last year was in decidedly greater volume; a reduction in personnel had then also been reported by the 293 employers whose statistics were included in the survey for October 1, 1937, and who had a staff of 37,835.

Windsor.—There was an increase in the number working in Windsor, chiefly in automobile and other iron and steel plants. One hundred and ninety concerns employed 17,317 persons, as against 16,560 at September 1. A larger advance had been indicated at the beginning of October of last year, when 179 co-operating establishments had reported 19,942 employees. The index of 146·2 at October 1, 1937, was decidedly higher than that of 126·7 at the date under review.

Winnipeg.—Little general change was indicated in Winnipeg at October 1, when the 499 firms furnishing data employed 41,423 men and women, or 54 fewer than in the preceding month. Manufacturing and trade were rather more active, while transportation and construction reported curtailment. A falling-off had been recorded at the beginning of October a year ago by the 487 employers whose statistics were received, and who had 41,930 workers on their paylists; the index then was slightly higher, standing at 97·6, as compared with 96·3 at October 1, 1938.

Vancouver.—Employment in Vancouver at October 1 was in much the same volume as in the preceding month, according to information from 473 establishments with an aggregate staff of 37,362 persons, compared with 37,414 at September 1. Transportation and trade reported improvement, but there was a decline in construction. A much larger reduction had been recorded at the beginning of October, 1937, but the index then stood at 117·9, as compared with 114·7 at the date under review. Statements for October 1 of last year had been received from 456 firms, whose employees had numbered 38,182.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—There was a falling-off in factory employment at October 1, when the 6,209 co-operating establishments reported a staff of 573,157 persons, or 6,634 fewer than in the preceding month. The index, based on the 1926 average as 100, stood at 112·5 at October 1, compared with the revised figure of 113·8 in the preceding month, and with 121·7 at the beginning of October, 1937. However, the latest index was higher than at October 1 in other years since 1929.

On the average, employment in manufacturing as a whole at the beginning of October in the period, 1921-1937, has shown a very slight increase, the tendency having been downward in eight, and upward in nine of these years. The reduction at the latest date therefore lowered the seasonally-adjusted index of employment, which declined from 110·6, the revised figure for September 1, 1938, to 109·1 at October 1.

Seasonal curtailment was noted at the date under review in fish, fruit and vegetable canning and in lumber mills, and there were also staff reductions in leather, tobacco, clay, glass and stone, electrical apparatus, iron and steel, non-ferrous metal and non-metallic mineral product works. On the other hand, textile, automobile, pulp and paper, chocolate and confectionery, agricultural implement and rubber factories showed improvement, that in textiles being pronounced.

The unadjusted index numbers in manufacturing at the beginning of October in recent years of the record, based on the 1926 average as 100, are as follows: 1938, 112·5; 1937, 121·7; 1936, 109·0; 1935, 103·3; 1934, 94·4; 1933, 86·7; 1932, 84·1; 1931, 91·8; 1930, 107·8; 1929, 120·2; 1928, 115·7, and 1927, 106·4.

The manufacturers making returns for the beginning of October of last year, numbering 6,012, had employed 618,417 men and women, compared with 615,978 in the preceding month. Marked gains had then been made in vegetable food, iron and steel and textile plants, but many other lines of factory employment had also shown considerable improvement.

Animal Products—Edible.—There were losses in dairies and fish-preserving establishments, but improvement was indicated in meat-preparing and packing plants. Statistics were received from 315 manufacturers, employing 25,923 persons, as compared with 27,194 in the preceding month. This contraction, which was most marked in British Columbia, was on a rather smaller scale than that registered at the corresponding date of last year, but the index was then some ten points higher.

Leather and Products.—A moderate decline occurred in the leather industry at October 1, mainly in footwear factories. The 315 employers making returns reported 23,206 workers, or 134 fewer than at September 1. Employment at the beginning of October a year ago had shown a greater decrease from the preceding month; the index number then, however, stood at 117·0, compared with 113·3 at the date under review.

Lumber and Products.—Seasonal contractions in personnel were indicated in the lumber group, in which employment was at a much lower level than at October 1, 1937. The reduction at the date under review took place very largely in rough and dressed lumber mills, but container plants were also slacker; on the other hand, furniture and vehicle factories showed improvement. A combined working force of 43,828 persons was reported by the 909 co-operating manufacturers, as compared with 47,585 at the beginning of September. The tendency was downward in most provinces, particularly in Quebec and Ontario.

Musical Instruments.—No general change was registered in musical instrument plants, in which employment was at a rather higher level than during last autumn. Thirty-five establishments reported 1,664 employees, as compared with 1,667 in the preceding month.

Plant Products, Edible.—The canning of vegetable foods showed decided curtailment, and sugar and syrup factories were also slacker; on the other hand, chocolate and confectionery and flour and cereal plants afforded considerably more employment. The staffs of the 532

Relative Weight of Employment by Economic Areas as at Oct. 1, 1938	100·0	7·5	30·6	40·5	12·9	8·5

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review

[1] Revised index.

reporting firms aggregated 44,613 persons, or 3,201 fewer than in their last return. The losses occurred in Quebec and Ontario, firms in the Maritime and Western Provinces showing heightened activity. The general decline compared unfavourably with the large increase registered at the corresponding date in 1937, when the index was many points higher.

Pulp and Paper Products.—An upward movement was indicated by 620 employers in this group who had 65,980 workers on their payrolls, as compared with 65,295 at the beginning of September. Moderate recovery took place in pulp and paper mills, and there were also gains in printing and publishing, while no general change was shown in paper product factories. A small falling-off had been reported at the beginning of October a year ago, but the index number then was several points higher.

Rubber Products.—Employment in rubber goods showed further expansion at October 1, 1938; data were compiled from 54 firms with 13,046 employees, as against 12,862 in their last report. A larger gain had been recorded at the same date in 1937, when employment was at a decidedly higher level.

Textile Products.—Cotton, woollen, silk, hosiery and knitting and garment and other textile factories reported heightened activity; 1,146 manufacturers enlarged their payrolls from 103,469 workers at the beginning of September, to 106,515 at the date under review. Quebec and Ontario recorded the bulk of this expansion. Smaller increases had been noted at the beginning of October last year, but the index then was higher by nearly seven points than at October 1, 1938.

Beverages.—A downward tendency was in evidence in these industries at the beginning of October, according to the 142 establishments furnishing statistics, which employed 9,180 workers. Employment was more active than at October 1, 1937, when a slight loss had been indicated.

Tobacco.—Curtailment was reported in tobacco manufacturing, the 45 factories whose data were tabulated reducing their staffs by

Relative Weight of Employment by Cities as at Oct. 1, 1938	14·8	1·4	12·3	1·3	3·0	1·5	3·7	3·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

323 to 7,941 at October 1. The index was lower than at the same date in 1937; a decline had then also been recorded.

Chemicals and Allied Products.—Little general change was noted in chemical factories, 289 of which had a working force of 18,025, as compared with 18061 in the preceding month. There were moderate increases in New Brunswick, Quebec, and British Columbia, with rather larger decreases in Nova Scotia and Ontario. The index of employment was the same as at the first of October of last year.

Clay, Glass and Stone Products.—Clay products and glass factories showed reduced activity, while the stone division of this group reported some improvement. Statements were received from 214 manufacturers employing 10,192 persons at October 1, compared with 10,397 at the beginning of September. The index was rather lower than at the corresponding date in 1937, although greater losses on the whole had then been indicated.

Electric Light and Power.—A small advance was made in electric light and power plants at October 1, when 98 establishments reported 17,282 workers, compared with 17,212 in the preceding month. A decrease had been noted at the same date of last year and the index number then stood at 129·5, compared with 136·6 at the beginning of October in 1938.

Electrical Appliances.—In the electrical apparatus division, 125 works employed 18,625 men and women, or 223 fewer than in their last report. Little general change had been indicated at October 1, 1937, when the index was many points higher.

Iron and Steel Products.—Increases were shown at the beginning of October in the automobile, agricultural implement, heating appliance and small hardware divisions, while curtailment was noted in the railway car and locomotive, shipbuilding, structural iron and steel, general plant machinery and crude, rolled and forged industries. Statements were

Relative Weight of Employment by Industries as at Oct. 1, 1938	100·0	51·2	2·0	6·6	2·1	9·7	15·4	2·6	10·4

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

[1] Revised index.

66620—5½

received from 913 manufacturers, whose payrolls aggregated 120,862 persons, as compared with 121,827 in the preceding month. Employment advanced in Ontario and British Columbia, but the tendency in the other economic areas was downward. Expansion, on the whole, had been shown at the first of October of last year, when employment was at a decidedly higher level, the index then standing at 107·0, compared with 92·4 at the latest date.

Non-ferrous Metal Products.—A combined working force of 24,776 persons was reported by the 182 co-operating employers, who had 25,233 employees at the beginning of September. There was some improvement in the precious metals division, but smelters and refineries and lead, tin, zinc and copper plants were slacker. The index was some five points lower than in the autumn of 1937.

Non-metallic Mineral Products.—The personnel of the 102 firms furnishing data in these industries aggregated 13,392, or 128 fewer than in the preceding month. A larger loss had been noted at October 1, 1937, when employment was in rather smaller volume.

Logging

Statements were tabulated from 334 logging companies, whose staffs were enlarged by 5,832 workers to 22,726 at the date under review. This expansion was on a much smaller scale than in the early autumn of 1937, and was also less than average, in the experience of past years. The index, at 78·8 at October 1, 1938, was lower than at that date in any of the last four years. Camps in Quebec absorbed a large proportion of the men added to payrolls at October 1 of the present year, but there were also considerable increases in Ontario and British Columbia.

Mining

Coal Mining.—There was an important seasonal advance in coal-mines, in which the index of employment was less by 4·2 points than at October 1, 1937, when the gains over the September 1 payrolls had been more extensive. Returns were received from 106 operators employing 25,096 persons at October 1, 1938, as compared with 24,128 in their last report. The increase took place mainly in the Alberta coal-fields.

TABLE IV.—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (Average 1926=100)

Industries	[1]Relative Weight	Oct. 1 1938	Sept. 1 1938	Oct. 1 1937	Oct. 1 1936	Oct. 1 1935	Oct. 1 1934	Oct. 1 1933
Manufacturing	51·2	112·5[1]	113·8	121·7	109·0	103·3	94·4	86·7
Animal products—edible	2·3	134·4	140·7	143·7	129·0	124·6	113·9	109·2

Mining	6·6	160·8	157·4	163·9	147·9	129·5	117·9	105·8

[1] For explanation of term "Relative Weight", see footnote to Table III. [1] Revised index.

Metallic Ores.—Employment in this group showed continued improvement, 223 employers reporting 40,684 workers, or 595 more than at the beginning of September. Nova Scotia, Ontario, and British Columbia, registered most of the advance. Expansion had also been noted at the corresponding date last year; the index number was then some eight points lower.

Non-Metallic Minerals, other than Coal.—Little general change was reported in this group, in which statistics were received from 106 firms employing 8,625 persons, compared with 8,611 in the preceding month. Activity in these industries was decidedly less than at October 1, 1937, when a moderate increase had been recorded.

Communications

Communications showed a reduction from the last report, the companies and branches furnishing data indicating a staff of 23,300 employees, as compared with 23,581 at September 1. The index was some three points lower than at the same date in 1937, employment having then shown a smaller decline.

Transportation

Street and Electric Railways, Cartage and Storage.—A considerable increase was indicated in local transportation and storage, 724 persons being added to the forces of the 257 co-operating firms, who had 29,076 on their payrolls. Employment in this industry was in greater volume than at October 1 of last year; a smaller advance had then been shown.

Steam Railways.—Statistics were tabulated from 99 employers in the steam railway operation group, whose payrolls were enlarged from 60,650 at September 1, to 61,930 at the beginning of October. Most of the advance took place in Quebec and the Prairie Provinces. Curtailment in personnel had been indicated at the same date of last year, but the index, at 78·8, was then slightly higher than at the latest date, viz., 77·9.

Shipping and Stevedoring.—A falling-off was registered in the water transportation group, in which 123 companies employed 17,587 workers; this was a decrease of 393 from the preceding month. Improvement had been noted at October 1 of last year, when the index stood at 103·5, as compared with 96·1 at the beginning of October of the present year.

Construction and Maintenance

Building.—There was a further substantial increase in employment in building, 2,503 persons being added to the forces of the 861 co-operating contractors. They had 32,386 employees; this number was below that reported at the beginning of October of a year ago, although a smaller gain had then been indicated. Except in British Columbia, the trend was generally favourable at the date under review.

Highway.—Employment in this group advanced in Nova Scotia, Quebec, Ontario, Saskatchewan, and British Columbia; the additions to staffs in Quebec were the largest. Statements were tabulated from 430 employers throughout the Dominion, whose payrolls, standing at 110,263 were greater by 10,374 workers than at September 1. The number employed in the group exceeded that reported at October 1, 1937, when only a small increase had been noted.

Railway.—A falling-off in employment took place on railway construction work. The forces of the 35 companies and divisional superintendents furnishing returns declined from 30,476 at the beginning of September, to 29,249 at the date under review. A larger loss had been registered at October 1, 1937, but the general level of employment in this industry was then slightly higher.

Services

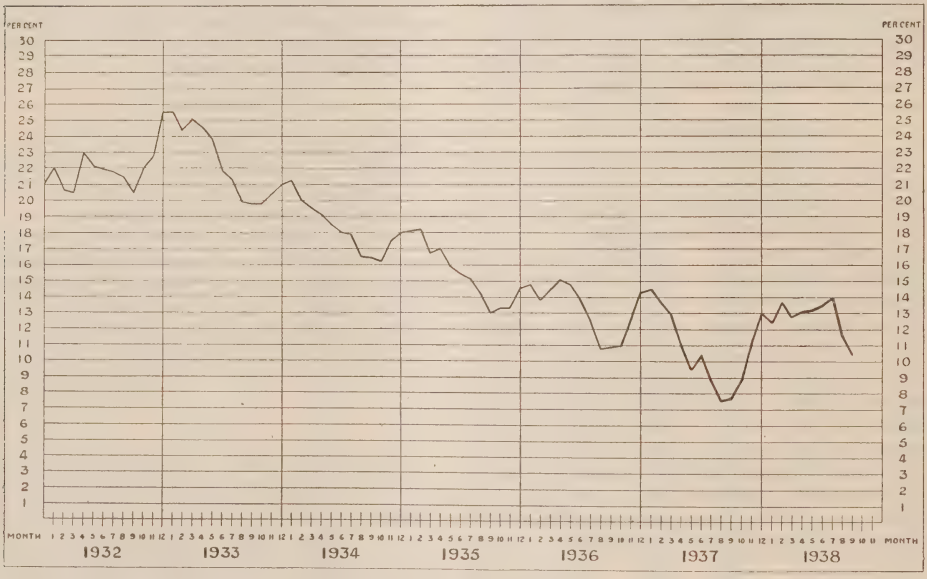
The closing of summer hotels caused a considerable contraction in employment, while laundries and dry-cleaning establishments were also slacker. The staffs of the 538 service firms whose returns were received, numbered 29,102 at October 1, as against 31,401 in the preceding month. The seasonal declines indicated at the same date last year had been on a somewhat similar scale; employment in the service division was then at about the same level as at the date under review.

Trade

Retail and wholesale trading establishments increased their personnel; 1,576 firms reported 116,110 employees, compared with 113,140 in the preceding month. This advance was larger than that recorded at October 1, 1937, and considerably exceeded the average gain noted at the beginning of October in the years, 1921-1937. The index at the date under review stood at 134·5, compared with 133·4 at October 1, 1937.

Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area, or industry, is of the total number of employees reported in Canada by the firms making returns at the date under review.



(2) Unemployment in Trade Unions at the Close of September, 1938

Unemployment as used in the following article has reference to involuntary idleness due to economic causes. Persons who are occupied at work outside their own trade or who are idle as a result of illness are not considered as unemployed. Unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Continued improvement in the local trade union situation was reflected at the close of September, the 1,860 labour organizations from which reports were received, involving an aggregate of 223,876 members, indicating that 23,203, or a percentage of 10·4, were idle, as compared with 11·6 per cent of inactivity in August. Some slackening off in available work, however, was evident from September, 1937, when the percentage of unemployment stood at 7·7. Alberta unions, due to substantial gains in coal mining activities during September, showed the greatest change in any of the provinces from August and employment advancement, on a small scale, was manifest by British Columbia, New Brunswick, Saskatchewan, Quebec and Ontario members. In Manitoba and Nova Scotia, however, there was a tendency toward lessened activity. Saskatchewan and Alberta unions alone showed an increased volume of employment during September over the corresponding month of last year, though the variations were not outstanding. Ontario members, on the contrary, suffered losses in work afforded of rather noteworthy degree, the iron and steel, and building and construction trades participating to quite an extent in this adverse movement. In New Brunswick, Manitoba, Quebec and Nova Scotia more moderate recessions were apparent, British Columbia unions showing but a nominal adverse trend.

Returns on unemployment for the largest city in each province, with the exception of Prince Edward Island, are tabulated separately each month. A more favourable situation obtained for Edmonton, Montreal, Toronto, Regina and Vancouver members during September than in the preceding month, though the gains noted were not particularly marked, Edmonton with an increase in activity of nearly 4 per cent showing the greatest advancement. Saint John, on the other hand, registered a 4 per cent drop in employment and Winnipeg and Halifax unions contractions of lesser proportions. When contrasted with the returns for September last year Montreal, Toronto and Saint John unions all showed a

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

considerable falling off in employment and in Vancouver fair sized recessions were noted. Winnipeg, Edmonton and Halifax unions also indicated some slowing up in activity. In Regina, however, there was a tendency toward increased employment.

From the chart which appears with this article and reflects the trend of unemployment among local trade union members by months from January, 1932, to date it will be seen that the curve during September continued in the downward trend of the preceding month, an evidence of more favourable conditions during the month reviewed. The curve, however, was maintained at a higher level than in September a year ago when employment was in greater prevalence.

Moderately increased activity was apparent in the manufacturing industries during September from the previous month, the 531 unions from which reports were received, with an aggregate membership of 81,452 persons, showing 11·8 per cent of inactivity, as compared with 14·0 per cent in August. The garment trades, due to seasonal activity, were a large factor in this advancement shown from August, though textile and carpet, leather and glass workers also registered substantial improvement in conditions. Gains of minor importance were recorded by meat cutters and butchers, paper makers, general labourers, bakers and confectioners and printing tradesmen. Wood workers, however, suffered pronounced employment recessions and activity for brewery workers showed moderate declines. Some employment cessation was indicated by cigar and tobacco, hat, cap and glove, jewelry, and iron and steel workers, and metal polishers. The percentage of idleness in the manufacturing industries, as a whole, was above that of September, 1937, when 7·9 per cent of unemployment was reported. In this comparison wood, textile and carpet, iron and steel and glass workers were much slacker during the period surveyed and noteworthy contractions were evident among metal polishers, and jewelry and brewery workers. The situation was also less favourable for bakers and confectioners, printing tradesmen, garment, hat, cap and glove, and leather workers. On the other hand, general labourers and fur workers were much better engaged and paper makers showed more moderate expansion. The trend was also upward for meat cutters and butchers, and cigar and tobacco workers, though the changes from September last year were small.

A higher level of employment was noted by coal miners during September than in either the previous month or September last year, according to the reports compiled from 55 local unions involving a membership of 22,904 persons. Of these, 1,255, or a percentage of 5·5, were out of work on the last day of the month, as compared with percentages of 9·8 in August and 7·1 in September, 1937. Alberta miners reflected appreciable betterment in the situation from August and accounted in large measure for the upward movement shown in the coal mining industry as a whole. In Nova Scotia employment advances of less than one per cent were reported. British Columbia

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

unions in the two months compared indicated that all their members were busy. Contrasted with the returns for September, 1937, conditions were more favourable in the western coal areas during the month reviewed, while in Nova Scotia the tendency was toward lessened employment, though the variations were merely nominal.

The building and construction trades, with 201 associations reporting at the end of September a total of 21,599 members, showed that 5,771, or a percentage of 26·7, were idle, as compared with 30·3 per cent of inactivity in August. The situation was more depressed than in September last year, when 19·2 per cent of the members reported were unemployed. Bridge and structural iron workers, whose membership was rather small and hence did not greatly affect the situation in the building trades as a whole, showed extensive gains in employment, while the improvement registered by carpenters and joiners, though not so great, viewed from a percentage basis still involved the largest number of members in any one group of trades. Employment advancement of lesser degree was evident among tile layers, lathers and roofers, hod carriers and building labourers, bricklayers, masons and plasterers, and plumbers and steamfitters. Fractional increases in activity were manifest by steam shovelmen and electric workers. Granite and stone cutters, however, were much slacker than in August and the trend for painters, decorators and paperhangers, while in an adverse direction, was so slight as to be almost negligible. When a comparison is made with the returns for September, 1937, much quieter conditions prevailed for steam shovelmen, carpenters and joiners, and plumbers and steamfitters during the month surveyed and the situation for tile layers, lathers and roofers, and hod carriers and building labourers was considerably less favourable. More moderate employment recessions were noted by bridge and structural iron workers and electrical workers. Bricklayers, masons and plasterers, and granite and stonecutters, however, registered gains of rather noteworthy proportions and somewhat heightened activity was reflected by painters, decorators and paperhangers.

Nominal contractions only in the volume of work accorded in the transportation industries were apparent during September from the preceding month, the percentage of idleness standing at 5·8 as contrasted with 5·5 per cent in August. The September percentage was based on the returns received from 825 local unions with a combined membership of 65,029 persons, 3,777 of whom were without employment on the last day of the month. That the trend of employment was less favourable than in August was due primarily to the quietness noted in navigation, though teamsters and chauffeurs also showed minor declines in activity. The steam railway division, which included nearly 79 per cent of the entire group membership reported, and street and electric railway employees indicated a slight rise in work afforded. In contrasting with the returns for September last year, when 4·6 per cent of inactivity was reported in the transportation industries, steam railway employees, navigation workers, and teamsters and chauffeurs all reflected a lowering in the employment volume during the month under review, while among street and electric railway employees the improvement noted was but fractional.

The 4 unions of retail shop clerks forwarding reports for September and covering a membership of 1,538 persons, indicated that all were at work at the close of the month, as in both the previous month and September, 1937.

Little variation in conditions was apparent among civic employees during September from both the previous month and September last year, as manifest by the reports compiled from 78 associations with 9,767 members. Of these, 107, or a percentage of 1·1, were out of work on the last day of the month, as compared with percentages of 0·4 in August and 0·9 in September, 1937.

A sharp increase in unemployment was noted in the miscellaneous group of trades during September from August, the 129 associations making returns, with a membership aggregate of 11,756 persons, showing that 15·2 per cent were out of work, in contrast with a percentage of 6·8 in August. Marked losses in employment were also manifest from September last year when 7·3 per cent of idleness was reported. Largely responsible for this adverse movement in September, both when compared with August returns and those of September, 1937, was the slackness shown among unclassified workers, though conditions were somewhat less favourable for theatre and stage employees, barbers, and stationary engineers and firemen. Hotel and restaurant employees, however, registered increased activity on a rather small scale in each comparison.

Fishermen reported moderate gains in work afforded during September from the preceding month and a decidedly better situation obtained than in September, 1937. This was evident from the reports furnished by 4 associations with a total of 796 members, 1·1 per cent of whom were unemployed on the last day of the month, in contrast with percentages of 5·0 in August and 16·2 in September a year ago.

Lumber workers and loggers, with 4 unions making returns at the close of September and including a membership of 2,075 persons, showed that 457 or a percentage of 22·0 were without work, as compared with a percentage of 23·3 in August. Unemployment, however, increased substantially from September, 1937, when only 2·2 per cent of inactivity was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937, inclusive, and also the percentages of unemployment by provinces for September of each year from 1919 to 1935, inclusive, and for each month from September, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.

(3) Employment Office Reports for September, 1938

The volume of business transacted by the officers of the Employment Service of Canada, as shown by the average daily placements effected during September, 1938, recorded a decline of nearly 4 per cent, both from the work of the previous month and also from that of the corresponding period a year ago. Under the first comparison, farming showed a heavy loss and construction and maintenance a smaller one, while moderate gains were reported in services, logging and transportation. Changes in manufacturing, mining and trade were minor only, those in the first two named groups being adverse. In comparison with September a year ago, logging was the division chiefly accountable for the decrease shown, although considerably fewer placements were registered in manufacturing, services and trade, as well as a very small decline in mining. On the contrary, farming and construction and maintenance recorded the most substantial gains, which, however, were not sufficient to counteract the above-mentioned losses. A moderate increase, also, was shown in transportation.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curves of vacancies and placements in relation to applications declined sharply throughout the month and at the close of the period under review reached levels from six to eight points below those recorded at the end of September a year ago. The ratio of vacancies to each 100 applications was 58·7 during the first half and 53·7 during the second half of September, 1938, in contrast with the ratios of 67·0 and 61·5 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 54·8 and 52·1, as compared with 62·1 and 57·9 during the corresponding month of 1937.

The average number of vacancies reported daily by employers to the officers of the Service throughout Canada during September, 1938, was 1,572, as compared with 1,631 during the preceding month and with 1,662 in September a year ago.

The average number of applications for employment received daily by the offices of the Service during the month under review was 2,779, in comparison with 2,541 in August, 1938, and with 2,591 in September last year.

The average number of placements made daily by the offices of the Service during September, 1938, was 1,495, of which 970 were in regular employment and 525 in work of one week's duration or less, as compared with a total daily average of 1,552 during the preceding month. Placements in September a year ago averaged 1,553 daily, consisting of 1,100 placements in regular and 453 in casual employment.

During the month of September, 1938, the offices of the Service referred 39,241 persons to vacancies and effected a total of 37,367 placements. Of these, placements in regular employment were 24,242, of which 18,859 were of men and 5,383 of women, while placements in casual work totalled 13,125. The number of vacancies reported by employers was 27,987 for men and 11,292 for women, a total of 39,279, while applications for work numbered 69,960, of which 52,157 were from men and 17,803 from women. Reports for August, 1938, showed 44,028 positions available, 68,590 applications made and 41,891 placements effected, while in September, 1937, there were recorded 41,540 vacancies, 64,763 applications for work and 38,816 placements in regular and casual employment.

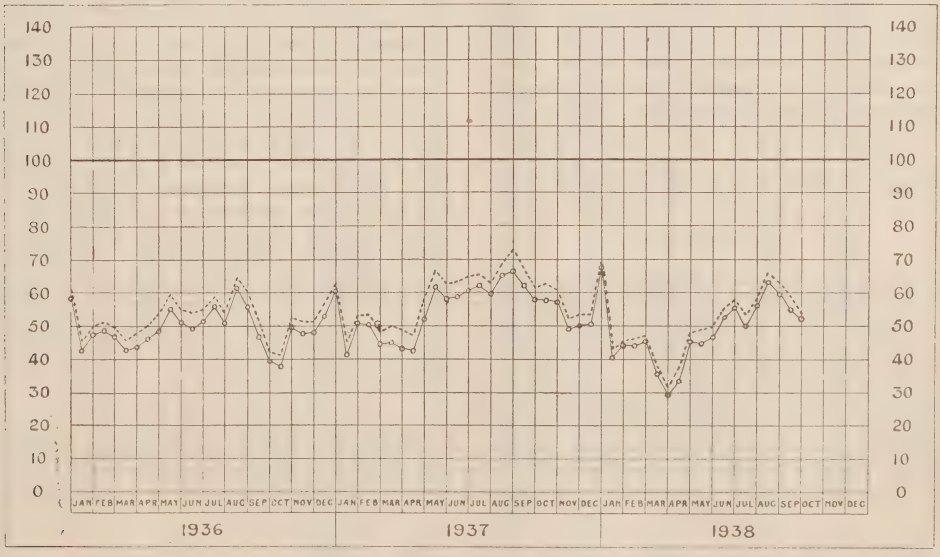
The following table gives the placements effected by the officers of the Employment Service of Canada, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Totals
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,632	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (9 months)	176,228	89,866	266,094

Nova Scotia

During September, employment offices in Nova Scotia received orders for nearly 14 per cent fewer workers than in the preceding month and over 6 per cent less than in the corresponding month of last year. There was a decrease also in placements of over 15 per cent when compared wtih August and of nearly 6 per cent in comparison with September, 1937. Decreased placements in logging and trade were responsible for the decline from September of last year, although a small loss was also reported in manufacturing. These reductions were partly offset by increases in farming, transportation and construction and maintenance. Industrial divisions in which most of the placements were effected during the month were farming 119; construction and maintenance 553 and services 463, of which 380 were of household workers. Regular placements numbered 480 of men and 145 of women.

New Brunswick



There was a decrease of 8 per cent in the number of positions offered through employment offices in New Brunswick during September, when compared with the preceding month, but an increase of nearly 36 per cent in comparison with the corresponding month of last year. Placements were nearly 9 per cent fewer than in August but nearly 33 per cent above September, 1937. The increase in placements over September of last year was due to a gain in the highway division of construction and maintenance. Small losses were reported in trade, manufacturing and transportation. Placements under construction and maintenance numbered 373 and in services 579. Of the latter 438 were of household workers. During the month 119 men and 84 women were placed in regular employment.

Quebec

The demand for workers, as indicated by orders received at employment offices in the Province of Quebec during September, was over 10 per cent greater than in the preceding month and nearly 14 per cent above the corresponding month of last year. There was an increase also in placements of nearly 16 per cent when compared with August and of over 14 per cent in comparison with September, 1937. A large increase in placements under construction and maintenance was partly offset by a decrease in logging. The only other industrial divisions in which there were changes of any importance from September of last year were transportation, with a gain and manufacturing with a loss. In addition, minor declines were reported in trade and farming. Placements by industrial divisions included manufacturing 86; logging 585; farming 88; transportation 350; construction and maintenance 3,846, and services 3,105, of which 2,814 were of household workers. There were 4,681 men and 2,070 women placed in regular employment.

ONTARIO

Orders received at employment offices in Ontario during September called for nearly 4 per cent fewer workers than in the preceding month and over 37 per cent less than during the corresponding month of last year. There was a decrease also in placements of over 4 per cent when compared with August and of nearly 34 per cent in comparison with September 1937. All industrial divisions participated in the decline in placements from September of last year, the most important reductions being in logging and construction and maintenance. There were fairly substantial losses in services and manufacturing and smaller declines in farming and transportation. Placements by industrial divisions included manufacturing 727; logging 478; farming 1,975; construction and maintenance 4,219; trade 329 and services 3,807, of which 2,586 were of household workers. During the month 4,841 men and 1,619 women were placed in regular employment.

MANITOBA

Positions offered through employment offices in Manitoba during September were nearly 60 per cent less than in the preceding month, but nearly 22 per cent above the corresponding month of last year. There was a decline in placements of nearly 60 per cent when compared with August, but a gain of nearly 11 per cent in comparison with September, 1937. There was an increase in placements under construction and maintenance and in services, when compared with September of last year, but declines in all other groups. The only losses of importance, however, were in logging and farming. Industrial divisions in which most of the placements were effected during the month were logging 134; farming 507; construction and maintenance 1,575 and services 886, of which 743 were of household workers. Placements in regular employment numbered 2,093 of men and 415 of women.

SASKATCHEWAN

There was a decline of over 46 per cent in the number of positions offered through employment offices in Saskatchewan during September, when compared with the preceding month, but a gain of nearly 6 per cent when compared with the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. A large increase in farming and a loss of somewhat smaller proportion in construction and maintenance were the only changes of importance by industrial divisions from September of last year. Small declines were reported in manufacturing, trade and logging. Industrial divisions in which most of the placements were effected during the month were farming 1,718; construction and maintenance 238, and services 616, of which 483 were of household workers. During the month 1,930 men and 329 women were placed in regular employment.

ALBERTA

Employment opportunities, as indicated by orders received at employment offices in Alberta during September, were nearly 72 per cent better than in the preceding month and nearly 82 per cent above the corresponding month of last year. Placements, also, were nearly 75 per cent higher than in August and nearly 83 per cent above September, 1937. The large gain over September of last year was due to an increase in farm placements, as small gains in services, manufacturing and trade were offset by declines in construction and maintenance and logging. Placements by industrial divisions included manufacturing, 86; farming, 3,691; construction and maintenance, 288, and services, 641, of which 518 were of household workers. There were 4,064 men and 390 women placed in regular employment.

BRITISH COLUMBIA

Opportunities for employment, as indicated by orders received at employment offices in British Columbia, were over 1 per cent better than in the preceding month and nearly 14 per cent above the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. When comparing placements by industrial divisions with September, 1937, there was a large increase in construction and maintenance and small gains in trade and mining. Services, however, showed a fairly substantial loss. There was a moderate decrease in farming and minor declines in manufacturing and transportation. Placements by industrial divisions included manufacturing, 60; logging, 89; farming, 132; construction and maintenance, 3,520, and services, 783, of which 566 were of household workers. During the month 651 men and 331 women were placed in regular employment.

Movement of Labour

During the month of September, 1938, the offices of the Employment Service of Canada effected 24,242 placements in regular employ-

*74 Placements effected by offices since closed.

ment, 11,854 of which were of persons for whom the employment found was outside the immediate vicinity of the offices at which they were registered. Of the latter, 470 were granted the Employment Service reduced transportation rate, 397 journeying to points within the same province as the despatching office, and 73 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4, is granted by the railway companies to bona fide applicants at the offices of the Employment Service who may desire to travel to distant employment for which no workers are available locally.

Workers benefiting by the Employment Service reduced rate in Quebec during September were 36 in number, all bushmen, who secured their certificates at the Hull office for transportation to Pembroke. By offices in Ontario during September, 362 persons were despatched to provincial centres. Granted certificates at Port Arthur, 55 bush workers, 37 airport construction employees, 9 cookees, 4 mine workers, 2 hotel employees and one lineman proceeded to various centres within the Port Arthur zone. For points within their respective zones the Fort William office transferred 119 bush workers, 4 construction employees and one grader man, and the Sudbury office, 71 bush workers. Destined to the Sudbury zone also were 3 labourers shipped from Toronto. The movement of labour in Ontario during September under the Dominion-Provincial Youth Training Plan comprised the transfer of 38 persons for student training courses in mining at Northern Ontario centres, 10 for home training courses and 8 for studies in art textile work at various points throughout the province. A number of offices assisted in the despatch of these students. In Manitoba during September 36 persons took advantage of the Employment Service reduced transportation rate, 4 of whom were destined to provincial situations and 32 outside the province. All of these received their certificates at the Winnipeg office. Within the province the transfers were to points in the Winnipeg zone and included one farm hand, 2 farm domestics and one sawmill labourer. Of the workers going to other provinces, 28 were bushmen, 2 mine cookees and one was a carpenter bound for centres in the Port Arthur zone, while one farm hand proceeded to Estevan. The labour movement in Saskatchewan during September was provincial and comprised the transfer of 2 farm hands, one of whom was sent from Moose Jaw, and one from Saskatoon to employment within the territory covered by their respective city offices. Reduced rate certificates were granted in Alberta during September to 34 persons, 29 of whom went to provincial centres and 5 outside the province. The latter were harvesters, bound for points in the Saskatoon zone. Within the province the Edmonton office transferred 20 highway construction workers, 2 oil refinery workers, 2 household workers, one engineer, one hotel employee and one cook to employment in its own zone, while the Calgary office shipped 2 bushmen to Lethbridge.

Of the 470 workers who profited by the Employment Service reduced transportation rate during September, 274 journeyed over the Canadian National Railways, 194 over the Canadian Pacific Railway and 2 over the Northern Alberta Railway.

In addition to the 2·5 cent rate referred to in the above, the special harvest transportation facilities afforded by the railway companies in the Prairie Provinces during the month of August and mentioned in the report for that month prevailed until the 15th of September in both Manitoba and Saskatchewan, although in Alberta since the last issue of the LABOUR GAZETTE went to press this harvest rate has been extended to the 15th of October. Under this arrangement the railway companies granted a special harvest rate of 1·5 cents per mile to all applicants upon presentation of certificates furnished by the offices of the Employment Service in Manitoba, Saskatchewan and Alberta, the movement being confined entirely to the localities within their respective provinces. During the first half of September, 28 persons in Manitoba and 50 in Saskatchewan travelled at this special harvest rate, while in Alberta the total of 329 workers represents the transfer of labour for the full month of September, making an aggregate in the three provinces of 407 persons. Of these, 184 were carried by the Canadian National Railways and 223 by the Canadian Pacific Railway.

(4) Building Permits Issued in Canada During September, 1938

The value of the building authorized in 58 cities during September was estimated at $5,278,381; this was a decrease of $535,949, or 9·2 per cent from the total of $5,814,330 reported in August, 1938, but an increase of $166,601, or 3·3 per cent in the more significant comparison with September of last year, when the permits granted represented building valued at $5,111,780.

The value of the building authorized in the first nine months of the present year was $43,104,172; this slightly exceeded the aggregate of $42,960,983 recorded in the period January-September, 1937, and was decidedly higher than in the first nine months in any other year since 1931. However, the cumulative total for the same period in each of these years has been very much lower than in earlier years for which data are available. The wholesale prices of building materials have recently been lower than in the same months of 1937, although they continue higher than in any of the years, 1931-1936.

Some 50 cities furnished detailed statistics for September, showing that they had issued about 470 permits for dwellings estimated to cost approximately $1,636,000, and more than 2,600 permits for other buildings valued at about $3,150,000. In addition, one city authorized engineering projects valued at $400,000. During August, permits were granted for the erection of about 500 dwellings and 2,100 other buildings, estimated to cost approximately $1,480,000 and $3,760,000, respectively.

Nova Scotia, Quebec, Saskatchewan, and Alberta reported increases in the value of the building authorized as compared with August, 1938, those of $615,566, or 48·2 per cent, in Quebec and $357,376, or 130·7 per cent, in Alberta being largest. The remaining provinces showed declines, of which that of $1,297,722, or 45·5 per cent, in Ontario was most pronounced.

As compared with September, 1937, there was improvement in Nova Scotia, Quebec, Saskatchewan, Alberta, and British Columbia. The greatest gain, of $700,503, or 58·7 per cent, was reported in Quebec.

Of the larger cities, Montreal and Winnipeg showed higher totals of authorized building than in either August, 1938, or September, 1937. In Vancouver, there was a decline in the first comparison, but an increase over September of last year, while the Toronto aggregate was lower than in either month used for comparative purposes. Of the other centres, Sydney, Quebec, Three Rivers, Westmount, Belleville, Peterborough, St. Thomas, Woodstock, Brandon, Regina, Saskatoon, Calgary, Kamloops, and North Vancouver recorded increases over August, 1938, and September, 1937.

The following table gives the value of the building authorized by 58 cities during September, and in the first nine months of each year since 1920, as well as index numbers for the latter, based upon the total for the corresponding period of 1926 as 100. The average index numbers of wholesale prices of building materials in the period, January-September, of the years since 1920 are also given (average 1926=100).

Year	Value of permits issued in September	Value of permits issued in first nine months	Indexes of value of permits issued in first nine months (1926=100)	Average indexes of wholesale prices of building materials in first nine months (Average 1926=100)

The aggregate for the first nine months of this year was very slightly higher than in 1937, and substantially exceeded that for the same period in any of the preceding five years. The average index number of wholesale prices of building materials, though lower than in 1937, was rather higher than in preceding years since 1930.

The following table gives the value of the building permits issued by 58 cities during August and September, 1938, and September, 1937. The 35 cities for which data are available since 1910 are marked thus "*".

ESTIMATED VALUE OF CONSTRUCTION WORK AS INDICATED BY BUILDING PERMITS ISSUED BY 58 CITIES.

EMPLOYMENT CONDITIONS IN CANADA AT END OF OCTOBER, 1938

Reports of the Superintendents of the Employment Service

THE employment situation at the end of October was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritimes were busy ploughing and gathering and marketing their field produce. Pulpwood was being cut, but otherwise very little logging was in progress. Stormy weather again hampered shore fishing. Sardines were scarce with prices high, but cod, haddock and halibut were plentiful. Coal mines in the New Glasgow area operated from two to six days per week, while those in Capt Breton and vicinity worked from three to six days. Manufacturing remained rather quiet, with the exception of wood-working industries and confectionery and food plants, which were busy preparing for the Christmas trade. Some idleness was also reported in the iron and steel industry. Repairs and alterations continued to provide considerable work for carpenters and labourers, and relief projects, including highway construction, were progressing favourably. Transportation by rail, motor and water was somewhat lighter than in recent weeks, but remained fairly heavy for the time of year. Trade, both wholesale and retail, was fair. Requests were received for domestics and charworkers and placements were made.

Farming in the Province of Quebec showed a decline and lumbering recorded little improvement, as the number of contracts listed was fewer than at this time last year. Active mines were operating normally at Rouyn, but the only workers hired were for replacements. Manufacturing concerns reported as follows: Bagotville, La Tuque and Matane—industries busy; Chicoutimi—aluminium, boot and shoe plants operating at full capacity, but some other concerns below normal; Montreal—rubber slack and textiles not up to last year's high level; Quebec—fair volume of activity;

Sherbrooke—silk and woollen mills steady, but fewer workers employed in cotton factories; Three Rivers—paper mills somewhat improved and other industries working satisfactorily; Val d'Or—staff reductions reported in sash and door and cement plants. Building was fairly brisk and relief projects including road and dam construction, provided employment for a large body of workers. Trade was normal. In domestic service many vacancies were listed and placements effected.

There was a decided decrease in the number of farm orders received in Ontario, with a surplus of good applicants available, although some casual work had been supplied to men husking corn, loading sugar beets, and so forth. No demand existed for loggers, for all vacancies available were readily filled by men who applied on the premises, thus leaving many bushmen from outer points unemployed. At North Bay, twenty camps were operating, as compared with over thirty in the corresponding period last year, but the total number of employees bore a much smaller ratio to the number of camps involved. At Sault Ste. Marie, the district faced the prospect of one of the smallest timber cuts in recent years, as companies had over-cut their needs last season and yards were overstocked with timber. Mining was quiet. Industrial concerns reported business steady and in some lines, particularly in motor factories, increased production, though gradual, was noted. Building continued active, due largely to the assistance given to smaller home owners through the Dominion-Provincial Home Improvement Plan. Highway and harbour construction also was well under way, though there was a continued reduction in the groups of men employed on road work, as various sections were completed. At Fort William, new grain arrived faster than it was shipped out, over 3,000 cars being on hand to be unloaded. Other ports, likewise, reported a heavy movement of freight and at Fort Erie and Niagara Falls increased railway business continued to absorb a number of former employees. There was the usual demand for experienced household help, but wages offered were not always attractive and other applicants were not sufficiently trained to suit employers. A few openings also were listed in industrial plants for extra hands for rush orders. These were easily filled, but office and sales vacancies were still scarce.

Farm placements in the Prairie Provinces were gaining momentum under the Farm Bonus Plan. An open season had made it possible for much fall work to be done and had been especially beneficial to beet farmers. Logging and mining were fair, but would show no great improvement until the weather was colder. At Drumheller strikes had rendered the mining situation somewhat chaotic. Lack of markets sufficient to absorb present production of the oil wells had had an adverse effect on that industry, with the result that there had been a slight increase in unemployment in the Turner Valley district. It was hoped, however, that this would be offset by a slight increase in wildcat wells at various points. Manufacturing was unchanged, with no demand for additional help. Permits in building construction dropped sharply, indicating a closing down of new projects for the season, but those under way were progressing favourably. Highway and other relief schemes also absorbed numerous workers. Trade was fair. All city orders for domestic service were readily taken care of, but those from the country, under the Farm Bonus Plan, were somewhat more difficult to fill.

With the completion of harvesting in British Columbia and the approach of winter, the demand for farm help, other than that for good milkers, was greatly curtailed. Apple picking was nearly completed, and packing houses had laid off some female employees. Where mines were in operation, few calls were reported for additional help. Logging remained unchanged and saw and shingle mills also were running only at partial capacity. Seiners engaged in chum salmon fishing were doing fairly well. Building trades were quite active, although general construction appeared to be slacker. Relief projects continued, but were gradually being completed. Dry docks and shipyards were quiet at Prince Rupert and Victoria. Waterfronts at New Westminster and Victoria were fairly busy, but at Prince Rupert work was slacker, as the fishing season was about over. Alaska transhipments of fish, however, kept up fairly well and gave some extra employment to longshoremen. The Women's Division was quiet, very few orders coming in, other than those for domestic service.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD JULY TO SEPTEMBER, 1938

The business of the offices of the Employment Service of Canada during the third quarter of 1938 showed a decline from that transacted during the corresponding quarter last year, as there was a decrease of over 5 per cent in vacancies listed and of nearly 4 per cent in placements effected in regular and casual employment. A substantial gain was shown in farming, most of which was recorded in the Prairie Provinces, but the increase in this group was more than offset by marked declines in logging, construction and main-

tenance, manufacturing and services, of which that in logging was by far the heaviest. Smaller decreases also were reported in mining and trade, and a nominal gain in transportation. Provincially, Quebec, the Prairie Provinces and British Columbia recorded gains in vacancies and placements and Nova Scotia and Ontario declines under both of these divisions, while New Brunswick registered a minor decrease in opportunities offered, with a correspondingly small gain in placements reported. The highest loss shown by any particular province was in Ontario, the major part of which was in logging. Alberta, Quebec and Manitoba registered the largest gains.

From the chart on page 1265 which accompanies the article on the work of the Employment Service offices for the month of Septem-

66620—6½

ber, it will be noted that the trend of the curves of vacancies and placements in relation to applications was downward during the first half of July, followed by an upward course during the latter part of that month and the first of August, when it again pursued a downward trend until the end of the quarter. At the close of the period under review the levels attained were from six to eight points below those recorded at the end of September a year ago.

During the period July to September, 1937, there was an average of 66·2 vacancies and 62·0 placements for each 100 applications for employment, as compared with 58·7 vacancies and 56·0 placements for each 100 applications during the period under review.

The average number of positions offered daily during the current quarter was 1,514, of applicants registered 2,579, and of placements effected 1,444, in contrast with the daily average of 1,597 vacancies, 2,413 applications and 1,496 placements in regular and casual employment during the corresponding quarter of 1937.

During the three months, July to September, 1938, the offices reported that they had made 115,312 references of persons to positions and effected a total of 111,125 placements, of which 73,908 were in regular employment and 37,217 in casual work. Of the placements in regular employment, 58,892 were of men and 15,016 of women, while casual work was found for 26,061 men and 11,156 women. Comparison with the corresponding period of 1937 showed that 115,150 placements were then made, of which 84,238 were in regular and 30,912 in casual work. Applications for employment during the period under review were received from 150,954 men and 47,583 women, a total of 198,537, in contrast with a registration of 185,731 persons during the same period of 1937. Employers notified the Service during the quarter, July to September, 1938, of 116,553 vacancies, of which 85,406 were for men and 31,147 for women, as compared with 122,968 opportunities for work during the corresponding period a year ago.

In another section of this issue will be found a report in detail of the transactions of the employment offices for the month of September, 1938.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, October, 1938, summarized the employment situation as follows:—

Employment at September 12 showed a decline as compared with August 15. There was a decline in employment in building, the distributive trades, hotel and boarding house service, the cotton industry, iron and steel manufacture, certain branches of engineering, the fishing industry, food manufacture, and the port transport industry. On the other hand, employment improved in the wool textile, carpet, hosiery, pottery, boot and shoe and clothing industries, and in coal mining.

It is estimated that at September 12, 1938, the number of insured persons, aged 16-64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,380,000. This was 22,000 less than at August 15, 1938, and 326,000 less than at September 13, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at September 12, 1938, was 13·2 compared with 13·0 at August 15, 1938, and 9·7 at September 13, 1937. For persons aged 16-64 insured under the agricultural scheme the percentage was 4·2 at September 12, 1938, as compared with 4·3 at August 15, 1938, and 3·1 at September 13, 1937. For both schemes combined the percentage unemployed at September 12, 1938, was 12·8 as compared with 12·6 at August 15, 1938, and 9·4 for September 13, 1937.

At September 12, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,324,151 wholly unemployed, 412,494 temporarily stopped, and 61,973 normally in casual employment, making a total of 1,798,618; this was 39,376 more than at August 15, 1938, and 459,414 more than at September 13, 1937.

The total of 1,798,618 persons on the registers in Great Britain at September 12, 1938, included 1,042,115 persons with claims admitted for insurance benefit, 531,677 with applications authorized for unemployment allowances, 54,656 persons with applications for insurance benefit or unemployment allowances under consideration, and 170,170 other persons, of whom 49,881 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at September 12, 1938, was 1,880,575 as compared with 1,843,272 at

August 15, 1938, and 1,403,506 for September 13, 1937.

United States

In an official press release issued on October 27, Secretary of Labor, Miss Frances Perkins announced that there was a marked increase in employment during September, approximately 440,000 persons being re-employed in all non-agricultural occupations between August and September, in addition to nearly 200,000 who had returned to work between June and August.

The following paragraphs are taken from the official press release:—

For the entire period from June to September over 640,000 men and women were re-employed. This figure does not take account of casual workers and others employed in harvesting crops, including approximately 120,000 cannery workers who are not part of the normal labour supply. The inclusion of these workers would add substantially to the total number of persons re-employed by private industry and by regular governmental agencies.

Most of the employment gain in September was in manufacturing, although retail and wholesale stores, railroads, mines, and certain other lines of industry also took on more employees. Employment of manufacturing wage earners increased by 250,000, an increase of 3·7 per cent, which is much greater than the usual seasonal gain of slightly over 1 per cent. Factory pay-rolls also increased by 5 per cent, or $7,500,000 a week, although there has ordinarily been a gain of about 1 per cent between August and September.

Seventy-three of the 87 manufacturing industries reported employment gains between August and September, and 69 reported larger pay-rolls.

Employment in the durable goods group rose 5·0 per cent. Thirty-seven of the 43 industries surveyed reported employment gains. Activity in automobile plants preparatory to the introduction of new models, was reflected in a rise of 33 per cent in employment. In iron and steel manufacturing employment showed a further small gain of 1 per cent, and pay-rolls increased 4 per cent. Other durable goods industries of major importance in which employment was larger in September than in August include electrical machinery, furniture, shipbuilding, lumber, and foundries and machine shops.

Employment in the industries manufacturing non-durable goods increased by 2·8 per cent during the month. The usual large seasonal employment gains were reported in the canning, cottonseed oil, and beet sugar industries, and in the manufacture of confectionery, fertilizers and millinery. There were also substantial additions to the personnel in clothing, silk and rayon goods, and cotton textile factories.

The employment gain of 5·9 per cent in retail trade was larger than seasonal and indicated the hiring of 184,000 workers since August. Among the more important lines of retail trade which added employees to their rolls were apparel and general merchandising stores, firms dealing in furniture, lumber and building materials, and food. Wholesale firms again reported a small increase of about 12,800 workers, affecting almost all lines of trade. The largest increases were reported by dealers in farm products, assemblers and country buyers, and firms selling metals, dry goods and apparel, paper goods, and plumbing and heating supplies.

Anthracite mines increased their forces by 23·4 per cent from the exceptionally low level of the previous month, adding about 12,600 workers. Bituminous coal mines had 16,100, or 4·3 per cent more men on their rolls in September than in August. Metal mines reported the first employment gain (of 10·3 per cent) since September, 1937, in response to increased demand and rising prices.

A preliminary report of the Interstate Commerce Commission indicated a gain of 2·4 per cent, or more than 22,000, in the number of employees on Class I railroads.

Changes in employment in other lines of industry were largely seasonal in character, with the exception of slight declines in building and certain of the utilities.

Factory employment and pay-rolls continued to rise in September, employment increasing 3·7 per cent and pay-rolls 5·1 per cent. While employment normally increases from mid-August to mid-September, the current gains are more pronounced than the usual seasonal increase of 1·2 per cent in employment and 1 per cent in pay-rolls. Comparisons of employment and pay-rolls in September, 1938, with September, 1937, show losses of 18·4 per cent and 22·7 per cent, respectively.

The gains in factory employment and pay-rolls were widespread, 73 of the 87 manufacturing industries surveyed showing employment gains and 69 reporting increased pay-rolls.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

As respects contracts for buildings and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours or contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract

for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

Note: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

Department of Agriculture

Construction of a piggery at Waterloo, Ont. Name of contractors, Dunker Construction Ltd., Kitchener, Ont. Date of contract, October 29, 1938. Amount of contract, $10,700. A fair wages schedule was included in the contract as follows:—

	Per hour
Asphalt rakers and finishers	$0 55
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and Concrete Mixer Operator:	
Steam	0 65
Gasoline or electric	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Electricians (inside wiremen)	0 70
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Painters (spray)	0 70
Painters and glaziers	0 60
Plumbers and steamfitters	0 75
Roofers, composition	0 50
Roofers, felt and gravel—patent	0 45
Sheet metal workers	0 70
Pipelayers, caulkers and solderers	0 50
Tractor operators	0 50
Watchman	0 35
Road grader operator:	
Horsedrawn	0 45
Including team	0 80
Gasoline	0 50

Department of National Defence

Construction of a road from the railway siding to the Magazine at Kamloops, B.C. Name of contractors, Mannix & Davidson, Vancouver, B.C. Date of contract, October 24, 1938. Amount of contract, $6,578.25. A fair

wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Dragline operators	1 12½
Dragline firemen	0 74½
Dragline oilers	0 60
Driver, team and wagon	0 75
Drivers	0 40
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Road grader operator:	
Horse drawn	0 45
Including team	0 80
Gasoline	0 50
Steam shovel engineer	1 12½
Steam shovel cranemen	0 90
Steam shovel firemen	0 74½
Tractor operators—gasoline	0 55
Driver, team and scraper	0 75
Driver, team and plow	0 75
Watchman	0 40

Construction of a sports field at Wellington Barracks, Halifax, N.S. Name of contractors, Standard Paving Maritime Ltd., Halifax, N.S. Date of contract, October 17, 1938. Amount of contract, $8,704. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters and joiners	$0 65
Cement finishers	0 60
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Pipe layers, caulkers and solderers	0 50
Plumbers and steamfitters	0 85
Road grader operators (horse drawn)	0 45
Road grader operators (including team)	0 80
Road grader operators (gasoline)	0 50
Steam shovel engineers	0 85
Steam shovel cranemen	0 65
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Shovel operators (gasoline)	0 85
Tractor operators	0 50
Watchman	0 35

Construction of a new rifle range at St. Bruno, P.Q. Name of contractors, T. C. Gorman Construction Co., Ltd., Montreal, P.Q. Date of contract, October 3, 1938. Amount of contract, $22,680. A fair wages schedule was included in the contract as follows:—

	Per hour
Axemen	$0 45
Blacksmiths	0 60
Blacksmiths' helpers	0 45
Carpenters	0 70
Cement and concrete mixer operators:	
Steam	0 65
Gasoline or electric	0 50
Cement finisher	0 60
Compressor operators (gasoline or electric)	0 50
Driver	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Electricians (inside wiremen)	0 75
Engineers, operating, steam:	
Single or double drum	0 65
Three or more drums	0 75
Firemen, stationary	0 50
Hoist operators (gas. or electric)	0 60
Labourers	0 40
Machinists	0 65
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Ornamental iron workers	0 66
Painters and glaziers	0 66
Rodmen, reinforced steel	0 50
Sheet metal workers	0 70
Shovel operators—gasoline	0 85
Steam shovel cranemen	0 65
Steam shovel engineers	0 85
Steam shovel firemen	0 55
Steam shovel oilers	0 50
Tractor operators	0 50
Team and scraper—including driver	0 75
Team and plow—including driver	0 75
Watchman	0 35

Construction of a heating trench from the Power House to Barrack Block No. 1, Royal Canadian Air Force Station, Dartmouth, N.S. Name of contractors, Bianco Bros., Halifax, N.S. Date of contract, October, 22, 1938. Amount of contract, $2,762.90. A fair wages schedule was included in the contract as follows:—

	Per hour
Carpenters	$0 65
Cement finishers	0 75
Cement and concrete mixer operators: (gasoline or electric)	0 50
Labourers	0 40
Motor truck drivers	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Plumbers and steamfitters	0 85
Rodmen—reinforced steel	0 50

Construction of married officers' quarters at Vimy Barracks, Barriefield, Ont. Name of contractors, Frontenac Construction Co., Ltd., Toronto, Ont. Date of contract, October 4, 1938. Amount of contract, $11,915. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 70
Blacksmiths	0 65
Blacksmiths' helpers	0 45
Brick and hollow tile layers	0 95
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters	0 80
Cement finishers	0 95
Cement and concrete mixer operator:	
Steam	0 65
Gasoline or electric	0 50
Compressor operator—gasoline or electric	0 50
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Drivers	0 40
Engineers on steel erection	0 80
Engineer, operating steam—	
Single or double drums	0 65
Three or more drums	0 75
Electricians (inside wiremen)	0 75
Firemen—stationary	.0 45
Hoist operator—gasoline or electric	0 50
Labourers	0 40
Lathers, metal	0 70
Lathers, wood	0 70
Machinists	0 70
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
4 tons	2 45
5 tons	2 95
Ornamental iron workers	0 60
Painters and glaziers	0 70
Plasterers	0 95
Plasterers' helpers (mixing and tempering material)	0 45
Plumbers and steamfitters	0 80
Plumbers' and steamfitters' helpers (all men assigned to help tradesmen)	0 45
Roofers, felt and gravel	0 45
Rodmen, reinforced steel	0 50
Sheet metal workers	0 75
Shovel operators—gasoline	0 90
Steam shovel engineers	0 90
Steam shovel cranemen	0 70
Steam shovel firemen	0 55
Stonecutters	0 95
Structural steel workers	0 80
Tile setters—ornamental	0 95
Tile setters' helpers (all men assigned to help tradesmen)	0 45
Welders on steel erection	0 80
Watchman	0 35

Construction of five magazine buildings, boiler house and Caretaker's quarters at the Royal Canadian Air Force Aerodrome, Truro, N.S. Name of contractors, Fundy Construction Co., Ltd., Halifax, N.S. Date of contract, October 7, 1938. Amount of contract, $39,994. A fair wages schedule was included in the contract as follows:—

	Per hour
Asbestos insulation workers	$0 55
Blacksmiths	0 55
Blacksmiths' helpers	0 40
Brick and hollow tile layers	0 75
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 40
Carpenters	0 55
Cement finishers	0 50
Cement and concrete mixer operator:	
Steam	0 60
Gasoline or electric	0 45

Riveter's helpers	0 40
Apprentices to fitters, machinists, and sheet metal workers only—(16 to 21 years of age)—	
1st year	0 20
2nd year	0 25
3rd year	0 35

NOTE.—Only one helper to be employed to each journeyman.

No more than one apprentice to be employed to each five journeymen.

The complete overhaul of Jaguar airplane engine. Name of contractors, Ottawa Car Manufacturing Co., Ltd., Ottawa, Ont. Date of contract, October 4, 1938. Amount of contract, $2,110.96. The preceding fair wages schedule was also included in this contract.

The complete overhaul of Wright airplane engine. Name of contractors, Canadian Wright Ltd., Montreal, P.Q. Date of contract, October 27, 1938. Amount of contract, $1,228.86. The preceding fair wages schedule was also included in this contract.

Transient Problem in U.S.A.

After six years of focusing nation-wide attention on the needs of homeless and non-resident persons and families, the Committee on Care of Transient and Homeless, appointed by the National Social Work Council, has announced the formation of a new organization which will concern itself with problems arising from migration within the United States. Its Executive Committee, headed by Dr. Ellen C. Potter, has been incorporated under the laws of New York State as the Council on Interstate Migration and selections for membership in the Council are now being made.

The Council on Interstate Migration is not so much a new organization as it is a successor to the Committee as a method of making more effective the work of existing agencies. The Council will adopt and expand the work of the Committee on Care of Transient and Homeless, making those functions more efficient by securing greater participation on the part of other agencies and groups, national, state, and local.

The objects of the Council, as set forth in its Certificate of Incorporation, are as follows:

1. To encourage the study of social problems arising from and connected with migration within the United States.

2. To serve as a clearing house for information among national, state, and local agencies, groups, and individuals, interested in such problems.

3. To facilitate joint planning and conference among governmental and non-governmental groups concerned with such problems.

4. To make such studies as may be necessary to carry out these purposes.

It is hoped that by the Council method, a co-ordination among the various private agencies concerned with migration problems can be established which will complement the co-ordination now being worked for among the federal agencies by the Technical Sub-Committee on Migration Problems recently appointed by the Interdepartmental Committee to Co-ordinate Health and Welfare Activities. The federal group, which now has representation from the Social Security Board, Works Progress Administration, Children's Bureau, Public Health Service, Bureau of Labor Statistics, Office of Education, Employment Service, and Farm Security Administration, is studying the various migration problems which concern federal agencies.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the Labour Gazette from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers but schedules of rates and wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Vegetable Foods, etc.

Montreal, P.Q.—Certain Bakeries (Hebrew) and the Bakery and Confectionery Workers' International Union, Local 115.

Agreement to be in effect from May 1, 1938, to May 1, 1939.

Only union members to be employed. Union representatives may visit the bakers. Bakeries to use the union label.

Hours: 8½ per day, 6 days per week.

Overtime at regular rate. Hebrew holidays to be paid for by the employer.

Minimum wages per week: first hand $40, second hand $37, third hand $34.

Hamilton, Ontario.—Two Bakeries and the Bakery and Confectionery Workers' International Union, Local No. 72.

Agreement to be in effect from May 1, 1938, to April 30, 1939.

Only union members to be employed. The business agent of the union may visit the bakeries. The Company to buy union labels from the union.

Hours: 8 per day, 48 per week. All civic and statutory holidays to be paid for.

Overtime: time and one-half, 90 cents per hour for journeymen, 60 cents for helpers and 45 cents for wrappers.

Wages per week: journeymen bakers $30, helpers $15 to $25, wrappers $15. Jobbers to be paid 60 cents per hour, and 90 cents for overtime.

Vacation: one week's vacation with pay for employees with one year's service.

Apprentices to serve three years and an additional year as improvers.

Wages for apprentices: from $10 to $20 per week, $25 for improvers.

Manufacturing: Tobacco and Liquors

Ottawa.—A Certain Brewery and the International Union of United Brewery, Flour, Cereal and Soft Drink Workers, Local No. 365.

Agreement to be in effect from June 1, 1938, to May 31, 1939, and thereafter from year to year subject to notice.

(N.B.—All breweries in Ontario are governed by a schedule in effect under the Industrial Standards Act as noted in the Labour Gazette, July, 1935, page 633 and September, 1936, page 838.)

Only union members to be employed if available. If another capable man is employed he must join the union.

Hours: for inside men, 9 per day, 5 on Saturdays, a 50-hour week from June 1 to September 30, and 8 per day, 4 on Saturdays, a 44-hour week from October 1 to May 31; drivers and helpers on city delivery 8 per day, 48 per week; drivers on transport work, 9 per day, 54 per week from April 1 to September 30 and 8 per day, 48 per week from October 1 to March 31. Watchman, engineers and firemen do not come under the 44-hour week.

Overtime: time and one-half. Work on Sundays and legal holidays, time and one-half.

Wages per week: coopers $30, truck drivers $26, fermenting room and cold storage, brew house, wash house (skilled labour), bottlers operating machines, shippers and receivers, $24.50; wash house (general labour), bottlers other than those operating machines, truck driver helpers, $22.50. Present higher rates are not to be reduced.

Vacation: drivers and helpers, shippers and receivers and men in retail department handling goods, to receive two weeks' vacation with pay during winter months; drivers and helpers employed less than one year to receive one week's vacation.

Drivers delivering half barrels and large loads to have helpers.

Disputes to be referred to a joint committee for their decision and no strike or lockout pending their decision.

Toronto, Ontario.—Certain Breweries and the International Union of United Brewery, Flour, Cereal and Soft Drink Workers, No. 304.

Agreement to be in effect from April 1, 1938, to April 1, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one summarized above for a brewery at Ottawa, with these exceptions:

Hours for inside workers to be 8 per day, 4 on Saturdays, a 44-hour week, throughout the year.

Wages per week: coopers $30, truck drivers $26, fermenting room and cold storage, brew house, wash house, bottlers operating machines, shippers and receivers, watchman, $25.50, bottlers other than those operating machines and truck drivers helpers, $23.50.

Hamilton, Ontario.—A Certain Brewery and the International Union of United Brewery, Flour, Cereal and Soft Drink Workers, Local 312.

Agreement to be in effect from April 1, 1938, to April 1, 1939, and thereafter from year to year subject to notice.

This agreement is similar to the one summarized above for breweries at Toronto, with this exception:

Wages for shipping and receiving department yardmen $26.50, kettlemen $33, fermenting room foreman $31.50.

London, Ontario.—A Certain Brewery and the National Beverage Workers' Union, Local No. 1.

Agreement to be in effect from April 1, 1938, to March 31, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to that summarized above for a brewery at Ottawa, with these exceptions:

Hours: employees other than engineers, watchmen, drivers and helpers and those engaged in process work, 8 per day, 5 on Saturdays, a 45-hour week; engineers and watchmen, a

48-hour week; brewing department, 45 per week with one day off in seven; drivers and helpers and other garage employees, 52 per week.

Overtime: for brewing department and for other employees except engineers, watchmen, drivers and helpers, overtime to be paid at the rate of time and one-half for all time over 9 in any day except Saturday and all time over five hours on Saturday.

Wages per week after one year's service: coopers $31, truck drivers $26, bottlers operating machines, watchmen (for week of six days of 12 hours), fermenting room and cold storage, $25.50; bottlers other than those operating machines and truck drivers' helpers $23.50. Wages per week during first year of service: $1 per week less than the above rates except for truck drivers who shall be paid the same rate of $26.

KITCHENER AND WATERLOO, ONTARIO.—CERTAIN BREWERIES AND THE INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS, No. 173.

Agreement to be in effect from May 1, 1938, to May 1, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one summarized above for a brewery at Ottawa, with these exceptions:

Hours: from June 1 to August 31, 9 per day, 5 on Saturdays, a 50-hour week; from September 1 to May 31, 8 per day, 5 on Saturdays, a 45-hour week; for drivers and helpers on city delivery 8 per day, a 48-hour week; for drivers on transport work, 9 per day, a 54-hour week, from April 1 to September 30, and 8 per day, a 48-hour week, from October 1 to March 31.

Wages are the same as at Ottawa except the class "wash house general labourers" is omitted and all wash house employees to receive $24.50.

WINDSOR, ONTARIO.—A CERTAIN BREWERY AND THE INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS, LOCAL No. 232.

Agreement to be in effect from May 3, 1938, to April 1, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one summarized above for a brewery at Ottawa, with these exceptions:

As the products of this company are transported by a transportation company, truck drivers are not included in this agreement.

Hours: from April 1 to September 30, 9 per day, 4 on Saturdays, a 49-hour week; from October 1 to March 31, 8 per day, 4 on Saturdays, a 44-hour week.

Wages per week: coopers $31; fermenting room and cold storage, kettlemen, wash house, watchmen (6 days of 12 hours), bottlers operating machines, $26.50; other bottlers, $24.50

FORT FRANCES, ONTARIO.—A CERTAIN BREWERY AND THE INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS, LOCAL 319.

Agreement to be in effect from July 1, 1937, to July 1, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, or in the busy season others with permit cards from the union may be employed. No discrimination against any man for his union activities. The union will furnish the union label when requested by the employer signing the agreement.

Hours of labour "shall be in accordance with the laws passed by the Dominion Government, with no reduction of wages." Eight out of nine consecutive hours with interruption of one hour for dinner, to be a day's work.

Overtime and work on Sundays and five legal holidays, time and one-half.

Wages per week: first cellar man and coopers, $31.70; first men in bottle shop and engineers, $29.70; truck drivers $27.50; all men in brewhouse (except first cellar men), bottlers operating machines, firemen and watchmen, $26.95; all permit card men and helpers $22.50. Employees receiving higher rates at time agreement came into effect not to be reduced while holding the same position.

Wages per week for apprentices: $22.50 first year and $24.50 second year.

Vacation: all drivers and their helpers who have worked one year with the company to be allowed two weeks' holidays with pay during winter months; those who have been employed six months, one week's holidays.

Disputes to be settled by a joint arbitration board including if necessary a disinterested fifth person, whose decision shall be binding on both parties.

VICTORIA, B.C.—A CERTAIN BREWERY AND THE INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS. LOCAL 280.

Agreement to be in effect from January 1, 1938, to December 31, 1938, and thereafter from year to year subject to notice.

Only union members or those who will join the union to be employed, except in busy seasons when others may be employed with permit cards from the union if no union members available. No discrimination against employees on account of union activity. The company to give preference to union made malt and all other union made materials. The company is entitled to the use of the union label.

Hours: for engineers and firemen, 8 per day, 6 days per week, a 48-hour week; for all other employees, 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half; work on Sundays and legal holidays, double time.

Minimum wages per week: brewhouse, cellarmen, washhouse, coopers and truck drivers, $31.50; bottlers, machine operators, packers, etc., $31; drivers' helpers, $30.50; extra and permit card help, $28; chief engineer, $150 per month, second and third engineer, $32 per week; first and second firemen $32, third and fourth firemen (without papers), $28.50. Employees receiving a higher wage at time agreement made not to be reduced.

The company may employ one apprentice for each fifteen union members regularly employed.

Wages for apprentices: $21 per week during first year and $23 during second year.

Vacation: engineers and firemen with one year's service with the company to be given two weeks' vacation with pay. All employees with three years' service to have one week's vacation with pay.

Manufacturing: Fur, Leather and Miscellaneous Animal Products

Toronto, Ontario.—Certain Manufacturers of Leather Goods (Handbags, Etc.) and the International Ladies' Handbag, Pocketbook and Novelty Workers' Union (Leather Workers).

An agreement was made, effective from July 15, 1937, to July 30, 1939, which renewed the previous agreement (Labour Gazette, May, 1936, page 458) and also stipulated the employees should receive increases in wages over their previous rates, with the additional provision that within one year the two parties should meet and draw up a schedule of wages and classifications. The supplementary agreement establishing this wage scale was made effective from August 15, 1938, to June 30, 1939.

Minimum wages per week: cutters, operators and framers—$27 for first class, $24 second class; third class cutters (employed exclusively on linings) $19.50; third class operators (employed exclusively on plain stitching on linings and pockets) and framers (employed exclusively on pockets) $16; scallopers (paper cutters) $27.50; shear cutting $19; bench workers—$18 for first class, $16 for second class; cementers and gluers $14; packers and examiners $16; skivers $19; turners (pouches and bags) $16; general helpers $12.50.

Manufacturing: Textiles, Clothing, Etc.

Cornwall, Ontario.—A Certain Cotton Textile Manufacturing Company and the Cotton Workers Federal Union, Local No. 2.

Agreement made following the strike reported in the Labour Gazette, April, page 380.

Agreement to be in effect from May 30, 1938. to March 31, 1939, and thereafter from year to year, subject to notice.

The company recognizes the union as the sole agency representing their membership in their Cornwall plant provided that the union be composed exclusively of the employees of the company's Cornwall mills and provided that the union be affiliated with no other labour organization but the Trades and Labour Congress of Canada. The company will co-operate with the union to assist in obtaining and retaining members. The union not to intimidate or coerce employees to join the union. New employees will only be engaged on condition that they join the union. Managers, superintendents, office employees, foremen, sub-foremen, members of the engineering department, watchman and all temporary employees are ineligible to join the union.

Hours to be in accordance with the regulations of the Industry and Labour Board of Ontario. Hours for tour workers to be in three shifts of 8 consecutive hours each, each shift to rotate in sequence weekly.

Wages: general changes in wages may be made only after 30 days' notice.

Seniority to be considered in making promotions and also when necessary to lay off employees.

There shall be a mill committee of employees for each mill and a general committee of employees of the three mills including the union president to meet representatives of the company and for the settlement of disputes. No strike or lockout to occur without 30 days' notice being given in writing.

Cornwall, Ontario.—An Artificial Silk Manufacturing Company and the United Textile Workers (Rayon Section), Federal Union Local No. 3.

Agreement to be in effect from September 10, 1938 to September 9, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, October, 1937, page 1153, with these exceptions:

The company agrees to the presence at any negotiations with the company of a national officer of the union when deemed necessary by the union. Shop stewards elected by union members are recognized as representing the members of the union in the department concerned.

No wage schedule or change in wage rates is mentioned in this agreement and the provisions as to helpers' wage rates and advancement is also omitted.

Vacation: paid vacations are now extended to employees with at least six months and less than one year's service who are given 3½ days vacation and such employees who work on the statutory holidays are given 5 days.

Toronto, Ontario.—Millinery Manufacturers' Association and the United Hatters, Cap and Millinery Workers International Union (Local 46).

Agreement to be in effect from March 1, 1937 to March 1, 1939.

Only union members to be employed, if available. Others employed must join the union. Any work sent outside the factory must be done at union shops. No discrimination against any employees on account of union activity.

The provisions as to hours, overtime and wages are entirely conditional on the existence of similar provisions in a similar agreement in Montreal. (Such an agreement for Montreal district is in effect as noted in the Labour Gazette, August, 1935, page 732, March, 1936, page 275 and June, 1937, page 695, except that by the April 15, 1937 amendment, overtime is permitted for one hour on any Friday.)

Hours: 8 per day from Monday to Friday, a 40 hour week.

Overtime permitted only during four to six weeks in the spring and four weeks in the fall and then limited to 2 hours per day from Monday to Friday, or 10 hours per week. Overtime to be paid at time and one-half. Employees to be given Good Friday and Labour Day with pay.

Minimum weekly wage rates after July 1, 1937: all round blockers $32; straw operators, blockers, fabric operators and cutters $29, drapers $20, trimmers $15. All of these classes to be paid by the week. Wages for workers in these classes who are not skilled may be at a less rate to be decided between the employer and the union but at no time may the number of such lower paid workers be more than 25 per cent of the workers.

So far as possible there will be equal distribution of work.

A shop committee to be elected in each establishment to deal with the employer about any grievances. If the matter cannot be settled in this way it will be taken up by the union representative with the employer. Any dispute which cannot be settled between the parties will be referred to a joint board.

Guelph, Ontario.—A Certain Hat Manufacturing Company and their Employees, Members of the United Hatters, Cap and Millinery Workers' International Union, Local No. 82. (Hat Factory Workers.)

Agreement made following strike (reported in the Labour Gazette, August, page 887) to be in effect from July 27, 1938 to May 31, 1939. A conference to be held 60 days before expiry date to negotiate a renewal or an amended agreement.

No discrimination to be shown by the company against any employee on account of union activity. Neither the company nor the employees to intimidate employees either against or in favour of trade union membership.

Hours: with the exception of janitors, watchmen, firemen, maintenance men and such other employees not connected with direct production, to be 45 per week to be worked in either 5 or 5½ days of not more than 9 hours a day and not more than 5 hours on Saturday.

Overtime: on 15 working days between May 1 and October 31 and on 15 working days between November 1 and April 30, overtime not exceeding 3 hours on any day may be worked at regular wage rate. All other overtime for employees except those noted above (janitors, etc.) to be paid at time and one-third.

The wage schedule which forms part of this agreement was not received by the Department of Labour. In the case of any change in the method of manufacture or new product being introduced the rate to be decided between the management and the committee of employees.

All direct productive work to be divided as equally as possible among the workers.

A committee of employees to be formed to deal with the company in matters of wages, prices, etc. and to adjust complaints. No strike or lockout to occur. Any disputes which cannot be settled between the parties to be referred to a board of arbitration consisting of one representative of the company, one of the employees' committee and a third from the Ontario Department of Labour, the decision of which board will be final and binding.

Toronto, Ontario.—A Certain Hat Manufacturing Company and their Employees, Members of the United Hatters, Cap and Millinery Workers International Union, Local No. 86. (Hat Factory Workers.)

Agreement reached following strike reported in the Labour Gazette, September, page 977.

Agreement to be in effect from August 22, 1938 to June 15, 1939. A conference to be held 60 days before expiration date to negotiate a renewal or amended agreement.

The terms of this agreement are the same as those for hat factory workers at Guelph as summarized above. The wage scale forming part of this agreement was not received in the Department.

Toronto, Ontario.—Certain Manufacturers of Men's Work Clothing and the United Garment Workers of America, Toronto District Council.

Agreement to be in effect from April 1, 1938 to March 31, 1939.

Only union members to be employed, if available. Any others employed must have a union working card. No discrimination against any employee on account of union activity. The manufacturer will not give out any work to be done at any non-union label, contracting or home shop. No manufacturer will be granted the use of the union label unless under the same conditions and piece work rates of this agreement.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one-half; double time for work on Sundays and on six specified holidays. These overtime rates apply to piece workers as well as time workers.

Wages: all new prices to be agreed upon between the manufacturer and the committee, or if necessary with a union representative. Examining, inspecting, marking, folding and boxing if paid for on a week work basis to be paid at not less than the minimum scale for all week workers that is $13.20 per week.

In slack period, the available work in the shop to be divided as equally as possible among the employees.

Disputes to be settled between the manufacturer and the shop committee or shop steward.

Manufacturing: Pulp and Paper

Liverpool, N.S.—Mersey Paper Company Limited and the International Brotherhood of Paper Makers (Local 259), the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 141) and the International Brotherhood of Electrical Workers (Local 709).

Agreement to be in effect from May 1, 1938 to May 1, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the Labour Gazette, July, 1937, page 813, with certain exceptions:

Hours are fixed at 8 per day for both tour and day workers.

Overtime: time and one half for day workers (except boom men and wood room men) for all work over 8 per day; time and one half for work of boom men and wood room men for work over 10 hours in a day; time and one half for time worked by tour workers required to work overtime at other than tour work.

Boom haul-up and wood room men to receive a minimum of 6 hours per day.

The wage schedule forming part of this agreement was not received in the department, but increases in wages have been reported over the 1937 rates.

Temiskaming, Three Rivers and Gatineau, Quebec.—The International Paper Company, the International Fibre Board Limited and the Quebec Provincial Council of Paper Mill Unions, the International Brotherhood of Paper Makers and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Agreement to be in effect from May 1, 1938 to April 30, 1939, and thereafter from year to year, subject to notice. There will be no suspension or stoppage of work at any plant because of the termination of this agreement.

The company recognizes the above council and unions as the agencies representing the employees of the above plants.

If employees are to be promoted or laid off, the management will take into consideration first, ability anad second, length of service.

"If it is necessary to materially curtail operations in any plant, thus creating a social problem in the community, the management will, in addition to the above, give particular consideration in the case of employees with dependents, if capable and efficient as against employees without dependents."

The wage schedule forming part of this agreement was not received in the Department.

A mutual interest board to be formed to meet regularly. Any disputes which cannot be settled between the plant's adjustment committee and the superintendent will be referred to the president of the company and the international president of the union, and later if necessary to a joint arbitration board whose decision will be final and binding.

Three Rivers, Quebec.—Canadian International Paper Company and the Quebec Provincial Council of Paper Mill Unions and the International Brotherhood of Paper Makers, Local 163.

Agreement to be in effect from May 1, 1938 to April 30, 1939, and thereafter from year to year, subject to notice. No suspension or stoppage of work because of the termination of this agreement.

The terms of this agreement are similar to those of the agreement summarized above for employees of this company at Temiskaming, Three Rivers and Gatineau.

Cornwall, Ontario.—Howard Smith Paper Mills Limited and the International Brotherhood of Paper Makers, Local 212, The International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 338.

Agreement to be in effect from December 10, 1937, to January 1, 1939, and thereafter from year to year, subject to notice.

The Company recognizes these unions as representatives of their membership. The Company will co-operate with the unions to assist in obtaining and retaining union members. The unions not to intimidate nor coerce employees to join the unions. New employees to join the union, and those now members or those who will become so or be reinstated are expected to maintain their union membership.

In promotion, the management will consider first, merit, character and ability and second, length of service. In laying off men, length of service to be given more consideration than in the case of promotion.

Hours for all workers not to exceed 50 per week. The regular operation of the mills to be six days a week with 24 hours shutdown on Sunday. Hours for tour workers: 8 per day.

Overtime: for day workers, time and one-half. Day workers to be paid time and one-half for work during shutdown periods on Sundays and specified holidays and shall be expected to take one day off during the week. Except in the chlorine plant and boiler house (which operates 7 days per week) tour workers to be paid time and a half for time worked during shutdown periods on Sundays and holidays, and also for overtime work on other than tour work.

Wages: the wage rates and bonus system in force at the time the agreement was made were to remain in effect unless otherwise mutually agreed upon.

Provision is made for the settlement of disputes by union representatives and the management, and if they are unsuccessful by a joint arbitration board whose decision will be final and binding.

Merritton, Ontario.—Alliance Paper Mills Limited and The International Brotherhood of Pulp, Sulphite and Paper Mill Workers (Local 77).

Agreement to be in effect from May 1, 1938 to April 30, 1939, and thereafter from year to year subject to notice.

The Company recognizes the union as the sole collective bargaining agency for its employees. New employees to join the union.

In promotions and when laying off men, the oldest men in the service to be given preference.

Hours: 48 per week. Tour workers to work 8 hours per day, shifts to rotate in sequence weekly.

Overtime: time and one-half for overtime work by day workers; for tour workers, time and one-half for overtime work on other than tour work; work on Sundays and mill holidays by both day and tour workers to be paid at time and one-half.

Wages per hour for some classes of work at Lincoln mill—papermakers 49 to 78 cents, beater bosses 67 cents, helpers 49 cents, millwright 73 cents, helper 46 cents, general mill labour 49 cents, yard men 46 cents; at bag mill—bottomer operator 61 cents, experienced girls 35 cents, tuber 53 cents, printer and pressman 53 and 55 cents, experienced girls 35 cents, packer 54 cents; maintenance—machinists and electricians 73 cents, mechanics 83 cents, mechanics' helpers 51 cents; at Lybster mill—papermakers 49 to 92 cents, oiler 55 cents, cutterman 63 cents, rewinders 57 cents, embosser operator and trimmers operator 57 cents, general mill labour 46 cents; at sulphite mill—digester operators 70 and 75 cents, helpers 48 cents, acid operators 67 cents, wet room 47 to 51 cents, wood room chipperman 56 cents, pulpwood men 46 cents, boiler-room firemen 65 cents, helpers 56 cents.

Thorold, Ontario.—Provincial Paper Limited, Montrose Division, and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (No. 290).

Agreement to be in effect from May 16, 1937 to May 1, 1938, and thereafter from year to year, subject to notice.

The Company recognizes the union as the sole collective bargaining agency for its employees. Only union members or those who will join the union to be employed.

Hours: for tour workers, 48 per week; for day workers, 44 per week.

Overtime: time and one-half for overtime and for work on mill holidays.

Wages per hour: papermakers 48 to 90 cents; beater engineers 77 cents, helpers 48 and 53 cents; bleach, clay and size, 50 cents; calender room runners 66 cents, helpers 48 cents, embosser and rewinder runner 57 cents; cutterman 53 cents, finishers 62 cents, trimmers 64 cents, platers 65 to 70 cents, girls (sorters and plater girls) 36 and 38 cents, shipper 66 cents; old paper—baler men 48 cents, sorter girls 36 cents, cookerman 50 cents, helpers 48 cents, washermen 53 cents; steam plant firemen 66 cents, helper 60 cents; loading and unloading—year men 46 cents, truck driver 52 cents; repair and maintenance—machinist, 88 cents, electrician, carpenter, millwright and steamfitters 77 cents, oiler 58 cents, mechanic's helper 55 cents, painter 58 cents; labourers 46 cents.

Seniority to be considered in making promotions and reducing staff.

A dispute which cannot be settled between the management and the union committee will

be referred to the company president and the international president of the union, and if they are unsuccessful it will be referred to a joint arbitration board whose decision will be final and binding.

Construction: Buildings and Structures

OTTAWA, ONTARIO.—OTTAWA BRANCH OF THE CANADIAN CONSTRUCTION ASSOCIATION AND THE BRICKLAYERS, MASONS AND PLASTERERS INTERNATIONAL UNION, LOCAL NO. 7 (BRICKLAYERS AND MASONS).

Agreement to be in effect from May 27, 1938, to April 30, 1940, and from year to year subject to notice.

(The clauses of this agreement relating to hours, overtime and to the wage rate until April 30, 1939, were made binding under the Industrial Standards Act as noted in the article on this Act in this issue.)

The accredited representatives of the union to have access to all jobs to confer with the shop steward.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. When two or more shifts are worked, 8 hours' pay for 7 hours' work.

Overtime: from 5 p.m. to 10 p.m. on Monday to Friday inclusive and Saturday afternoon to 5 p.m., time and one-half; all other overtime including work on Sundays and five specified holidays, double time.

Minimum wage rate for journeymen bricklayers and stonemasons: 90 cents per hour from July 1, 1938, to April 30, 1939; $1 per hour from May 1, 1939, to April 30, 1940.

Union members to be strictly journeymen. Any member wishing to take contracts must withdraw from union membership and may not apply for membership for one year.

A joint industrial council consisting of five representatives of each party and an independent chairman to be set up for the settlement of any disputes, the decision of such board to be binding on both parties.

Transportation and Public Utilities: Telegraphs and Telephones

THE CANADIAN PRESS AND ALL CANADIAN PRESS TELEGRAPH EMPLOYEES

This agreement, which was negotiated before a Board of Conciliation and Investigation (LABOUR GAZETTE, July, page 724 and this issue page 1202), is in effect from August 1, 1938, to July 1, 1940, and thereafter from year to year subject to notice.

The telegraphers may hold membership in the trade union of their choice without discrimination by the company, with the exception of 11 traffic chiefs appointed by the company who will have executive authority over the telegraphers and on appointment these traffic chiefs must abstain from union membership. Such traffic chiefs are not governed by this agreement except as to their minimum weekly wage and except that if any traffic chief is demoted, he may retain his seniority and return to his former position or a similar one.

Hours: 8 per day (not including the 30-minute lunch period), a 44-hour week for day work; 7¾ per night (not including the 45-minute lunch period), a 42½-hour week for night work. In the New York Bureau, however, hours not to exceed 41½ hours within six days and six nights. Two rest periods of 10 minutes to be given on day and on night shifts.

Overtime: time and one-half. When called for emergency duty, at least three hours to be paid for at overtime rate. Where the exigencies of newspaper publication permit, a full holiday to be allowed for seven statutory holidays. Telegraphers who are called to work on these days (or the night preceding such holiday for the night shifts) to be paid for such time worked at the regular rate in addition to this regular weekly salary. Telegraphers called to work on their seventh day or seventh night, whether this falls on Saturday or Sunday, to be paid overtime at double time for time worked, with a minimum working time of three hours.

Wages per week: line telegraphers and junior bureau telegraphers, $23.50 during first year of service; $26 during second year, $28.50 during third year; senior bureau telegraphers, $31 during first year of service, $33.50 during second year and $36 during third year. Any telegraphers being paid at higher wages at the time the agreements made were not to be reduced. Increases above the scale to be given in the discretion of the general manager.

Vacation: two weeks' annual holiday with pay to be given each telegrapher who has at least one year's service.

In filling vacancies by promotion, service record of character and ability to govern and those being equal, length of continuous service with the company to be the deciding factor. On completion of three years, bureau juniors to be advanced into the senior ratings if they have a satisfactory record; line telegraphers to be eligible for transfer to bureau positions. In reduction of staff also, seniority to be deciding factor.

Telegrapher called to perform duties at another place of employment to be allowed all necessary expenses incurred in addition to regular pay and to be paid overtime for travelling time between 8 a.m. and 11 p.m. in any one day in excess of his regular shift.

Grievances of telegraphers to be submitted in writing to the general committee and traffic superintendent within 20 days, with the right of appeal, through the general committee to the general manager.

If requested by the chairman of the general committee, the company will give reasons for the transfer, suspension or discharge of any telegraphers. Disputes which cannot be settled between the parties to be referred to a board of arbitration consisting of one representative of the company, one representative of the employees and a chairman chosen by them, or if necessary appointed by the Minister of Labour for Canada. (No director, official or member of the Canadian Press or any employee of the company or an official or member of any union to which the telegraphers may belong may be chosen as a member of the board of arbitration.) The decision of this board to become part of this agreement.

Ontario

Bricklayers and Stonemasons, Ottawa.
Barbers, Timmins, Schumacher and South Porcupine.
Barbers, Fergus and Elora.
Barbers, Perth, Carleton Place, Smiths Falls and Almonte.
Barbers, St. Thomas.
Barbers, Port Colborne and Humberstone.
Barbers, Simcoe.

Saskatchewan

Jewellery Workers, Saskatoon.
Electric Workers, Regina.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May issue of the Labour Gazette, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette

from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting the can, container and metal utensil manufacturing industry throughout the province, building trades at St. Johns and Iberville and barbers and hairdressers at St. Jerome and district, which are summarized below; and amendments and corrections to a number of other agreements which are also summarized below. Requests for the extension of new agreements affecting retail store clerks (except food stores) in Quebec City, cleaners and dyers in Quebec City and undertakers in Montreal were published in the *Quebec Official Gazette,* October 1; for the extension of agreements affecting pleating and embroidery workers in Montreal, shoe shiners in Montreal and barbers and hairdressers in St. Johns and Iberville in the issue of October 29. In addition, Orders in Council were passed approving the constitution and by-laws of certain joint committees and others making competency certificates obligatory as listed below.

Manufacturing: Textiles and Clothing

MEN'S HAT AND CAP MANUFACTURING INDUSTRY, MONTREAL.—An Order in Council, approved October 16, and published in the *Quebec Official Gazette,* October 22, amends the previous Orders in Council for this industry (LABOUR GAZETTE, January, 1938, page 102 and August, page 944), by excluding baby bonnets, that is any headwear made for an infant up to the age of two years if made of silk, satin, lace or poplin.

Manufacturing: Metal Products

CAN, CONTAINER AND METAL UTENSIL MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved October 16, and published in the *Quebec Official Gazette,* October 22, makes obligatory the terms of an agreement between the American Can Company, General Steel Wares, Ltd., the Continental Can Company of Canada, Ltd., and Canco Can Makers Association of Montreal, Continental Can Makers Association of Montreal and General Steel Wares Limited, Montreal Employees' Association.

The Order in Council to be in effect from June 15, 1938, to December 31, 1939, and applies to establishments engaged in the "manufacturing of cans, containers and metallic utensils" throughout the Province of Quebec.

Hours: 48 per week for all except stationary engineers and firemen who may work up to 54 hours at regular rate.

Overtime: work on Sundays and eight specified holidays, double time, except overtime work performed by stationary enginemen and firemen of the regular shift on these days, for which time and one-half will be paid; overtime work for general employees and specialized employees, time and one-quarter; for stationary enginemen and firemen—for work over 54 but not exceeding 60 hours in a week, 45 cents per hour for fourth class enginemen, 50 cents for third class, 60 cents for second class, 35 cents for firemen; for stationary enginemen and firemen for work over 12 hours per day or 60 per week, time and one-quarter. Overtime for mechanical employees, time and one-half; overtime for watchman, truck drivers and service men at regular rate.

Minimum hourly wage rates for general employees: female employees—17 cents for beginners, 22 cents after 6 months, 26 cents after one year; boys (16 to 20 years)—20 cents for beginners, 23 cents after 6 months and 26 cents after one year; men employees—labourers, sweepers, janitors, truckers and general helpers, 30 cents during first six months and 32½ cents thereafter; other classes including production operators, can pilers, packers, etc., 32½ cents and 35 cents, assistant shippers 40 cents.

Minimum hourly wage rates for specialized employees: machine and tool setters—37½ cents for beginners, 40 cents after 6 months, 42½ cents after one year; lithograph press feeders 37½ cents for beginners and 40 cents after six months; stationary enginemen (for a week of 48 to 54 hours), $24.30 per week for fourth class, $27 for third class and $32.40 for second class; fireman (stoker) $18.90 for week of 48 to 54 hours; stationary enginemen and firemen for work where less than 48 hours is worked in week, 51 cents per hour for fourth class enginemen, 56 cents for third class and 68 cents for second class, 40 cents for fireman (stoker); maintenance men on machines 40 to 45 cents, picklers, galvanizers' and tinners' helpers 40 cents, galvanizers' and tinners principal attendants 50 and 55 cents, building and maintenance men 50 cents, painters and sprayers capable of mixing and applying paints, 45 and 50 cents, acetylene welders and electric arc welders 50 cents, deep draw press operators 42½ and 45 cents.

Minimum hourly wage rates for mechanical employees: mechanics skilled on a special machine or working on mechanical work but not a qualified journeyman 50 cents, millwrights 55 and 60 cents, journeymen machinists including toolmakers, diemakers and general machinists 65 and 70 cents, journeymen lithographers, including lithograph pressmen, photo composers, transfermen and etchers 80 and 85 cents.

Minimum hourly wage for watchmen 25 and 30 cents, for truck drivers and service men 40 cents.

Minimum weekly salaries for office employees: 65 per cent of female employees to be paid a minimum of $15, another 20 per cent $13 and the remaining 15 per cent $12; 65 per cent of male employees $20 per week, another 20 per cent $17.50 and the remaining $15 per week; office boys and messengers—65 per cent to be paid $8, another 20 per cent $7 and the remaining $6; junior clerks (male or female) $9 to $14.

Employees incapacitated by age or infirmity may be employed at a lower wage rate to be determined by the joint committee, but in no case may there be more than one such employee in each ten employed. There shall be no reduction in wages.

Minimum wages for apprentice machinists: from 20 cents per hour during first six months with a 5 cent per hour increase each six months to journeymen's rate; apprentice lithographers from 40 cents during first six months, with increase of 5 cents per hour each six months till journeymen's rate is reached.

There shall be no reduction in wages. An employee who is handicapped may work for a lower wage rate to be determined by the joint committee, but not more than one such employee may do so out of every ten employees.

PASSENGER, FREIGHT AND INDUSTRIAL CAR INDUSTRY, MONTREAL.—An Order in Council approved October 16, and published in the *Quebec Official Gazette*, October 22, amends the previous Order in Council for this industry (LABOUR GAZETTE, October, page 1171) by confining the jurisdiction of the Order in Council to the Turcot and Dominion plants of the Canadian Car and Foundry Ltd.

Construction: Buildings and Structures

BUILDING TRADES, SOREL.—An Order in Council, aproved October 7, and published in the *Quebec Official Gazette*, October 15, and further correction published in the issue of October 29, amend the Original Order in Council (LABOUR GAZETTE, October, page 1172): by changing the class "pipe-mechanics" to "plumbers and pipe mechanics"; by adding the class tinsmith-roofers at a wage rate of 75 cents per hour for contractors (personal services) and 50 cents for journeymen. The correction published in the *Quebec Official Gazette of* October 29 does not affect the summary as given in the LABOUR GAZETTE.

BUILDING TRADES, JOLIETTE.—An Order in Council, approved October 16, and published in the *Quebec Official Gazette,* October 22 amends the previous Order in Council for these trades (LABOUR GAZETTE, June, 1938, page 694) by changing the wage rate for stone masons on the work from 50 to 60 cents per hour in zone II, thus raising the rate in zone II to the same as the zone I rate for this trade.

BUILDING TRADES, SHERBROOKE.—An Order in Council, approved September 28, and published in the *Quebec Official Gazette,* October 8, corrects the previous Order in Council for these trades (LABOUR GAZETTE, October, page 1173) by correcting the minimum wage rate for carpenters in the city of Drummondville and within five miles of its limits to be 45 cents per hour (instead of 40 to 45 as previously stated).

BUILDING TRADES, ST. JOHNS AND IBERVILLE.—An Order in Council, approved September 24, and published in the *Quebec Official Gazette,* October 1, makes obligatory the terms of an agreement between certain employers and le Syndicat Catholique National de la Construction de St. Jean (the National Catholic Union of Building Trades of St. Johns).

The Order in Council to be in effect from October 1, 1938, to January 31, 1939, and thereafter from year to year, subject to notice, in the city of St. Johns and the town of Iberville.

Hours: 8 per day, 4 on Saturdays, a 44-hour week, except labourers who may work 9 hours per day, 5 on Saturdays, a 50-hour week.

Overtime: time and one-half; work on Sundays and holidays, double time.

Minimum hourly wage rates:

Trades	Wage rates per hour
Bricklayers, plasterers, masons including cutters on the field	$0 65
Carpenter joiners, erectors of screens (wood or metal), sashes, windows, steel partitions, joiners, concrete form (shop or job)	0 50
Weather strippers	0 50
Electricians	0 55
Enginemen (hoist)	0 50
Enginemen (steam mixer)	0 50
Enginemen (gasoline mixer)	0 35
Compressor operators	0 45
Hod carriers	0 35
* Labourers	0 35
Lathers (metal or wood)	0 50
Marble setters	0 65
Painters, sprayers, decorators, glaziers, paper hangers	0 48
Plumbers, steamfitters and pipe-mechanics:	
Journeymen	0 55
Fifth year apprentices and junior mechanics	0 45
Roofers (asbestos, slate, tiles and composition):	
Journeymen	0 50
Helpers	0 35
Sheet metal workers	0 55
Terrazzo layers	0 50
Men working on the machine for the polishing of terrazzo:	
Dry polishing	0 45
Water polishing	0 40
Sprinkler fitters	0 60
Tile setters	0 60
Erectors of structural iron:	
Journeymen	0 50
Helpers	0 35
Cement finishers	0 35

* Labourers may be gasoline mixer operators, hod carriers, structural iron erectors' helpers, roofers' helpers and cement finishers' helpers.

A handicapped worker may work for a lower wage rate if such is established by the joint committee for him.

Apprentices must be at least 16 years and not more than 28 years of age when beginning apprenticeship. One apprentice allowed for each ten journeymen or fraction thereof. This restriction does not apply to the plumbing, heating, electric, tin, refrigerating and sprinkler trades. Apprentice bricklayers, carpenters and joiners, masons, painters (including sprayers, glaziers, decorators, paper-hangers) and plasterers to serve four years. Apprentices to be registered with the joint committee and at end of apprenticeship take an examination before the board of examiners. Apprentices who attended a technical or trades school to be credited for such time.

Wages for apprentices from 30 per cent of journeymen's rate during first year to 75 per cent during fourth year, except apprentices

in the plumbing, heating and tin industries who shall be paid from 20 cents per hour during first year to 35 cents during fourth year.

Building contracts granted and signed before the adoption of this Order in Council were not to be governed by its provisions.

BUILDING TRADES, MONTREAL.—A correction is published in the *Quebec Official Gazette,* October 22 to the Order in Council for these trades (LABOUR GAZETTE, August, page 945) which removes from the enumeration of the types of work, covered by the industrial jurisdiction the word "public," making it clear that all building construction is included under the agreement.

BUILDING TRADES, HULL.—An Order in Council approved September 28, and published in the *Quebec Official Gazette, October* 8, amends the previous Order in Council for these trades (LABOUR GAZETTE, July, page 798) by repealing the clause which had provided that the agreement be administered by the joint committee of the building trades of Montreal subject to 30 days' notice and the formation of a joint committee for Hull.

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN, SOREL.—An Order in Council, approved October 16, and published in the *Quebec Official Gazette,* October 22, amends the previous Order in Council for these workers (LABOUR GAZETTE, September, page 1044) by providing that the agreement be administered by the joint committee of the building industry of Sorel or any other committee duly replacing it.

Trade

RETAIL STORE CLERKS, MAGOG.—An Order in Council, approved September 24 and published in the *Quebec Official Gazette,* October 1, corrects the original Order in Council for these workers (LABOUR GAZETTE, October, page 1173) but it does not affect the summary as given in the LABOUR GAZETTE.

GROCERS AND BUTCHERS, SHERBROOKE AND EASTERN TOWNSHIPS.—An Order in Council, approved October 7 and published in the *Quebec Official Gazette,* October 15, amends the previous Order in Council for these workers (LABOUR GAZETTE, September, page 1045 and October, page 1174) by excluding from the terms of the Order in Council the public market of the city of Sherbrooke.

Service: Custom and Repair

SHOE REPAIRERS, SHERBROOKE.—An Order in Council, approved October 16, and published in the *Quebec Official Gazette,* October 22, amends the previous Orders in Council for these workers (LABOUR GAZETTE, July, page 800 and September, page 1045) by making certain changes which do not affect the summary as given in the LABOUR GAZETTE.

GARAGE AND SERVICE STATION EMPLOYEES, MONTREAL.—Two Orders in Council, one approved September 24 and published in the *Quebec Official Gazette* October 1, and the other approved October 7 and published in the issue of October 15, amend the previous Orders in Council (LABOUR GAZETTE, June, page 697 and July, page 800) by excluding from the territorial jurisdiction the counties of Vaudreuil and Châteauguay.

Service: Business and Personnel

BARBERS AND HAIRDRESSERS, SHERBROOKE, LENNOXVILLE AND MAGOG.—An Order in Council, approved September 24, and published in the *Quebec Official Gazette,* October 1, amends the previous Order in Council for these trades (LABOUR GAZETTE, July, page 800) by providing that the apprentice and employer work in the same shop so that the apprentice be under the immediate and continuous direction of the employer.

BARBERS AND HAIRDRESSERS, ST. HYACINTHE.—An Order in Council approved October 7, and published in the *Quebec Official Gazette,* October 15, amends the previous Order in Council for these trades (LABOUR GAZETTE, October, page 1174) by making corrections in the arrangement of hours which do not change the summary as given in the LABOUR GAZETTE.

BARBERS AND HAIRDRESSERS, ST. JEROME.—An Order in Council, approved October 7, and published in the *Quebec Official Gazette,* October 15, makes obligatory the terms of an agreement between le Syndicat des Maîtres Barbiers, Coiffeurs et Coiffeuses du district de Saint-Jérôme (the union of Master Barbers and Hairdressers of St. Jerome district) and le Syndicat des Employés-Barbiers, Coiffeurs-Coiffeuses du district de Saint-Jérôme (the Union of Employed Barbers and Hairdressers of the St. Jerome district).

The Order in Council to be in effect from October 15, 1938, to October 14, 1943, and thereafter until a new agreement is assented to. With the consent of both parties, the Joint Committee may suggest any modification which it may deem in the interest of the trade.

The territorial jurisdiction comprises the towns of St. Jerome and St. Therese de Blainville, St. Janvier, St. Rose, Shawbridge, New Glasgow, town of Terrebonne, St. Canut, St. Monique, St. Scholastique, St. Sophie de la Corne, St. Lin, St. Martin de Laval, St. Augustin, St. Anne des Plaines, St. Eustache and St. Hippolyte.

Hours: barber shops and beauty parlours may be open on Monday to Thursday inclusive from 8 a.m. to 8 p.m., on Friday from 8 a.m. to 10 p.m., on Saturday and eves of holidays from 8 a.m. to 11 p.m. Every barber entitled to six consecutive hours off in a week except the weeks in which there is a holiday.

Overtime to be paid at rate of regular time plus 35 cents per hour.

Minimum wages: barbers and hairdressers for men $12.50 per week plus 50 per cent of all receipts over $20 taken in by the employee during the week; for male and female hairdressers for ladies $12.50 per week; for extra employees, 35 cents per hour.

No employer may reduce the wages of an employee who was receiving more than the minimum rates at the time the Order in Council was put into effect. A schedule of minimum wages for each piece of work which must be paid any barber or hairdresser who works on contract or by the job is included in the agreement.

Handicapped workers may have their case submitted to the joint committee who may set a lower wage rate.

Not more than one apprentice allowed to each shop. Apprentices to spend 6 months at a school and 18 months in a shop and they will be paid $5 per week after the six months' period and $10 after 18 months' apprenticeship.

Barbers and Hairdressers, Montreal.—An Order in Council, approved September 24, and published in the *Quebec Official Gazette*, October 1, amends the previous Order in Council for these trades (Labour Gazette, September, page 1045) by enlarging the territorial jurisdiction to include the municipality of St. Lambert.

Barbers and Hairdressers, Hull.—An Order in Council, approved October 7, and published in the *Quebec Official Gazette*, October 15, amends the previous Orders in Council for these trades (Labour Gazette, August, 1935, page 731, June, 1937, page 696, March, 1938, page 336 and October, page 1175) by making certain changes in the minimum prices which must be charged customers.

Joint Committees

The constitution and by-laws of the Joint Committee set up under the following agreements were approved by Orders in Council and published in the October 1, 15 and 22 issues of the *Quebec Official Gazette*:—

Barbers and hairdressers, Montreal,
Barbers and hairdressers, St. Hyacinthe,
Bakers, Granby,
Passenger, freight and industrial car industry, Province of Quebec,
Building materials, Province of Quebec.

Certificate of Competency

The certificate of competency was made obligatory by Orders in Council as noted in the October 1, 8, 15, 22 and 29 issues of the *Quebec Official Gazette* for the following trades:—

Building trades, Joliette,
Building trades, Sherbrooke and Eastern Townships,
Building trades, Quebec,
Building trades, St. Hyacinthe,
Fur industry, Quebec,
Shoe repairers, Sherbrooke and Eastern Townships,
Shoe repairers, Montreal,
Garage and service station employees, Quebec,
Tavern employees, Quebec,
Dairy industry, Quebec,
Painters, Three Rivers,
Plumbers, Three Rivers,
Plumbers, Hull,
Aluminium industry, Arvida,
Aluminium industry, Shawinigan Falls,
Barbers and hairdressers, Hull,
Barbers and hairdressers, Missisquoi district,
Barbers and hairdressers, Quebec,
Lithographing industry, Province of Quebec,
Printing trades, Montreal,
Barbers and hairdressers, Rouyn and Noranda,
Barbers and hairdressers, St. Jean and Iberville,
Bakers and bread distributors, Quebec.

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders In Council in Ontario and Saskatchewan

In four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under

the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Construction: Buildings and Structures

BRICKLAYERS AND STONEMASONS, OTTAWA.—An Order in Council, dated October 13, and published in *The Ontario Gazette*, October 22, makes binding the terms of a schedule of wages and hours in the bricklaying and stonemasonry industry in the city of Ottawa and a defined adjacent area.

The Order in Council to be in effect from November 1, 1938, to May 1, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, November, 1936, page 1081, with this exception:—

Minimum wage rate for bricklayers and stonemasons: 90 cents per hour (an increase of 5 cents per hour over the previous schedule).

Hours are unchanged at 44 hours per week.

The union agreement for these trades is summarized on page 1296.

Service: Business and Personal

BARBERS, TIMMINS, SCHUMACHER AND SOUTH PORCUPINE.—An Order in Council, dated August 18, and published in *The Ontario Gazette*, August 27, makes binding the terms of a schedule of wages and hours for barbers in the Timmins, Schumacher and South Porcupine zone.

The Order in Council to be in effect from September 7, 1938, "during pleasure."

The regular working period for employers and employees to be those hours during which barber shops are permitted to be open under municipal by-laws. No work on Wednesday afternoon or evenings except on Wednesday of a week in which a holiday occurs.

Minimum wage rates for employees: for any person who is given full time employment on a straight salary basis, $25 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $20 per week plus 50 per cent of proceeds in excess of $30 from the work of the employee; for persons employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturdays, $12 per week plus 50 per cent of proceeds in excess of $16 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $9 per week plus 50 per cent of proceeds in excess of $11 from the work of the employee; for persons employed only for Saturday or the day before a holiday, $6 per day or part thereof plus 50 per cent of proceeds in excess of $8 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday, $4 per day or part thereof plus 50 per cent of proceeds in excess of $5 from the work of the employee.

No deduction may be made from these wages for materials supplied, laundry service or operating expenses of any kind.

A scale of minimum rates which must be charged for each operation is included in the schedule.

BARBERS, FERGUS AND ELORA.—An Order in Council, dated August 18, and published in *The Ontario Gazette*, August 27, makes binding the terms of a schedule governing barbers in Fergus and Elora.

The Order in Council to be in effect from September 7, 1938, "during pleasure."

This schedule is similar to the one summarized above for barbers at Timmins, with the exception of the minimum wage schedule and minimum charges for work:

Minimum wage rates: for any person who is given full time employment on a straight salary basis, $19 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $17 per week plus 50 per cent of proceeds in excess of $23 from the work of the employee; for persons employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturdays, $7.50 per week plus 50 per cent of proceeds in excess of $12.50 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $5 per week plus 50 per cent of proceeds in excess of $7.50 from the work of the employee; for persons employed for Saturday or the day before a holiday, $4 per day or part thereof plus 50 per cent of proceeds in excess of $6 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 50 per cent of proceeds in excess of $4 from the work of ithe employee.

BARBERS, PERTH, CARLETON PLACE, SMITH FALLS AND ALMONTE.—An Order in Council, dated August 18, and published in *The Ontario Gazette*, August 27, makes binding the terms of a schedule governing barbers in the towns of Smith Falls, Carleton Place, Perth and Almonte and the county of Lanark.

The Order in Council to be in effect from September 7, 1938, "during pleasure."

This schedule is similar to the one summarized above for barbers at Timmins, with the

exception of the minimum wage schedule and minimum charges for work:

Minimum wage rates: for any person who is given full time employment on a straight salary basis, $18 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $12.50 per week plus 60 per cent of proceeds in excess of $19 from the work of the employee; for persons employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturdays, $7.50 per week plus 60 per cent of proceeds in excess of $12.50 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $5 per week plus 60 per cent of proceeds in excess of $7.50 from the work of the employee; for persons employed for Saturday or the day before a holiday, $4 per day or part thereof plus 60 per cent of proceeds in excess of $6 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 60 per cent of proceeds in excess of $4 from the work of the employee.

Barbers, St. Thomas.—An Order in Council, dated August 18, and published in *The Ontario Gazette*, August 27, makes binding the terms of a schedule governing barbers in the city of St. Thomas.

The Order in Council to be in effect from September 7, 1938, "during pleasure."

This schedule is similar to the one summarized above for barbers at Timmins, with the exception of the minimum wage schedule and minimum charges for work:

Minimum wage rates: for any person who is given full time employment on a straight salary basis, $22 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $13 per week plus 65 per cent of proceeds in excess of $19 from the work of the employee; for persons employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturdays, $10 per week plus 65 per cent of proceeds in excess of $15 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of proceeds in excess of $7.50 from the work of the employee; for persons employed only for Saturday or the day before a holiday, $4 per day or part thereof plus 65 per cent of proceeds in excess of $6 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday $2.50 per day or part thereof plus 65 per cent of proceeds in excess of $4 from the work of the employee.

Barbers, Port Colborne and Humberstone.—An Order in Council, dated October 13, and published in *The Ontario Gazette*, October 22, makes binding the terms of a schedule of wages and hours for barbers in the town of Port Colborne and the village of Humberstone.

The Order in Council to be in effect from November 1, 1938, "during pleasure."

The regular working period for employers and employees to be those hours during which barber shops are permitted to be open under municipal by-laws of the town of Port Colborne. No work on Wednesday afternoon or evenings except on Wednesday of a week in which a holiday occurs.

Minimum wage rates: for any person who is given full time employment on a straight salary basis, $25 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $15 per week plus 50 per cent of proceeds in excess of $22 plus an additional 10 per cent over $30 from the work of the employee; for persons employed four hours per day or less from Monday to Friday inclusive and all day or less on Saturdays, $7.50 per week plus 60 per cent of proceeds in excess of $12.50 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $5 per week plus 60 per cent of proceeds in excess of $7.50 from the work of the employee; for persons employed for Saturday or the day before a holiday, $4 per day or part thereof plus 60 per cent of proceeds in excess of $6 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday $2.50 per day or part thereof plus 60 per cent of proceeds in excess of $4 from the work of the employee.

No deduction may be made from these wages for materials supplied, laundry service, etc.

A scale of minimum rates which must be charged is included in the schedule.

Barbers, Simcoe.—An Order in Council, dated October 13, and published in *The Ontario Gazette*, October 22, makes binding the terms of a schedule of wages and hours for barbers in the town of Simcoe.

The Order in Council to be in effect from November 1, 1938, "during pleasure."

The regular working period for employers and employees to be those hours during which barber shops are permitted to be open under municipal by-laws of the town of Simcoe. No work on Wednesday afternoons or evenings except on Wednesday of a week in which a holiday occurs.

Minimum wage rates: for any person who is given full time employment on a straight salary basis, $18 per week; for any person who is given full time employment on a percentage or commission basis or who is paid a salary plus a percentage or commission, $13 per week plus 65 per cent of proceeds in excess of $20 from the work of the employee; for persons employed four hours per day or less from Monday to Fridays inclusive and all day or less on Saturdays, $7.50 per week plus 65 per cent of proceeds in excess of $12.50 from the work of the employee; for persons employed for Saturday or the day before a holiday and on the previous evening only, $5 per week plus 65 per cent of proceeds in excess of $7.50 from the work of the employee; for persons employed only for Saturday or the day before a holiday, $3.50 per day or part thereof plus 65 per cent of proceeds in excess of $5.50 from the work of the employee; for persons working on days other than Saturdays or the day before a holiday, $2.50 per day or part thereof plus 65 per cent of proceeds in excess of $4 from the work of the employee.

No deduction may be made from these wages for materials supplied, laundry service or operating expenses of any kind.

A scale of minimum rates which must be charged for each operation is included in the schedule.

Saskatchewan

Manufacturing: Metal Products

JEWELLERY WORKERS, SASKATOON.—An Order in Council, approved October 17 and published in *The Saskatchewan Gazette*, October 29, makes binding in the city of Saskatoon and within five miles of it the terms of a schedule of wages and hours for the jewellery industry which includes the construction, alteration and repairing of jewellery, clocks, watches, etc.

The Order in Council to be in effect from November 8, 1938, "during pleasure."

Hours: 47 per week from April to August inclusive and 51 hours from September to March inclusive.

Overtime: for employees with at least five years' bench experience, 50 cents per hour.

Minimum wages: for employees with at least five years' bench experience: $18 per week; for employees of less than five years' bench experience who are not apprentices, $15 per week.

Apprentices include employees with less than five years' bench experience who are under articles of apprenticeship receiving instruction therein.

Wages for apprentices: from $5 per week during first year to $12 during fifth year.

A scale of minimum prices charged for services in the industry is included in the Order in Council.

Construction: Buildings and Structures

ELECTRICAL WORKERS, REGINA.—An Order in Council, approved September 22, and published in *The Saskatchewan Gazette*, September 30, makes binding the terms of a schedule governing the electrical industry in the city of Regina and within five miles of it.

The Order in Council to be in effect from October 10, 1938 "during pleasure."

Hours: 8 per day, 4 on Saturdays, a 44 hour week. However, where the job is continuous and shift work is done, shifts to be 8 hours each, a 48 hour week but on each shift, 20 minutes to be allowed for a meal. There are five recognized holidays in the year.

Overtime: time and one half. One man available for repair work Saturday afternoons until 5 p.m. at straight time in each shop.

Minimum wage rates: journeymen wiremen 90 cents per hour (an increase of 10 cents per hour over the previous schedule); probationary journeymen (those who have obtained their licence but have not yet completed 12 months or 1,000 regular working hours of work) 80 cents per hour (an increase of 10 cents over the previous schedule).

Wages for apprentices: from 30 cents per hour during first year to 60 cents during fourth year.

Industrial Hygiene in Manitoba, 1937

In the report of the Manitoba Department of Health and Public Welfare for the calendar year ending December 31, 1937, reference is made to the work of the Division of Industrial Hygiene.

During 1937 the Department of Health and Public Welfare, acting under agreement with the Workmen's Compensation Board, undertook the yearly examination of all workmen employed in certain industries where silicosis may be contracted. Those men who successfully passed the examination were granted a subsisting licence, issued by the Minister, as required by the amendments to the regulations under "The Public Health Act," passed in April, 1937. An examining centre has been established in the Department, for the purpose of issuing cerificates to all new men going into the mining area who will be exposed to silica dust.

Under this agreement with the Workmen's Compensation Board, 1,431 men were examined for silicosis of whom 1,353 were considered to be normal, 60 abnormal in respect to silicosis, 1,413 certificates were issued and 18 were refused certificates.

The report states that of the 78 men with abnormal findings, 66, or 84 per cent, were found to have increased fibrosis of greater or lesser degree, while 12 had tuberculosis in some form. It was also stated that it is not the policy of the department, or the Compensation Board, to reject men from the mines who show increased fibrosis, unless they are definitely infectious to other workmen, or have a disability greater than 20 per cent. Consequently, 60 men were granted medical certificates, although they showed abnormal chest conditions.

As a result of the work done by this branch of the department it is stated in the report that the following important conclusions have been established:—

"1. Silicosis may be contracted in Manitoba mines, but requires a minimum of 7 to 10 years' continuous exposure. That it is not, in itself, of the major importance which may have been given it in the past, is borne out by the fact that, so far, it has only affected 9 per cent of the workers at all, and less than 2 per cent to the point of active disability.

2. Tuberculosis is a very important factor in dealing with silicosis; no less than 11 of the 18 rejected men showing some evidence of tuberculosis activity. Once introduced into a silicotic lung, it shows markedly increased activity, and thus frequent examination of all potential silicosis cases, is indicated.

3. The advisability of maintaining a rigid standard of physical fitness for new applicants is most important. Particular emphasis must be placed upon the detection of tuberculosis in its most incipient stage.

4. There is reasonable ground to believe that by such careful selection of applicants, along with greatly improved method of ventilation, and other means of prevention now under investigation, silicosis will eventually be reduced to a minimum in Manitoba."

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1938

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement of prices during October continued to be downward, the cost of a weekly family budget of staple foods, fuel and lighting, and rent, and the Dominion Bureau of Statistics index number of wholesale prices being both slightly lower than in September. The decline in the former was due to a fall in the cost of foods and in the latter mainly to lower prices of grains, live stock and meats.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.45 at the beginning of October as compared with $8.52 for September. Of the twenty-nine articles included in the list, nineteen cost less than in the previous month, eight were more expensive and two were unchanged. The most important decreases were in bread and flour, while seasonal changes in the prices of eggs were the only substantial increases. Other changes were slight, but in the aggregate accounted for a decrease in the cost of the list of foods. Comparative figures giving the cost of this list for certain earlier dates are $8.75 for October, 1937; $8.24 for October, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.68 for October, 1929. Including the cost of fuel and rent with that of foods the total budget cost $17.35 at the beginning of October as compared with $17.41 for September; $17.51 for October, 1937; $16.87 for October, 1936; $15.41 for June, 1933 (the low point during recent years); $21.96 for October, 1929; $20.87 for October, 1922; $26.92 for July, 1920 (the post-war peak); and $14.48 for October, 1914. Both fuel and rent were practically unchanged.

In wholesale prices the Dominion Bureau of Statistics weekly index number, on the base of 1926 as 100, continued downward until the week ended October 7, when the figure was 74·2, rising to 74·3 for the week ended October 14, but again declining to 74·0 for the week ended October 21 and 73·9 for that ended October 28, as compared with 74·5 for the week ended September 30 and 74·6 for that ended September 2. At the end of October the index number was at the lowest point reached since July, 1936, and about 12·5 per cent lower than in October, 1937. The latest figures available on a monthly basis are for September, when the index was 74·5 as compared with 84·7 for October, 1937; 77·1 for October, 1936; 63·5 for February, 1933 (the low point in recent years); 96·8 for October, 1929; 164·5 for May, 1920 (the post-war peak); and 66·8 for October, 1914. In the classification according to chief component materials five of the eight major groups declined, while advances predominated in the Wood and Wood Products group, the Non-Ferrous Metals group and in the Chemicals and Allied Products group. During the month Vegetable Products declined 2·7 per cent; Animals and Their Products 1·6 per cent, and Non-Metallic Minerals and Their Products 0·7 per cent. The grain index declined from 47·1 to 43·2 during the month, influenced, it was stated, by poor export demand and by favourable crop prospects in the Argentine, together with unusually large world supplies.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of October of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the Labour Gazette, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which

†December only. §Kind most sold.
††An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent.

(Continued from page 1305)

reports are received and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the Labour Gazette for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended October 28, 1938; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

*The figures for "all items" were calculated by giving the following weights to each group; Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.
†Revised.

Retail Prices

Meat prices in the average showed a downward tendency at the beginning of October, with the exception of veal which was slightly higher. Sirloin steak declined from 27·7 cents per pound in September to 26·8 cents in October, rib roast from 20·3 cents per pound to 19·4 cents, fresh pork from 25·8 cents per pound to 24·8 cents and breakfast bacon from 38·6 cents per pound to 37·6 cents. Egg prices were generally higher, fresh advancing from 36 cents per dozen in September to 39·7 cents in October and cooking from 30·2 cents per dozen to 32·9 cents. Milk was unchanged in the average although increases were reported from several cities. Creamery butter prices moved downward in nearly all localities, averaging 27·2 cents per pound in October as compared with 28·3 cents in September. Bread averaged lower at 6·9 cents per pound in October as compared with 7·1 cents in September, decreases being reported from numerous cities. Flour also was lower at 3·4 cents per pound in October as compared with 3·6 cents in September. Potatoes were slightly higher in the average, increasing from $1 per ninety pounds in September to $1.04 in October. Anthracite coal was seasonally higher at $14.37 per ton in October as compared with $14.28 in September.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut": Halifax, $15.50; Charlottetown, $13.50; Moncton, $16; Saint John, $13; Quebec, $14; Three Rivers, $15 and $14; Sherbrooke, $14.75; St. Hyacinthe, $14.50; Thetford Mines, $17.25; Montreal, $15.25 and $15.50; Hull, $16.75; Ottawa, $16.50; Kingston, $15; Belleville, $14.50; Peterborough, $16.75; Oshawa, $15; Toronto, $15; St. Catharines, $15; Hamilton, $15 and $14.50; Brantford, $16.25; Galt, $16; St. Thomas, $16; Cobalt, $18.75; Timmins, $19.50; Port Arthur, $17.75; Fort William, $17.75; Winnipeg, $20.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and other countries. Tables giving the official and certain other index numbers of cost of living, wholesale and retail prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the Labour Gazette.

Great Britain and Northern Ireland

Wholesale Prices.—The Board of Trade index number, on the base 1930=100, was 98·4 for September as compared with 99·5 for August, a decline of 1·1 per cent for the month. A decline of 3·0 per cent in food prices, mainly due to a further fall in the prices of cereals, was responsible for the lower index, there being little change in the prices of industrial materials and manufactures. Compared with September, 1937, the general index showed a decline of 11·5 per cent, prices of food and industrial materials sharing almost equally in the decline. The decline in the general index has proceeded, almost without interruption since July, 1937, when it was 111·5.

The Statist index number, on the base 1867-1877=100, was 88·6 at the end of September showing no change from the figure for August. The index for the combined foodstuffs groups declined 1·2 per cent, while the all material index increased 1·0 per cent due chiefly to increases in the prices of minerals. Compared to the corresponding figure for the end of September, 1937, the general index showed a decline of 14·2 per cent.

Cost of Living.—The Ministry of Labour's index number, on the base July, 1914=100, was 155 at the first of October as compared with 156 at the first of September. The index of food prices declined from 140 to 139 due to reductions in the prices of bread, flour and potatoes which were partially offset by increases in the prices of eggs and milk in some districts. The other groups making up the index were practically unchanged. As compared with the general index for the same month last year, this year's figure showed a reduction of 1·9 per cent.

Eire

Cost of Living.—The cost of living index number of the Department of Industry and Commerce, on the base July, 1914=100, was 173 at mid-August as compared with 171 at mid-May, an increase of 1·2 per cent for the quarter. The index for food prices increased from 156 to 159, or 1·9 per cent due mainly to increases in the prices of eggs and potatoes, although these increases were offset to some extent by decreases in the prices of mutton and of bread, the latter decrease being due to an order under the Bread (Regulation of Prices) Act. The indexes for clothing and for fuel and light were unchanged from the previous quarter's figures, at 226 and 179 respectively.

France

Wholesale Prices.—The General Statistical Office index number, on the base 1914=100, was 646 for September as compared to 644 for August. The index of food prices was unchanged at 628, a decrease in the price of animal foods being offset by increases in the prices of vegetable foods. The index of prices of industrial materials was 663 as compared with 659 the previous month. The index based on gold currency, 1914=100, was unchanged from the August figure which was 54.

Germany

Wholesale Prices.—The index number of the Federal Statistical Office, on the base 1913 =100, was 105·6 for September as compared with 105·9 for August, a decrease of 0·3 per cent for the month. The index of prices of all agricultural products was 105·6 which was 0·9 per cent lower than the figure for the previous month. The index of prices of raw materials and semi-manufactured goods was unchanged at 94·0 while that for manufactured goods was 125·6, a decrease of 0·2 per cent for the month.

Cost of Living.—The official index number on the base 1913-14=100, was 125·2 for September as compared with 126·5 for August, a decrease of 1·0 per cent for the month. Food prices declined 2·1 per cent during the month, while prices of heating and lighting materials increased 0·7 per cent. The indexes of rent, clothing and sundries were unchanged.

India

Wholesale Prices.—The index number of the Labour Office, Government of Bombay, on the base July, 1914=100, was 100 for July showing no change from the figure for the previous two months. The index for food prices was 101 as compared with 103 for June but this decrease was offset by the non-foods index which increased from 99 to 100 during the same period.

Cost of Living.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934= 100, was 105 for August as compared with

106 for July. The decrease was due to a decline in the food index all the other groups being unchanged.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926=100, was 78·1 for August as compared with 78·8 for July, a decrease of 0·9 per cent for the month. This index is the lowest since December, 1934, but it should be noted that over the last five months the range of movement has been less than one per cent. During the month, the farm products group declined 3·0 per cent, foods 1·7 per cent, miscellaneous products 0·4 per cent, and textile products 0·3 per cent. The prices of hides and leather products advanced 0·4 per cent while the prices of the metals and metal products group and the building materials group each advanced 0·2 per cent. Fuel and lighting materials, chemicals and drugs, and housefurnishing goods showed no change from their July indexes.

COST OF LIVING.—The index number of the Industrial Conference Board, on the base 1923 =100, was 85·9 for September showing no change from the index for the preceding month. Increases in the cost of food and coal were offset by declines in the other major groups of expenditures. The index in September was 3·9 per cent lower than in the same month of 1937, 14·2 per cent lower than in 1929, but 19·8 per cent higher than at the low point of 1933.

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE THIRD QUARTER OF 1938

THE number of fatal industrial accidents (including fatalities from industrial diseases reported with fatal accidents by workmen's compensation boards, etc., as well as fatalities to persons incidental to the pursuit of their occupations) which were recorded in the Department as occurring during the third quarter of 1938 was 286, there being 98 in July, 102 in August and 86 in September.

The report for the second quarter of 1938, showing 264 fatalities, was given in the LABOUR GAZETTE, August, 1938, page 961. In the third quarter of 1937, 364 fatal accidents were recorded (LABOUR GAZETTE, November, 1937, page 1289).

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 15 fatalities for the first half of 1938 and 5 fatalities for 1937.

In this series of reports it is the custom to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Reports were received from the Provincial Workmen's Compensation Boards, from the Board of Railway Commissioners of Canada, from certain other official sources and from the correspondents of the LABOUR GAZETTE: Information as to accidents is also secured from newspapers.

Classified by groups of industries the fatalities occurring during the third quarter of 1938 were as follows: agriculture, 52; logging, 16; fishing and trapping, 8; mining, non-ferrous smelting and quarrying, 52; manufacturing, 26; construction, 46; electric light and power, 6; transportation and public utilities, 47; trade, 12; service, 21.

Of the mining accidents, 34 were in "metalliferous mining," 13 in "coal mining," 3 in "non-metallic mineral mining and quarrying, n.e.s.," and 2 in "structural materials."

Of the accidents in manufacturing, 2 were in "vegetable foods, drink and tobacco," 3 in "textiles and clothing," 10 in "saw and planing mill products," 1 in "pulp, paper and paper products," 1 in "printing and publishing," 3 in "iron, steel and products," 1 in "non-ferrous metal products," 2 in "non-metallic mineral products," and 3 in "chemical and allied products."

In construction there were 18 fatalities in "building and structures," 1 in "shipbuilding," 20 in "highway and bridge," and 7 in "miscellaneous construction."

In transportation and public utilities there were 18 fatalities in "steam railways," 13 in "water transportation," 2 in "air transportation," 12 in "local and highway transportation." and 2 in "telegraphs and telephones."

In trade there were 4 fatalities in "wholesale," and 8 in "retail."

Of the fatalities in service, 13 were in "public administration," 1 in "recreational," 5 in "custom and repair," and 2 in "personal, domestic and business."

There was no serious disaster resulting in the loss of a very large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

Five mining engineers were killed on July 28, at Bourlamaque, Quebec, when they were dropped 700 feet down a shaft in a runaway hoist cage. The cable snapped as the hoistman applied the emergency braking devices in attempt to check the rapid descent and the cage plunged to the bottom of the shaft.

When a lightning bolt travelled 3,900 feet into the workings of a coal mine along the steel rails of an underground railway and ignited a pocket of gas, three miners lost their lives in the explosion, at Michel, British Columbia, on July 5. Three coal miners were also killed at Coal Creek, British Columbia, on September 20, when they were crushed by an avalanche of coal following a "bump" or upheaval in the mine.

At Val d'Or, Quebec, two miners lost their lives on July 25, when buried under falling muck.

On July 14, a farmer and a labourer were burned to death when lightning struck a barn, at St. Charles de Mandeville, Quebec. A farmer and his son were asphyxiated by gas fumes in a cistern, on July 20, near Waskada, Manitoba. Similarly another farmer and his son were killed by gas fumes in a well near Cloverdale, British Columbia.

Two labourers on sewer construction were killed in an explosion when a compression drill struck a live stick of dynamite in a missed hole, at Montreal, Quebec, on August 2.

A train was derailed when a bridge trestle collapsed under it owing to heavy floods, near Portneuf, Quebec, on September 1, and an engineer and a fireman lost their lives.

When an auto collided with a truck near Farnham, Quebec, on September 16, two truck helpers were killed.

At Prince Rupert, British Columbia, a police inspector and a sergeant were shot by a taxi driver on July 4.

A garage owner and a labourer were fatally injured when an auto crashed into a truck which they were repairing near Sonningdale, Saskatchewan, on July 18.

It may be mentioned that during this quarter one fatality occurred in Canadian waters which is not included in the statistical record, owing to the fact that the seaman killed was employed on a ship registered in another country. On July 11, while engaged in painting the ship he fell into Montreal harbour and was drowned.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first half of 1938 has been compiled which contains 15 fatalities, of which 2 were in logging, 3 in mining, non-ferrous smelting and quarrying, 4 in manufacturing, 2 in construction, 1 in transportation and public utilities, 1 in trade and 2 in service. One of these accidents occurred in January, 1 in February, 2 in March, 1 in April, 5 in May and 5 in June.

A further supplementary list of accidents occurring in 1937 has been made. This includes 5 fatalities of which 1 was in logging, 1 in fishing and trapping, 1 in construction and 2 in transportation and public utilities. One of these accidents occurred in June, 1 in October, 1 in November and 2 in December.

REPORT OF COMMISSIONER ON CERTAIN MATTERS RELATING TO GREAT LAKES' SHIPPING

As a result of certain disputes which arose in connection with Great Lakes' shipping in the early summer and which involved to some extent a disruption of service, a Commission was appointed by the Minister of Labour to deal with this development (LABOUR GAZETTE, July, 1938, pp. 736-7).

The report of the Commissioner on these matters is as follows:—

MONTREAL,
November 10, 1938.

W. M. DICKSON, Esq.,
Deputy Minister of Labour,
Ottawa, Ont.

Re: Alleged discrimination against members of the Canadian Seamen's Union by the Mohawk Navigation Company Ltd., Inland Lines Limited and North American Transports Limited.

SIR,—I beg to submit my report as Commissioner, appointed under Order in Council No. 1383, in connection with the above entitled matter.

The first meeting was convened on July 11, 1938:—

Present:

E. McG. Quirk, Commissioner.
J. A. Mathewson, K.C., representing R. A. Campbell, et al.
H. H. Harris, legal representative for the C.S.U.
J. A. Sullivan and T. J. Hautman, C.S.U.

The second and last meeting was held on October 13, 1938.

Present:

E. McG. Quirk, Commissioner.
J. A. Mathewson, K.C., representing R. A. Campbell, et al.
H. H. Harris, legal representative for the C.S.U.
J. A. Sullivan, T. J. Hautman and Chapman, C.S.U.

During the period between the first and last meeting (three months) I was in frequent contact with Mr. J. A. Mathewson, K.C., representing the Shipping Companies under the management of Mr. R. A. Campbell, and Mr. H. H. Harris, solicitor, representing the Canadian Seamen's Union (Mr. J. A. Sullivan), in order to ascertain from them when it would be convenient to open and continue the inquiry. At the same time I did not press either of them to submit briefs or names of witnesses, nor did I arbitrarily insist that the inquiry be carried on. My principle object was to assure them that the services of the Commissioner were available at any time.

During the said three month period, however, neither Mr. Mathewson nor Mr. Harris had availed themselves of the opportunity thus offered to submit any evidence or argument in support of or in rebuttal of the matters under dispute and to consider which the Commission had issued. Moreover, Mr. Mathewson and Mr. Harris assured me at the meeting of October 13 that they were not then in a position to submit arguments as to the complaints specifically defined in the Commission. Having regard to this and to the near approach to the close of navigation the Commissioner at the second meeting proposed that the Commission should now dissolve and both Mr. Mathewson and Mr. Harris concurred in this view and agreed to submit to the Commissioner their concurrence in writing. Such letters were subsequently received and the originals forwarded to you under date of October 20, 1938.

In view of the circumstances related above, I recommend that the Commission of Inquiry under Order in Council No. 1383 of the 20th June, 1938, be dissolved.

Respectfully submitted,
E. McG. QUIRK, *Commissioner.*

Minimum Wage Rates for Rubber Industry in Great Britain

The rubber manufacturing trade in Great Britain has been brought within the scope of the Trade Boards Act in order that minimum rates of wages may be established in the industry. The Minister has power to apply the Acts to any trade if he is of the opinion that no adequate machinery exists for the effective regulation of wages throughout the trade and that the rates of wages prevailing in the trade are unduly low. The rubber manufacturing trade is defined in the Order as the preparation and manufacture of rubber materials and the manufacture and repair of rubber articles in an establishment wholly or mainly so engaged or in a department of an establishment so engaged, the rubberizing of fabrics and the regeneration of waste or used rubber. The following operations are, however, excepted: the preparation and manufacture of rubber materials and the manufacture and repair of rubber articles if the factory as a whole is mainly engaged on operations other than those included in the Order and the materials and articles are used in the manufacture or repair of articles made or repaired in the factory, not being rubber articles; the making up from rubberized fabrics of articles other than vulcanized articles; work performed by dental mechanics; manufacture of articles made from asbestos and the manufacture of electric cables.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Deductions from Fishermen's Earnings for Workmen's Compensation in British Columbia must be Refunded

FISHERMEN working for the Canadian Fishing Company from 1927 to 1937 on a plan under which they received as remuneration a share of the proceeds of the fishing operations were granted by the Supreme Court of British Columbia on July 18 a refund of moneys which had been deducted by the Company for the purpose of paying assessments to the Workmen's Compensation Board.

At the beginning of each year the Workmen's Compensation Board determines the basic rate that must be levied on employers to meet the estimated cost of compensation for the year having regard to the payrolls of the employers in the industry. Employers are notified of the basic rate but assessments are made by the Board from time to time on the estimated payroll with an adjustment at the end of the year on the final payroll. In the fishing industry for at least eight years the Board had collected from employers less than the basic rate would have yielded. The defendant company in this case, however, deducted from the sums payable to the crew the amount that would be required at the basic rate. Although the plaintiffs did not authorize the deductions, they agreed with the statements shown to them by the company from time to time.

The Workmen's Compensation Act of British Columbia declares void any agreement whereby a workman waives any of the benefits of the Act and prohibits an employer making any deduction from his employees' wages to make up any part of the sum which the employer is liable to pay to the provincial Accident Fund, or to indemnify himself at the workmen's expense for any liability he may incur under the Act except in respect of the one cent a day deduction from wages he is permitted to make to pay the cost of medical aid.

The questions to be decided by the Court, then, were (1) whether the plaintiffs in the action were employees of the Company and so within the scope of the Workmen's Compensation Act, (2) whether an action to recover the sums deducted could be maintained at a date so long after the cause of the action and (3) the distinction to be made with respect to the moneys deducted between the part paid to the Workmen's Compensation Board and the part retained by the Company.

On the first point, Mr. Justice Fisher held that the relationship between the defendant and each of the plaintiffs was that of employer and employee arising from contracts of employment. The Company owned or chartered the boats and could require the crew to deliver the fish to it. The crew were paid according to the value of the fish. Since the crew were deemed to be employed by the Company, the Workmen's Compensation Act applied to all parties.

As regards the period of time during which such an action as that before the Court might be brought, the British Columbia Statute of Limitations provides that an action under a special statute may be brought at any time within twenty years after the cause of such action but actions other than for statutory liability or certain other specified actions must be instituted within six years after the cause for action. The Court held that the action was one on the contract of employment and not altogether on the Workmen's Compensation Act.

> The claim in each case is really for the unpaid balance of the remuneration due under the contract of employment which has not been abrogated and to which reference has to be made. The relationship between the parties was created by such contract and not by the statute. The liability is therefore not purely statutory but arises out of the contract of employment which is affected in respect of the deductions in the manner set out in the statute. It follows then that the period of limitation, if any applies, would be six years. Under the unusual circumstances existing here I cannot see how there can be any suggestion of fraud of any kind with regard to the moneys deducted and paid over to the Board and my view is therefore that the limitation of six years applies where the moneys deducted were paid over to the Board.

But the Court considered that although the deductions had been made in good faith at the basic rate determined by the Board, yet it would amount to fraud for the defendant Company to retain the amounts not collected by the Board when it became apparent that the Board would make no further assessments for the years prior to 1937. For this reason, he held that time was no bar to the recovery of these amounts.

The plaintiffs were given judgment in each case for the total amount deducted during these years less the sums paid to the Workmen's Compensation Board from the amount deducted from earnings payable more than six years before the action was begun and less also any other sums paid them by the defendant. The claim for interest was disallowed but costs were given the plaintiffs. *Bilan et al. v. Canadian Fishing Co., Ltd.* (1938) 3 Western Weekly Reports 123.

Conviction for Picketing in Windsor

On September 2 Magistrate Hanrahan in Windsor police court convicted a workman accused of watching the premises of the Walker Metal Products Ltd., wrongfully and without legal authority, with a view to compelling employees of the company to abstain from working in the plant where some of the employees were on strike. The act thus described is an offence under section 501 of the Criminal Code governing what is commonly called picketing. The section reads, in part:—

> Every one is guilty of an offence. . . who, wrongfully and without lawful authority, with a view to compel any other person to abstain from doing anything which he has a lawful right to do, or to do anything from which he has a lawful right to abstain. . .
>
> (*f*) besets or watches the house or other place where such other person resides or works or carries on business or happens to be.

As the workman had acted on the advice of a union official wishing to test the validity of a local by-law forbidding unnecessary noise between 6 p.m. and 6 a.m., the accused was released on suspended sentence for two years on his personal recognizance of $200. Counsel for defence asked that the reasons for judgment be stated in order that the conviction might be appealed. The facts as given in the judgment appear not to involve a consideration of the clause added to the section in 1934 to stipulate that attending at or near any premises in order merely to obtain or communicate information is not to be deemed an offence within the meaning of the section. The giving of information is not referred to in the judgment.

The strike was called by the United Automobile Workers of America for recognition as the sole bargaining agent of the employees. The accused, a member of a picket line assembled outside the plant, left the line to "boo" at two employees entering for work. These workmen testified that while this act did not deter them from continuing their employment, they did not like the expression of contempt and one claimed it had caused him some loss of sleep.

After reviewing several leading cases, including the Alberta case of *Reners v. The King,* which was finally decided by the Supreme Court of Canada (LABOUR GAZETTE, 1926, p. 618), the Ontario case, *R. v. Baldassari* (LABOUR GAZETTE, 1931, p. 501), and the English judgment in *Lyons v. Wilkins,* the magistrate concluded that the watching and besetting need not be for any lengthy period; that the word "compel" does not necessarily imply physical violence; that there are many ways short of violence or the threat of it—annoyances of all sorts and degrees; that it is not necessary that the acts alleged succeed in their object so long as they were done with a view to compel; that picketing effecting a practical compulsion by moral force is wrongful and that sub-section (*f*) of section 501 clearly forbids anyone from besetting another's house or place of business with a view to compel him to abstain from doing anything which he has a lawful right to do. The magistrate stated:—

> Applying this law to the evidence before me, I am convinced this expression of aversion by the accused, given while these two workmen made their way into their employment, was intended to convey to them they were held in contempt for continuing to do that which they had a lawful right to do, namely, exercise, without unpleasant persuasion by anyone in the picket line, their right to continue in their employment; and that the means taken by the accused on this occasion, perhaps more eloquent by reason of its decisive and unmistakable implication of derision than any words of his would be, was clearly intended to operate as a moral force on their minds as to whether or not they should continue in their employment. There can be no doubt, I believe, from the expressions in higher courts that anything done by a person picketing that would render employment unpleasant or intolerable to people employed is unlawful.
>
> Having regard to all the circumstances in this case I must find the accused guilty as charged. *R. v. Hadgus,* Windsor Police Court, Sepetmber 2, 1938.

During 1937 four passengers were killed and 381 injured in train accidents, as against 6 killed and 657 injured in 1936, according to a report recently issued by the Dominion Bureau of Statistics. The number of employees killed was also reduced from 83 to 59 and the number injured from 1,293 to 1,082, while the numbers of other persons killed and injured were 263 and 659, as against 273 and 622 respectively in 1936. The increase in other persons injured was all in the number of trespassers which increased from 186 to 272. These are persons stealing rides on trains, walking on the right-of-way, and also persons crossing the railways at highway crossings when the gates are down. There were 2 fewer persons killed at highway crossings, but 48 more were injured than in 1936. These increases were all motorists, the number injured jumping from 266 to 323 and the number of motorists killed increasing from 105 to 109. There was one pedestrian killed and 2 pedestrians, 14 motorists, and 2 other persons injured at crossings protected by gates and one motorists killed and 13 motorists injured at crossings protected by watchmen. At unprotected crossings 106 persons were killed, 100 of whom were motorists, and 275 persons were injured, of whom 265 were motorists.

There were 2,788 protected crossings and 29,278 unprotected highway crossings in Canada at the close of the year.

VOLUME 38] DECEMBER, 1938 [NUMBER 12

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Monthly Summary

THERE was a slackening in industrial activity at the beginning of November, according to returns furnished to the Dominion Bureau of Statistics by 11,049 firms with 1,100,263 employees, as compared with 1,120,068 at October 1. Each of these firms ordinarily employs a minimum of 15 workers. Reflecting this seasonal reduction, the index (based on the average for the calendar year 1926, as 100), declined from 116·7 in the preceding month to 114·6 at the date under review, as compared with 125·2 at November 1, 1937. At that date in the recent years of the record, the index was as follows: 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9, and 1927, 108·8.

Unemployment in Trade Unions.—At the beginning of November, 1938, reports were forwarded to the Department of Labour by 1,920 local trade unions covering a membership of 236,690 persons, 29,160 of whom, or 12·3 per cent, were unemployed, in comparison with 10·4 per cent at the beginning of October, 1938, and 8·9 per cent at the beginning of November, 1937.

Employment Office Reports.—Reports received from the offices of the Employment Service of Canada showed a decrease in the work transacted during October, 1938, when a comparison was made with that of the preceding month and also with that of the corresponding period of 1937. The industrial groups showing the most marked changes from last month were farming, in which a loss was recorded, and construction and maintenance in which a gain occurred; and in comparison with October last year, logging and farming showed declines, and construction and maintenance an increase. Vacancies in October, 1938, numbered 36,970, applications 74,715 and placements in regular and casual employment 35,348.

Prices.—In retail prices the cost per week of a list of staple foods, fuel and lighting, and rent entering into a family budget was $17.29 at the beginning of November as compared with $17.35 for October; $17.58 for November, 1937; $16.96 for November, 1936; $15.41 for June, 1933 (the low point in recent years); and $22.03 for November, 1929. In wholesale prices the Dominion Bureau of Statistics weekly index number, based upon prices in 1926 as 100, was slightly lower at 73·4 for the week ended December 2 than for the last week in October when it was 73·9. On a monthly basis the index number was 74·1 for October, 1938; 83·1 for November, 1937; 77·2 for November, 1936; 63·5 for February, 1933 (the low point in recent years); and 95·7 for November, 1929.

Business Statistics.—The latest information available reflecting industrial conditions in Canada is given in the table on page . The index of the physical volume of business in October was little changed from the figure for September but was about seven per cent lower than in October, 1937. The index of mineral production indicated a slightly lower level of activity in this industry in October than in the preceding month but about eight per cent higher than in October, 1937, there being important increases in the latter comparison in the shipments of copper, nickel and gold and in the imports of bauxite. The level of manufacturing activity as measured by the index for this group was slightly lower than in September but substantially higher than in any other month of 1938. It was, however, about 15 per cent lower than in October, 1937. Construction was considerably higher than at any time since January and higher also than in October, 1937. The index of the volume of exports was lower in October than in the preceding month but higher than at any time during the last year while imports were higher than at any time since the beginning of 1938 but lower than in October, 1937. Information available for November shows wholesale prices, employment and the number of freight cars loaded to be lower

* Most of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† For the week ended December 2, 1938.

(1) Calculated from yields of Ontario bonds. (2) For group figures see articles elsewhere in this issue.

(3) Adjusted for number of business days and seasonal variations. (4) Figures for end of previous month.

(5) Figures for four weeks ending November 26, 1938, and corresponding previous periods.

(6) Sugar production given in periods of four weeks ending November 5, October 8, and September 10, 1938; November 6, October 9, and September 11, 1937. (7) MacLean's Building Review. (8) Index numbers are adjusted when necessary for seasonal variation.

both as compared with the previous month and with November, 1937.

Strikes and Lockouts.—The number of strikes and lockouts recorded during November was seven, involving 392 workers and resulting in a time loss of 3,150 man working days as compared with 31 disputes during October, involving 3,146 workers with time loss of 18,122 days. None of the disputes during November involved a large number of workers for any considerable period. The most important strikes were those involving leather goods workers in Montreal and lime plant workers at Blubber Bay, B.C. In October the disputes included nine strikes of coal miners in Nova Scotia, Saskatchewan and Alberta and four strikes in automobile and automobile parts plants in Windsor, Ont. In November, 1937, there were 27 disputes involving 6,277 workers with a time loss of 42,007 man working days. Nearly half of this time loss resulted from a strike of coal miners at Minto, N.B. Strikes of meat packers at Montreal, of rubber factory workers at Kitchener, Ont., and of coal miners in Nova Scotia and Alberta also caused considerable time loss in November, 1937. Of the seven disputes recorded for November three were terminated during the month, one resulting in favour of the employers, and two in favour of the workers. Four disputes involving 174 workers, were recorded as unterminated at the end of November. These figures do not inclure those strikes and lockouts in which employment conditions were no longer affected but which had not been called off or definitely declared terminated by the unions involved.

Industrial Disputes Investigation Act

During November, the department received the findings of two Boards of Conciliation and Investigation. One report concerned the dispute between the Ottawa Electric Railway Company and its employees, while the other dealt with the differences between Hendrie and Company Limited, Toronto, and their motor truck drivers. The full text of these board reports appears on pages 1332 and 1335 respectively. Other proceedings under the Industrial Disputes Investigation Act are also summarized on page 1331 of this issue.

Statistics of material aid recipients for October

The National Registration of persons on Aid, carried out by the Department of Labour, showed the start of the usual winter increase in numbers in receipt of assistance to which the Government of the Dominion contributes during the month of October.

Preliminary figures show the total of the unemployed but fully employable persons on Aid throughout Canada in October at 125,000, an increase of slightly less than 6 per cent from the September total of 118,000. The figure for October this year represented a net increase of less than 3 per cent over October a year ago. Decreases in the numbers of fully employable persons on Aid had occurred in every month of the current year up to September, since the winter peak of 174,932 in February last.

A total of 478,000 persons were receiving Non-Agricultural Material Aid in October this year, six per cent more than in the previous month. This category includes totally unemployable, partially employable and fully employable persons, together with all dependents of family heads. This aggregate showed a net increase of about 1·5 per cent from October, 1937.

Approximately 48,500 farmers who, when their dependents are included, account for a farm population of 223,500, were reported as receiving Agricultural Aid for subsistence in October. These persons were largely located in the Province of Saskatchewan, that province alone showing a total of 185,000. The Dominion total on Agricultural Aid, 32·5 per cent less than in October, 1937, had increased by 23·5 per cent in October over September, 1938. The Saskatchewan total, indicating the improvement due to this year's crops, showed a decrease of 37 per cent compared with October, 1937; however, the start of the winter increase for 1938 was already reflected in the October figures.

The grand total of all classes of persons on Material and Agricultural Aid in October, according to these early figures, was 701,500, an increase of over 10 per cent from September, but a decrease of 12·5 per cent from October, 1937.

Placements under Farm Employment Plan

Improved conditions in Western Canada are reflected in the substantial decrease in the number placed under the Government's farm employment plan. This plan, usually referred to as the Farm Placement Plan, is operating in the three Prairie Provinces, and to a limited extent in British Columbia. Supplementary plans also are effective in British Columbia. They constitute one of the Government's methods for dealing with the problem of the needy unemployed, including transients.

Statistics released by the Honourable Norman McL. Rogers, Minister of Labour, indicated that up to December 3rd, 9,467 persons, of which 1,174 were women and 8,293

men, were placed on farms in Western Canada, as compared with last year's total, at approximately the same date, of 22,461 placewere men. Last year's figures are thus reduced by more than one-half, and this is attributed more than one half; and this is attributed largely to improved crop conditions in Western Canada.

Placements under the Farm Employment Plan are, of course, not yet at their peak. Experience has shown that the peak is reached about January 15th. Last year on that date placements totalled 42,539 of which 9,170 were women and 33,369 were men. In addition to this, supplementary plans in British Columbia placed 4,640 persons, making a total of nearly 48,000 under farm placement and supplementary plans.

By provinces, farm placements thus far this winter are as follows:—

	Women	Men	Total
Manitoba	91	2,132	2,223
Saskatchewan	1,083	3,953	5,036
Alberta	....	2,058	2,058
British Columbia	....	150	150
	1,174	8,293	9,467

Provincial totals at the same time last year were as follows:—

	Women	Men	Total
Manitoba	132	1,893	2,025
Saskatchewan	5,437	12,465	17,902
Alberta	....	2,445	2,445
British Columbia	3	86	89
	5,572	16,889	22,461

The supplementary plans in British Columbia, under which men are provided with work in forestry projects and on the highways have resulted in placement for 1,726 thus far this winter. This is practically identical with the same total in 1937, when 1,722 were placed. Men are kept in camps on the job, paid wages and given work during the winter. Both the farm placement plan and the British Columbia supplementary plans are designed purely for winter operation.

The Minister emphasized that one of the advantages of the farm employment plan is that it takes homeless necessitous and unemployed men and women from the urban centres and distributes them in selected farm homes. A large number of those thus placed have remained on the farm. Allowances are paid to those placed. The cost of the plan is defrayed on a dollar-for-dollar basis by the Dominion and the Provinces.

In the farm placement scheme, started in the fall of 1936, the Province of Quebec was included among those Provinces participating. Approximately 4,816 placements were made in Quebec during the winter of 1936-37 while those in the Prairie Provinces were as follows:—

Manitoba	10,769
Saskatchewan	21,230
Alberta	5,114

There were 225 placements in British Columbia, making a total for the first year of 42,154.

Views of Minister of Labour on relationship of trade agreements to employment

The Minister of Labour, Hon. Norman McL. Rogers, in a press release on November 17, expressed his views on the increased employment possibilities of the new trade agreements recently signed between Canada and the United States, as follows:

"The new trade agreements cannot fail to have important results for the world at large. Together they make an outstanding contribution to a broadening of the base of international trade and reverse the trend toward national self-sufficiency. I believe our new agreement with the United States will mean more employment in Canada. The increase in employment in this country should develop in two ways; first, through the greater activity stimulated in our primary industries through the enlarged markets for our products, and second, through the improved domestic market for Canadian manufacturers arising from the restored confidence and higher incomes of those engaged in our primary industries. Both of these effects may not appear at once but I believe that on balance the new agreements will bring about a substantial improvement in employment conditions in Canada."

Deputy Minister of Labour Emphasizes Challenge to Democracy

In an address presented before the recent convention of the Canadian Federation of Labour, the federal Deputy Minister of Labour, Mr. W. M. Dickson, drew attention to the challenge to democracy in the modern world and the responsibilities devolving upon the individual citizen with regard to the preservation of democratic institutions. The wide measure of freedom enjoyed by the citizens of a democracy, he pointed out, "is not a natural right. It has been won only after constant and sacrificial struggle and can be maintained only by the exercise of eternal vigilance." He warned against an attitude of indifference and urged an intelligent consideration of the complex problems of government to-day. Continuing the deputy minister expressed his faith in "the ability of an energetic and industrious people under democracy to do all and even

more than a regimented people under dictatorship, if they so will and are wisely directed."

Emphasizing the particular significance to organized labour of this challenge, Mr. Dickson stated: "You may ask why am I talking about democracy and its preservation before a gathering of labour leaders. First, because it is only under democracy that labour leaders can carry on and develop as such the worthwhile achievements which in the past they have been able to accomplish under that form of government. Under dictatorships the character and scope of labour organization is determined by the ruling power. Organized labour in Canada to-day can and does freely make known its will and purpose to government, and has in the past and does to-day exercise an influence in shaping the policies of governments. This is the practice under democracy. Under dictators such labour organization as is permitted is told what it will do. Secondly, no economic waste is permitted under dictatorship. The people are regimented into every necessary service for the state and their maximum effort is demanded. Democracy can only match this by everyone voluntarily giving of his or her best and doing what he or she can to avoid unnecessary interruption of that effort."

Pointing out that the International Labour Organization of the League of Nations is established on a basis of co-operative effort, the deputy minister concluded: "You all have knowledge of what the principle of co-operation between governments, employers and workers has been able to accomplish in improving conditions in the countries of the world who have followed it. I cannot emphasize too strongly my conviction that a continued faithful adherence to the principle will go far in enabling democracies to meet the challenge of dictatorship. Therefore, to return to the question of controllable interruption in industry, let me urge the application of the I.L.O. principle, viz., that representatives of governments, representatives of employers and representatives of workers sit down together around the council table and calmly discuss matters of controversy and dispute, endeavouring thereby to reach a satisfactory and peaceful solution."

Extension of nutrition surveys in Canada

Nutrition surveys will be extended and new investigatory work in this field of public health initiated in Canada in 1939, it was announced at Ottawa following a conference on the Dominion Government's participation in the work of the Canadian Council on Nutrition.

Major the Honourable C. G. Power, Minister of Pensions and National Health, discussed Canada's further participation in world-wide nutrition surveys with Senator Cairine Wilson, Vice-President of the International Federation of League of Nations Societies, and Dr. T. H. Leggett, immediate Past-President of the Canadian Medical Association and Chairman of the Executive of the League of Nations Society in Canada.

Dr. R. E. Wodehouse, Deputy Minister of Pensions and National Health, and Chairman of the Canadian Council on Nutrition, who has just returned from an International Nutrition Conference at Geneva, reported the unanimous decision of that gathering to intensify field studies with a view to setting up accurate dietary standards.

Dr. Wodehouse was honored by election as Chairman of the Geneva meeting, which was attended by Professors of Physiology and others representing Belgium, France, Holland, Latvia, the United States of America, Hungary, Yugoslavia, Great Britain, Iraq, Australia, Norway, Finland, Sweden and Denmark, in addition to Canada.

Reports at the Geneva conference, Dr. Wodehouse said, indicated the most extensive survey at present was in progress in Australia, (LABOUR GAZETTE, November 1938, page 1196) where in connection with the work, x-ray was being employed to detect bone and enamel development in the teeth of children.

The conference agreed that the Canadian surveys in progress at Toronto were the most complete, in their individual analysis of food consumed by representative members of families.

This work, as explained to the delegates, includes weighing of food served to each individual of the family at each meal, and weighing of residue not consumed. This made it possible to arrive at the amount of different food constituents consumed by each member of the family in a 24-hour period, and to analyse this data on a basis of age, sex, occupation, etc.

Dr. Wodehouse reported the conference felt that much more information was required before definite standards of nutrition could be set up for people of various countries and that the information must be so assembled as to permit scientists to draw definite conclusions from it.

Canada was able to report at Geneva she had almost completed one study in Toronto on this minute-detail basis, of 100 families, and planned to study another 100 families, of those living under rural conditions near Toronto.

In Alberta a study of 100 families, on a budgetary basis, has been completed. Arrangements are being made for a survey, similar to that in Toronto, in technical detail, to be carried out on the actual consumption of food by members of 100 Alberta families. The survey will be conducted by the University of Alberta.

It was indicated studies similar to those in and near Toronto may be made in the provinces of Quebec and Nova Scotia.

The International Conference was told of the large budgetary survey being made in Canada under the organization of the Dominion Bureau of Statistics, and of methods employed in this investigation. (The scope and objectives of this cost of living survey were reviewed in the LABOUR GAZETTE for September on page 967).

The conference was also told that the Canadian Council on Nutrition has established two studies of the analytical content of foods offered for sale and consumed by the Canadian people, one in the Connaught laboratories, Toronto, and another in the Hospital for Sick Children, Toronto. It is planned, if the work can be financed, to inaugurate similar studies in laboratories at the Universities of McGill, Montreal, and Dalhousie. Through using several laboratories at the same time, it is hoped to establish the analytical content of foods consumed in Canada, in a short time.

Industrial hygiene discussed at Dominion-Provincial Health Conference

Featured by an important agenda covering a wide range of subjects pertaining to problems of health and hygiene, a joint conference of the provincial Ministers of Health and the Dominion Council of Health was held in Ottawa on December 6 and 7 under the auspices of the Federal Department of Pensions and National Health.

Of particular interest in the sphere of industrial hygiene were the discussions on silicosis in metalliferous mining, sand-blasting, and foundries; and also lead poisoning in connection with spray painting. These subjects were introduced by Mr. Gus Francq, secretary of the Quebec Federation of Labour, an affiliate of the Trades and Labour Congress of Canada.

Led by Dr. F. S. Parney, Chief of the Division of Industrial Hygiene, Department of Pensions and National Health, there was an important discussion on occupational diseases in general and the advisability of a systematic program of health supervision for the adult working population. Participating in this discussion, also, were the representatives of the provincial health departments.

Upon the request of the provincial health authorities, the Department of Pensions and National Health was approached in regard to the possibility of receiving periodic assistance concerning specific problems (especially those arising out of industrial hygiene) which called for the services of an expert technical advisor. This request was favourably received by the department.

Special work projects for Northern Ontario

Construction projects to relieve the acute unemployment situation in Northern Ontario are being planned as the result of a meeting held in Ottawa recently at which members of Parliament from Northern Ontario constituencies discussed with Hon. Norman McL. Rogers, Minister of Labour, and Hon. C. D. Howe, Minister of Transport, the need for action to relieve this situation.

Following this meeting the Dominion Government made definite proposals, as set forth in a letter from the Minister of Labour to Premier Hepburn of Ontario.

The Minister's letter pointed out that owing to exceptional market conditions, the forest industries of Northern Ontario have greatly curtailed their woods operations for the coming winter season, with the result that this district is facing an acute shortage of employment and some thousands of men are deprived of their usual means of livelihood.

It was further indicated that "this situation has been the subject of recent discussion between Dominion and Provincial Ministers with a view to finding some means by which this severe but temporary condition of unemployment in Northern Ontario can be relieved without further delay."

In conclusion the Minister of Labour stated:

"On behalf of the Dominion Government I have now been authorized to state that this Government is prepared to contribute one million dollars on the basis of an equal contribution from the Province of Ontario in order to meet this emergency situation in the northern districts; this total sum to be expended under the terms of joint agreement to provide works projects consisting of highway construction, if such is possible during the winter months, or forest conservation work to remove fire hazards in northern areas, the actual projects to be determined by the joint approval of the two Governments.

"We are prepared to work out the terms of this special agreement immediately, and believe it will assist substantially in relieving the acute situation now prevailing in Northern Ontario."

In reply, Premier Hepburn wired that the provincial Deputy Minister of Highways, Mr. R. M. Smith, would come to Ottawa to discuss the situation, and was empowered to act on behalf of the Ontario Government.

Subsequently, on Mr. Smith's arrival, a conference was held at which preliminary steps were taken, and an agreement was drafted subject to a schedule of works to be approved. It is contemplated that these projects will provide increased opportunities for employment.

Japan withdraws from International Labour Organization

The resignation of Japan from the International Labour Organization was announced on November 3 in Geneva following receipt of a letter by the Deputy Director of the International Labour Office from the Japanese Government Representative in Geneva.

This official notification stated that Japan had decided to discontinue the co-operation which it had previously maintained with the units of the League (including the International Labour Organization) in consequence of the situation which was created recently between Japan and the League of Nations by the adoption by the League Council on September 30 of a report indicating that the provisions of the Peace Treaty were applicable to Japan under Article 16 which provides as follows:—

"Should any Member of the League resort to war in disregard of its covenants under Articles 12, 13 or 15, it shall *ipso facto* be deemed to have committed an act of war against all other Members of the League, which hereby undertake immediately to subject it to the severance of all trade or financial relations, the prohibition of all intercourse between their nationals and the nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of any other State, whether a Member of the League or not."

Survey of accident risks in coal-mining

The necessity of international action aimed at reducing accident risks in coal-mining is clearly shown in studies which the I.L.O. has made on this subject for the meeting of Experts on Safety in Coal Mines, which opened at Geneva on November 21. (A report of this meeting appears elsewhere in this issue on page 1361.)

It is a well-known fact that in all countries with a coal-mining industry the accident risk in the coal mines is far higher than in any other industry; and the latest statistics available stress the seriousness of the situation.

Thus, comparisons for the year 1935, show that the rates of fatal accidents in coal-mining as compared with rates in industry, range from twice as high in Czechoslovakia and 3 times as high in Germany, to 7 times in the United States, 12 times in India and over 20 times in Japan.

Non-fatal rates in coal-mining were nearly twice as high as in industry in Germany, over twice as high in the Netherlands, 4 times as high in the United States, and 11 times as high in Japan.

During the year 1935, in coal mines, there were on the average, per 1,000 workers, more than 5 fatal accidents in Japan, more than 4 in the Union of South Africa, more than 3 in the United States and Canada, and more than 2 in Poland.

The countries with the greatest number of non-fatal accidents during the period 1927-36 were France and Japan, each with over 400 accidents annually per 1,000 workers (accidents causing disabilities lasting over four days in France and over three days in Japan).

In all countries accidents underground are naturally more frequent than on the surface.

In underground mines, falls of ground are by far the greatest cause of accidents, accounting for, according to the countries, from slightly over one-fourth to one-half of the fatal, and from one-eighth to slightly over one-third of the non-fatal accidents. Transport or haulage accidents are the second most important group of underground accidents, varying from 7 to 35 per cent of fatal and from 10 to 55 per cent of the non-fatal accidents. Other accidents are due to explosions from fire-damp and coal dust, to explosives used by miners, and to electricity.

So far as surface accidents are concerned, the group of greatest importance is that of transport accidents.

National health insurance in British Commonwealth

The situation in regard to national health insurance in the British Commonwealth was reviewed recently at a conference of members of the overseas branches of the British Medical Association held in Plymouth in a paper given by Sir Henry Brackenbury, a former chairman of the Association and a member of the advisory committee to the British Ministry of Health.

(On the invitation of the New Zealand Branch of the British Medical Association, Sir Henry Brackenbury visited New Zealand

to act in an advisory capacity in the formulation of the national health insurance plan recently established in that country and reviewed elsewhere in this issue.)

At the Plymouth Conference, this eminent British authority on health insurance set forth the chief lessons and conclusions which Canada, Australia, New Zealand and South Africa could draw from experience in Great Britain. The following summary of his paper is taken from the October 31 issue of *Industrial and Labour Information,* published by the International Labour Office:—

Misconceptions of Effect of Insurance on Medical Practice.

Proposals for national health insurance in Australia, Canada, New Zealand, South Africa, and, for that matter in the United States, had been strongly opposed by doctors. The antagonism seemed to be based on an entire misconception of the scheme in Great Britain It was often stated in the Dominions that the effect of insurance in Great Britain had been to lower the quality of the practice of general practitioners. This was not the conviction of the doctors in Great Britain, and Sir Henry was of the opinion that the effect had been, on the contrary, to raise the general standard of practice. No argument against health insurance could be drawn from its supposed ill effects in Great Britain, where, broadly speaking, the scheme was working well.

Principles of Insurance Medical Service.

Sir Henry enumerated four principles which the medical profession should insist on having observed in the organization of the insurance medical service:—

(1) The beneficiaries under the scheme should not include persons above a certain income limit.

(2) Every registered medical practitioner should have the right to take part in the service.

(3) There should as far as possible be free choice as between doctor and patient.

(4) There should be no interference by Government or any other third party in the treatment given by the doctor to his patient.

The insurance medical service should not be confined to that which a general practitioner could provide, but should preferably include the service of consultants and specialists, while its benefits might be extended to the dependants of insured persons. In any case it was necessary that the quality of the service should be good and worthy of proper remuneration. The medical profession must be ready to co-operate with the authorities in securing observance by the doctors of the standard of service which they had contracted to provide.

Holidays with pay in Great Britain

It is estimated by the British Ministry of Labour that the number of wage-earners covered by collective agreements providing for annual holidays with pay increased by about 1,000,000 between March and September, 1938. The total number is now nearly 4,000,000. This total is exclusive of the large number of salaried employees and workers on "standing" wages who are allowed holidays with pay, and of the wage-earners employed by firms who, though not parties to collective agreements, actually grant holidays with pay to their workpeople under industrial agreements.

The duration of the holiday is in most cases six or seven days. In the great majority of cases it is granted after a year's service. In the co-operative societies' agreements the holiday is increased to nine days after two years' service, and in some towns to twelve days after three years' service. In some of the agreements such as those respecting the iron puddling and tin plate industry provision is made for 1938 only.

Industrial health research in Great Britain

The eighteenth annual report of the Industrial Health Research Board, Medical Research Council (Great Britain) reviews in two parts the scope and medium of its activities. Part I deals with the results of twenty years' work, while Part II constitutes a report on the work of the current year.

By its terms of reference the function of the Board is:—

"To suggest problems for investigation, and to advise upon or carry out schemes of research referred to them from time to time by the Medical Research Council, undertaken to promote better knowledge of the relations of methods and conditions of work to functions of the human body, having regard both to the preservation of health among the workers and to industrial efficiency; and to take steps to secure the co-operation of industries in making widely known such results of this research work as are capable of useful application to practical needs."

Prefacing its survey of the results of its efforts in the past twenty years, the Board observes:—

"There is at present a stimulus to production in industry comparable in some ways to that urge of the country towards maximum output which first brought the Board into being. As increase in output is so often taken as the criterion of effective result of this or

that improvement in working conditions, the Board wish at the outset to make it clear that *they are not interested in output as such, and are interested in it only in so far as variations in output are often the sole means of measuring the effects of conditions of work.*"

The report also emphasizes that industry itself has changed within the twenty-year period since the Board began to promote and direct physiological research in the industrial field, thus:—

"The rapid advances of mechanization, together with the introduction of other conditions which tend to favour 'speeding-up'—not to mention social changes—have altered conditions of work and created a different type of worker. In modern industry, light repetition work has tended to grow at the expense of heavier work, thus putting a premium on dexterity and making demands more on temperament than on muscular strength."

Continuing its observations the report adds: "At a time, therefore, when industry may again be pressed for quick results it seems fitting to the Board, less the lesson be lost, to recapitulate what has so far been learnt."

In the main, the Board classifies the results of its investigations into groups according to whether they relate to the effects on the worker of external conditions, of the methods by which he performs his task, of his suitability for particular tasks, and of the risks of ill-health which he may run.

On this basis the Board sub-divides its investigations as follows:—

(a) *Hours of Labour.*
(b) *Environmental Conditions.*
  (1) Lighting and Vision.
  (2) Heating and Ventilation.
  (3) Noise.
  (4) Vibration.
  (5) Dust and Toxic Vapours.
(c) *Methods of Work.*
  (1) Physiology of Work.
  (2) Psychology of Work.
(d) *Vocational Suitability.*
  (1) Vocational Selection and Guidance.
  (2) Accident-proneness.
(e) *Industrial Sickness.*
  (1) Sickness Absence and Labour Wastage.
  (2) Psycho-neuroses in Industry.
  (3) Statistical Inquiries.
  (4) Specific Industrial Disease.

It is explained that though not set down in order of time when the inquiries began, the above divisions follow historical sequence to the extent that the Board's work started with hours of labour and environmental conditions, turned then towards methods of work and vocational psychology, and is now trending towards medical problems of health.

Congress of industrial organizations established

Following an unsuccessful attempt to have the convention of the American Federation of Labor declare in favour of organizing the mass production industries on an industrial basis, six international unions which had advocated this move, formed the Committee for Industrial Organization in November 1935 (LABOUR GAZETTE, December, 1935, page 1088). These six organizations were: United Mine Workers of America; Amalgamated Clothing Workers of America; International Ladies' Garment Workers Union; International Association of Oil Field, Gas Well and Refinery Workers of America; United Textile Workers of America; and International Union of Mine, Mill and Smelter Workers. In addition, officials of the International Typographical Union and the United Hatters, Cap and Millinery Workers' International Union, acting in their individual capacities and not as representatives of their unions, co-operated from the beginning in the C.I.O.

After three years of operation on this basis, during which period the number of affiliated national and international unions increased to 38 with a reported membership of 4,000,000, representatives of these bodies recommended the calling of a convention for the purpose of establishing a permanent organization. As a result of the convention—convened in Pittsburg, Pa., and attended by delegates from the United States, Canada, and the Hawaiian Islands—a new labour body was established under the name of the "Congress of Industrial Organizations."

"For the purpose of providing a permanent basis for the continued achievement and success on behalf of the workers of America, this constitution and the principles embraced therein have been adopted."

Objects.—The objects as stated in the constitution are as follows:

1. To bring about the effective organization of the working men and women of America regardless of race, creed, colour, or nationality, and to unite them for common action into labor unions for their mutual aid and protection.

2. To extend the benefits of collective bargaining and to secure for the workers means to establish peaceful relations with their employers, by forming labor unions capable of dealing with modern aggregates of industry and finance.

3. To maintain determined adherence to obligations and responsibilities under collective bargaining and wage agreements.

4. To secure legislation safeguarding economic security and social welfare of the workers of America, to protect and extend our democratic institutions and civil rights and liberties, and thus to perpetuate the cherished traditions of our democracy.

Revenues.—The revenue provisions in the constitution are:

Section 1.—Each national and international union and organizing committee shall pay on or before the 15th of each month, for the preceding month, a per capita tax of five cents per member per month.

Section 2.—Each local industrial union shall pay on the 15th of each month, for the preceding month, a per capita tax of fifty cents per member per month. The local industrial unions shall also pay to the Organization one-half of the initiation fee received by such local industrial union from its members, which payment to the Organization shall in no case be less than $1 per member.

Section 3.—The Executive Board may exonerate any national and international union, organizing committee and local industrial union from the payment of per capita tax due to the Organization for any month for the members in good standing of such affiliate who are unemployed due to strike, lock-out or other involuntary cause.

Section 4.—Each affiliate, upon the issuance of a certificate of affiliation, shall pay to the Organization the sum of $25.

Section 5.—Each industrial union council shall pay to the Organization an annual fee of $25.

Officers.—The officers elected were: President, John L. Lewis (United Mine Workers of America); vice-presidents—Philip Murray (United Mine Workers of America and Steel Workers Organizing Committee), and Sidney Hillman (Amalgamated Clothing Workers); secretary-treasurer, James B. Carey (United Electrical, Radio & Machine Workers). General offices of the organization are located at 1106 Connecticut Ave., N.W., Washington, D.C.

Vocational training in Italy under new Decree

The British *Ministry of Labour Gazette* for November contains a review of the new and centralized arrangements for the provision of occupational training courses for workers which have been instituted in Italy by a Royal Decree-Law, No. 1,380, dated June 21, 1938, promulgated on September 12, 1938. The object of these arrangements, as defined in the legislation, is "to train and develop the technical and productive capacity of the workers correspondingly with the requirements of the national economic life."

As summarized in the British *Ministry of Labour Gazette*, the courses of training to be provided are classified, first, under four main headings, *viz.*, (I) agriculture; (II) industry; (III) commerce; and (IV) banking and insurance; and, secondly, according to the grade of tuition to be provided. Thus, in industry, for example, four grades of training are to be provided through elementary, skilled, specialized, and finishing courses. Other courses may be arranged, as necessary, for specified purposes, *e.g.*, training in business administration and handicrafts, and the training of women for suitable occupations, and of subordinate workers in concerns engaged in war manufacturers. In addition, special courses of training may be instituted for unemployed persons.

The courses are to be under the control of the Ministry of National Education, and are to be organized, either directly or through specially constituted authorities, by the National Fascist Party and the Confederation of employers and workers, the latter acting in mutual agreement. For this purpose, the organizing authorities in question must submit each year to the Ministries of National Education and of Corporations their projected program of courses, together with statements establishing the need for the courses and certifying that the necessary financial resources are assured in each case. The final program of courses to be instituted each year is to be determined by agreement between the above-mentioned Ministries, after consultation with the technical education authorities. The two Ministries are also required to submit to the Central Corporative Committee special reports on the courses of training of workers.

The courses are to be held in the schools and technical education establishments in so far as these are suitably equipped; otherwise, suitable factories, business premises or institutes may be used for the purpose. The curriculum and the duration of the individual courses, attendance at which is, as a rule, to be free of charge, are to be determined by the Ministry of National Education, according to the nature of the course and the occupational activity concerned.

Officers of International Association of Governmental Labour Officials for 1938-39 Term

At the annual convention of the International Association of Governmental Labour Officials held recently at Charleston, S.C., the following officers were elected for the 1938-39 term: President, Martin P. Durkin, Director, Illinois Department of Labour; first vice-president, Adam Bell, Deputy Minister of Labour, British Columbia; second vice-president, Frieda S. Miller, Industrial Commissioner, New York State Department of Labour; third vice-president, Voyta Wrabetz, Chairman, Industrial Commission of Wisconsin; fourth vice-president, John W. Nates, Commissioner of Labour of South Carolina; fifth vice-president, E. I. McKinley, Commissioner of Labour of Arkansas; secretary-treasurer, Isador Lubin, Commissioner of Labour Statistics, United States Department of Labour.

RECENT PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT

THREE applications for the establishment by the Minister of Labour of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act were submitted to the Department of Labour during the month of November as follows:—

(1) On behalf of employees of the Security Storage Company, Limited, Winnipeg, Man., being truck drivers, helpers, warehousemen, packers, etc., members of Division No. 205, Automotive Transport Section of the Canadian Brotherhood of Railway Employees. It was stated that the dispute directly affected 53 employees, their request for an agreement respecting wages, hours and working conditions being given as the cause of the controversy. The company, however, refused to negotiate with the Canadian Brotherhood of Railway Employees on the ground that it is composed mainly of railway workers whose interests are inimical to the interests of both the Security Storage Co. and its employees. The Western Representative of the department was sent to Winnipeg in connection with this matter, and as a result of his mediation conferences were arranged between the management and a committee of the employees at which an agreement was reached.

(2) On behalf of 40 employees of the City Dray Company, Limited, Winnipeg, Man., being truck drivers, helpers, warehousemen, etc., members of Division No. 205, Automotive Transport Section of the Canadian Brotherhood of Railway Employees. This dispute related to the demand of the employees for an agreement regarding wages, hours and working conditions. An officer of the department interviewed the President of the company, who, although refusing to recognize the union, indicated his willingness to negotiate a contract with a committee of the employees and to meet such committee at any time to discuss any grievances. Meetings between the President of the company and a committee of the employees were subsequently arranged, at which the Western Representative of the department was present, and an agreement covering wages and working conditions was reached on December 1, effective for one year. The application was accordingly withdrawn.

(3) On behalf of telegraph messengers in the employ of the Canadian National Telegraphs, being members of Division No. 264, Canadian Brotherhood of Railway Employees. Changes in wages and working conditions requested by the employees are stated to be the cause of the dispute, 130 messengers being directly affected. An officer of the department is in touch with the parties concerned and will endeavour to bring about a settlement of the dispute without the necessity of Board procedure.

Board Established

It was reported in the November issue of the LABOUR GAZETTE, pages 1201-2, that the Minister of Labour was prepared to establish a Board of Conciliation and Investigation to deal with the matters set forth in an application submitted on behalf of employees of various coal mining companies at Bienfait in the Estevan district of the Province of Saskatchewan, provided a ballot of the employees established a majority in each mine in support of the application. The necessity for taking such a ballot arose from the fact that two unions, the Bienfait Local Union of the United Mine Workers of America and the Saskatchewan Mine Workers' Union, an affiliate of the Canadian Federation of Labour, had membership in the field and each claimed to have a majority of members in at least some of the mines. It was accordingly decided by the Minister to have a ballot taken to establish if the United Mine Workers of America, which had made the application, represented a majority of the employees in each or all of the mines operated by the companies named in the application. The mine operators co-operated with a representative of the department in conducting the vote, and arrangements were made with the Town Clerk of Estevan to count the ballots with the departmental officer. The result of the ballot showed 589 votes in support of the application and 37 against, while a majority in each mine indicated their desire to be represented by the United Mine Workers of America. A Board of Conciliation and Investigation was accordingly established by the Minister of Labour on November 22, and members thereof were appointed as follows: on the employees' recommendation, Mr. Angus J. Morrison, of Calgary; on the companies' recommendation, Mr. B. D. Hogarth, K.C., of Regina. Messrs. Morrison and Hogarth have been requested to confer looking to a joint recommendation for a third member who will be chairman of the Board.

Agreement Reached

An agreement was reached on November 15 between the Canadian National Railways and the Canadian Pacific Railway Company

and certain of their employees on the Montreal Wharf, being truckers, checkers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, disposing of the wages dispute which had been the subject of inquiry by a Board of Conciliation and Investigation recently. The texts of the Board's findings appeared in the November issue of the LABOUR GAZETTE at page 1203. The Board's recommendation of an increase of seven cents an hour in the wage rate for truckers, with corresponding increases for the other classes affected, had been rejected by the companies. During further direct negotiations, however, in which the conciliation services of the Department of Labour played an important role, a compromise settlement was reached providing for a wage increase of three cents an hour effective November 1, 1938.

Application Withdrawn

An application for a Conciliation Board submitted on behalf of employees of the Canadian Pacific Railway Company, comprising its unlicensed personnel in British Columbia Coastal Steamship Service, members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (LABOUR GAZETTE, November, 1938, page 1201), was withdrawn early in December, arrangements having been made for direct negotiations to take place between the manager of the steamship service and a committee of employees in the stewards' department selected from members of the union. The union had requested an agreement covering approximately 400 employees in this service. An agreement was already in effect with a committee of employees representing the deck, engine room and stewards' departments, and there appeared to be doubt as to whether a majority of the employees desired to be represented by the union. Representatives of the Department of Labour conferred with officials of the company and of the union on various occasions and later arrangements were made for the manager of the steamship service and an officer of the brotherhood to discuss the question of representation. Early in December word was received in the department indicating that upon production of evidence the manager had been satisfied that the union represented a majority of the employees in the stewards' department and had agreed to make arrangements at once to meet a committee selected by members of the Brotherhood with a view to arriving at an agreement covering wages and working conditions for the stewards' department. The employees' representative accordingly wrote the Labour Department requesting that the application be cancelled.

Report of Board in Dispute Between the Ottawa Electric Railway Company and Its Employees

A unanimous report was received by the Minister of Labour on November 12 from the Board of Conciliation and Investigation established to deal with a dispute respecting wages and working conditions between the Ottawa Electric Railway Company and approximately 380 employees, being members of Division No. 279, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. The Board was composed of His Honour Judge J. T. Mulcahy, of Pembroke, Ontario, chairman, and Messrs. A. W. Beament, K.C., and Hal J. Burns, both of Ottawa. The Board's findings have been accepted by the employees, but at the time of going to press the Ottawa Electric Railway Company has not yet indicated its attitude towards the Board's recommendations.

Following is the text of the Board's report:—

Report of Board

In the matter of The Industrial Disputes Investigation Act and of a dispute between the Ottawa Electric Railway Company (Employer) and its Employees, being members of Division No. 279 Amalgamated Association of Street, Electric Railway, and Motor Coach Employees of America (Employees).

To the Honourable
Norman McL. ROGERS,
Minister of Labour,
Ottawa, Canada.

Ottawa, Ontario, November 9, 1938.

SIR,—The undersigned members of the Board of Conciliation and Investigation established under the provisions of The Industrial Disputes Investigation Act, having, before entering upon the functions of office, taken the oath of office required by the Act and having taken

upon themselves the burden of the investigation, have the honour to report as follows:—

The application by Division No. 279 Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, hereinafter called the Employees, for the establishment of a Board of Conciliation dated the 23rd day of July, A.D. 1938, requested a renewal of a written agreement with certain modifications and changes between the Employer and the Employees, including an increase in the rate of pay. In the said application to the Minister of Labour, the Employees named as their representative on the Board of Conciliation proposed to be established, Mr. Hal. J. Burns, Barrister of Ottawa.

The Ottawa Electric Railway Company, hereinafter called the Company, by letter dated 12th day of August, A.D. 1938, to the Deputy Minister of Labour named as its representative upon the proposed Board of Conciliation, Mr. A. W. Beament, K.C., of the City of Ottawa, and proposed in answer to the request of the said Employees that wages of the said Employees should be decreased.

The Board held a preliminary meeting on the 2nd day of September, A.D. 1938, at 56 Sparks street in the City of Ottawa when the procedure to be followed at subsequent meetings of the Board was fully discussed, and prior to such meeting each member of the Board took the oath of office above mentioned. The Board has held 23 sittings on a total of 17 days, at which sessions a great deal of evidence was produced before the Board and a total of 41 exhibits were filed, 26 filed on behalf of the men and 15 filed on the part of the Company.

The Board was assisted in the presentation of the case, for the men, by Mr. M. Sinclair, representative of the International Union of the said Employees Association and by Messrs. A. Brisbois and Percy Tompkins, officers of the local Union of the said Employees. For the Company, the case was presented by Mr. Redmond Quain, K.C., assisted by various officers and officials of the Company.

It appeared from the case presented by the Employees that one of the main reasons for asking the increase is that the Company had in the year 1931 followed a minority report of a Board of Conciliation established under this Act and had put into force a cut in the hourly rate of pay of one cent for car and bus operators and a reduction in the number of hours, the total reduction in earning power being approximately 10 per cent, and a reduction of 10 per cent in the salary or wages of all other Employees affected by the award of the Conciliation Board of 1931. The Board of Conciliation of the year 1931 had been applied for by the Company specifically asking a reduction of wages and the Employees contested this request and countered with a request for an increase in their rates of pay. The majority award of the 1931 Board speaking generally was that the then existing rates of wages and hours should stand with no reduction.

A Board of Conciliation under the said Act had been appointed by the Minister of Labour in the year 1929 at the instigation of the Employees, a copy of the award of which Board has been put in as Exhibit No. 18 before us. The Employees before this 1929 Board contended that there should be an increase in the rates of pay. Amongst other reasons advanced by the Company in opposition to the request of the Employees before the 1929 Board and in support to the Company's contention then made that there should be a reduction in wages, was the fact that the Company at that time was not making enough money to justify an increase of wages, and that no dividends had been paid to the shareholders since the year 1927, and that the Company would from time to time be in need of further capital, and that the net profits of the Company for the fiscal year immediately preceding the holding of such 1929 Board were not sufficient to enable the Company to raise more capital by the sale of bonds.

After the award of the 1931 Conciliation Board, and after the cut in wages put in operation by the Company (following the minority report), the majority report having recommended no change in rates of pay or in earnings, the Company resumed payments of dividends to shareholders in the year 1934 and paid dividends of $3.20 per year at the rate of 80 cents per quarter on each share of stock (which stock is without par value) until January, 1938, when the quarterly dividend was cut in half for two quarters and in September, 1938, the Company passed its dividend entirely.

It is shown by Exhibits before us that the total of passengers carried by the Company has declined almost continuously from a high of 37 million in 1921 to 36 million in 1927, to 33 million in 1928, to 30 million in 1929, to 26 million in 1931, to 20 million in 1933. The number of passengers carried has since 1933 to date remained fairly constant at 20 to 21 million for each of the intervening years. It is proper to remark that from the evidence before us the reduction in total passengers carried is in part attributable to an increase in the Company's tariff or fare from 5 cents to 7 cents on order of the Railway Board in August, 1928, and also, later, from unregulated competition from taxis in the city of Ottawa.

This latter factor, it is said, has recently been partly obviated by the introduction of a "Metre By-law" governing taxis.

It is a fact that the annual earnings of the Company have declined from a high in 1921 of $1,800,000 to $1,600,000 in 1931, to $1,300,000 in 1933 and has remained practically at that figure from 1933 to date.

It has been shown by evidence before this Board that from 1929 until about half way through the year 1931 the cost of living fell about 12½ per cent and that from 1931 until a new low was reached in 1933, a further continuous decline in such cost took place amounting to 10 per cent. Since 1933 such cost has taken an upward turn fairly continuously until it reached the peak in January, 1938, at about 5 per cent over the low point of 1933 from which time to date such cost of living has been almost constant.

This present Board agrees that Employees are entitled to a fair living wage considering the nature of their work and it subscribes to the principle that, after Employees have received a fair living wage, the claims of capital, of the shareholders of the Company, are entitled to be met by receipt of a fair return upon their investment in the Company.

This Board does not hold the view that wages should fluctuate, upwards or downwards, because of a similar variation in the cost of living alone. There is no doubt that the cost of living is an important element to be considered in trying to arrive at that rate of wage, so difficult of precise definition, a fair living wage. Such wage should not ever be a bare living wage for an Employee and his dependents, but should be such as will enable the Employee to maintain himself and dependents in a reasonable degree of comfort.

This Board holds the view that before it can recommend the increase in wages which forms part of the Employees' request herein, the evidence before us should show that the Employees do not receive a fair living wage, and this, apart from whether capital receives a return on investment or not. The evidence before us fails, in our opinion, to establish that the rates now paid by the Company do not constitute a fair living wage. For this reason this Board cannot recommend the increase asked for.

The Board finds that no case has been made out for a reduction in pay of the Employees.

Prior Boards have considered the question of the inauguration of a pension scheme for Employees of the Company and this matter was mentioned before us. Both parties and all the members of the Board are in agreement that the inauguration of a pension scheme is in the highest degree desirable. In the past, the Company has always endeavoured to find employment in another sphere for Employees who have ceased to be capable of performing their duties in their normal sphere, but of course there are very real limits to the extent to which this system can be carried. The particular difficulty in inaugurating a pension scheme arises from the fact that such a high percentage of the employees have reached an age where they are close to retirement and we are all agreed that the cost of introducing any scheme of this kind which would be applicable to all Employees would be prohibitive. We do feel, however, that a start must be made some time and we therefore recommend that the Company in consultation with the Employees should immediately investigate the actuarial and other problems involved in the institution of such a scheme applicable to all Employees under a certain age upon a compulsory contributory basis and with a view to the introduction of such a scheme at the earliest possible moment.

In the latter stages of our enquiry, our attention was directed to the position of spare operators. We were not given sufficient evidence upon which to formulate any very definite recommendations. It does appear, however, that there is a possibility that more spare operators are required to report than the traffic justifies and that, at least in some cases, they do this without any remuneration. It is our opinion that the whole question of spare operators and reporting time should receive the immediate and most anxious consideration of the Company's management in order that any inequities which may exist may be alleviated.

A condition affecting Power Plant and Substation Employees has been shown before us which we think may not have come to the notice of the Company's officials, and for which we propose a remedy. These men work for seven days in the week except that the Power Plant men get every second Sunday off. The Board recommends that these classes of Employees should work six days per week only and that the rates of pay should be for Sub-station Employees fifty (50) cents per hour and for Power Plant Employees fifty-three and one-half (53½) cents per hour. Also that where an Employee of the Company is required to replace or substitute for a man in a higher-paid class, he should be paid at the rate of the higher-paid man.

The Board recommends that Trackmen answering emergency calls on Sundays and Holidays should be paid for time and one-half on prevailing rates of pay. Similarly we recommend that Shop-men and Shed-men on emergency work on Sundays and Holidays should be paid for time and one-half on prevailing hourly rates of pay.

We are of opinion that work performed in excess of 8 hours on all days except Sundays and legal holidays should be paid for at the rate of time and one-quarter.

The Board recommends that an agreement as to working conditions (similar to Exhibit No. 41 filed) should be prepared and signed on behalf of the Company and the Employees, such agreement to embody the findings of this Board.

The Board had also before it a request by the employees for two weeks' holiday with pay annually. We were informed that the tendency in recent years has been to grant holidays of this type to employes of local transportation systems. Exhibit 10 filed before us discloses the fact that this situation is becoming fairly general among street railways in Canada. It is our opinion that in order to earn a fair living wage, men should be required to work a reasonable time annually. That is to say, an Employee is entitled to some annual holiday taken under conditions which do not prejudice his ability to earn a fair annual wage. The evidence before us discloses that some at least of the operators obtain this holiday by taking leave, to which the Company does not object, but of course the operators draw no pay during this period. The evidence also discloses that among Employees other than operators, a very great many work 52 weeks in the year. We do not consider this to be a satisfactory situation in the interests of either the Company or of the Employees. Consequently, we are all of opinion that steps should be taken to rectify it. We feel that the period of two weeks asked by the Employees is excessive under all the circumstances and we feel that the right to holidays should be hedged by reasonable restrictions. We therefore recommend that all Employees who have been continuously in the employ of the Company for a period of five years or more and who have worked for at least 2,000 hours in the 11 months preceding their application for leave should be granted six days' leave with pay in each calendar year.

We believe that the other recommendations in this report should be brought into effect forthwith, but that the recommendation with regard to holidays with pay should be brought into effect during, and should be applicable to, the calendar year 1939 and ensuing years.

We have been much impressed throughout by the high calibre of the Employees of this Company and the very evident feeling of goodwill and mutual confidence which exists between the Company and its Employees. We have no doubt that the Company will continue to receive the loyal and honest service of its Employees, who, if one can judge from the record of lengthy service proven before us, must be Employees of the most satisfactory and reliable type. We trust that both parties to this arbitration, recognizing that their interests are mutually interlocked, will accept all the recommendations in this report and that we may have been successful in establishing a basis which will preclude the necessity of Boards of Conciliation in the future relations between this Company and its Employees.

All of which is respectfully submitted.

JOHN T. MULCAHY,
Chairman.

H. J. BURNS.
Employees' Representative.

A. W. BEAMENT,
Employer's Representative.

Report of Board in Dispute Between Hendrie and Company, Limited, and their Motor Truck Drivers

Settlement of a dispute between Hendrie and Company, Limited, Toronto, and their motor truck drivers, members of the Canadian Brotherhood of Railway Employees, respecting wages, hours and working conditions was reported to the Minister of Labour on December 3 by a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act. The Board, composed of Professor Kenneth W. Taylor, of McMaster University, Hamilton, chairman, and Messrs. H. A. F. Boyde, of Hamilton, and J. L. Cohen, K.C., of Toronto, was successful in bringing the disputing parties into agreement on the various points at issue and the memorandum of settlement is incorporated in the Board's report. The principal concessions are provision for payment for work done in excess of regular working hours and the inclusion of a seniority clause.

Following is the text of the Board's report:—

Report of Board

The Honourable the MINISTER OF LABOUR,
Ottawa.

Re Industrial Disputes Investigation Act and re differences between Hendrie and Company, Limited, Toronto, and their motor truck drivers, members of the Canadian Brotherhood of Railway Employees.

SIR,—The Board of Conciliation and Investigation appointed by you in the above matter

commenced its sittings on November 5, 1938, and is pleased to be able to submit to you a unanimous report.

History of the Dispute

The formal application for the establishment of this Board was made by the Union on March 29, 1938, and the statement in reply by the Company was made on April 4, 1938. The demands of the Union related to the wages, hours and conditions of work of about 100 men employed as motor truck drivers in the cartage business in Toronto of Hendrie and Company, Limited, a company with head office in the city of Hamilton. The Union also asked for a written agreement with the Company. The Company in its reply set out in brief compass the existing conditions relating to wages and hours and certain other matters. It was willing to recognize the Canadian Brotherhood of Railway Employees as representing its employees, but was not willing to sign a written agreement with the Union.

Through the efforts of the Conciliation Officers of the Department of Labour, and with the mutual consent of both parties, direct negotiations were resumed and progressed for several months. As a result of those efforts the differences between the Company and the Union were narrowed down by the time the Board was finally constituted on October 28, 1938.

The Work of the Board

In accordance with Section 24 of the Act the Board endeavoured to bring about a voluntary settlement by further mediation and conciliation, and it is pleased to report that these efforts were entirely successful.

The Board held a number of sittings in the nature of conferences with both parties. Sessions of the Board were held in Toronto on the 12th of November, in Hamilton on the 15th of November, and again on the 18th of November with the parties present. The employees were represented by E. Robson, General Representative of the Canadian Brotherhood of Railway Employees; George McIntosh, an employee of the Company and chairman of the local committee, and James Williams, an employee of the Company and a member of the local committee. The Company was represented by William Hendrie, Vice-President; George C. Hendrie, resident Director in Toronto, and C. A. Miller, Secretary of the Company. Other sessions of the Board were held on the 5th of November and on the 23rd of November; in the first instance for the purpose of organization of the Board, and in the second instance for the purpose of completing its report.

As a result of these proceedings the Board was able to bring about and have reduced to writing a memorandum of settlement which was accepted by both parties. The document setting out this settlement was prepared after constant consultation with the parties concerned and was finally approved of by them and authority given to the Board to issue the same as the text of the settlement of the dispute. The memorandum of settlement so agreed upon and accepted by the parties is as follows:—

MEMORANDUM OF SETTLEMENT OF DIFFERENCES BETWEEN HENDRIE AND COMPANY, LIMITED, AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES.

1. Employees shall not be discriminated against for membership in the Brotherhood, nor for serving on committees representing the employees. Provided however that members of the Brotherhood shall not discriminate against non-members of the Brotherhood.

2. Employees will, within reason, be granted necessary leave of absence without pay to serve on committees representing the employees, or to attend meetings of the Brotherhood.

3. Seniority lists shall be prepared of all employees and in the event of reduction of staff or re-hiring or distribution of work, such reduction of staff or re-hiring or distribution of work shall, so far as is practical having regard to merit and ability, be in accordance with the seniority of employees.

4. In the event of the dismissal or suspension or discipline by loss of time of any employee, or in the event of any other dispute or grievance relating to or affecting the carrying out of this memorandum of settlement, two representatives of the employees shall be afforded full opportunity to examine any charges against such employee and to offer all evidence, representation or argument on his or their behalf. In the event of any such question not being settled directly with the resident management the same shall be referred to a Board of Adjustment, which it is hereby agreed to set up, composed of three representatives of the Company and three representatives of the employees.

5. Employees required to work on Sunday will be paid pro rata rates of pay for all time on duty with a minimum of four hours.

6. Employees will not be required to suspend work during working hours for the purpose of absorbing overtime, nor suspend work without pay during the period their trucks are being serviced or repaired, except where such repairs are necessitated by the negligence of the employee, and provided that work and equipment are available.

7. Employees required to work on statutory holidays will be paid extra at pro rata rates of pay.

8. In computing broken time for employees, the calendar days of the month, exclusive of Sundays, shall constitute a basic month for such employees.

9. The following provisions as to rates of pay and hours shall apply:

Truck drivers entering the service of the company shall be engaged at the minimum rate of $95 per month, and thereafter on becoming sufficiently qualified, in the first instance in the opinion of the management, but subject to the provisions of paragraph 4 if such opinion is objected to by, or on behalf of any employee affected, at the rate of $100 per month, and then, according to the type of vehicle which the employee is driving, increased to a maximum of $110 per month.

Fifty-four (54) hours' work performed over a period of at least six days per week shall constitute a week's work, but employees working fifty-two (52) hours in a period of at least six days in a week shall be entitled to receive a full week's pay. An employee

(*a*) working more than ten hours on any week day or after 2 p.m. on Saturday, or

(*b*) working more than 54 hours in any one week shall be paid for such extra time at the pro rata rate of his wage. Any extra time paid under clause (*a*) shall be deducted from any overtime rate payable under clause (*b*).

10. Employees will be allowed to erect notice boards at the various garages, same to conform to the general surroundings and the Brotherhood hereby takes responsibility for what appears thereon.

11. This memorandum of settlement shall come into effect on December 1, 1938, and shall remain in effect until revised by mutual agreement, or terminated on thirty days' notice from either party.

Conclusion

In the course of the discussions leading up to this settlement it was common ground that the Company has had a creditable record as an employer. In concluding the Board desires particularly to record its appreciation of the full co-operation and the spirit of courtesy and fairness which characterized the attitudes of both parties and of all persons who appeared before it in these negotiations.

All of which is respectfully submitted.

(Sgd.) K. W. TAYLOR, *Chairman.*
(Sgd.) J. L. COHEN, *Member.*
(Sgd.) H. A. F. BOYDE, *Member.*

HAMILTON, ONTARIO, November 23, 1938.

Canadian Pulp and Paper Industry, 1937

In a preliminary report on the pulp and paper industry in Canada during 1937 issued by the Dominion Bureau of Statistics, it is stated that the gross value of wood-pulp and paper produced in Canada in 1937 was $226,255,915, an increase of 22·2 per cent in value over 1936 and 83·3 per cent over 1933 when production was at its lowest level. It is pointed out however, that despite the increase in value in 1937 it is still 7·3 per cent below the peak of 1929.

The total employment on salaries and wages in pulp and paper mills in 1937 was 32,101 and the total payroll was $48,757,795 as compared with 30,054 in 1936 with salaries and wages amounting to $40,063,852 equal to increases in employment and in payroll of 6·8 per cent and 21·7 per cent respectively.

The total capital invested in the manufacturing part of the industry in 1937 was $570,352,287 compared with $539,350,001 in 1936, an increase of 5·7 per cent. Only capital invested in operating mills is included in these totals. The greatest increase in capital investment in the industry occurred in the province of Quebec.

68911—2½

Home Improvement Loans in November

According to figures recently released by the Hon. Charles A. Dunning, Minister of Finance, home improvement loans numbering 3,088 and amounting to $1,201,957.99 in value were reported to the Department of Finance during November. This brings the total number of loans to 58,908 and the amount to $23,521,504.50 as at November 30, 1938. An increase of approximately 6 per cent in both the number of loans and the amount of loans in the last three months is reported compared with the corresponding period of 1937.

In Ontario an increase during November of 1,749 loans and of $670,147.48 in the amount of loans brings the total for that province to over eleven millions of dollars. Quebec, with an increase of 391 loans for $201,493.09, shows a total of 8,934 loans for $4,495,814.95. Alberta stands in third place in amount of loans for the month, British Columbia coming third, however, in number of loans.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1938

THE following table shows the number of disputes, workers involved and time loss for November, 1938, as compared with the previous month and the same month a year ago.

Date	Number of disputes	Number of employees involved	Time loss in man working days
*Nov. 1938	7	392	3,150
*Oct. 1938	31	3,146	18,122
Nov. 1937	27	6,277	42,007

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees, are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review. Each month, however, any such disputes reported are mentioned in this article as "minor disputes."

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

The number of disputes, the number of workers involved and the time loss in man working days in November were the lowest recorded in any month since the beginning of 1936. None of the disputes involved a large number of workers for any considerable period. The most important disputes were those involving leather goods workers in Montreal and lime plant workers at Blubber Bay, B.C., both of which were carried over from October. In October there was considerable time loss due to strikes in coal mines in Alberta, Saskatchewan and Nova Scotia and to strikes of automobile and automobile parts workers at Windsor, Ont. In November, 1937, most of the time loss was due to strikes of coal miners in Nova Scotia, New Brunswick and Alberta, abattoir and meat packing employees in Montreal, and rubber factory workers at Kitchener.

Five disputes, involving 297 workers, were carried over from October, including the dispute of winery employees in one establishment at Toronto, Ont., which commenced October 3, 1938, but was not reported to the Department in time for inclusion in the November issue of the LABOUR GAZETTE. The strike of building labourers at Sydney River, N.S., recorded in the LABOUR GAZETTE as unterminated at the end of October has since been reported as terminated on October 27. Two disputes commenced during the month. Of these seven disputes in the record for November three were terminated during the month, one resulting in favour of the employer involved and two in favour of the workers. At the end of November, therefore, there were four strikes and lockouts on record, namely: winery employees, Toronto, Ont.; leather goods workers, Montreal, P.Q.; lime plant employees, Blubber Bay, B.C., and bakers and helpers, Vancouver, B.C.

The record does not include minor disputes such as are defined in a previous paragraph, nor does it include disputes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to seven such disputes, namely: motion picture projectionists, Toronto, Ont., July 11, 1932, two employers; coastwise longshoremen, Vancouver, B.C., November 23, 1936, several employers; meat packing employees, Vancouver, B.C., December 29, 1936, one employer; beverage dispensers, Toronto, Ont., March 4, 1937, one employer; dairy employees, Toronto, Ont., September 17, 1937, one employer; cotton factory workers, St. Gregoire de Montmorency, P.Q., July 11, 1938, one employer; and lithographers, London, Ont., August 31, 1938, one employer.

Disputes involving men on unemployment relief work who are not paid wages but receive subsistence or allowances for which work is performed or may be required are not included in the record, no relation of employer and employees being involved.

A minor dispute involved 7 truck drivers in a cessation of work in Toronto for 3½ hours on November 4. The employees are members of the Canadian Brotherhood of Railway Employees, local 243 (Automotive Section) and were employed by a motor express company. They demanded an agreement with the same wages and working conditions as in agreements signed with other employers in May, 1938, and work was resumed when this was conceded.

Employees in one establishment in Vancouver manufacturing brass signs, seals, stencils and rubber and metal stamps became involved in a dispute with the employer owing to a demand for a union agreement. The employees were members of the International Jewelry Workers' Union. Six men ceased work on November 17 for one day and a half but stated they were not on strike. Negotiations were held up pending discussions with other employers and it was stated the matter would

probably be referred to a Board under the British Columbia Industrial Conciliation and Arbitration Act.

The following paragraphs give particulars regarding certain disputes in addition to the information given in the tabular statement.

Disputes in Progress Prior to November

WINERY EMPLOYEES, TORONTO, ONTARIO.—Employees, members of the Wine Workers Federal Union, in one establishment manufacturing wine ceased work on October 3, against the employment of additional help stating that the existing staff was on short time. A settlement was not reported by the end of the month. An agreement between the company and its employees expired on November 14. Information as to the commencement of this dispute was not received in time for inclusion in the November issue of the LABOUR GAZETTE.

LEATHER GOODS WORKERS (HANDBAGS, ETC.), MONTREAL, P.Q.—This dispute was reported as unterminated at the end of November,

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1938*

Industry, occupation and locality	Number involved		Time lost in man working days	Remarks
	Establishments	Workers		
(a) Strikes and Lockouts in Progress Prior to November, 1938†				
MANUFACTURING—				
Tobacco and Liquors—				
Winery employees, Toronto, Ont.	1	9	234	Commenced Oct. 3, 1938; against hiring additional employees while present staff working only part time; unterminated.
Fur, Leather, etc.—				
Leather goods workers (handbags, etc.), Montreal, P.Q.	1	48	1,250	Commenced Oct. 8, 1938; for closed shop union agreement with increased wages, reduced hours, etc.; unterminated.
Miscellaneous Wood Products—				
Furniture factory workers, Hanover, Ont.	1	101	101	Commenced Oct. 25, 1938; for payment of union dues by assistant foreman and against refusal to meet shop committee; terminated Nov. 1; conciliation (provincial); in favour of workers.
Non-Metallic Minerals—				
Lime plant workers, Blubber Bay, B.C.	1	104	1,000	Commenced June 2, 1938; *re* application of conciliation board (provincial) award as to reinstatement of certain employees; unterminated.
SERVICE—				
Business and Personal—				
Restaurant employees, Toronto, Ont.	3	35	105	Commenced June 15, 1938; against discharge of workers alleged to be for union activity; terminated Nov. 3; conciliation (provincial); in favour of employer.
(b) Strikes and Lockouts commencing during November, 1938				
MANUFACTURING—				
Vegetable Foods, etc.—				
Bakers and helpers, Vancouver, B.C.	1	13	214	Commenced Nov. 11; for union agreement with restoration of union wages etc.; unterminated.
Bakery workers and drivers, Port Arthur and Fort William, Ont.	14	82	246	Commenced Nov. 27; for closed shop union agreement with increased wages and reduced hours; terminated Nov. 30; conciliation (municipal) in favour of workers.

*In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

†The strike of building labourers at Sydney River, N.S., on October 24 was terminated on October 27.

mediation by provincial officials not having resulted in a settlement. Apparently some of the strikers have been replaced.

FURNITURE FACTORY WORKERS, HANOVER, ONTARIO.—As noted in the November issue of the LABOUR GAZETTE this dispute was terminated as a result of conciliation by the Ontario Department of Labour. It was agreed that the assistant foremen would pay union dues and an agreement between the management and representatives of the employees was signed to be in effect until March 1, 1940. It provided that the management would confer with the shop committee in regard to any dispute and that there would be no strike until there had been three conferences within six days and that there would be no discrimination against union members or action to prevent employees joining the union. The employees are members of the National Union of Furniture Workers, affiliated with the All Canadian Congress of Labour.

LIME PLANT WORKERS, BLUBBER BAY, B.C.—This dispute in progress since June was unterminated at the end of November. A settlement had not been reached in October as a result of negotiations carried on through the chairman of the Board under the Industrial Conciliation and Arbitration Act which had dealt with the dispute before the strike. Four men were found guilty of unlawful assembly, and two of the four on charges of rioting also, and ten were to be tried in December. The charges were made as a result of a clash involving pickets, strike breakers and police in September.

RESTAURANT EMPLOYEES, TORONTO, ONTARIO.—A settlement of this dispute involving employees in three restaurants since June 15 was reached on November 3. Under the settlement a number of the strikers were to be re-engaged immediately and the remainder except ten would be taken back from time to time as required. The strike, involving members of the Hotel and Restaurant Employees' International Alliance and Bartenders International League, was in protest against the discharge of certain workers, alleged to be for union activity. The employing company stated that employees had been advised that they were free to belong to the union but that there was to be no intimidation or coercion of employees while on duty, and that the employees had been laid off due to revised operating hours, not for union membership. In June and again in August, the Ontario Department of Labour had attempted to bring about negotiations at the request of the union but the company had refused. A committee of social workers and clergymen also attempted to bring about a settlement in August but the company refused mediation on the ground that the attitude of the union made it impossible. In September a representative of the union in Toronto, accompanied by union representatives in New York, where there was a union agreement with the company, met head office officials in New York. The proposals of the company were not accepted by the union but on October 25 the company reported these proposals to the Ontario Department of Labour with a statement that the offer still stood. A settlement was reached on this basis and the strike was called off on November 3. A number of the strikers had been replaced and several appear to have secured work elsewhere during the strike.

Disputes Commencing during November

BAKERS AND HELPERS, VANCOUVER, B.C.—A number of employees, members of the Bakery and Confectionery Workers' International Union of America, in one establishment, ceased work on November 11, demanding increased wages and improved working conditions. An agreement with the union had expired on May 31 and the employer had refused to renew it and apparently lowered wage rates. After conciliation by an official of the provincial Department of Labour the dispute was referred to a Board under the British Columbia Industrial Conciliation and Arbitration Act. A majority report made on October 17 recommended the wages and conditions as under the union scale but the employer refused to accept this. The union picketed the ten retail stores of the baking company and it was reported that the company had notified the union that it would seek an injunction restraining the union from picketing and enter suit for damages.

BAKERY WORKERS AND DRIVERS, PORT ARTHUR AND FORT WILLIAM.—Employees of 14 bakery establishments ceased work on November 27 demanding a closed shop union agreement with increased wages and reduced hours. The employees are members of the Bakery and Confectionery Workers' International Union of America. Several of the bakeries were reported to have signed agreements with the union on the following day. A settlement was reached on November 30 following conciliation by an alderman. The agreements provide for 54 hours per week with wages at $23 to $25 per week for various classes of bakers, $16 for helpers and wrappers, $29 for foremen, $15 per week plus commission for drivers with a guaranteed minimum of $20 per week.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND OTHER COUNTRIES

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March issue, in the review of Strikes and Lockouts in Canada and Other Countries, 1937. The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919 in the several countries for which such figures were available. Many countries publish these statistics only once each year, the figures being issued in some cases after an interval of as much as two years, and for such countries the figures are not for relatively recent dates. Statistics given in the annual review and in the monthly articles are taken as far as possible from the government publications of the various countries concerned. Information as to particular disputes is obtained for the most part from newspaper reports which at times are uncertain or incomplete.

Great Britain and Northern Ireland

In Great Britain the *Ministry of Labour Gazette* publishes statistics dealing with all strikes and gives some details in regard to the more important ones. These details which are published after investigation, do not always agree with the information given earlier in the press.

The number of strikes beginning during October was 64 and 11 were still in progress from the previous month making a total of 75 during the month, involving approximately 23,000 workers with a resultant time loss of 90,000 man working days.

Of the 64 strikes which began during October, 10 arose out of demands for increases in wages, and 9 were over other wage questions; 6 arose over questions of working hours, 23 arose over questions regarding the employment of particular classes or persons, 9 were over other questions respecting working conditions and 7 were over questions of trade union principle.

Final settlements reached during October numbered 60. Of these 14 were settled in favour of the workers, 33 were settled in favour of the employers and 13 resulted in compromises. In the case of three other disputes work was resumed pending negotiations.

The strike which involved the largest number of workers during October was that of 3,900 railway employees at various London stations and depots (LABOUR GAZETTE, November, 1938, page 1225). The strike occurred on October 10, as a result of the non-payment of union dues by one employee. On October 15 the strikers returned to work on the advice of their union officials.

On October 12, 1,603 fitters, turners and other workers employed in aircraft production at Belfast ceased work in protest against the employment of platers on work claimed by the fitters. Work was resumed the same day under conditions existing prior to the stoppage.

At London, 1,600 building trade workers went on strike, demanding the reinstatement of a discharged carpenter, and the dismissal of the foreman who was alleged to be responsible for his discharge. The workers also demanded payment of wages for time lost through the dispute. The carpenter was reinstated in accordance with findings of the Joint Emergency Disputes Commission. The other demands were dropped and work was resumed on October 15.

A strike of carpet weavers, creelers, pickers, etc., employed by a carpet manufacturing firm at Kidderminster began on October 18 due to a claim by the weavers for compensation for extra work resulting from an alleged shortage of creelers and to other alleged grievances concerning wages, working timing, etc. The number of workers directly and indirectly involved was estimated at 800. Work was resumed on November 9, when the strikers accepted an offer giving the weavers extra pay in the absence of a creeler and adjusting certain other matters in dispute.

A strike of 750 female workers employed in gutting and packing herrings at Lowestoft occurred on October 24 when the workers refused to handle fish caught on Sunday and demanded an increase of 2s. 6d. per week. Work was resumed the following day under conditions existing prior to the strike.

Belgium

The monthly labour review of Belgium reports seven strikes as beginning during July which with nine unterminated at the end of the previous month made a total of 16 strikes in progress. The number of workers directly involved was 3,280 and the resultant time loss was 20,584 man working days. During the month 13 strikes were settled; four in favour of the workers, seven in favour of the employers and three ended in compromises. Various questions connected with wages were listed as causing 10 of the 16 strikes in progress.

France

During October the government of France obtained from Parliament emergency powers for the issue of decrees designed to improve national finances and increase production. Early in November fifty-eight such decrees were published. One of the most controversial, was that which extended the forty-hour week, established in 1936, to from 44 to 50 hours.

About November 20 strikes in protest against these decrees broke out in the Lille district where about 50,000 metal workers and coal miners ceased work, in some cases remaining in the mines and factories. On November 24 the strike spread to the Paris district, one of the largest being that of employees of an automobile and small arms plant at Billancourt, reported to number over 30,000, a number of whom refused to leave the plant until compelled to do so by a military force.

On November 25, the General Confederation of Labour, representing about 5,000,000 trade unionists, called for a 24-hour strike to take place on November 30, in protest against the decrees. The government, as in the case of a railway strike in 1910, requisitioned the railways making interference with railway operation a crime. Later military control was extended to subways, buses, gas, water, light, mail, telegraph and telephone services. Strikers in these categories were warned that they would be liable to court martial. Troops were also concentrated at various points in Paris and throughout the country to aid police authorities, should they be required.

On November 30 large numbers of workers refrained from working but the great majority did not and although there were numerous interruptions to industry these did not reach the proportions of a nation-wide general strike. There were numerous arrests and dismissals of strikers but following the failure of the general strike the government announced a policy of "appeasement" and it appeared probable that sentences would not be severe. By December 7, it was reported that conditions in the metal industry in northern France, where the strikes had been most severe, had become almost normal.

Protesting against the dismissal of 60 workers on a steamship at Le Havre, who had taken part in the general strike, about 2,000 workers on various ships together with about 1,500 dock workers ceased work on December 2. The government took steps to have this work carried out by others, and one of the ships involved sailed on December 7 manned partly by strike breakers and naval technicians.

New Zealand

A report recently published by the Census and Statistics Department of New Zealand, gives statistics in regard to strikes during the first six months of 1938. The number of disputes was 39, involving 5,078 workers, employed by 55 firms. Time loss amounted to 12,796 man working days, and the approximate loss in wages was £12,538. During the corresponding period in 1937, there were 29 disputes, involving 5,908 workers, with a resultant time loss of 13,318 man working days.

United States

Preliminary estimates of strikes in September, 1938, which as the Bureau of Labour Statistics points out, are based on "scattered information from the newspaper and other sources and are subject to revision as more definite reports are received" show 190 strikes as beginning during the month, which with 140 unterminated at the end of August, made a total of 330 in progress during the month. The number of workers involved in these disputes was 140,000 and the resulting time loss was 1,150,000 man working days. The comparable figures for the previous month which have been partially revised but are not final, show that there were 355 strikes in progress, involving 70,000 workers with a resultant time loss of 810,000 man working days.

On November 21, 500 members of the Livestock Handlers Union No. 567, an affiliate of the Congress of Industrial Organizations, ceased work at the Chicago stockyards, demanding a 40 hour week, time and a half for overtime, a wage increase for 65 men getting less than 62½ cents per hour, a written contract, a closed shop and a checkoff of union dues. Negotiations had been going on prior to the strike but members of the union claimed that their officials were being intimidated and that the negotiations were being unduly prolonged. Members of the Livestock Handlers Union No. 517, which is affiliated to the American Federation of Labor and has a membership of about 200, did not join in the strike but despite the fact that they stated they would go to work, they did not do so, the probable reason being that by the time they were ready to do so receipts of live stock had practically ceased, shipments having been diverted to other points, or direct to packing plants. The federal government sent a conciliator and the Mayor of Chicago also took part in negotiations. On December 4, the strikers voted to return to work pending further negotiations which were to be completed within ten days. During the strike stockhandlers employed by a large packing

company ceased work for a day at the company's plants in Chicago and East St. Louis in sympathy with the stockyard strike.

On November 11, about 1,400 out of a force of 2,000 employees of an automobile parts plant in Detroit ceased work in protest against the dismissal of two men for alleged union activity. The consequent shortage of doors caused a large automobile factory to close down and about 8,000 of its employees were temporarily out of work. Work was resumed on November 14 when a settlement was reached between the United Automobile Workers and the company manufacturing the doors. The terms of the settlement were not reported in the press.

On November 30, a strike of about 50 men demanding wage increases in an automobile factory at Detroit caused the shutdown of a plant employing about 14,700 men for one or two days. It was reported that after the strike was settled certain members of the United Automobile Workers requested the employers to penalize four of the men who had been responsible for the strike and the consequent stoppage.

A similar strike occurred at Flint, Michigan, on December 2, when members of the United Automobile Workers employed by an automobile body plant, reported to number between 6,000 and 7,000, struck for higher wages. This strike affected about 25,000 in other plants. The men agreed to resume work on December 6 but threatened to resume the strike if negotiations were not proceeding satisfactorily within three days.

Union Wages and Hours in the Building Trades in U.S.A.

About 57 per cent of the workers in the building trades covered by union agreements had higher hourly rates of pay on June 1, 1938, than on May 15, 1937, according to statistics in the November issue of the *Labor Information Bulletin*, published by the United States Department of Labor. Rates of pay for the other skilled and unskilled union workers in the building industry remained virtually unchanged. Widespread increases in rates of pay, most of which occurred from June to September, 1937, resulted in a 9 per cent rise in the Bureau of Labor Statistics index of hourly union rates for building-trades workers and brought the index to its highest point on record. At the same time hours of work declined nearly 2 per cent to an average of 38·5 hours per week—the lowest recorded.

Union wage rates and hours of work for the various skilled crafts and helpers and labourers in the building trades are surveyed each year by the Bureau of Labor Statistics. This year's survey, based upon agreements in effect on June 1, 1938, covered approximately 440,000 building-trades workers in 72 cities scattered throughout the United States.

For all union journeymen combined the union hourly rate on June 1, 1938, averaged $1.46½. Wide variations ranging from 55 cents per hour for union painters in Charleston, S.C., to $2.50 per hour for bucket-hoist operators in New York City, were revealed in the agreements surveyed. Sixteen trades reported scales of $1.50 or more for over half of their membership, and four crafts—bricklayers, lathers, marble setters, and plasterers—had agreements calling for wage scales of $1.60 or more per hour for a majority of their members. Twenty-eight per cent of the plasterers, 21 per cent of the electricians, 17 per cent of the steam and sprinkler fitters, 15 per cent of the engineers, 13 per cent of the plumbers and gas fitters, and between 5 and 10 per cent of the lathers, sheet-metal workers, and structural-iron workers had rates of $2 or more per hour.

Weekly Hours.—Seventy per cent of the union journeymen covered by the Bureau's study worked under agreements stipulating 40 hours as the normal work week. Eighteen per cent of the journeymen had a 35-hour work week and about 10 per cent were covered by union agreements calling for a 30-hour week. Nearly three-fourths of the skilled union workers were covered by an overtime clause specifying pay at twice the regular hourly rate for work performed in excess of the normal weekly hours of work.

More building-trades journeymen were covered by union agreements calling for a work week of less than 40 hours in June, 1938, than on May 15, 1937. Among the various trades, slightly more than one-half of all union journeyman granite cutters, painters, and plasterers worked under agreements specifying a 35 or a 30-hour week. About 13 per cent of the machinists, 6 per cent of the sign painters, and 5 per cent of the elevator constructors reported a 44-hour normal week, and a small number of portable and hoisting engineers and composition and slate and tile roofers had agreements to work 48 hours per week.

Approximately two-thirds of the union helpers and labourers in the building trades worked under 40-hour week agreements, 22 per cent under agreements providing more than 40 hours, and 13 per cent had less than a 40-hour work week.

ANNUAL REPORT OF THE DOMINION DEPARTMENT OF LABOUR

Administrative Activities During the Fiscal Year Ending March 31, 1938

IN his report on the work of the Dominion Department of Labour for the fiscal year 1937-38 the deputy minister, Mr. W. M. Dickson, surveys departmental activities during the year in connection with the administration of the following legislation: Labour Department Act; Conciliation and Labour Act; Fair Wages Policy of the Government of Canada (as set forth in Orders in Council passed in 1922, 1924 and 1934 and in The Fair Wages and Hours of Labour Act, 1935); Industrial Disputes Investigation Act; Government Annuities Act; Employment Offices Co-ordination Act; Technical Education Act; Combines Investigation Act; The National Employment Commission Act, 1936; and The Unemployment and Agricultural Assistance Act, 1937. The report also reviews the department's discharge during 1937-38 of its duties arising out of Canada's membership in the International Labour Organization.

Economic Recovery During 1937

The deputy minister points out in the introduction to his report that throughout the spring, summer and autumn of 1937 economic conditions in Canada registered steady improvement, although a decline occurred in the final months of the period under review. During the latter months of 1937 the indices of industrial production, physical volume of business and industrial employment rose to figures higher than those recorded in any month since 1929. The percentage of unemployment among trade union members in the Dominion likewise dropped to a new low for the period since 1929. Wage rates continued to rise in 1937 and the cost of living advanced about 2·5 per cent during the fiscal year. As an accompaniment to economic recovery in 1937 there was a marked increase in the number of strikes and lockouts, as well as in the number of workers involved and the loss of working time. One-half of all the time loss during the year occurred, it is reported, in disputes in which the principal point at issue was union recognition.

Labour Organization in Canada

An outstanding development during the period under review, observes the deputy minister, was the marked increase in trade union membership throughout the Dominion. The 1937 figures for total membership, 384,619, and number of local unions, 3,258, are higher than those recorded in any previous year. Striking progress was made during the year, it is pointed out, in the organization of workers in many industries hitherto largely unorganized.

Conciliation and Investigation

In his capacity of Registrar of Boards of Conciliation and Investigation, the deputy minister reports that during 1937-38 the Department of Labour continued to render conciliation services in industrial disputes. In addition to the work preformed by the departmental conciliation staff, 34 applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were dealt with during the year. Seven boards were established, three of which dealt with two, three and five applications, respectively. In no case were the findings of a board followed by an interruption of work.

Fair Wages Policy

During the fiscal year under review the Department of Labour prepared fair wages conditions for insertion in 703 building and construction contracts proposed to be executed by other government departments. Of this number, 489 contracts, involving an expenditure of some $13,689,686, had been awarded up to March 31, 1938. Numerous investigations were also made by the departmental fair wages officers for the purpose of enforcing compliance with the labour conditions inserted in the aforementioned contracts and in contracts for the manufacture of governmental supplies and equipment.

Canadian Government Annuities

The deputy minister reports that during 1937-38 a total of 5,724 Canadian Government Annuity contracts were issued, the total purchase money received in the same period being $13,550,483.22. Between September 1, 1908, and March 31, 1938, a total of 42,623 contracts had been issued, and on the latter date 39,015 were still in force. The total amount o purchase money received during the same period was $115,109,178.17.

Employment Service of Canada

For the twentieth year the Department of Labour co-operated with the provinces in maintaining the Employment Service of Canada. Uniform agreements were concluded with all the provinces except Prince Edward Island and the statutory grant of $150,000 was distributed among the participating provinces in proportion to their expenditures on public

employment office administration and operation. The offices of the Employment Service reported a total of 388,396 placements for 1937-38.

Technical Education

During the fiscal year under review the province of Saskatchewan received the balance of its original appropriation under the provisions of the Technical Education Act. On March 31, 1938, a credit remained only to the province of Manitoba, which will continue to be reimbursed for expenditures up to that amount, $302,339.23, on a fifty-fifty basis, provided that the amount is earned by March 31, 1939, when the present extension of the statute expires.

Combines Investigation

Early in 1937-38 the administration of the Combines Investigation Act again came under the authority of the Minister of Labour, after having been entrusted to the Dominion Trade and Industry Commission since October 1, 1935. Investigations made during the year related to a wide variety of trade practices and dealt with complaints in connection with production and wholesale and retail distribution of a number of classes of commodities.

International Labour Organization

The deputy minister reports that Canada was represented at the world tripartite technical conference on the textile industry held under the auspices of the International Labour Organization in Washington, D.C., April 2 to 17, 1937, and at the twenty-third session of the International Labour Conference in Geneva, Switzerland, June 2 to 24, 1937, at which the decision was made to place on the agenda of the 1938 session the question of the generalization of the reduction of hours of work in all economic activities not covered by conventions already adopted.

National Employment Commission

During the fiscal year the National Employment Commission submitted its final report to the Minister of Labour, who announced the dissolution of the commission on February 2, 1938. The national registration and classification of the unemployed on relief, inaugurated by the commission in September, 1936, has been continued by the Department of Labour.

Unemployment and Agricultural Assistance

Throughout the period under review the Dominion Government continued its policy of supporting and supplementing the efforts of the provinces to discharge their responsibilities with regard to the alleviation of unemployment and agricultural distress and of granting them financial assistance in this connection where necessary. During 1937-38 the Dominion contributed approximately $19,500,000 to the provinces by way of grants for material aid (food, clothing, fuel and shelter) and disbursed some $4,500,000 under agreements providing for Dominion contribution to approved provincial relief works projects. More than 55,000 unemployed young people were afforded training under the Dominion-provincial youth training program and over 47,000 placements were effected under the Farm Employment and Improvement Plan. Administration of Dominion appropriations for assistance in the drought areas of the Prairie Provinces was transferred on September 1, 1937, from the Department of Labour to the Department of Agriculture, in accordance with a recommendation of the National Employment Commission that agricultural aid should be distinguished as far as possible from unemployment aid. The report shows that the number of persons assisted throughout the Dominion during 1937-38 was considerably less on the average than in the previous fiscal year.

Unemployment Insurance

The deputy minister also reviews the steps taken during the fiscal year with a view to the establishment of a national system of unemployment insurance. By the end of the year legislation in this regard was ready for introduction in Parliament, but up to that time three of the provincial governments had not indicated their acceptance of the Dominion Government's proposal to add the words "unemployment insurance" to section 91 of the British North America Act, which would empower the Parliament of Canada to enact such legislation.

According to an announcement made recently by Hon. Geo. S. Pearson, Minister of Labour in the British Columbia Legislature, an inquiry into the financial reserves of the Workmen's Compensation Board has been ordered and is being carried out by a firm of chartered accountants.

The members of the operating and maintenance staff of the Winnipeg school board have been included in the city's plan for workmen's compensation, under the terms of a by-law passed recently by the trustees. The provisions of the by-law go into effect on January 1, 1939.

CANADIAN NATIONAL RAILWAYS EMPLOYEES' BOARD OF ADJUSTMENT No. 2

Summary of Recent Decisions

REPORTS have been received of eleven cases recently settled by the Canadian National Railways Employees' Board of Adjustment No. 2. Outlines of previous cases were given in the LABOUR GAZETTE, May, 1938, page 495, and in previous issues.

The issue of August, 1930, contained a general summary of the proceedings of the Board, covering the period from January 1, 1928, to December 31, 1929; and a similar summary of proceedings from September 1, 1925 (the date of the inception of the Board), to December 31, 1927, appeared in the issue of October, 1928, page 1060. The text of the memorandum of the agreement made between the railways and the employees concerned for the establishment of the Board was given in these summaries.

The Canadian National Railways Employees' Board of Adjustment No. 2 was established for the purpose of disposing of outstanding grievances or disputes that might arise from the application, non-application or interpretation of the schedule of working conditions for "Clerks and other Classes of Employees as herein named," which are not adjusted between the officers of the railway and the representatives of the employees. The members of the Board are appointed for a term of one year, subject to reappointment. The Board is composed of four members selected by the management and four members selected by the representatives of the employees concerned. The decisions of the Board are binding upon the parties to the agreement. Provision was made, in the agreement constituting the Board, for the appointment of an arbitrator in any case in which the Board might be unable to agree upon an award. The ruling of the arbitrator becomes the decision of the Board.

Case No. 179.—Operating Department, Central Region.—This case arose out of a claim made by engine watchmen of the motive power department at Owen Sound, Ont., for pay at stationary firemen's rate of 55 cents per hour. The employees contended that the men concerned were required to perform the higher rated work and assume all the responsibilities in connection with such work and therefore claimed that these men should be paid at the rate of 55 cents per hour from November 24, 1935, until the supplying of steam for heating passenger coaches was discontinued in the spring of 1936. The railway contended that as the locomotives were kept under steam and as the coaches were receiving steam from that source there was not any increase in the responsibility of the men and there was no further work involved.

This case was heard by the Board on November 17, 1936, when it was agreed that it should be referred to an arbitrator. As no action has been taken by the employees' representative to progress the case, the Board recommended that this case be dismissed.

Case No. 186.—Sleeping, Dining and Parlour Car Department, Toronto District.—Cafe car employees on trains operating between Toronto, Hamilton and Chicago, submitted a claim for six days' relief per month at their home terminal, such relief to be retroactive to April 25, 1937. The railways contended that the assignment was fair and reasonable and that there was no justification for granting the employees' claim for monthly relief.

Since the submission of this case to the Board, the assignment on the trains concerned has been discontinued and the case has therefore been dismissed.

Case No. 187.—Sleeping, Dining and Parlour Car Department, Toronto District.—This case concerned the claim for the assignment of eight sleeping car porters to certain trains operating between Toronto and Sioux Lookout effective May 8, 1937. The employees contended that the porters on this run were in service approximately the same hours as the porters on the long established Toronto-Winnipeg run, and that in order to maintain a relation between similar working conditions, eight porters should be assigned to the service and that the employees on the run be compensated on that basis retroactive to May 8, 1937. The railways claimed that the terms of the employees' schedule had been fully carried out in regard to making an endeavour to reach a mutual agreement, and that the seven porter assignment provided very reasonable running conditions for the employees concerned.

Since the submission of this case to the Board the Toronto-Sioux Lookout assignment has been discontinued and the case has therefore been dismissed by the Board.

Case No. 189.—Sleeping, Dining and Parlour Car Department, Montreal District.—The cafe coach crew on certain trains on the Montreal-Riviere à Pierre service submitted a claim for 9½ days' monthly relief effective April 25, 1937. The employees contended that they were entitled to "at least maintain their

working hours on the work schedule in effect prior to April 25, 1937." As in the previous case the company claimed that the terms of the employees' schedule in regard to an endeavour to arrange a mutual agreement had been fully carried out, and that the monthly relief granted to the crew making the claim was a fair and equitable arrangement particularly "when it is taken into consideration that the employees in question enjoy a Sunday layover at home terminal" between trains.

This case was dismissed for the same reason as that mentioned in the preceding one.

Case No. 190.—Sleeping, Dining and Parlour Car Department, Toronto District.—This case concerned the claim of dining car crews on certain trains operating between Toronto and North Bay for ten days' monthly relief effective April 25, 1937. The contention of the employees and railways was somewhat similar to that outlined in the preceding case and in a general statement it was declared that the Board had been informed that the conditions under which the employees are now working "are considerably improved as compared to the conditions when the case was presented to the Board."

The Board denied the claim of the employees in this case.

Case No. 194.—Operating Department, Atlantic Region.—A clerk in the freight office in Sydney, N.S., submitted a claim for cashier's rate of $160 per month for time served in the latter capacity during the 1937 vacation period. The employees contended that the clerk in question was arbitrarily removed from his regularly assigned position and was assigned to relieve the cashier for a period of four weeks, during which time he had to assume all of the duties and responsibilities of the higher rated position and therefore was entitled to remuneration at the cashier's rate for the time he performed the duties of that position. The railways considered that the clerk was not entitled to the cashier's rate while relieving on that position for vacation purposes.

The case was heard before the Board on May 17, 1938, and was referred back to the parties to the dispute. The Board was advised recently that it had been satisfactorily settled and the request that the case be withdrawn from the Board was acceded to.

Case No. 195.—Operating Department, Atlantic Region.—A clerk in the locomotive and car department at Moncton, N.B., filed a claim for the position of clerk in the freight car shop at $135 per month. The employees contended that the clerk should have been awarded the vacant position of apprentice instructor, in view of his long service as timekeeper and shop clerk as well as in other clerical positions in the locomotive and car department which service was submitted as proof that the employee in question was qualified to fill the vacant position. The railways claimed the employee concerned was not the senior qualified applicant for the position.

When the case was heard before the Board on September 20, 1938, it was referred back to the parties to the dispute with the understanding that a railway representative on the Board would develop the matter further with the Vice-President and General Manager. After reviewing the additional information thus secured by this member the Board expressed the opinion that the clerk making the claim was not the senior qualified applicant and therefore denied the claim of the employees.

Case No. 196.—Operating Department, Atlantic Region.—This case concerned the claim of a yard clerk at Campbellton for the position of roadmaster's clerk at that point. The employees contended that as the yard clerk had made a study of the duties performed by roadmasters' clerks in order to fit himself for the position, and should have received the position because of his seniority but had been denied the right to promote to the position on the grounds that he had no previous experience in maintenance of way work, material and distribution of labour, etc. It was also stated by the employees that as a matter of justice the claimant should be given a fair trial in the position. The railways stated that "it is not practicable to give all applicants for a position a trial, especially in cases where there are a number of employees involved, and the schedule does not require this, but provides that after employees are promoted or awarded bulletined positions they will be allowed reasonable time in which to qualify."

Both parties appeared before the Board and gave oral evidence and the Board expressed the opinion that the claimant did not merit appointment to the position of roadmaster's clerk and therefore denied the claim of the employees.

Case No. 197.—Stores Department, Central Region.—Protesting the alteration of the seniority status of an issuer in the stores department at Toronto, Ont., the employees contended that the claimant had been transferred with his position to the consolidated stationary department at Montreal on July 1, 1924, and allowed seniority in that seniority group for his previous service and as no mutual agreement was made between the general

storekeeper and the general chairman to transfer him to the district stores' seniority group at Leaside, Ont., on August 26, 1924, that under the current schedule "he is entitled to seniority in the stores department, Toronto, and Northern Ontario District from August 26, 1924, only. The railways contended that the issuer had been laid off due to a reduction in staff.

Both parties appeared before the Board and gave oral evidence in respect of their contentions, and the Board's decision sustained the claim of the employees.

Case No. 199.—Sleeping and Dining Car Services, Western Region.—In this case sleeping car porters in the western region claimed payment for services performed in connection with trips made in addition to their regular assignments. The employees contended that these porters should receive payment in accordance with the provisions of the schedule. The railways contended that the employees' claim was not justified as the case formed an example of a situation where an employee accumulates excess hours of service due "to doubling on a run" other than on his regular assignment and should therefore be compensated accordingly.

Additional evidence was submitted to the Board by both parties and the Board expressed the opinion that the extra work performed by these employees should be compensated in accordance with the schedule. The Board denied the claim of the employees.

Case No. 200.—Sleeping and Dining Car Services, Western Region.—Porters who were assigned to extra tourist cars leaving Winnipeg for Flin Flon, Man., claimed additional compensation for six days' service when the cars to which they were assigned were being used in hotel service. The employees contended that the porters concerned should receive additional compensation for "terminal detention" in accordance with the provisions of the 1927 schedule. The railways stated that the claim of the employees was not justified as the tourist car porters were not assigned to extra service on a regularly assigned run which would involve exactly the same working conditions as the regularly assigned porters on the run, but were required to perform special service under special conditions and the railways further stated that the porters were properly and fully compensated on an agreed basis for such special service.

Both parties appeared before the Board and gave oral evidence in addition to their written presentation. The Board expressed the opinion that the "compensation of the employees in question properly comes under Article 1, Clause (*b*), covering 'Special Service on Regular Trains' and Article 5 of the Special Agreement dated November 27, 1936." The Board denied the claim of the employees.

Co-operative Health Insurance Plan of C.I.L.

Canadian Industries Limited recently inaugurated a Co-operative Health Insurance Plan which became effective October 14, 1938. At the same time the Co-operative Sickness and Non-Occupational Accident Insurance Plan went out of existence. (From time to time in various issues of the LABOUR GAZETTE reference has been made to the industrial welfare plans of Canadian Industries Limited, and other companies. For references to C.I.L. welfare plans, see LABOUR GAZETTE, July, 1938, page 753, September, 1937, pages 987-8, and August, 1936, pages 705-7.)

The new co-operative sickness and non-occupational accident insurance plan is complementary to the disability wage plan in that, with the two plans, employees now have protection in times of sickness or accident. Under the co-operative health insurance plan each employee having not less than six months' service is afforded the opportunity of obtaining insurance which will assist him in meeting the costs of hospitalization and medical care.

A substantial part of the cost of this insurance is to be borne by the company, the proportion which the company assumes being progressively greater in the lower earnings' classifications. Participation is voluntary, but, for the plan to remain in force, at least 80 per cent of those eligible must participate.

Under the hospitalization part of the plan, the benefits include a maximum of $210 for hospital bills, a maximum of $75 for surgeons' bills, and a maximum of $35 for anaesthetic, operating room, X-rays, laboratories and ambulance charges. The main conditions under which the benefits are payable are that the employee must be confined to a hospital for at least twenty-four hours, and that the confinement must take place within four months of laying off work on account of the disability.

Under the medical benefit part of the plan, participation, though optional, is limited to those who are insured in the hospitalization part of the scheme. The benefit in this case is to cover doctors' bills when the absence exceeds seven days. The maximum benefit payable is $25, calculated on the basis of a maximum of $5 a week for each week of absence after the first week. Payment of the benefit is conditional upon the submission of doctors' bills for medical services rendered, at home or in hospital, at any time during the first four months an employee is absent from work on account of disability.

RECENT REGULATIONS UNDER PROVINCIAL LEGISLATION

Revision of Taxicab Orders and Issuance of Temporary Orders for Mercantile and Christmas Tree Industries Under British Columbia Hours of Work and Minimum Wage Acts—Quebec Fair Wage Orders

IN British Columbia and in Quebec new orders affecting wages and hours of certain classes of workers have been made recently. In British Columbia, the orders fixing minimum rates and maximum hours for taxicab drivers have been revised and temporary orders have been issued governing employees in shops during the Christmas season. A minimum wage has also been fixed for persons employed in cutting, hauling and shipping trees and evergreens to be used at Christmas time. In Quebec, changes have been made in the orders governing the manufacture of silk textiles and shoe counters. New regulations fix minimum wages for workers in laundries, in establishments where dairy products are sold at wholesale or exported and in the manufacture of funeral caskets and hosiery.

British Columbia Hours of Work Act

Order 28b, dated November 15, exempts taxicab drivers in Victoria, Esquimalt, Oak Bay and Saanich from the daily limit of nine hours provided by Order 28a in force since August 22. (Labour Gazette, October, 1938, page 1094.) The weekly maximum of 54 hours fixed by the earlier order is not changed. Such taxicab drivers, who are defined as persons in charge of or driving a seven-passenger motor vehicle used for the conveyance of the public or operated for hire, may work ten hours a day within the 11 hours immediately following commencement of work. Time worked in excess of 10 hours must be paid for at a minimum of 45 cents an hour in accordance with the Male Minimum Wage Order covering taxicab drivers noted below.

As usual, special provision has been made for longer hours in retail establishments during the Christmas shopping season. On December 23 and 24, workers may be employed for 10 hours instead of the 8 to which they are limited in Vancouver, Victoria, Burnaby, Esquimalt, Oak Bay and Saanich. Throughout the province the working hours in that week may be 50 instead of 48. From November 28 to December 31 persons employed in the mail-order or shipping departments or in delivery by bicycle, motorcycle or on foot may work up to 10 hours a day but they are not released from the 48-hour weekly limit fixed by the Act.

British Columbia Minimum Wage Acts

An order, effective November 17, fixes a minimum wage of $3 per day for taxicab drivers covered by the order noted above under the Hours of Work Act. On June 28, 1934, a minimum of $2.50 a day came into force for these workers and in September, 1937, was increased to $2.75. Minimum rates for part-time work are now fixed at 35 cents an hour for a day of less than 10 hours with a daily guarantee of $1.40. As previously, unless written application for another arrangement is made to the Board of Industrial Relations and approved by it, employers requiring employees to wear special uniforms must supply them and pay for laundry. Two new provisions require the payment of wages semi-monthly, the amount to include all money due up to not more than seven days before the date of payment, and provide for a weekly rest period of 24 consecutive hours of which the employee must be notified by the employer.

Orders covering employees in the mercantile industry hired only for the Christmas season fix a minimum weekly rate of $12.75 for females employed during the period from November 28 to December 31 for 40 hours or more in a week. For those working less than 40 hours in a week the hourly rate is 35 cents. These are the same rates as for last year.

The special order governing temporary male workers for the same period establishes the 1937 Christmas rate of $15 for adult men for a week of 37½ hours or more. For less than 37½ hours the rate is again 40 cents an hour with a daily minimum of $1.60. There is no change from last year's order in the minimum rates for boys under 21 working the full 37½ hours. They vary from $6 a week for those under 17 to $13 a week at 20 years. For boys on part-time, who must be paid for at least four hours' work, the minimum hourly rate is 15 instead of 16 cents for boys under 17; the 20 cent minimum for boys of 17 and under 18 is the same as last year but for boys of 18 and 19 it is 1 cent higher, 25 and 30 cents respectively. Boys of 20 again receive 35 cents an hour.

Another order in effect from November 24 to December 31 fixes a minimum wage of 40 cents an hour for every employee in the Christmas-tree industry which includes "all operations in or incidental to the cutting, gathering, hauling and shipping of trees and evergreens to be used for decorative purposes during the Christmas season."

Quebec Fair Wage Act

Recent orders in council fix minimum wages for four classes of workers, amend two earlier orders of the Fair Wage Board relating to silk textiles and shoe counters and exclude wage-earners in St. Jean-de-Dieu Hospital, Gamelin, from Order 11, governing hospital employees (LABOUR GAZETTE, October, 1938, p. 1098). New orders relate to persons employed in butter and cheese wholesale and exporting establishments, in laundries, in the manufacture of funeral caskets and in hosiery mills. Each of the four new orders stipulates that where the provisions of Order 4 (LABOUR GAZETTE, May, 1938, p. 512) are not inconsistent with the new order, they are to apply.

SILK TEXTILE INDUSTRY

Order 5 applying to silk textiles, exclusive of silk velvet and fabrics less than twelve inches wide, is amended by an Order in Council gazetted October 22. The order first came into force on February 12 and was revised on August 13 (LABOUR GAZETTE, 1938, pp. 294, 985). As revised, it fixes a minimum and average hourly rate for certain groups into which employees must be divided. The time basis for calculating the average is changed. The order now provides that if, in any two weeks, the average hourly rate of a group is less than that fixed in the order and if, at the end of the next six weeks, the deficiency is not made up, the employer must make up the difference and divide it among the group in proportion to their earnings for the eight weeks. Formerly, the difference between the earnings in any two weeks and the required average rate for the group had to be made up and distributed according to earnings for the two weeks if at the end of a second fortnight the deficiency had not been made up by higher earnings. The Board may limit the number of looms per worker and adjust the rates accordingly. As revised in August, the order provided that where the rates as fixed by the original order were higher than those fixed in August, the former could not be reduced as long as the order remained in effect. It is now stipulated that such rates may be decreased if approved by the Board.

WORKERS ON SHOE COUNTERS

Order 7 as revised and effective November 26, is to remain in force for a year when it is to be renewed for another year unless an Order in Council to the contrary is issued. The minimum rates which, under the unrevised order (LABOUR GAZETTE, June, 1938, p. 625), applied to a 50-hour week throughout the year now apply to a 50-hour week for 32 weeks and a 55-hour week for 20 weeks of the calendar year. As before, time and one-half must be paid for work in excess of these weekly hours or in excess of 12 hours a day. Double time, which formerly had to be paid for Sunday work and work on legal and religious holidays, is no longer required to be paid for work on Sunday. Holidays are defined as New Year's Day, Epiphany, Good Friday, Ascension Day, St. Jean-Baptiste, Dominion Day, Labour Day, All Saints' Day, Immaculate Conception Day and Christmas Day. Piece workers employed overtime must be paid at a rate equivalent to the hourly rates fixed in the order. Automatic skiver machine setters do not have to be paid double time for holidays.

The May order fixed hourly minima of 38, 30 and 22 cents for 60 per cent, 25 per cent and 15 per cent, respectively, of all employees hired on a time basis. The revised order divides time workers into five groups and fixes a lower hourly minimum for each group. Moulders, who form one group, are divided into four classes with not less than 25 per cent in each class and minimum rates of 34, 32, 30 and 28 cents an hour for the four classes. Piece rates for moulders remain unchanged. Moulder apprentices, who must not exceed one to every five master moulders, must be paid at least 20 cents an hour for the first six months and 25 cents for the second six months. The apprenticeship period for all workers is limited to twelve months or 2,150 hours. The minimum rate for machine setters is 31 cents and for cutters 30 cents. The fifth group into which the workers are divided includes all employees not in the above four groups. Not less than 60 per cent of this group must be paid at least 24 cents, 25 per cent must be paid at least 20 cents and 15 per cent at least 15 cents an hour.

BUTTER AND CHEESE WHOLESALE AND EXPORT ESTABLISHMENTS

Order 16, gazetted November 26, applies to all establishments on the Island of Montreal engaged in selling at wholesale and exporting butter and cheese. It is to remain in force until May 15, 1939, then be renewed for a year unless a contrary order is made.

The hourly rates fixed by the order are payable for the regular working week as defined in the order. They apply to a 60-hour week in the case of watchmen, and for stationary enginemen and firemen if the latter are hired by the year beginning May 15, 1938, and are allowed a minimum of four weeks' sick leave and two weeks' holidays with pay each year. For enginemen and firemen not included here the minimum rates apply to a week of not less than 48 and not more than 54 hours as provided for such workmen by Order 6 (LABOUR GAZETTE, June, 1938, p. 624).

Order 6 also provides that such employees working less than 48 hours per week are to receive an hourly rate determined by dividing the weekly rate by 48. For foremen, superintendents, overseers and others in positions of authority, the rates relate to a 72-hour week. Maintenance men have a regular working week of 61 hours from June 1 to November 30 and 54 hours from December 1 to May 31; for all other employees the work week for which the minimum wage is payable is 55 or 48 hours according to the season. Except in the case of butter and cheese handlers and stationary enginemen and firemen, time worked in excess of the above hours must be paid for at the rate of time and one-half. Butter and cheese handlers are to be paid pro rata for overtime. Conditions as to religious and legal holidays may be agreed upon by the employer and employee.

A minimum wage of 25 cents an hour is fixed for office employees and watchmen and 10 cents an hour for messenger boys and persons performing similar services not requiring more than primary school education. Until the Board makes a special order, maintenance men must be paid as prescribed by Order 4, an hourly, weekly, monthly and yearly minimum of 25 cents, $13.50, $58.50 and $700, respectively. Butter and cheese handlers have a minimum rate of 45 cents per hour in summer and 40 cents per hour in winter. Wages paid superintendents, foremen, overseers and others in supervisory positions are to be determined by agreement between employers and employees but not to be less than $18 per week. Rates for enginemen and firemen are the same as in Order 6, $18.90 a week for firemen and from $24.30 to $32.40 a week for enginemen according to the nature of the work. First-class enginemen have a minimum of $200 a month. All other employees under this order have an hourly minimum of 26 cents for not less than 60 per cent of their number, 22 cents for not more than 25 per cent and 17 cents for not more than 15 per cent.

With the exception of stationary enginemen and firemen, butter and cheese handlers and persons in or above the foreman class, all hourly rates fixed by Order 16 are identical with those of Order 4 for similar employees on the Island of Montreal and in cities or towns within a five-mile radius of the Island (Labour Gazette, May, 1938, p. 512).

Laundries, Dry Cleaning and Dyeing Establishments

Order 17, also gazetted on November 26, applies to all wage-earners covered by the Fair Wage Act in laundries, dye works, dry cleaning and carpet cleaning establishments and allied services having more than five employees and situated on the Island of Montreal and within a five-mile radius. The order includes within its scope employees repairing furniture and upholstery in connection with a cleaning service and persons to whom employers lease equipment or sell routes except where the Board decides that there is a bona fide contract and issues a permit to that effect. The order is to remain in force for a year unless after six months an order is made to the contrary. The Fair Wage Board may appoint a committee of five persons, two representing the employers, two the employees and one, the chairman, representing the Board, to administer the order and report to the Board.

In workplaces covered by this order, lower rates are fixed for female employees, but where men and women perform the same work or women do work usually performed by men the minimum rates for men must be paid to all. Temporary employees, who may only be hired with the approval of the Board and under conditions determined by it, include all wage-earners employed intermittently for short periods such as a day, a week or a month. The order declares that the sections of Order 4 permitting lower rates for apprentices and limiting the proportion of apprentices do not apply to places covered by this order. Stationary enginemen and firemen in the establishments covered by the order are governed by Order 6 (Labour Gazette, June, 1938, p. 624-5).

The only maximum working hours fixed by the order, 60 hours a week and 12 hours a day for not more than three days a week, apply to female workers exclusive of office help, superintendents, foremen and overseers. Establishments covered by this order are not within the scope of the Industrial and Commercial Establishments Act of Quebec which limits hours of women and young persons under 18 to 55 a week and 10 a day except with a permit. The minimum rates of wages fixed by the order apply to the regular work week as defined for each class of workers. For female workers in general the regular work week is 54 hours. For female office workers the rates apply to a 48-hour week, for maintenance men to a 65-hour week and for superintendents, foremen, overseers and drivers to a 72-hour week. The work week for office workers and for other male employees not specified is 59 hours. For temporary employees, messengers, office and delivery boys, the minimum rates apply to the same work week as that of the group with which they are employed.

Time and one-half must be paid to all employees except drivers, superintendents, foremen and maintenance men for work in excess

of the regular number of hours per week as indicated above, or in excess of 12 hours in a day or in excess of 10 hours a day when the weekly hours are the number prescribed for the minimum wage. Time lost on legal holidays may be made up and paid for at the regular rate, not the overtime rate.

The minimum rates are 15 cents an hour for messengers and office and delivery boys; $20 a week for not less than 50 per cent of the drivers; $18 for not less than 30 per cent and for all temporary drivers and $15 a week for not more than 20 per cent of the drivers. Rates for maintenance men, superintendents, foremen and overseers are the same as in Order 16 above. That is, a temporary rate of 25 cents an hour for maintenance men, the rates for the others to be determined by an employer-employee agreement at not less than $18 a week. All other employees are divided into four classes with not less than 25 per cent in each of the Classes A, B and C and not more than 25 per cent in Class D. Female workers, except office employees and foremen, have hourly minima of 26, 24, 21 and 19 cents according to their classification. In the four classes of office workers, male and female, and of other male workers, not elsewhere specified, the minimum rates are 30, 26, 23 and 20 cents an hour. Temporary male employees may not be paid less than 27 cents an hour and temporary females 22 cents an hour. The percentages to determine the minimum to be paid must be calculated on the basis of one week.

Funeral Casket Manufacture

Order 18, gazetted November 26 to remain in force for six months, governs employees in establishments manufacturing caskets and funeral furniture. This order divides the province into two zones, Zone 1 consisting of all cities, towns and villages with a population of 10,000 or more and the remainder of the province making up Zone 2. There are nine groups of employees, Group 1 including those not in other groups. Other groups in order are: apprentices; office employees; office boys, messenger boys and others doing similar service not requiring more than primary school education; superintendents, foremen, overseers and others in positions of authority; stationary enginemen and firemen; maintenance men; watchmen; machinists.

The minimum rates for apprentices are the same in the two zones, 18 cents an hour for the first 1,300 hours and 21 cents from 1,300 to 2,600 hours, with a 25 cent rate thereafter. For office employees the rate in Zone 1 is 25 cents an hour and in Zone 2, 22½ cents. A minimum hourly rate of 10 cents applies throughout the province for office boys, messengers, etc., and all superintendents, etc., must be paid at least $18 a week. For stationary enginemen and firemen the rates set out in Order 6 apply. (Labour Gazette, June, 1938, p. 624.) Maintenance men throughout the province are entitled to at least 35 cents an hour and watchmen to 25 cents. As regards machinists, the minimum rate is 50 cents an hour in Zone 1 and 45 cents in Zone 2.

For employees in Group 1, average and hourly minimum rates are fixed for various departments. In wood-working in Zone 1, the average rate is 41 cents and the minimum 25 cents; in Zone 2 the average is 37 cents and the minimum 23 cents. Painting departments in the larger centres must pay an average hourly wage of 33 cents with a 28 cent minimum and in the smaller ones the rates are 30 cents average and 25 cents minimum. In the draping department an average hourly rate of 33 cents and a minimum of 30 cents are fixed for Zone 1 and 28 cents and 25 cents respectively for Zone 2. Thirty-four cents and 31 cents are the average and minimum hourly rates for the shipping department in Zone 1 with 30 cents and 27 cents elsewhere. The order allows for the furniture department an average rate of 39 cents and a minimum rate of 35 cents or the 28 cent average and 25 cent minimum according to the zone. For dressmaking departments, there is a 20 cent average rate and a minimum of 18 cents in Zone 1 and 15 cents and 14 cents elsewhere. Where employees work in more than one department, the average and minimum rates are not to be less than the average of the rates for the departments in which they work.

The regular weekly hours to which the rates for superintendents, etc., apply are 72, for maintenance men and watchmen, 60 hours. For first-class enginemen no work-week is specified but for second, third and fourth-class enginemen and firemen the weekly hours vary from 48 to 54. Machinists, apprentices, office employees, office boys, messengers and others doing similar service and all employees not specifically mentioned above have a regular work-week of 54 hours. Overtime at the rate of time and one-half is payable in all cases for more than 12 hours in a day or for time in excess of 10 hours a day if the weekly hours fixed for the class are worked or for work in excess of the regular work-week.

Hosiery Manufacture

Order 19, gazetted also on November 26, fixes regular and overtime rates of pay for all wage-earners covered by the Fair Wage Act engaged in the manufacture of full-

fashioned hosiery. The order is to remain in force for six months when it is to be renewed for another six months unless an order to the contrary is issued. Stationary enginemen and firemen in the establishments covered are governed by the rates provided in Order 6.

The rates apply to the regular working week as fixed in the order. Time in excess of these hours is overtime and, except in the case of stationary enginemen and firemen, must be paid for at the regular rate increased by 10 per cent. Superintendents, foremen, overseers and others in positions of authority and watchmen have a work-week of 72 hourrs. A 60-hour week is established for employees in yarn throwing departments and for stationary enginemen and firemen. For all other employees in production processes and for office employees, the hours per week to which the rates apply are 50 from June 1 to August 31 and 55 from September 1 to May 31. Maintenance men have a 56-hour week in the summer and a 61-hour week in winter. Messengers and office boys have the same work-week as the group with which they are employed. Employees are entitled to seven days' holidays each year. Time lost on these or legal holidays may be made up within two weeks before or after the holiday and paid for at the regular rate.

Wages payable to superintendents, foremen, overseers and others in supervisory positions are to be determined by agreement at not less than $20 a week for males and $18 for females. For messengers and office boys, the minimum wage is $6 per week. Skilled maintenance men have a minimum of 40 cents an hour. An hourly minimum of 25 cents is established for unskilled maintenance men, watchmen and office workers in Zone 1, that is, the Island of Montreal and within a five-mile radius of the Island. Office workers in the rest of the province, Zone 2, must be paid at least 22½ cents an hour. All other employees are divided into four classes, A, B, C and D. Among male employees Classes A, B and C must contain not less than 20 per cent each and Class D not more than 40 per cent. Classes A, B and C of the female workers must each include not less than 25 per cent of the total number and Class D not more than 25 per cent. Such male employees have minimum hourly rates of 55, 35, 28 and 20 cents in Zone 1 according to their class and 50, 32, 25 and 17 cents in Zone 2. Female employees in these classes must be paid not less than 30, 26, 21 and 16 cents in Zone 1 and in Zone 2 2 cents less in all classes except D where the rate is 15 cents.

Rates higher than those in effect on April 1, 1938, may not be reduced without the approval of the Board. The number of experienced workers in proportion to the machines may be regulated by the Board where there is evidence of abuse. Apprentices must be promoted according to their seniority and experienced workers according to efficiency and seniority. All apprentices must be paid directly by the Company and not by employees working on piece work.

All work must be stopped during specified rest periods except for employees engaged in spinning, twisting and dyeing operations or working on continuous processes in shifts of not more than 8 hours. An employee taken off a standard line to work on a new style or sample must receive at least the same average hourly rate as during the previous three months until a new piece rate is established. Needles must be supplied free of charge to leggers and single unit operators at the rate of 100 for each 100 hours' work and to footers at the rate of 100 for each 50 hours' work. Deductions from wages are permitted only in certain cases: when the Board authorizes specified deductions; in the case of garnishment or a court order; and when the employer has paid out for the employee sums in case of sickness or pressing needs, life insurance premiums, contributions to pension funds and for medical benefits or the employee's share of the price of fuel and foodstuffs bought by the employer and sold to the employee below the ordinary price; rent for dwellings owned by the employer; payments for tools, needles and merchandise sold to the employee; and payment for goods damaged or improperly processed. The consent of the workman is required before any deduction may be made except in the case of garnishment. The Board may withdraw permission to make deductions where it has been given or may forbid deductions to be made when the interest of the employee warrants such action.

Holidays With Pay for Garment Workers in Great Britain

According to a press despatch, garment workers and tailors in Great Britain numbering approximately 250,000 persons, have obtained the right to one week's holiday with pay each year as a result of negotiations between manufacturers and employees. The agreement was reached at a meeting of the executive of the Wholesale Clothing Manufacturers' Federation and the National Union of Tailors and Garment Workers.

LABOUR LEGISLATION IN PRINCE EDWARD ISLAND, ALBERTA (SECOND SESSION) AND THE YUKON IN 1938

Prince Edward Island

The Prince Edward Island Legislature, which was in session from March 28 to April 22, amended the Public School Act to raise the age for compulsory attendance at school from thirteen to fifteen years. Every child failing to attend school because of bodily or mental illness must furnish a medical certificate. Formerly such certificates were only required in Charlottetown and Summerside. The clause was repealed which made it a valid excuse for non-attendance in districts other than Charlottetown and Summerside that conditions of weather or travel made it impossible for the child to attend. Attendance, outside of Charlottetown and Summerside, is still required only for 60 per cent of the school days. In those towns attendance is compulsory throughout the term.

The Income Tax Act provides for a tax on incomes, which include any payment to an employee out of an employees' superannuation or pension fund. The income of labour organizations is not taxable. Exemptions include income up to $1,200 derived from annuity contracts with the Government of Canada or with any provincial government or with any company incorporated or licensed to do business in Canada. It is provided, however, that in the case of annuities payable under contracts made prior to May 26, 1932, the amount exempted shall be that provided for under the 1930 amendment to the Dominion Income War Act, viz:—$5,000.

The Personal Property and Special Companies Taxation Act which provides for the taxation of goods, chattels, wares, merchandise and fur-bearing animals and their skins, exempts from such tax personal property of fishermen consisting of fishing boats, gear and tackle up to the value of $1,000.

The Co-operative Associations Act provides for the incorporation of such associations.

Alberta

The Alberta Legislature during its second session of the year, which was held from November 15 to 22, made some amendments in the Workmen's Compensation Act which had been revised during the earlier session. The amending Act is retroactive to March 31, 1938, when the revised Act came into effect.

"Assessment" is defined to include, in addition to its ordinary meaning, charges, rates, levies and deductions imposed for medical aid. The section providing for repair, maintenance or renewal of special apparatus provided by the Board for injured workmen was amended to make it applicable to such apparatus whether provided before or after the passing of the 1938 Act.

Sections dealing with deductions from wages for medical aid, where no plan for providing medical aid has been approved by the Board, were amended to provide either for the collection by the employer of the sum determined by the Board from the workmen or its deduction from their wages. Formerly, the amounts required were deducted from wages.

Where work is undertaken for a principal by a contractor or sub-contractor, the principal is made liable to pay to the Board any sum which the contractor is, or may become, liable to pay in respect of such work. Formerly, the principal was charged with the duty of seeing that the sums due by the contractor or sub-contractor were paid and if he failed to do so he was held personally liable for payment.

Where the amount of any assessment is to be made a charge against real estate owned by an employer, a certified statement of the monies due the Board is to be lodged in the Land Titles Office of the district in which the real estate is situated. Formerly a copy of the assessment was so registered.

Yukon

During the recent session of the Yukon Council, the Workmen's Compensation Ordinance was amended to extend the maximum period for which compensation for temporary disability is payable from six months to twelve.

CANADIAN FEDERATION OF LABOUR

Summary of Convention Proceedings

THE convention of the Canadian Federation of Labour was held in Montreal, P.Q., December 5-7, 1938, with delegates present representing most of the affiliated organizations. The president, Mr. Zenon David, in his opening address reaffirmed the organization's faith in democracy and confidence that its principles would survive the assaults of those who sought to dictate and domineer. Referring to the activities of the organization, he considered that the actions of the executive "have been attended with enough publicity to keep every member of the movement informed of what was being done from week to week and from month to month." Speaking of the future outlook of the Federation, Mr. David stated that "it will exercise a bigger influence on the course of events in the years to come if we continue to conduct ourselves as an organization with a coherent policy, if we preserve the spirit of comradeship which has characterized our relations in the last two years, and if we conduct ourselves with that self-discipline which is the only true discipline and the essence of democracy."

Report of Executive

In the report of the executive board reference was made to the establishment and background of the national labour movement in Canada. In this respect the report drew attention to the Federation's objection to the alleged "special privileges accorded foreign unions in Canada under federal law." It was suggested that the Criminal Code should be further amended to fulfil the need for more adequate protection of the right to picket than is recognized in the various provincial statutes.

The board recommended that the constituent unions and councils of the Federation should urge upon provincial authorities the importance of introducing unemployment insurance legislation with as little further delay as possible. At the same time the Federation recommended renewal of representations to the Dominion Government for a scheme of national scope. The executive was of the opinion that the government should be petitioned to seek an amendment to the British North America Act to secure for the Parliament of Canada power to regulate hours of labour and to limit the number of working days in the week; also to encourage the voluntary institution of paid holidays. It was the further contention of the executive officers that "the unemployed can at least provide their own necessities of existence if given the practical means of doing so."

The opinion was expressed "that the Dominion and Provincial Governments would be justified in subsidizing the construction of low-priced dwellings both on account of the overcrowding and slum conditions that prevail and in order to provide employment for building workers."

Constitutional Changes

Of the constitutional changes adopted by the convention, the most important was the raising of the per capita tax paid by local unions from 15 cents to 25 cents. In future the convention call will be sent out five weeks before the date of conventions instead of three months as heretofore.

Message of Sympathy

A message of sympathy was forwarded from the convention to the families of the miners killed at Sydney Mines, N.S.

Seamen's and Miners' Problems

The problems confronting the seamen on the Great Lakes and the St. Lawrence and the miners of Southern Saskatchewan were discussed at considerable length. The discussions arose out of resolutions submitted by representatives of the organizations concerned, and resulted in the convention, by unanimous vote, requesting the necessary protection to enable the workers to join unions of their own choice.

Resolutions

A number of resolutions were submitted to the convention urging unity in the national labour movement. A lengthy discussion took place on this subject, the consensus of opinion being that it was desirable that the various Canadian organizations and independent units should be united in one body. Following the discussion the resolution committee submitted a recommendation that the incoming executive be instructed to take into consideration the suggestions presented on the floor of the convention and formulate the necessary procedure to unite all Canadian labour movements into the Canadian Federation of Labour.

The recommendations contained in some of the other resolutions adopted were:

Opposing mass immigration to Canada until the unemployed in this country are absorbed into industry.

Asking the Dominion Government to declare election day a compulsory holiday with pay.

Recommending that white girls be not allowed to work in Oriental establishments after 10 p.m., and that all such girls must be twenty-one years of age.

Requesting stricter governmental control over Oriental establishments.

Seeking changes in the compensation laws of Saskatchewan in regard to coal mines of that province.

Opposing American Federation of Labor unions obtaining closed shop agreements in plants manufacturing munitions.

Asking that it be made a criminal offence for employers to prevent workers from joining labour unions.

Advocating pensions at 60 years of age.

Seeking standard rates of wages throughout the Southern Saskatchewan coal fields.

Favouring seafarers having the opportunity of studying first aid.

Recommending that the benefits of the sick mariners' fund be made applicable to Ontario ports.

Officers Elected

The officers elected were: President, Allan Meikle (of the One Big Union), Winnipeg, Man.; vice-presidents, J. McKinlay (of the Amalgamated Building Workers of Canada), Vancouver, B.C., and Zenon David (of the Canadian Association of Railwaymen), Montreal, P.Q.; according to the constitution of the Federation, secretary-treasurer, W. T. Burford (of the Electrical Communication Workers of Canada), 126A Sparks St., Ottawa, remains in office as long as his work and conduct give satisfaction to the executive board and to the delegates attending conventions.

Address of Government Officials

At a banquet concluding the convention, the delegates were addressed by Mr. W. M. Dickson, Dominion Deputy Minister of Labour, and Mr. Cyprien Miron, conciliation officer of the Quebec Department of Labour, who was substituting for the Hon. William Tremblay, provincial Minister of Labour, unavoidably absent. The address of Mr. Dickson is summarized elsewhere in this issue on page 1324.

Mr. Miron spoke of the work of the conciliation branch of the department and of the success that was being achieved in this direction. He told the representatives of the Federation that the Provincial Labour Department's "aim and object is to bring about needed betterment in labour legislation in a direction which is best for labour." It was the opinion of the speaker that the main reason the labour legislation passed by the Provincial Government was not receiving more general approval was that the provisions of these acts were not properly understood, but when they were explained thoroughly there would be a more sympathetic attitude on the part of the workers.

Mr. Miron informed those present that the government was ready and willing to receive suggestions from labour and that any representations made would receive the most serious consideration.

PRODUCERS' AND CONSUMERS' CO-OPERATION IN CANADA, 1937

Annual Report of National Executive of the Co-operative Union of Canada

IN order to indicate the position and progress of producers' and consumers' co-operation in Canada, reference has been made in the LABOUR GAZETTE in previous years to the annual statistical review published by the Co-operative Union of Canada.

The annual review published by the Co-operative Union of Canada in *The Canadian Co-operator* for November, refers specifically to the operations of retail societies, buying clubs, wholesale societies, marketing, dairy, producers, and transportation societies affiliated with the union.

Retail Societies.—This report gives statistics concerning the operations during 1937 of 45 affiliated retail societies, an increase of four societies compared with 1936. The aggregate sales in 1937 of these retail societies amounted to $5,041,327.90 compared with the aggregate sales of 41 societies in 1936, amounting to $4,445,338.97. The sales of three buying clubs amounted to $4,841.18, while one club confined its activities to the sale of milk on commission.

The forty-five retail societies reported a combined membership of 16,364, or 2,668 more than was reported by forty-one societies in the previous year. Share capital of these societies amounted to $545,730.07 in 1937, loan capital $263,738.31—the combined investments in share and loan capital being $809,468.38, an increase of $172,456.80 over 1936.

The total amount of purchase dividends distributed in 1937 by retail societies was $182,789.74, an increase of $18,837.30 compared with $163,952.44 distributed in 1936. The purchase dividends of the buying clubs aggregated $278.90.

The net surplus of the retail societies for 1937 was $229,270.30, an increase of $19,891.34, and aggregate losses amounted to $2,276.71 compared with $742.71 for the previous year.

Dairy and Wholesale Societies.—Three co-operative dairy societies, the same number as in the previous year, reported sales to the Co-operative Union, amounting to $1,270,191.08 compared with sales of $1,021,611.50 in 1936. It is stated that two of these societies sell to consumers, and the third to the retail dairy trade. Two of the dairy societies reported increased sales amounting to $251,744.96 and the third recorded a decrease in sales of $3,165.74.

Including the turnover of the dairy societies and the buying clubs, the total volume of sales of the distributive societies amounted to $6,316,360.16, an increase of $845,140.56.

The total sales of the three provincial wholesale societies affiliated with the Union—Alberta, Manitoba and Saskatchewan—amounted to $911,646.92 made up as follows: Alberta, $13,201.52; Manitoba, $397,000; and Saskatchewan, $501,445.40. The report states that the Alberta Co-operative Wholesale finished the year with a net surplus of $120.05, while those of Manitoba and Saskatchewan reported surpluses of $17,759.99 and $8,946.45 respectively.

The report also states that Consumers Co-operative Refineries Limited of Regina, Saskatchewan, had a turnover of $412,949.30, a decrease of $83,559.39 on the year's operations and a net profit of $11,529.88. For statistical purposes the sales of the organization are regarded in the report as of a wholesale character and therefore adding its sales of $412,949.30 to those of the wholesale societies ($911,646.92) the same are increased to $1,324,596.22.

The total distributive turnover for 1937 of both wholesale and retail societies, is therefore $7,640,956.38. If the distributive business of the Canadian Livestock Co-operative (Maritimes) amounting to $359,276.61 and the garage and bus services and sales of the Transportation Society amounting to $91,101.93 are taken together, the total volume for these types of societies affiliated with the Co-operative Union is $8,091,334.92. It is explained, however, that the aforementioned volume is exclusive of the turnover of two large grain marketing associations, namely the Manitoba Pool Elevators, Limited, and the Saskatchewan Co-operative Wheat Producers, Limited, both affiliated with the Union, and also the marketing operations of the Saskatchewan Co-operative Livestock Producers Limited, which societies reported total sales of $5,079,685.02 for 1937. The resultant grand total of sales for all types of co-operative societies affiliated with the Union amounts to $13,171,019.24 for the year 1937.

In conclusion, the report stated that the aggregate membership of organized co-operative movement in Canada "is exclusive of that of two farmers' educational bodies, affiliates of the Union, from which reports were not received. The membership of the Union also includes the Co-operative Wholesale Society, England, and the Scottish Co-operative Wholesale Society, with Canadian offices at Montreal and Winnipeg, respectively. It is not the practice to incorporate in the statistical tables information with reference thereto, their activities in Canada being mainly in buying for export, although efforts are being made, and which should be encouraged by every Canadian co-operative society, to cultivate reciprocal trade relations in the marketing in this country of British co-operative productions.

"Ten distributive societies, four more than for the previous year, were also engaged in the marketing and shipping of produce for members to the value of $548,622.37 (of which $359,510.30 was livestock shipped by Canadian Livestock Co-operative Maritimes), which is $298,816.45 more than for the previous year. The same consisted of livestock, blueberries, butter, eggs, poultry, vegetables, lumber, etc. Three fishermen's societies, which operate several small stores but are principally engaged in the marketing of fish for their members, disposed of a quantity to the value of $480,196.02, compared with $441,128.46 for the previous year."

Estimate of Unemployed Youth in U.S.A.

Four-and-one-third million youth between the ages of 16 and 24 in the United States are wholly unemployed, according to a report just prepared for the Director of the American Youth Commission by D. L. Harley, of the Commission's research staff. Of this total, over half-a-million are engaged in emergency work of some kind, while the remainder have no work at all but are desirous of obtaining employment. In addition, there are a million-and-a-half youth who have some employment of a non-emergency character but desire more. These may be described as part-time unemployed, and adding their numbers to those of the wholly unemployed youth (including emergency workers) gives a total of nearly six million youth either completely or partly unemployed.

A significant fact is shown in the report that only a small proportion—13 per cent—of the youth who have no work at all are not actively seeking work. The remaining 87 per cent, plus emergency workers, constitute 31 per cent of all youth who are available for employment.

JUVENILE EMPLOYMENT IN NON-INDUSTRIAL OCCUPATIONS

IN connection with an inquiry being made by the International Labour Office into the employment of school children in accordance with a resolution of the 1937 session of the International Labour Conference, a recent statute enacted in Britain is of interest although it does not relate expressly to employment outside school hours.

The Young Persons (Employment) Act, 1938, regulates the hours of work of persons under 18 years of age in non-industrial employment and is to come into force on January 1. It applies to the collection, loading, unloading and delivery of goods, to juveniles employed in carrying messages or running errands mainly outside the premises where they are employed or in connection with a newspaper publishing business, or in attending upon guests in any hotel, club or place of public entertainment, in operating a mechanical hoist or elevator, in connection with the operation of a cinematograph apparatus, or in receiving or despatching goods for a laundry, dyeing or cleaning works or other factory. Except in the instance noted below workers covered by the Shops Act are excluded.

The Act fixes a maximum 48-hour week for all workers under 18 years of age in these occupations and, from December 31, 1939, a 44-hour week for those under 16 years within this Act or the Shops Acts. At the present time, persons under 16 may work in shops for not more than 48 hours in a week. All employees under 18 are entitled to time off for meals and rest periods, a weekly half-holiday and a weekly rest period of 24 hours, preferably on Sunday. Overtime is prohibited for any one under 16 and limited for those between 16 and 18. Night work is forbidden during a period of 11 consecutive hours including the time between 10 p.m. and 6 a.m. Daily hours are not limited but the Secretary of State has power to safeguard the welfare of these employees by regulating, among other things, working hours per day.

This legislation is in addition to the Children and Young Persons Act, 1933, the Children and Young Persons (Scotland) Act, 1937, and the Education Act, 1918. These statutes stipulate that no child under 12 may be employed in any way and no child of school age may be employed before the close of school hours on any school day, nor may they be employed for more than two hours on school days or Sundays. No person under 16 in England and Wales or under 17 in Scotland may be employed in the selling of newspapers or magazines or in any form of street trading. Under the Education Act, 1918, local education authorities, on the report of the school medical officer stating that the health or physical development of a child is being prejudicially affected so that his employment makes him unfit to benefit from instruction, may entirely prohibit the employment of school children.

The International Labour Conference in 1937 revised the Convention of 1932 concerning the minimum age for non-industrial employment to fix the age at 15 instead of 14. This Convention stipulates that children under 15 or children over 15 who are still required by law to attend primary school may not be employed in non-industrial undertakings except as provided in the Convention. Children over 13 may, outside the hours fixed for school attendance, be employed on light work which is not harmful to their health or normal development and is not such as to prejudice their attendance at school or capacity to benefit from the instruction given but no child under 14 may be employed on light work for more than two hours on any school day or school holiday or may spend at school and on light work more than seven hours. The national law giving effect to the Convention is to fix the number of hours a day during which children over 14 may be employed on light work. Light work must be prohibited on legal and public holidays and, in the case of children under 14, for a period of at least 12 consecutive hours between 8 p.m. and 8 a.m. and, in the case of children over 14, during a period at night fixed by the national law but not less than 12 hours.

The employment of school children was the subject also of a resolution adopted by the Conference in June, 1937. This resolution called attention to a recommendation of the 1935 Conference concerning unemployment among young persons which urged that annual returns should be compiled in the countries which are members of the International Labour Organization showing the number of children of school-leaving age who have been engaged in employment out of school hours. The Governing Body was asked by the 1937 Conference to request the various governments to furnish such returns for publication by the International Labour Office.

In Canada, there is little legislation in effect expressly applying to the employment of school children out of school hours. In Ontario, the Adolescent School Attendance Act prohibits the employment of children over 14 and under 16 between 8 a.m. and 5 p.m. except in the case of children who have employment certificates and are exempt from school attendance. Other school laws merely

prohibit employment of children of school age during school hours. In Manitoba, however, by an amendment in the Shops Regulation Act, 1916, boys of 13 could be employed in shops, including messenger services, for not more than two hours on school days or 8 hours on holidays but an order of the Manitoba Minimum Wage Board in 1937 raised the minimum age for employment in retail and wholesale stores from 14 to 15 years.

SOCIAL SECURITY IN NEW ZEALAND

Summary of National Pensions and Health Insurance Legislation

REFERENCES have been made in the Labour Gazette from time to time to the progress of social security measures in New Zealand, and a brief summary of the 1938 legislation providing for pensions and health insurance has appeared in recent issues (April, 1938, page 373; September, page 972; and October, page 1078).

There has now been received an official summary and copy of the Social Security Bill as enacted by the New Zealand Parliament. While New Zealand has had in operation a system of non-contributory pensions and family allowances, the initiation of a national plan, including health insurance, was envisaged by the present Government since it came into power in 1935. Various government committees have studied the matter, and in September, 1937, Sir Henry Britten Brackenbury, member of an advisory committee to the British Ministry of Health, and former chairman of the Council of the British Medical Association, visited New Zealand at the invitation of the local branch of the British Medical Association. Owing to his wide experience of the subject he was able to assist in an advisory capacity both the association and the Government committees.

Following the report of a National Health and Superannuation Committee on the proposals of the Government to establish a national health and superannuation system, a social security Bill was introduced in the House of Representatives.

The Bill was amended in several particulars, the most important of which was the imposition of a tax of 1s. in the £ on company income for social security finance. The official summary of the Bill (in the form of an "explanatory memorandum") as amended and passed is presented as follows:—

Administration

This Bill has two main objects. In the first place, it is intended to substitute for the existing system of non-contributory civil pensions (*e.g.*, old-age, widows', and other pensions) a system of monetary benefits, on a contributory basis. In the second place, the Bill makes provision for the inauguration of a system of medical and hospital benefits, and of other related benefits.

Part I of the Bill establishes a Social Security Department, which will replace the present Pensions Department, and may absorb certain branches of other Departments. It is proposed to place the new Department under the administrative control of three Commissioners acting under Ministerial direction.

Monetary Benefits

Benefits of the following classes are provided for in Part II:—

(*a*) *Superannuation benefits:* Every person over the age of 65 years who satisfies the prescribed residential conditions (which are the same as the residential conditions attached to the grant of the age-benefits referred to below) is entitled, for the year commencing on 1st April, 1940, and for every subsequent year, to a superannuation benefit, without conditions as to income or property. The rate of the superannuation benefit for the year 1940 is fixed at £10 a year; in every subsequent year it is increased by £2 10s. a year. Thus the superannuation benefit in the year 1941 will be £12 10s. and in the year 1942 will be £15, and so on. The maximum superannuation benefit is £78 a year.

(*b*) *Age-benefits:* Age-benefits are in substitution for old-age pensions, and, subject to the alterations hereinafter referred to, the provisions of the Bill as to age-benefits are substantially the same as the provisions of the existing law as to old-age pensions. The material differences are as follows:—

(1) The general age-limit is reduced from 65 years to 60 years.

(2) The maximum rate is increased from £58 10s. a year to £78 a year.

(c) *Widows' benefits:* The widows' benefits provided for in the Bill are, speaking generally, in substitution for the widows' pensions now provided under the Pensions Act, 1926. Under the proposals contained in the Bill, however, widows who satisfy the prescribed conditions will receive the

benefits provided thereby in their own right, whereas, under the existing Act, a widow is qualified to receive a widow's benefit only if she is the mother of one or more children under 15 years of age. The Bill does not, however, provide a benefit for every widow merely because she is a widow. The necessary qualifications are set out in clause 22 of the Bill; the actual though unexpressed condition common to all the conditions enumerated in clause 22 is that a widow does not become qualified to receive a widow's benefit unless by reason of her marriage or the care of the children of her marriage she has been deprived of the opportunity of earning her own living until she has reached an age when she can no longer be reasonably expected to do so.

(*d*) *Orphans' benefits:* The provisions of the Bill as to orphans' benefits are new. It is not proposed to grant benefits in respect of orphans who for the time being are maintained in any State institution, but in other cases the Commission, having regard to the particular circumstances in each case, is empowered to grant benefits in respect of orphans at a rate not exceeding £39 a year in any case.

(*e*) *Family benefits:* The provisions of the Bill relating to family benefits are in substitution for the existing provisions for the payment of "family allowances" under the Family Allowances Act, 1926. The essential differences between the present Act and the proposals contained in the Bill are—

(1) The age limit of the children in respect of whom a benefit can be granted is extended from 15 years to 16 years.

(2) The rate of the benefit is increased from 2s. a week to 4s. a week.

(3) The permissible income of the family (including the benefit) is increased from £4 a week, plus 2s. for each child in excess of two, to £5 a week, plus 4s. for each child in excess of two.

(*f*) *Invalids' benefits:* The provisions of the Bill as to invalids' benefits are in substitution for the existing invalidity pensions. The only material alteration is the increase of the basic rate of the benefit from £52 a year to £78 a year.

(*g*) *Miners' benefits:* The provisions as to miners' benefits are in substitution for the existing miners' pensions, the basic rate being increased from £65 a year to £78 a year.

(*h*) *Sickness benefits:* The provisions as to sickness benefits are new, and are intended for relief of persons who suffer a loss of wages or other earnings through temporary incapacity resulting from sickness or accident. The rates of sickness benefits coincide with the rates fixed (in later provisions of the Bill) in respect of unemployment.

(*i*) *Unemployment benefits:* The unemployment benefits provided for in the Bill are in substitution for the existing "sustenance" payments made out of the Employment Promotion Fund. At the present time there is no prescribed scale of payments and no fixed conditions subject to which payments can be made. The Bill prescribes a scale of payments and fixes the qualifications of persons to whom unemployment benefits can be granted.

(*j*) *Maori War benefits:* The provisions as to Maori War benefits are in substitution for the existing Maori War pensions, the only material alteration being that the basic rate is increased from £58 10s. a year to £78 a year.

(*k*) *Emergency benefits:* The provisions of the Bill as to emergency benefits are new. They are designed to meet cases of hardship where applicants fail to qualify for any of the specific benefits provided for. The Commission is directed, as far as possible, to relate any emergency benefit to an analogous specific benefit and to fix the rates of the emergency benefit accordingly.

Medical, Hospital, and Related Benefits

Part III of the Bill is of general application to all persons ordinarily resident in New Zealand, and makes provision for medical, pharmaceutical, hospital, maternity, and other related benefits.

Medical benefits: Under the proposals contained in the Bill every person will be entitled to such medical treatment as is ordinarily given by medical practitioners in the course of a general practice. The services of recognized specialists are outside the scope of the medical benefits. Every registered medical practitioner will be entitled to co-operate in the scheme for the provision of medical benefits, on terms to be fixed by the Minister of Health after consultation with a Medical Committee.

Pharmaceutical benefits: Persons claiming medical benefits will be entitled to receive, without cost to themselves, all such medicines, drugs, approved appliances, and materials as are prescribed for their use by a medical practitioner in the course of providing any medical services under the Bill.

Hospital benefits: The Bill provides for the payment to Hospital Boards and to the proprietors of licensed hospitals and other approved institutions of prescribed amounts in respect of hospital treatment afforded by

them. The amount paid to a Hospital Board is in satisfaction of its claims for the treatment of patients; in the case of licensed hospitals and other institutions the amount paid is in partial satisfaction of claims against the patients or other persons liable for the hospital charges.

Mental Hospitals: The Bill also makes provision for the treatment of patients in public mental hospitals, without charge.

Maternity benefits: Maternity benefits include ante-natal and post-natal advice and treatment by medical practitioners, and the services of doctors and nurses at confinements in maternity hospitals or elsewhere. No charge is to be made in respect of confinements in State maternity hospitals, or in maternity hospitals conducted by Hospital Boards. In respect of confinements in private maternity hospitals, provision is made for the payment of prescribed fees which will be accepted in partial satisfaction of the charge payable by the patient or any other person in respect of the confinement.

Supplementary benefits: Authority is given for the inauguration of supplementary benefits as and when the occasion for providing such benefits arises. Among the supplementary benefits contemplated are specialist and consultant services, radiological services, dental services, home-nursing services and domestic assistance.

Financial Provisions

Part IV of the Bill proposes to abolish the present Employment Promotion Fund and the present Employment Tax, and makes provision for the establishment of a Social Security Fund, out of which will be paid the cost of providing benefits and the cost of administration. Provision is made for the collection of a Social Security Contribution, consisting of (*a*) a registration fee; and (*b*) a charge on salaries, wages, and other income. Subject to such exemptions as may be made by Order in Council, every person over 16 years of age is required to be registered, to pay the registration fee, and to pay the charge on salaries, wages, and other income.

The provisions of Part IV are generally on the lines of corresponding provisions in the Employment Promotion Act, 1936 (which is proposed to be repealed). The material alterations are: (1) The increase in the rate of the charge on salaries, wages, and other income; and (2) the requirement of the registration of all persons over 16 years of age (an annual fee of 5s. being payable by women and by youths under 20 years of age). In respect of other persons the registration fee remains at the rate of 5s. a quarter. Other alterations are principally for the purpose of curing defects discovered in the administration of the Employment Promotion Act.

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Eighty-fifth Session of the Governing Body—International Conference on Reduction of Accident Risks in Coal Mines—Ratification of Conventions by the United States

RECENT activities under the International Labour Organization included the convening of the Eighty-fifth Session of the Governing Body in London, and the meeting of international experts held at Geneva during the latter part of November to study the best methods of taking international steps to decrease the great number of accidents to which coal miners are exposed. These events are dealt with in the following summaries:—

Eighty-fifth Session of Governing Body

In response to a cordial invitation of the British Government, the Governing Body of the International Labour Office held its Eighty-fifth Session in London, from October 25 to 27. The day before the opening of the meeting the members of the Governing Body, as well as the Director and the higher officials of the International Labour Office, were received by their Majesties the King and Queen at Buckingham Palace.

The Governing Body elected as its chairman for the ensuing year Mr. Paul Berg, Norwegian Government representative. The retiring chairman was Mr. F. W. Leggett, the British Government representative.

At this meeting consideration was given to the measures to be taken with regard to the resolutions adopted by the International Labour Conference at its Twenty-fourth Session in June last, and it was decided to convene a second Regional Conference of American States in Havana at the end of 1939, and also to hold a Tri-partite Conference in Geneva in March, 1939, on Hours of Work in Rail Transport. The Governing Body decided to adjourn the consideration of the measures to be taken to give effect to the other resolutions of the Conference until its Eighty-sixth Session, which will be held at Geneva in January.

Reduction of Accident Risks in Coal Mines

The American, Belgian, British, French, Netherlands and Polish experts, who have been meeting (November 21-24) at the I.L.O.

to study the best methods of taking international steps to decrease the great number of accidents to which coal miners are exposed, discussed the bases of a model code of safety regulations which will be of service to all countries concerned when they come to frame or revise their coal mining regulations, according to a press release recently received from the International Labour Office at Geneva.

The most important points of these regulations would deal with safety measures to be taken in connection with: explosives and shot firing; supports of mine galleries; haulage and travel; winding; ventilation; gases and coal dust; and electricity.

On most of these subjects the existing regulations in the various countries contain the necessary details. There are, however, a few matters on which they contain only very few and apparently inadequate provisions.

The first of these matters is underground supports. In spite of the fact that falls of roof and sides are the most frequent cause of coal-mining accidents in all countries (in Great Britain, for example, accidents from this cause accounted, in 1936, for not less than 49 per cent of all the serious accidents occurring underground), the regulations in most cases leave it to the managements to draw up, separately for each mine or group of mines, requirements concerning the setting of supports.

Such a state of affairs can hardly be considered satisfactory, and the experts are of opinion that an attempt should be made to frame more precise regulations concerning supports.

Another matter on which provisions more detailed than those contained in most of the existing regulations might suitably be incorporated is the training and qualifications of miners. Such regulations governing the training of hewers and other categories of underground workers would certainly be useful; good training is generally recognized as an efficient means of ensuring greater safety.

It would also seem necessary to lay down, in more detail than in most of the existing national regulations, rules concerning the installation, use, shifting, etc., of conveyer plant of different types.

Even the best safety regulations, however, will remain largely inefficient unless their enforcement can be effectively supervised. An essential aid in the promotion of safety in coal mining is, therefore, a sufficiently numerous, properly qualified and efficient body of mining inspectors.

In this connection it would also seem necessary to consider the best ways in which the miners themselves could play an active part in mining inspection. On this subject various countries, e.g. France and Belgium, possess detailed regulations; their essentials might perhaps be recommended for adoption in other countries also.

Besides legislation and its enforcement by means of efficient supervision and inspection, voluntary action is being more and more considered as a powerful weapon in the struggle for greater safety in industry. In the coal mining industry a great deal has been done in this field in various countries, both on a national scale and in individual mines. Very many miners may be said to owe their lives to the efforts of safety associations, safety committees, safety engineers and similar voluntary agencies.

After discussing all these aspects of the problem of the prevention of accidents, the experts expressed the opinion that the drafting of a model safety code would be of great value for all coal mining countries. They asked that a recommendation embodying such a model code should be framed and submitted to them at a future meeting, with a view to having the question placed on the agenda of one of the forthcoming sessions of the International Labour Conference.

The experts also made several suggestions of a technical nature aimed at improving national statistics of mining accidents and making them more easily comparable.

In conclusion, they discussed a proposal of the French Government to set up an international centre of mining information. This would be an organization which, under the direction of the International Labour Organization, would centralize documentation and research, and so would allow the specialists of the different countries to pool their experience and to discuss their ideas on matters of health and safety in mines and quarries.

The French expert, M. Galliot, former French Director-General of Mines, stated that the wishes of the French Government on the matter had been already largely met during the meeting of the experts, also thanks to the complete documentation prepared by the I.L.O. The purpose of the proposed organization would in fact be realized if this documentation were kept up to date and expanded as necessary, and if the exchange of ideas between the countries concerned were helped and speeded up.

All the experts agreed with their French colleague, and warmly supported these proposals.

America and International Labour Conventions

For the first time ratifications of International Labour Conventions by the Government of the United States have just been officially registered.

These concern five important Conventions adopted by the Maritime Session of the International Labour Conference, held at Geneva in 1936.

They include the Convention regulating hours of work on board merchant ships on the basis of an 8-hour day, and laying down the minimum manning scale thereby required.

The four other Conventions ratified by the United States are those on holidays with pay for seamen, the liability of the shipowner in case of sickness, injury or death of seamen, the minimum requirements of professional capacity for masters and officers of merchant ships, and the prohibition of employing children under 15 years of age on board ship.

Moreover, the Government of the Republic of Argentina has submitted to Congress a message recommending 17 International Labour Conventions for approval.

National Housing Statistics

In a release, dated December 5, Hon. Charles A. Dunning, Minister of Finance, announced that the number of loans approved under the National Housing Act during November were 193 per cent above approved loans for the same month last year, and in amount loaned 37 per cent above approvals for October, 1938, and 172 per cent above November, 1937.

Number of loans approved, 316, was again higher than for any previous month since operations began in 1935, surpassing October, 1938, previous high month, by nine loans. The total amount of loans approved was $1,739,865, and was greater than for any previous month, excepting June, 1938, the very peak of the building season, when loans approved amounted to $2,096,713. These loans during November provided housing accommodation for 507 families. Taking into account the seasonal falling off usually prevailing at this time of the year, November totals offer spectacular evidence of the increasing effectiveness of the new provisions of the Dominion's housing legislation which came into operation at the beginning of August. In the four months since the National Housing Act came into force loans are up 97 per cent in amount loaned, and 123 per cent in number of family housing units financed, compared with the same four months of 1937.

An additional forty 90 per cent loans on low-cost homes valued at $2,500 or less were approved during the month, bringing the total number of such loans to 82. Under the guarantee for loans in the smaller and more remote areas, and in special districts of the larger centres, 141 loans were approved during the month, bringing the total in this classification to 400.

New communities continue to be opened to the benefits of the lending facilities provided under the Act. During November loans were approved in 34 new municipalities, bringing the total number of communities so serviced to 285. Since the provisions of the National Housing Act became effective in August, 91 new municipalities have been added to the list of communities in which the lending institutions are making loans.

Of the 507 family housing units financed during November, 81 or 15·9 per cent were financed by loans of $2,500 or less; 241 or 47·4 per cent were financed by loans of $3,000 or less; and 358 or 70·6 per cent were financed by loans of $3,500 or less. The average loan for the month is $3,432, and the average of all loans made to date, now stands at $3,914.

The total amount of loans made under the Dominion's housing legislation now exceeds $26,400,000, and total housing units financed number 6,755.

The Trade Unionist's Handbook is the title of a pamphlet published under the authority of the Workers' Educational Association of Canada. The booklet is divided into three main sections, and an introduction. The three main sections deal with the history of trade unionism in Canada, the principles, functions and problems of trade unionism, and trade unions and the law. In a foreword, the publication committee states that the intention of the booklet is "to be suggestive of the need for trade unionists to study intensively and in a critical spirit the progress of the movement which they support."

The *International Labour Review* for November contains an article entitled "A Historical Survey of Factory Inspection in Great Britain", by D. H. Blelloch. The article deals with the origin of factory inspection under which heading reference is made to factory legislation passed in 1802, 1819, 1825, 1831 and the Factories Inquiry Commission of 1833, and the factory act of that year. Under another heading the gradual extension of the scope of factory legislation is sketched. The final sections of the article deal with the evolution of the factory inspection staff, the integration of the local authorities in the work of factory inspection, and the powers, duties and methods employed by factory inspectors.

EMPLOYMENT AND UNEMPLOYMENT IN CANADA, OCTOBER, 1938

THE following information as to the employment situation in Canada is based upon reports from the following sources:—

(1) The Dominion Bureau of Statistics receives reports each month from most of the larger employers of labour throughout Canada in all industries except agriculture, fishing, hunting and highly specialized business, the returns being from firms employing fifteen workers or more. The number of firms so reporting on November 1 was 11,049, the employees on their payrolls numbering 1,100,263 persons.

(2) The Department of Labour receives reports from local trade unions throughout Canada, showing the number of their members who were unemployed in the period under review. The number of unions reporting for October was 1,920, having an aggregate membership of 236,690 persons, 12·3 per cent of whom were without employment on November 1. It should be understood that the report on the number of unemployed workers refers only to organized labour, definite figures not being available as to the number of unorganized workers who were without employment during the period reviewed.

(3) The Department of Labour receives reports from 70 centres in which the Employment Service of Canada is situated, showing the number of applications for work, the existing vacancies and the number of workpeople placed in positions.

(4) The Dominion Bureau of Statistics receives each month detailed statistics from 58 cities throughout Canada showing the value of permits granted during the period for various classes of building construction, these figures indicating the degree of activity prevailing in the building trades.

(1) The Employment Situation at the Beginning of November, 1938, as Reported by Employers

Data furnished the Dominion Bureau of Statistics by 11,049 leading industrial establishments throughout the Dominion show that employment was considerably curtailed at the beginning of November. The loss was seasonal in character, but exceeded the average decline at November 1 in the experience of the years, 1921-1937. The reported payrolls aggregated 1,100,263, compared with 1,120,068 at October 1, while the index (1926=100) declined from 116·7 in the preceding month, to 114·6 at the first of November, as compared with 125·2 at the same date in 1937. Industrial employment was thus at a lower level than in the late autumn of last year, but it was more active than at the beginning of November in 1936, when the index was 111·0; it was also in greater volume than in any November in the years, 1930-1935.

Since the reduction in staffs at November 1, 1938, was larger than usual at the time of year, the seasonally-adjusted index showed a decrease, declining from 111·0 at October 1, 1938, to 109·7 at the beginning of November.

In recent years of the record, the unadjusted indexes at November 1 have been as follows: 1938, 114·6; 1937, 125·2; 1936, 111·0; 1935, 107·7; 1934, 100·2; 1933, 91·3; 1932, 84·7; 1931, 103·0; 1930, 112·9; 1929, 124·6; 1928, 118·9, and 1927, 108·8.

Important seasonal improvement was noted at the beginning of November in logging; the gain did not provide work for so many men as were dispatched to the bush at November 1 in either 1937 or 1936, although it exceeded the average advance at that date in the years since 1920. There were also considerable increases in mining, building and retail trade. On the other hand, communications, transportation, services, highway construction and manufacturing showed declines, mainly of a seasonal character; the losses in highway construction and maintenance and transportation were particularly extensive. Within the manufacturing division, food, lumber and leather factories recorded the largest reductions in personnel, while rubber, chemical, electric light and power, automobile, agricultural implement, crude, rolled and forged and some other iron and steel plants reported heightened activity.

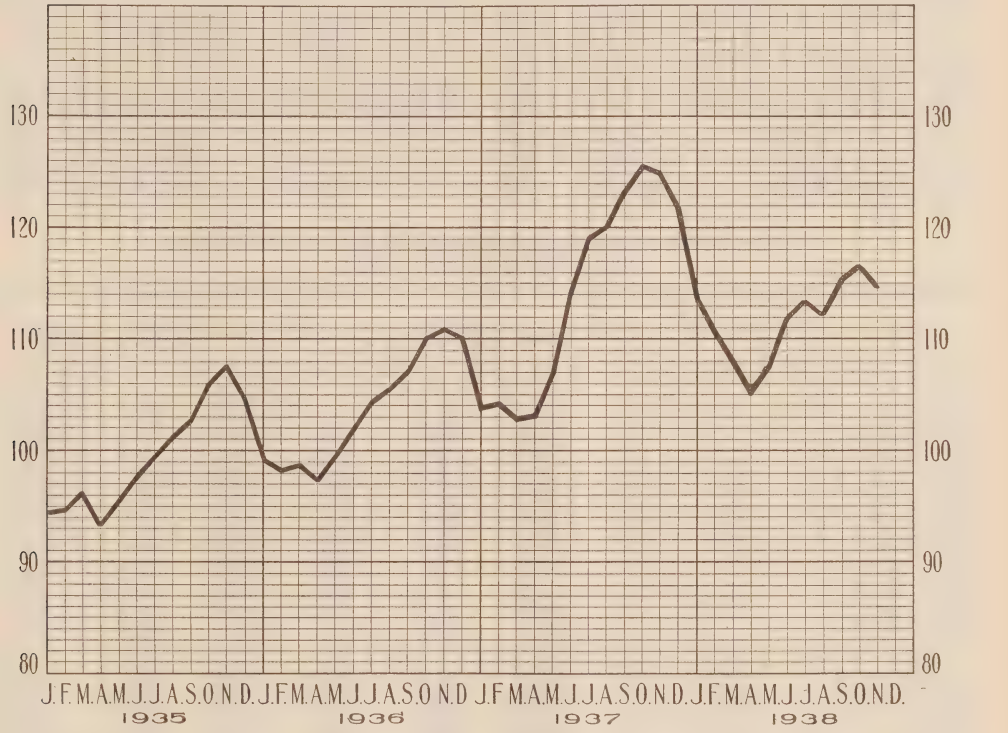
For November 1 of last year, 10,463 employers had reported staffs aggregating 1,194,137, a decrease of some 3,900 persons as compared with their October 1, 1937, returns. The contractions in construction were then most pronounced, while exceptionally large advances had been indicated in logging.

Employment by Economic Areas

The tendency was downward in all provinces. The curtailment in Quebec involved the release of the largest number of persons, but the greatest percentage losses were in Saskatchewan and Alberta. Except in Prince Edward Island and Saskatchewan, employment was generally at a lower level than at November 1, 1937, however in all but the Maritime Provinces, activity was greater than at the same date in 1936 and immediately preceding years; in the

Maritimes, the index at the latest date was higher than in the beginning of any November in the period, 1932-35.

Maritime Provinces.—There was a decrease in industrial activity in each of the Maritime Provinces, most of the reduction in personnel taking place in road construction; mining, communications and transportation, however, also reported curtailment. The factory group as a whole showed moderate improvement; additions to staffs were recorded in food and iron and steel plants, but lumber and pulp and paper mills were slacker. Building also afforded more employment, and there were important seasonal increases in logging camps. Returns were received from 807 employers in the Maritime Provinces with 82,494 workers on their payrolls, or 1,367 fewer than at the beginning of October.



A much larger decline had been indicated at November 1, 1937, by the 721 co-operating establishments, whose payrolls had included 91,900 persons; the index was then many points higher than at the latest date.

Quebec.—Employment in Quebec showed a falling-off, chiefly in construction, but manufacturing, steam railway operation and services also released employees. On the other hand, there were gains in mining, retail trade, building and logging, those in the last-named being pronounced. Within the manufacturing group, the leather, lumber, pulp and paper, textile, mineral product, electrical apparatus and some other divisions showed contractions. The 2,749 reporting employers reduced their forces by 5,411 persons, bringing them to 337,692 at November 1. Employment was not so brisk as at November 1, 1937, when a considerable gain had been indicated in 2,507 establishments, whose staffs numbered 363,525.

Ontario.—The trend was downward in Ontario at the beginning of November, the 4,808 firms whose data were tabulated having a combined working force of 450,092 persons, or 3,213 fewer than in the preceding month. On the average, the change at November 1 in the years, 1921-1937, has been a decline on a smaller scale than that indicated at the

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

latest date. There was a seasonal advance in logging, and mining and trade also showed improvement from October 1. On the other hand, manufacturing, communications, transportation and building, highway and railway construction and maintenance reported curtailment. Within the group of factory employment, the pulp and paper, rubber, chemical and iron and steel divisions showed heightened activity, the gains in the latter being largest; leather, lumber, food and some other divisions, however, released employees. The losses, which were most pronounced in canneries, were mainly seasonal in character. Little general change had been noted in Ontario at the beginning of November, 1937; the index was then 15·4 points higher than at the latest date, when it stood at 115·0. For November 1, 1937, statistics had been received from 4,639 employers having 508,302 workers.

Prairie Provinces.—There were seasonal decreases in employment in Manitoba, Saskatchewan and Alberta at November 1, 1938. Returns were compiled from 1,548 firms in the Prairie Provinces having 137,972 employees, as against 144,491 at October 1. Logging, coal-mining, building and retail trade afforded more employment, but there were declines in manufacturing, services, transportation and highway and railway construction and maintenance. Most of the loss in manufacturing occurred in iron and steel factories. The general curtailment in this area was on a much larger scale than that recorded at November 1, 1937, but the index then was slightly lower, standing at 106·2, as compared with 108·1 at the date under review. Statements had been tabulated for November 1 of last year from 1,492 employers of 135,559 men and women; this was a decrease of 1,832 from their October 1, 1937, payrolls.

British Columbia.—A further contraction in employment was recorded in British Columbia; the staffs of the 1,137 employers furnishing returns aggregated 92,013, compared with 95,308 in the preceding month. The reduction took

TABLE I.—INDEX NUMBERS OF EMPLOYMENT BY ECONOMIC AREAS
(AVERAGE CALENDAR YEAR 1926=100)

—	Canada	Maritime Provinces	Quebec	Ontario	Prairie Provinces	British Columbia
Nov. 1, 1921	91·3	102·6	83·4	92·7	101·9	83·7
Nov. 1, 1922	97·0	102·9	88·4	101·1	104·3	88·9

Nov. 1	114·6	112·6	119·7	115·0	108·1	107·5
Relative Weight of Employment by Economic Areas as at Nov. 1, 1938	100·0	7·5	30·7	40·9	12·5	8·4

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review

place largely in construction, manufacturing and transportation, with smaller losses in communications and services. In the group of factory employment, there were important seasonal reductions in food canneries, with smaller declines in iron and steel plants. On the other hand, logging and retail trade were more active. Employment generally was quieter than at November 1 of last year, when 1,104 establishments had reported a total working force of 94,851 persons, compared with 100,263 in the preceding month; the index then stood at 111·5, as compared with 107·5 at November 1, 1938.

Table 1 gives index numbers by economic areas.

Employment by Cities

Additions to staffs were recorded in Quebec, Toronto, and Windsor, while in Montreal, Ottawa, Hamilton, Winnipeg, and Vancouver, there was a falling-off in activity. Except in Montreal and Quebec, the volume of employment in these centres was not so great as at the beginning of November of 1937.

Montreal.—A reduction in employment occurred in Montreal at November 1, when 1,750 persons were released from the payrolls of the 1,583 co-operating firms, who employed 164,254. Trade and building showed heightened activity, but there were losses in manufacturing, road construction and transportation. Within the manufacturing group, there was curtailment in textile, leather, mineral product and electrical apparatus factories, while vegetable food and some other plants reported advances. A rather smaller decrease had been noted at the same date of last year, and the index was then fractionally lower. Statements for November 1, 1937, had been received from 1,417 establishments providing work for 159,897 men and women.

Quebec City.—Industrial activity showed a further advance in Quebec, according to 193 employers of 16,405 persons, compared with 16,137 at October 1. Construction and transportation indicated most of the increase, while manufacturing recorded a decline; this took place largely in leather plants. Employment

Relative Weight of Employment by Cities as at Nov. 1, 1938	14·9	1·5	12·6	1·3	3·0	1·6	3·7	3·3

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated city, to the total number of all employees reported in Canada by the firms making returns at the date under review.

was brisker than at the beginning of November, 1937, when the 178 co-operating establishments had employed 13,886 workers, or 448 fewer than at October 1, 1937.

Toronto.—There was a slight increase in the pay-rolls of 1,626 firms in Toronto, who had 138,304 persons in their employ, a number greater by 193 than in their last report. Most of the expansion took place in trade, services and manufacturing, in which food and printing and publishing plants showed improvement. On the other hand, employees were released by transportation and construction companies. A small gain had also been registered at the beginning of November of a year ago, when the index was some three points higher; the 1,555 employers making returns for November 1, 1937, had reported staffs aggregating 140,300, compared with 140,162 in the preceding month.

Ottawa.—In Ottawa, moderate curtailment was shown in manufacturing, particularly in the lumber and pulp and paper divisions; construction and transportation were also slacker, while trade was rather more active. The changes in the other groups were slight. The 211 establishments furnishing data employed 14,203 persons, as against 14,533 at October 1. Employment was in less volume than at the same date in 1937, when the trend had also been downward, according to information from 204 employers of 14,813 workers.

Hamilton.—Industrial activity in Hamilton decreased slightly at November 1, when the 304 co-operating firms reported 33,311 employees, or 87 fewer than at the beginning of October. Manufacturing was quieter, the loss taking place chiefly in the iron and steel and electrical apparatus groups; on the other hand, construction and trade showed moderate increases. A general gain had been made at the beginning of November of last year, and the index was then decidedly higher. The November 1, 1937, pay-lists of the 294 reporting employers had included 38,512 men and women.

Relative Weight of Employment by Industries as at Nov. 1, 1938	100·0	51·4	3·4	6·9	2·1	9·6	13·4	2·6	10·6

NOTE:—The "Relative Weight", as given just above, shows the proportion of employees in the indicated industry, to the total number of all employees reported in Canada by the firms making returns at the date under review.

Windsor.—The situation in Windsor showed a further improvement; 191 establishments reported 17,958 persons on their staffs, compared with 17,390 at the beginning of October. The increase took place mainly in the automobile and related industries, while food factories were seasonally slacker. A larger gain had been indicated at the same date of a year ago, when employment was at a much higher level. Statistics for November 1, 1937, had been tabulated from 179 firms, whose payrolls totalled 21,019.

Winnipeg.—Employment was reduced in Winnipeg, according to 498 employers with 40,712 workers at the beginning of November, as compared with 41,430 in their last report. Manufacturing was slacker, iron and steel plants reporting most of the falling off; transportation, building and road construction also released employees, while trade showed an upward movement. Figures furnished by 488 firms at the first of November of last year indicated that they had 42,183 men and women on their pay-lists; the employment index then stood at 98·0, compared with 94·7 at the date under review.

Vancouver.—The movement was again downward in Vancouver, where the 476 co-operating establishments had 35,972 persons on their staffs, or 1,387 fewer than in the preceding month. Manufacturing, transportation, construction and other industries showed declines, those in the first-named occurring largely in lumber, food and metal-using factories. Industrial activity generally was at a lower level than at the beginning of November of last year, when curtailment had also been reported by 461 firms, whose employees had numbered 37,215, a decline of 988 from October 1, 1937.

Index numbers by cities are given in Table 2.

Employment by Industries

Manufacturing.—While employment in manufactures at November 1 showed a seasonal contraction, this was on a smaller scale than that indicated at the same date of last year, and was also less than the average decline at the beginning of November in the autumns since 1920. The 6,217 co-operating establishments reported 565,332 employees, or 8,094 fewer than at October 1. The index (1926=

[1] For explanation of term "Relative Weight", see footnote to Table III.

100), declined from 112·5 in the preceding month to 110·9 at November 1, when it was lower than that of 119·0 at the same date in 1937. However, the latest index was higher than at the beginning of November in any of the six preceding years.

Since the recession was less-than-average in the experience of past years, the seasonally-adjusted index gained slightly, rising from 109·1 at the beginning of October, to 109·9 at the date under review.

The trend was upward at November 1, 1938, in iron and steel plants, the improvement occurring mainly in the crude, rolled and forged, agricultural implement and automobile divisions. The general gain was contrary to the usual seasonal movement, but was smaller than that indicated at November 1 in any of the three preceding years. The rubber, chemical and electrical light and power industries also afforded more employment than at the beginning of October. On the other hand, animal and vegetable food, lumber, leather, pulp and paper, textile, beverage, clay, glass and stone, electrical apparatus, non-ferrous metal and non-metallic mineral product factories released employees, the declines in many cases being of a seasonal nature.

For November 1, 1937, 6,015 manufacturing establishments had reported 605,134 employees, compared with 618,470 in the preceding month.

The unadjusted indexes of factory employment (calculated on the 1926 average as 100), have been as follows at the beginning of November in recent years: 1938, 110·9; 1937, 119·0; 1936, 107·7; 1935, 103·5; 1934, 92·8; 1933, 86·5; 1932, 81·7; 1931, 88·8; 1930, 104·6; 1929, 117·2; 1928, 115·1 and 1927, 104·9.

Animal Products—Edible.—Meat-preserving plants reported greatly increased activity, but seasonal curtailment was indicated in dairies and fish-canneries. Statistics were received from 313 manufacturers, employing a staff of 25,715, as compared with 25,947 in the preceding month. This decrease, which took place largely in British Columbia, was much smaller than that registered at the corresponding date last year, when employment was, however, at a rather higher level.

Leather and Products.—There was a decided loss in personnel in this group at November 1, mainly in boot and shoe factories in Quebec and Ontario. The 314 firms furnishing data reported 21,739 workers, as against 23,206 at October 1. The index was three points lower than at the same date in 1937, although a rather larger decline had then been noted.

Lumber and Products.—Further seasonal contractions, involving fewer employes than in the autumn of last year, were indicated in the lumber group, where employment was, however, in smaller volume than in November, 1937. The shrinkage at the date under review took place principally in rough and dressed lumber mills, while furniture works showed improvement. A combined working force of 41,296 men and women was reported by the 905 co-operating manufacturers, as compared with 43,825 at the beginning of October. The most pronounced decreases were in Quebec and Ontario, but the tendency was generally downward except in British Columbia, where little change on the whole was noted.

Musical Instruments.—A loss was indicated in musical instrument factories, 37 of which employed 1,526 persons, or 138 fewer than at October 1. Employment was quieter than at the beginning of November, 1937, when a gain had been recorded.

Plant Products—Edible.—Fruit and vegetable canneries reported very marked seasonal reductions in their pay-rolls, while the sugar and syrup and other divisions of this industry showed advances. The force of the 534 co-operating firms included 40,907 employees, or 3,706 fewer than in their last return. Employment declined in Ontario and British Columbia, but improvement was noted in Quebec and the Prairie Provinces. The curtailment, on the whole, did not involve nearly so many workers as were released at the corresponding date last year; the index number then, however, was slightly higher than at the date under review.

Pulp and Paper Products.—The trend in this group was downward, according to data from 621 establishments with 65,574 men and women on their pay-rolls, as compared with 66,005 at the beginning of October. Moderate improvement was recorded in printing and publishing houses, and in the manufacture of paper products, while pulp and paper mills showed a reduction. There were losses in the Maritime Provinces and Quebec, while improvement was noted in Ontario. A greater contraction had been indicated at the beginning of November a year ago, but the index was then over six points higher.

Rubber Products.—Employment in rubber goods showed an increase at November 1; information was compiled from 54 firms with 13,254 employees, as against 13,046 in their last report. Activity was below its level at November 1, 1937, although a smaller gain had then been noted.

Textile Products.—Cotton, knitting and some other textile factories reported moderately heightened employment, but the production of garments and personal furnishings and headwear showed a falling-off; 1,151 textile manufacturers reduced their pay-rolls from

106,732 at October 1 to 106,371 at the date under review. The largest decreases were in Quebec and Ontario. A greater loss had taken place at the beginning of November last year, but the index was then some six points higher.

Beverages.—A reduction was recorded in beverage plants, 141 of which furnished statistics showing 8,844 persons on their pay-rolls, as compared with 9,180 at October 1. Most of the decline occurred in Ontario. Improvement had been indicated at the corresponding date last year; employment then, however, was not quite so brisk.

Tobacco.—Practically no change was reported in tobacco manufacturing at the beginning of November, when the 45 co-operating establishments employed 7,949 men and women. Although a falling-off had been shown at November 1, 1937, the index was then rather higher.

Chemicals and Allied Products.—In this group, statements were furnished by 290 plants employing 18,495 persons, or 153 more than in their last report. The index was practically the same as at November 1, 1937, when a small gain had also been recorded.

Clay, Glass and Stone Products.—Seasonal curtailment was noted in these classes of building materials in most provinces; employment generally was at a lower level than at November 1, 1937, although greater losses, on the whole, had then taken place. The forces of the 214 employers from whom information was received, had declined since October 1 by 261 persons, to 9,926 at the beginning of November, 1938.

Electric Light and Power.—Employment in the production of electric light and power showed further improvement, 168 workers being added to the pay-rolls of the 98 co-operating manufacturers, who employed 17,450 persons. Little general change had been indicated in this industry at November 1 of last year, when the index was lower.

Electrical Appliances.—There was a contraction in electrical apparatus works, 126 of which had 18,416 employees, or 209 fewer than at October 1, 1938. An upward movement had been noted at the same date in 1937, and employment was then in greater volume.

Iron and Steel Products.—Automobile, agricultural implement, crude, rolled and forged, wire and some other iron and steel works showed increases in personnel, while the heating appliance, machinery and structural iron and steel divisions reported lowered activity. On the whole, the additions to pay-rolls were smaller than those indicated at November 1, 1937, when employment was at a higher level. Statements were received from 918 manufacturers whose staffs aggregated 122,842, as compared with 120,873 at October 1, 1938. Most of the advance took place in Nova Scotia and Ontario, while the tendency in the Western Provinces was unfavourable.

Non-ferrous Metal Products.—Data tabulated from 183 firms in the non-ferrous metal group showed that they employed 24,490 workers, or 286 fewer than at October 1. The decrease occurred largely in smelting and refining and in the manufacture of lead, tin, zinc, copper and aluminum products. The level of employment was slightly lower than at the same date of 1937, although a larger loss had then been indicated.

Non-metallic Mineral Products.—There was a decline in activity in non-metallic mineral product factories, 100 of which released 460 persons, bringing their staffs to 12,612 at the beginning of November. The index was higher than at November 1 of last year, when a reduction had also been noted.

Logging

Statistics were tabulated from 364 firms employing 37,672 men, or 15,020 more than in the preceding month. This advance was decidedly smaller than that reported at November 1 in 1937 or 1936, but it exceeded the average gain recorded at that date in the years, 1921-1937. The index, at 130·8, was much below its level of last autumn. There were increases at the date under review in all five economic areas, those in Quebec being largest.

Mining

The mining of coal and other non-metallic minerals and of metallic ores afforded more employment, according to statements from 441 mine operators, with 75,672 employees, a number greater by 1,230 than in their last report. Of the total staff recorded at the date under review, 25,361 members belonged in coal-mining, 9,116 in the extraction of other non-metallic minerals, and 41,195 in metallic ore mining. A decline had been indicated at the same date in 1937, and the index then was slightly below its level at the time of writing.

Communications

Telephones and telegraphs showed moderate seasonal contractions; the companies and branches making returns had 22,826 workers on their pay-rolls, a loss of 474 since October 1. The index of employment was lower than at November 1, 1937, when a falling-off had also been noted.

Transportation

Street Railways and Cartage.—There was a reduction in activity in local transportation, according to 257 firms whose staffs aggregated

28,481 at the beginning of November, as compared with 29,089 in the preceding month. The decline occurred chiefly in Ontario and the Prairie Provinces. Employment was in greater volume than at the corresponding date in 1937; the loss then reported had been on a larger scale.

Steam Railways.—Statistics were tabulated from 99 divisional superintendents and other employers in the railway operation group, whose pay-rolls were reduced by 1,717 persons, to 60,213 at November 1. The most extensive contractions were in Quebec and the Western Provinces. Employment was quieter than at the beginning of November, 1937, when a smaller decline had been indicated.

Shipping and Stevedoring.—A falling-off was noted in water transportation, 123 companies employing 17,327 workers, as compared with 17,587 in the preceding month. There were moderate losses in New Brunswick, Quebec, Ontario and British Columbia. A much greater decrease had been shown at November 1 last year, and the index then stood at 93·1, compared with 94·6 at the date under review.

Construction

Building.—There was a further improvement in building, 1,009 persons being added to the forces of the 877 co-operating contractors, who had 33,642 employees; this number was rather smaller than that reported by the firms making returns at the begining of November, 1937, although the trend had then been unfavourable. There were advances at the date under review in the Maritime Provinces, Quebec and Saskatchewan, while elsewhere curtailment was indicated.

Highways.—Work on highways and streets decreased in all provinces, the largest losses being in Quebec. Statements were tabulated from 424 employers, whose staffs, standing at 90,811, were smaller by 19,443 persons than at October 1, 1938. The index, at 238·2 at the beginning of November, was lower than at the same date in 1937, when the reported contraction had been on a much smaller scale.

Railways.—Seasonal curtailment of railway construction work was generally recorded, the most marked reductions occurring in Quebec, Ontario and Saskatchewan. The forces of the 35 companies and divisional superintendents furnishing returns declined from 29,249 persons at October 1, to 22,536 at the beginning of November. This shrinkage considerably exceeded that registered at the corresponding date in 1937, and employment was then in greater volume.

Services

Hotels and restaurants were seasonally quiet, while little general change was shown in other branches of the services group, according to 539 firms employing 28,446 persons, or 717 fewer than at the beginning of October. The index, at 132·8, was slightly higher than that of November 1, 1937; a larger decline, on the whole, had then been indicated.

Trade

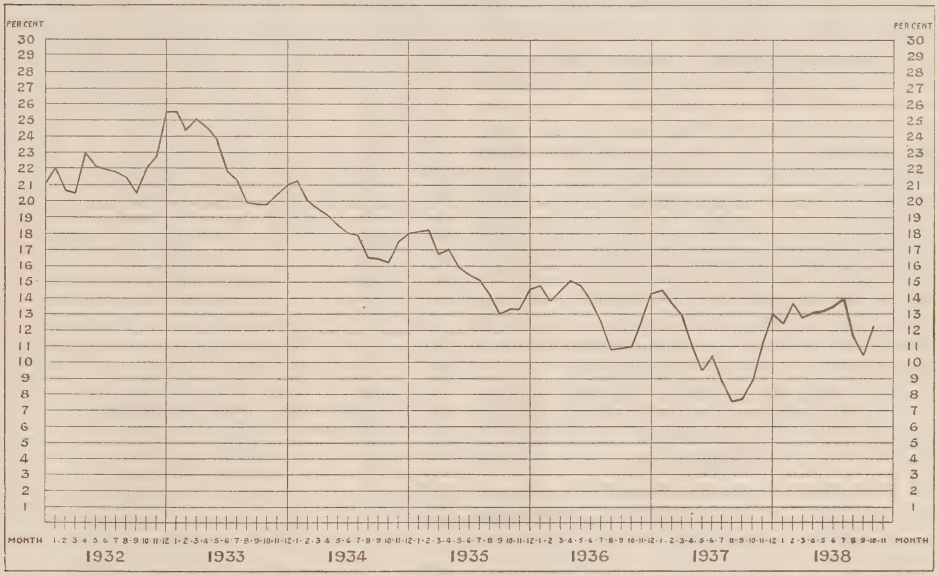
The trend of employment in trade was again seasonally upward, 962 workers being added to the forces of the 1,587 retail and wholesale houses furnishing returns, whose staffs aggregated 117,229. The increase took place in the retail division, wholesale trade showing a moderate falling-off. The index stood at 135·6, compared with 137·0 at November 1, 1937, when the reported gains had been on a much larger scale. Further pronounced expansion in employment may be expected during the next few weeks, in preparation for the Christmas and holiday trade.

Tables

Index numbers of employment by economic areas, leading cities and industries are given in the accompanying tables. The columns headed "Relative Weight" show the proportion that the number of employees reported in the indicated area or industry is of the total number of employees reported in Canada by the firms making returns at the date under review.

(2) Unemployment in Trade Unions at the Close of October, 1938

The term unemployment as used in the following report has reference to involuntary idleness due to economic causes. Persons who are engaged at work other than their own trades or who are idle owing to illness are not considered as unemployed, while unions which are involved in industrial disputes are excluded from these tabulations. As the number of unions making returns varies from month to month, with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.



Retarded activity on a rather small scale was in evidence among local trade unions during October, the percentage of unemployed members rising from 10·4 at the close of September to 12·3 per cent in October. The unemployment volume was also in advance of that recorded at the end of October, 1937, when 8·9 per cent of the members were idle.

Returns for October were furnished by 1,920 local unions with a total membership of 236,690 persons, 29,160 of whom were without employment on the last day of the month. In the curtailment of work afforded during October over the previous month all provinces, with the exception of Alberta, shared in varying measures, British Columbia with a drop in activity of over 3 per cent showing the greatest change and Ontario and Saskatchewan contractions of over 2 per cent, while the remaining provinces registered declines on a smaller scale. The improvement reported from Alberta, however, was merely nominal. When a comparison is made with the returns for October, 1937, Ontario and New Brunswick unions showed the most pronounced employment recessions during the month under review and reductions of somewhat lesser extent were manifest by Nova Scotia, Quebec, Manitoba and Alberta unions. From Saskatchewan and British Columbia, however, slight increases in available work were noted.

Each month a separate compilation is made of trade union unemployment in the largest city in each province, with the exception of Prince Edward Island. Contrasted with the returns for September, Halifax, Saint John and Edmonton unions reflected a higher employment level during October, but the improvement recorded was rather small, while in Winnipeg, Montreal, Toronto, Regina and Vancouver there was some lessening in the volume of work afforded. Contrasted with the returns for October, 1937, Montreal members suffered marked losses in employment during the period surveyed, and moderate curtailment of activity was evident among Saint John, Toronto and Winnipeg members. In Edmonton and Vancouver lesser declines occurred. More favourable conditions, however, prevailed in Halifax and Regina.

The chart which accompanies this article illustrates the trend of unemployment by months from January, 1932, to date. The curve at the close of October traced a course contrary to that of the preceding month, tending in an upward direction and denoting a somewhat lessened employment volume. The level attained by the curve at the end of October was considerably higher than in the corresponding month last year, showing that the situation for organized workers was less favourable than in October a year ago.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADES UNIONS

Workers in the manufacturing group of industries registered a drop in the volume of employment afforded during October from the previous month, as manifest by the reports tabulated from 562 unions with 90,472 members. Of these, 12,069 or 13·3 per cent were idle on the last day of the month, contrasted with 11·8 per cent of unemployment in September. Activity for hat, cap and glove, and glass workers was extensively curtailed from September, but as their membership was not particularly large they did not greatly affect the situation in the manufacturing in-

dustries as a whole. Noteworthy recessions in employment were also manifest by papermakers and general labourers, and the situation declined for printing tradesmen, wood, garment, fur, iron and steel, and gas workers. On the other hand, improvement in substantial measure was reflected by textile and carpet workers, and metal polishers. More moderate gains were evident among bakers and confectioners, and the trend for cigar and tobacco, brewery, leather and jewelry workers was in a favourable direction, though the variations from September were slight. In comparison with the returns for October, 1937, when 10·2 per cent of idleness was recorded in the manufacturing industries, conditions for glass and hat, cap and glove workers as in the previous comparison, and for mill and smeltermen were much more depressed during the month under review and important employment recessions were apparent among general labourers and iron and steel workers. Contributing declines on a smaller scale were evident among jewelry, garment, gas, brewery, textile and carpet, and wood workers, printing tradesmen and metal polishers. Fur workers were much better engaged than in October last year and paper makers showed noteworthy improvement in the situation. Advances of somewhat lesser degree were registered by leather workers while meat cutters, and butchers, cigar and tobacco workers, and bakers and confectioners indicated but little gain in activity.

Slight variation in the employment volume as affecting coal miners was shown during October when compared with both the returns for the preceding month and October last year, the 57 unions from which reports were tabulated, with a membership numbering 23,392 persons, indicating that 1,718 or a percentage of 7·3 were out of work on the last day of the month, in contrast with 5·5 per cent in September and with a percentage of 6·4 in October, 1937. Alberta coal areas afforded a considerably better volume of employment during October than in September, which was more than counteracted by the recessions apparent in British Columbia, Nova Scotia and New Brunswick, the declines recorded in British Columbia being quite substantial. The trend of employment for British Columbia coal miners, however, was decidedly upward from October a year ago, while in Alberta and in the eastern coal districts employment was at a somewhat lower level.

A rather noteworthy drop in the volume of work afforded building and construction tradesmen was indicated during October when compared with September and conditions were much quieter that in October, 1937. Returns were forwarded for October this year by an aggregate of 208 associations with 23,730 members, and of these 7,537, or a percentage of 31·8 were idle at the end of the month, compared with an unemployment percentage of 26·7 in September and with 21·4 per cent in October, 1937. Bridge and structural iron workers, and granite and stone cutters showed a large increase in available work from September and marked improvement was apparent among hod carriers and building

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada
Average 1919	3·1	2·0	3·4	2·7	2·1	3·2	2·0	7·9	3·4
Average 1920	1·8	2·0	7·2	3·4	3·1	3·2	2·8	11·2	4·9

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES

Month	Fishing	Lumbering and Logging	Mining	Manufacturing Industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Electric current	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Telephone operation	Trade (retail shop-clerks)	Services	Governmental	Miscellaneous	All occupations

labourers. This advancement was, however, considerably more than offset by the recessions noted in the remaining trades, steam shovelmen, and painters, decorators and paperhangers particularly, showing substantial increases in slackness. Bricklayers, masons and plasterers, carpenters and joiners and electrical workers also recorded important losses in work available, and the situation declined slightly for plumbers and steamfitters, and tile layers, lathers and roofers. When contrasted with the returns for October a year ago the depression evident among carpenters and joiners was a large factor in the increase in idleness shown in the building trades as a whole during the month reviewed. Steam shovelmen and plumbers and steamfitters also, indicated extensive employment curtailment and noteworthy contractions in activity were evident among bricklayers, masons and plasterers, and electrical workers. Bridge and structural iron workers, on the other hand, were afforded a much better volume of work and conditions for granite and stone cutters, painters, decorators and paperhangers, tile layers, lathers and roofers, and hod carriers and building labourers were considerably improved.

In the transportation industries 7·8 per cent of the members included in the returns were idle on the last day of October in contrast with unemployment percentages of 5·8 in September and 5·3 at the close of October, 1937. The October percentage was based on the returns tabulated from 829 unions of transportation workers involving a membership of 65,893 persons, 5,145 of whom were without employment at the end of the month. Steam railway employees, whose returns constituted over 78 per cent of the entire group membership reported, showed some falling off in activity from September, as did also navigation workers and street and electrical railway employees. Among teamsters and chauffeurs, however, there was a slightly upward employment tendency. As in the previous comparison, steam railway employees and navigation workers showed contractions in work afforded from October last year. Teamsters and chauffeurs, and street and electric railway employees, however, indicated a slight rise in available work.

Retail shop clerks, who for some months past have reported adequate work for all their members, registered an unemployment percentage of 0·3 at the close of October. This was apparent from returns received from 5 locals with a total of 1,903 members. In October a year ago all members were reported busy.

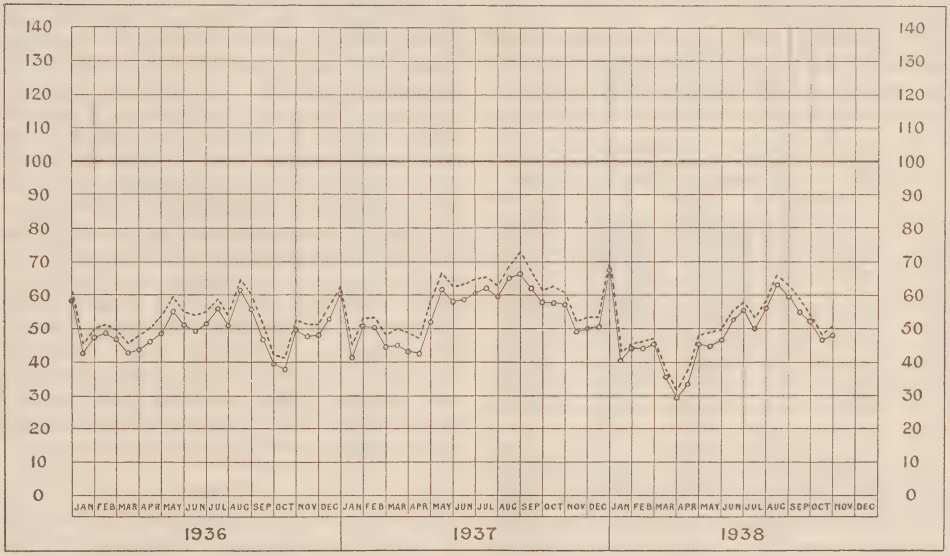
A slight change only in conditions was noted by civic employees during October, both when compared with the returns for the preceding month and October, 1937, the 79 unions from which reports were tabulated with a combined membership of 9,363 persons, indicating that a percentage of 1·4 were unployed, compared with 1·1 per cent of inactivity in September and with 1·6 per cent in October last year.

The situation in the miscellaneous group of trades during October showed little variation from the preceding month, though the tendency was favourable according to the returns compiled from 139 unions, with a membership total of 11,849 persons. Of these, 1,746 were idle on the last day of the month, a percentage of 14·7, contrasted with 15·2 per cent in September. Theatre and stage employees, unclassified workers and stationary engineers and firemen all showed slight improvement in conditions, which was partially offset by the contractions evident among hotel and restaurant employees and barbers. Compared with the returns for October, 1937, when 5·5 per cent of idleness was recorded, all groups reflected a downward employment movement during the month reviewed, unclassified workers especially indicating pronounced increases in slackness. Among hotel and restaurant, and theatre and stage employees the recessions noted were moderate. Barbers and stationary engineers and firemen, however, recorded a slightly lesser volume of work.

Fishermen reported a sharp increase in unemployment during October from September the 8 unions making returns, with 1,173 members showing that 236 were unemployed at the close of the month, a percentage of 20·1 in contrast with 1·1 per cent of idleness in September. Conditions were, however, somewhat improved from October, 1937, when 23·6 per cent of inactivity was recorded.

A much higher level of activity was apparent among lumber workers and loggers during October than in the preceding month, as indicated by the reports tabulated from 3 associations embracing a membership of 1,834 persons. Of these 149, or a percentage of 8·1 were idle on the last day of the month, contrasted with 22·0 per cent in September. Noteworthy increases in slackness, however, were manifest from October, 1937, when 2·4 per cent of unemployment was recorded.

Table I shows by provinces the percentage of members who were on an average unemployed each year from 1919 to 1937, inclusive, and also the percentages of unemployment by provinces for October of each year from 1919 to 1935, inclusive, and for each month from October, 1936, to date. Table II summarizes the returns in the various groups of industries for the same months as in Table I.



(3) Employment Office Reports for October, 1938

During the month of October, 1938, reports from the offices of the employment Service of Canada showed a decline of over 5 per cent in the average daily placements effected from those of the preceding month and also one of 6 per cent from those of the corresponding month of last year. In comparison with September, 1938, farming, logging, manufacturing and transportation registered losses, the largest being in farming, while increases were recorded in construction and maintenance, services, trade and mining, that in construction and maintenance being quite substantial. When compared with October, 1937, all groups, except construction and maintenance and trade, reported fewer placements, a very marked gain in the former group almost entirely offsetting the heavy decrease shown in logging. The decline in farming, however, which also was large and those in manufacturing and services, which were fairly marked, together with the minor losses in transportation and mining, much more than counterbalanced the small increase registered in trade.

The accompanying chart shows the trend of employment since January, 1936, as represented by the ratio of vacancies notified and of placements effected for each 100 applications for work registered at the offices of the Employment Service throughout Canada, compilations being made semi-monthly. It will be seen from the graph that the curve of vacancies and of placements in relation to applications declined during the first half of October but followed an upward trend during the latter half of the month under review and at the close of October attained a level about 9 points below that recorded at the close of the corresponding month a year ago. The ratio of vacancies to each 100 applications was 48·0 during the first half and 50·8 during the second half of October, 1938, in contrast with ratios of 62·6 and 60·6 during the corresponding periods of 1937. The ratios of placements to each 100 applications during the periods under review were 46·5 and 48·0, as compared with 57·6 and 57·1 in the corresponding month of 1937.

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements —o—o—o—o—o—o

The average number of vacancies reported daily by employers to the offices of the Service throughout Canada during October, 1938, was 1,479, as compared with 1,572 in the preceding month and with 1,614 in October a year ago.

The average number of applications for employment received daily by the offices during the month under review was 2,989, in comparison with 2,799 in September, 1938, and with 2,623 during October last year.

The average number of placements made daily by the offices of the Service during October, 1938, was 1,414 of which 917 were in regular employment and 497 in work of one week's duration or less, as compared with a total daily average of 1,495 during the preceding month. Placements in October a year

ago averaged 1,505 daily, consisting of 1,067 in regular and 438 in casual employment.

During the month of October, 1938, the offices of the Service referred 37,095 persons to vacancies and effected a total of 35,348 placements. Of these, the placements in regular employment were 22,922, of which 17,281 were of men and 5,641 of women, while placements in casual work totalled 12,426. The number of vacancies reported by employers was 25,997 for men and 10,973 for women, a total of 36,970, with applications for work numbering 74,715, of which 55,355 were from men and 19,360 from women. Reports for September, 1938, showed 39,279 positions available, 69,960 applications made and 37,367 placements effected, while in October, 1937, there were recorded 40,347 vacancies, 65,551 applications for work and 37,605 placements in regular and casual employment.

The following table gives the placements effected by the offices of the Employment Service, each year, from January, 1928, to date:—

Year	Placements		
	Regular	Casual	Total
1928	334,604	135,724	470,328
1929	260,747	137,620	398,367
1930	187,872	180,807	368,679
1931	175,652	295,876	471,508
1932	153,771	198,443	352,214
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938 (10 months)	199,150	102,292	301,442

Nova Scotia

During October, positions offered through Employment Offices in Nova Scotia were over 5 per cent higher than in the preceding month and nearly 3 per cent above the corresponding month of last year. There was an increase also in placements of over 5 per cent in comparison with September and of nearly one per cent when compared with October, 1937. The only changes of importance in placements by industrial divisions when comparison is made with October of last year were a gain in services and a decline in logging. Other changes included an increase in construction and maintenance and losses in manufacturing, trade and farming. Placements under construction and maintenance numbered 577 and of services 605: of the latter 460 were of household workers. During the month 392 men and 153 women were placed in regular employment.

New Brunswick

Orders received at Employment Offices in New Brunswick during October called for nearly 9 per cent more workers than in the preceding month and were nearly 35 per cent above the corresponding month of last year. Similar percentages of gain were reported in placements under both comparisons. The increase in placements over October, 1937, was due to a substantial gain in the highway division of construction and maintenance. There were small losses in services and manufacturing and minor changes only in all other groups. Most of the placements effected were in construction and maintenance and services, there being 420 in the former group and 668 in the latter. Of the placements in services, 484 were of household workers. Regular placements numbered 104 of men and 88 of women.

Quebec

There was a decrease of one per cent in the number of positions offered through Employment Offices in the Province of Quebec during October when compared with the preceding month, but an increase of over 17 per cent in comparison with the corresponding month of last year. Placements were nearly 4 per cent higher than in September and nearly 27 per cent above October, 1937. A substantial gain under construction and maintenance accounted for the increase in placements over October of last year, although moderate improvement was also shown in transportation. The most noteworthy loss was in logging and there were small declines in services and manufacturing. Placements by industrial divisions included manufacturing, 76; logging, 347; transportation, 296; construction and maintenance, 4,691 and services, 2,873, of which 2,640 were of household workers. There were 5,299 men and 1,899 women placed in regular employment.

Ontario

Opportunities for employment, as indicated by orders received at Employment Offices in Ontario during October, were over 8 per cent less favourable than in the preceding month and nearly 32 per cent below the corresponding month of last year. There was a decrease also in placements of over 7 per cent when compared with September and of over 26 per cent in comparison with October, 1937. The decrease in placements from October of last year was mainly due to a substantial loss in logging, although large declines were also reported in farming, services, transportation and manufacturing. Construction and maintenance was the only group to show any improvement of importance and a minor increase was reported in trade. Placements by industrial divisions included manufacturing, 670; logging, 451; farming, 1,080; construction and maintenance, 4,298; trade, 412 and services, 3,813, of which 2,651 were of household workers. During the month 4,322 men and 1,657 women were placed in regular employment.

*265 Placements effected since closed.

MANITOBA

There was a gain of nearly 36 per cent in the number of positions offered through Employment Offices in Manitoba during October when compared with the preceding month and of nearly 30 per cent in comparison with the corresponding month of last year. There was an increase also in placements of nearly 37 per cent over September and nearly 13 per cent above October, 1937. Placements in farming, construction and maintenance and services were considerably higher than during October of last year, but these gains were largely offset by a decline in logging. Industrial divisions in which most of the placements were effected during the month were logging, 173; farming, 1,139; construction and maintenance, 1,979; and services, 935, of which 756 were of household workers. During the month there were 3,284 men and 403 women placed in regular employment.

SASKATCHEWAN

Positions offered through Employment Offices in Saskatchewan during October were 24 per cent higher than in the preceding month, but nearly 24 per cent below the corresponding month of last year. There was an increase in placements of nearly 19 per cent when compared with September, but a decline of over 22 per cent in comparison with October, 1937. Except for nominal increases in trade and transportation all industrial divisions showed declines when compared with October of last year, the most noteworthy of these being in construction and maintenance and farming. Industrial divisions in which most of the placements were effected during the month were farming, 1,950; construction and maintenance, 157 and services, 948, of which 802 were of household workers. Placements in regular employment numbered 2,041 of men and 745 of women.

ALBERTA

Orders received at Employment Offices in Alberta during October called for over 52 per cent less workers than in the preceding month and nearly 17 per cent less than during the corresponding month of last year. There was a decrease also in placements of over 57 per cent when compared with September and over 25 per cent in comparison with October, 1937. The largest change in placements from October of last year was a decrease in farming, which accounted for the decline under this comparison for the province as a whole. Placement reductions were also reported in construction and maintenance and logging, but these losses were more than offset by gains in services, mining and manufacturing. Placements by industrial divisions included logging, 79; farming, 878; mining, 105; construction and maintenance, 240 and services, 660, of which 493 were of household workers. During the month 1,186 men and 402 women were placed in regular employment.

BRITISH COLUMBIA

Employment opportunities, as indicated by orders received at Employment Offices in British Columbia during October, were over 11 per cent less favourable than in the preceding month, but nearly 18 per cent better than during the corresponding month of last year. Similar percentages of change were reported in placements under both comparisons. The increase in placements over October, 1937, was due to a gain in the highway division of construction and maintenance, made up largely of placements on relief work. Services, manufacturing, farming and transportation showed declines, but there were minor increases in all other groups. Placements by industrial divisions included farming, 87; construction and maintenance, 3,252 and services, 698, of which 524 were of household workers. Placements in regular employment numbered 653 of men and 294 of women.

Movement of Labour

During the month of October, 1938, the offices of the Employment Service of Canada made 22,922 placements in regular employment 10,757 of which were of persons for whom the employment located was outside the immediate region of the offices at which they were registered. Of the latter, 528 were granted the Employment Service reduced transportation rate, 504 going to centres within the same province as the despatching office and 24 to other provinces. The reduced transportation rate, which is 2·5 cents per mile with a minimum fare of $4.00, is granted by the railway companies to *bona fide* applicants at the offices of the Employment Service who may wish to travel to distant employment for which no workers are available locally.

The movement of labour in Quebec during October originated at Hull and comprised the transfer of 14 bushmen to employment in the Pembroke zone. By offices in Ontario during October 441 persons were shipped to provincial situations. The Port Arthur office issued certificates to 265 bush workers, 3 mine employees, one hotel waitress, one cook and one domestic; the Fort William office to 71 bush workers and one miner, and the Sudbury office to 61 bush workers and one mine blacksmith travelling to centres within their respective zones. In addition, the Sudbury zone received 10 bushmen from North Bay and one bushman from Toronto, while to the Port Arthur

zone one blacksmith was shipped from Sudbury. Under the Dominion-Provincial Youth Training Plan during October various Ontario offices were instrumental in transferring 24 persons to centres within the province, enabling them to register for training courses in a number of lines of work. Transfers at the reduced rate in Manitoba during October were effected by the Winnipeg office and numbered 25, of which 15 were within the province and 10 outside. The latter were to the Port Arthur zone and included the despatch of 6 bushmen, one mine worker, one farm hand, one blacksmith and one housekeeper. The provincial movement was entirely within the Winnipeg zone, 11 bushmen, one fisherman, one mill labourer, one mine carpenter and one hotel waitress being carried to employment at various centres. In Saskatchewan during October, 4 workers travelled at the reduced rate to points within the province. Receiving certificates at Saskatoon one bushman went to Prince Albert and 2 bushmen to employment in the Saskatoon zone. Within its own zone the Regina office transferred one teacher. Business transacted by Alberta offices during October involved the despatch of 43 persons to provincial employment. On certificates secured at Edmonton 17 bushmen, 11 mine workers, 4 bricklayers, 4 highway construction workers, 2 farm hands, 2 Dominion Parks labourers and one domestic were carried at the reduced rate to centres within the Edmonton zone. From Calgary one farm hand was sent to a point within the same zone and one farm housekeeper to Edmonton. The Vancouver office was responsible for the one transfer effected in British Columbia during October, which was of a companion help travelling to a situation in the Vancouver zone.

Of the 528 persons who took advantage of the Employment Service reduced transportation rate during October, 219 were transported by the Canadian National Railways, 308 by the Canadian Pacific Railway and one by the Pacific Great Eastern Railway.

In addition to the 2·5 cent rate referred to in the above, the special harvest transportation facilities extended by the railway companies in the Prairie Provinces during August and the first half of September was continued in the province of Alberta alone until the 15th of October. By this arrangement a special harvest rate of 1·5 cents per mile was accorded to all applicants upon presentation of certificates supplied by offices of the Employment Service in Manitoba, Saskatchewan and Alberta, the transfers being entirely confined to the districts within their respective provinces. A summary of the movement of labour under this plan for August and September has appeared in the two previous issues of the Labour Gazette. During the first fifteen days of October, however, 30 harvesters in Alberta profited by this special rate, 17 of whom were conveyed by the Canadian National Railways and 13 by the Canadian Pacific Railway.

(4) Building Permits Issued in Canada during October, 1938

The estimated cost of the building authorized by 58 cities during October was $9,587,462; this was a pronounced increase of $4,304,041 or 81·5 per cent, as compared with the September total of $5,283,421, and of $5,185,625, or 117·8 per cent over October, 1937, when the aggregate value was $4,401,837. The estimated cost of the construction work authorized in October, 1938, was substantially greater than in any other month since September, 1931. The permit for a large public building in Ottawa was a factor in the high total for last month, while the construction work authorized in Montreal and Edmonton also greatly exceeded in value that reported in any other month of recent years.

The value of the building represented by the permits taken out in the first ten months of the present year was $52,696,759; this was higher than the aggregate of $47,362,820 reported in the period, January-October, 1937, and also exceeded that indicated in the first ten months of any other year since 1931. However, the cumulative total in each of these years has been very much lower than in preceding years of the record; the wholesale prices of building materials have recently been lower than in the same period of 1937, although they continue higher than in any of the years, 1931-1936.

Some 50 cities furnished detailed statistics, showing that they had issued about 550 permits for dwellings estimated to cost approximately $1,600,000, and some 2,500 permits for other buildings valued at more than $7,000,000. During September, authority was granted for the erection of about 470 dwellings and 2,600 other buildings, the estimated cost being approximately $1,636,000 and $3,150,000, respectively.

All provinces except Nova Scotia and British Columbia recorded increases in the value of the building authorized as compared with September, 1938, the gains of $3,017,863 or 196·6 per cent in Ontario and $974,879 or 51·5 per cent in Quebec being greatest. Nova Scotia and British Columbia showed decreases of $136,336, or 63·8 per cent and $92,809 or 15·3 per cent respectively.

As compared with October, 1937, there was improvement in Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Ontario, Saskatchewan and Alberta; in this comparison also, Ontario and Quebec reported the most pronounced increases of $2,341,126 or 105·9 per cent and $2,017,766 or 237·2 per cent, respectively. Manitoba showed a decline of $183,675 or 40 per cent as compared with October, 1937, while the falling-off in British Columbia was slight.

Montreal reported an increase in the value of authorized building as compared with the preceding month, and also over the same month of last year. In Toronto and Winnipeg, there was improvement from September, 1938, that in the latter being slight, but these cities reported declines as compared with October, 1937. The Vancouver total for October was lower than in either the preceding month, or the same month of last year.

Of the other centres, Charlottetown, New Glasgow, Fredericton, Quebec, Shawinigan Falls, Sherbrooke, Chatham, Hamilton, Kingston, Ottawa, St. Catharines, York and East York Townships, Welland, Windsor, Riverside, Brandon, St. Boniface, Regina, Saskatoon,

Year	Value of permits issued in October	Value of permits issued in first ten months	Indexes of value of permits issued in first ten months (1926=100)	Average indexes of wholesale prices of building materials in first ten months (Average 1926=100)

[1] Includes Moncton, received too late for inclusion in September totals.

Edmonton, Kamloops, New Westminster and Prince Rupert reported increases over September, 1938, and also as compared with October, 1937.

The accompanying table gives the value of the building authorized by 58 cities during October, and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1926 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (average, 1926=100).

The aggregate for the first ten months was higher by 11·3 per cent than in 1937, and also exceeded that for the same period in each of the five years immediately preceding, but was substantially lower than the average of $99,725,571 reported in the eighteen years, 1920-1937. The average index number of wholesale prices of building materials, though lower than in 1937, was higher than in preceding years since 1930.

The accompanying table gives the value of the building permits issued by each of the 58 cities during September and October, 1938, and October, 1937. The 35 cities for which records are available since 1910 are marked thus "*".

EMPLOYMENT CONDITIONS IN CANADA AT END OF NOVEMBER, 1938

Reports of Superintendents of the Employment Service

THE employment situation at the end of November was reported by the superintendents of the Employment Service to be as follows:—

Farmers in the Maritime Provinces had about completed their fall ploughing and field work. Severe storms had rendered roads impassable, so that produce at the city markets was not so plentiful. Except for the seasonal cutting of Christmas trees, logging was dull, as operators still had a considerable amount of last year's cut on hand and were not disposed to begin operations on any extended scale until the markets warranted it. Fishing was severely handicapped through high seas and heavy gales, many fishermen having lost their homes, as well as their boats and all their gear. Coal mines in the New Glasgow area and also those in Cape Breton and vicinity worked from two to six days per week. Manufacturers reported only average outputs outside the biscuit and confectionery plants, which were busy with Christmas orders. At Saint John, the pulp mill remained closed and the cotton mill was operating on short time. At Sydney, no idleness was reported in the iron and steel industry. Little new building was being started, but all construction underway progressed rapidly and road projects continued. A great number of men also were employed locally, clearing drains and shovelling snow. Freight and passenger traffic by railway was steady, but by bus and auto was slacker, due to heavy storms. The winter port season at Saint John had opened and several cargo and passenger boats had docked there. Trade, both wholesale and retail, was fair, all retail merchants being busy preparing for Christmas. Placements of houseworkers in the Women's Division remained steady.

Farming in the Province of Quebec was very quiet and no improvement was noted in logging. Sawmills had been unable to dispose entirely of last year's cut, but contracts for railway ties were expected. Producing mines at Rouyn were operating normally and some drilling was underway. Manufacturing centres reported as follows: Bagotville, increased activity; Chicoutimi, paper mills working at 75 per cent capacity, while the aluminium plant was very busy; Hull and Rouyn, decreased activity, Matane, fair; Montreal, production nearly normal, although several hundred men had been laid off in the metal industries; Quebec, leather slack, but furs and clothing busier; Val d'Or, some rush orders on hand, coincident with the closing of the navigation season. Experienced tradesmen throughout the province were finding employment in connection with new construction, the enlargement of industrial and commercial buildings, apartment houses, etc., labourers alone suffering loss in this line from lack of work. Highway contractors had also taken advantage of the excellent weather to speed up work and, as a result, many additional men were employed. Trade was rather quiet and a general decrease was noted in household services.

The call for farm help in Ontario was very light, with plenty of experienced workers available. Although far below that of last year, the demand for loggers showed some improvement, the supply of men for cordwood cutting, however, being greatly in excess of requirements. Mining was quiet and many skilled men applied for work daily on the premises. Manufacturing, on the whole, remained fairly steady, although seasonal fluctuation appeared in some industries. Iron

and steel establishments reported low production and staff levels. Agricultural implement factories, while continuing to rehire regular employees, were still below last year's standard. Candy and textile firms were very busy preparing for the Christmas trade. Furniture, tobacco and metal industries, also, were somewhat better. Activity in auto plants likewise had increased considerably. Leather and shoe factories remained about the same. Building construction was beginning to slacken, as various projects were nearing completion, and few new large contracts were being let. Colder weather, too, was responsible for the slowing down of highway work. Lake shipments at Fort William were regular, and increased railway activity at Niagara Falls continued to provide extra employment. The call for fully experienced domestic workers was maintained, particularly for cooks and cooks-general. Requests for clerical and sales help showed some improvement and a few women and girls were placed with industrial concerns.

Orders in the Prairie Provinces for help under the Farm Relief Plan formed the bulk of the demand in this group, with applicants still plentiful. Logging was quiet, except for placements in cordwood camps. Coal mines registered the usual amount of seasonal activity, with plenty of help available. The oil industry at Calgary was unsettled, but increasing interest was being taken in wildcat fields. Manufacturing was fair. Building construction was apparently ended for the time being, only a few repair and alteration jobs being in progress. Highway construction also was approaching completion. Trade was good, with collections fair. A number of women had been placed in household service on farms under the bonus scheme and a scarcity of applicants was recorded in certain localities for this type of work. Employment in city homes, however, was not so easily obtainable, as vacancies, except for those who had taken the specialized training course, were fewer.

Farming was quiet in British Columbia. Contraction was also noted in logging, with some slight reduction in numbers employed. The cutting and shipping of Christmas trees continued and this had helped the situation to a great extent. Sawmills in general were very slack. Coal mines, except at Nanaimo where all Canadian collieries were working full time, recorded no increase in output. Herring and chum salmon fishing at Nanaimo was active and reduction plants were operating again in the vicinity of Prince Rupert, but not, as yet, at capacity. Factories in Nelson were working as usual. A little improvement was noted at Victoria in the building trades, but this was only on small jobs; elsewhere few new contracts were underway and highway construction had slackened. Quietness prevailed in drydocks and shipyards and along the waterfront at Prince Rupert. Colder weather afforded an impetus to trade, both wholesale and retail, but collections were slow. There were numerous vacancies for experienced household help and a scarcity of persons of the right type available; many unskilled applicants for domestic service, however, were seeking employment.

EMPLOYMENT AND UNEMPLOYMENT IN GREAT BRITAIN AND THE UNITED STATES

Great Britain

THE British *Ministry of Labour Gazette*, November, 1938, summarized the employment situation as follows:—

Employment at October 17 showed an improvement as compared with September 12. It improved in the cotton, wool and other main textile industries, coal mining, iron and steel and metal goods manufacture, the motor vehicle, cycle and aircraft industry, tailoring, paper manufacture, and the fishing industry. On the other hand, employment declined in hotel and boarding house, railway, shipping and road passenger transport services, the distributive trades, building, public works contracting, printing, ship building and repairing, bread, biscuit, etc. making, entertainments, sports, etc., and laundry service.

It is provisionally estimated that at October 17, 1938, the number of insured persons, aged 16-64, in employment in Great Britain was approximately 12,294,000. This was 23,000 more than at September 12, 1938, but, on a comparable basis, 210,000 less than at October 18, 1937.

The figure for the number in employment on October 17, 1938, includes 839,000 persons insured under the agricultural scheme and in the classes of domestic employments which became insurable at April 4, 1938. These classes have hitherto been excluded from these figures.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at October 17, 1938, was 12·3 as compared with 12·4 at September 12.

For October 18, 1937, the percentage (which excludes the classes brought into insurance in April, 1938) was 9·8. For persons insured under the general scheme the corresponding percentages were 12·7 at October 17, 1938, 12·8 at September 12, 1938, and 10·1 at October 18, 1937. For persons within the agricultural scheme the percentages were 4·3, 4·1 and 3·3 respectively.

At October 17, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,408,932 wholly unemployed, 307,947 temporarily stopped, and 64,348 normally in casual employment, making a total of 1,781,227; this was 17,391 less than at September 12, 1938, but 390,978 more than at October 18, 1937.

The total of 1,781,227 persons on the registers in Great Britain at October 17, 1938, included 1,019,969 persons with claims admitted for insurance benefit, 538,565 with applications authorized for unemployment allowances, 51,845 persons with applications for insurance benefit or unemployment allowances under consideration, and 170,848 other persons, of whom 43,351 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at October 17, 1938, was 1,862,662, as compared with 1,880,575 at September 12, 1938, and 1,460,080 at October 18, 1937.

United States

According to a press release dated November 23, issued by Miss Frances Perkins, United States Secretary of Labor, a further substantial gain in non-agricultural employment was shown in October. Continuing the succession of gains in employment since July, 248,000 additional persons obtained employment over the month interval. Approximately 900,000 non-agricultural workers have returned to work over the four-month interval. These figures, it was pointed out, do not include employees on projects of the Works Progress Administration and other federal emergency agencies. Temporary cannery employees are also excluded as they are not considered as part of the normal labour supply but are drawn into industry during the packing season.

The following paragraphs taken from the official press release show the employment situation in the United States during October to be as follows:—

Gains were generally reported in the various manufacturing and non-manufacturing industries surveyed. Factory employment in October continued the upswing which began in July, the slightly-larger-than-seasonal gain of 0·8 per cent indicating the hiring of 53,000 additional workers between mid-September and mid-October. Excluding the decrease of approximately 103,000 casual workers in canneries, there was an increase of approximately 156,000 workers in other lines of manufacturing activity. Weekly payrolls rose more sharply than employment, the gain of 3·3 per cent indicating an increase of approximately $5,100,000 in the weekly wage disbursements of factory workers. While gains in factory employment and payrolls are usually reported from September to October, the current gains are significant as they are slightly more pronounced than the seasonally expected gains of 0·3 per cent in employment and 1·6 per cent in payrolls. Payrolls normally show a greater gain than employment in October because September payroll totals are somewhat depressed by the observance of the Labor Day holiday in the September pay period reported.

Gains in employment were reported in wholesale and retail trade establishments, and reports from anthracite and bituminous coal mines and private building construction contractors showed slightly greater than seasonal expansion. Metal mines continued to expand their working forces, and telephone and telegraph companies and electric-railroad and motor-bus companies added workers to their payrolls. Year-round hotels also took on additional employees. Crude petroleum producing companies reported a reduction in working forces, laundries reported a seasonal loss, and dyeing and cleaning, brokerage, insurance, and quarrying firms reported declines of less than one per cent.

The gains were predominantly in the durable goods industries, the October employment index (79·0) for this group standing 4·9 per cent above the September level. Thirty-five of the 43 durable goods industries reported employment gains over the month interval. Employment in the durable goods industries, however, has recovered only to the March, 1938, level and is 28 per cent below the high point reached in May of last year.

While 26 of the 44 non-durable goods industries surveyed reported employment gains from September to October, the group as a whole showed a decline of 2·2 per cent. The October non-durable group index (99·4), with the exception of the preceding month, stands above the level of any month since November, 1937, and 11 per cent below the high recorded in September of last year.

The outstanding employment gain in October was in the automobile, body and parts industry in which approximately 85,000 workers were returned to jobs. The hardware industry, due largely to demand for automobile hardware, reported a gain of nearly 7,000 workers.

Other durable goods industries reported substantial gains in virtually all instances the gains being larger than seasonal.

The more pronounced losses in employment over the month interval were in industries in which seasonal recessions normally occur in October. The largest decrease (103,000 workers) occurred in canning and preserving. Other non-durable industries reporting declines of a seasonal character were ice cream, beverages, boots and shoes, silk and rayon goods, women's clothing, and men's clothing. Among the durable goods industries showing losses were tin cans and other tinware, electric and steam railroad car building, and marble-slate-granite.

Retail trade establishments hired approximately 44,000 additional workers in October to handle the increased volume of fall business. While the October gain is less than the preceding 9-year average, the gain from August to October, 1938, is greater than the average August-October gains in preceding years. The retail general merchandise group, which is composed of department, variety, general merchandise stores, and mail-order houses, showed a gain of 2·6 per cent. Other lines of retail trade showing a substantial gain in numbers of additional workers hired, included apparel, furniture, jewellery, and building materials. Wholesale trade establishments reported a seasonal gain of approximately 8,000 workers who were taken on over the month interval. Anthracite mines continued to re-employ workers, employment increasing 12·8 per cent, or 8,500 workers, over the month interval. Bituminous coal mines also added workers, the rise of 5·0 per cent indicating the re-employment of 19,300 workers. A further expansion in employment of 3·3 per cent, or 2,000 workers, was reported in metal mines, reflecting increased activity due to improved metal prices. Telephone and telegraph companies added approximately 2,100 workers to their payrolls and year-round hotels took on 3,500 additional employees. Employment in private building construction showed a more pronounced gain than the average for the preceding 6-year period, reports from 12,142 private building contractors employing 108,234 workers showing an increase of 2·3 per cent from September to October.

The employment losses in the laundry and crude petroleum producing industries were 4,800 and 3,900, respectively. Small decreases in numbers of workers were shown in brokerage, insurance, dyeing and cleaning, and electric light and power industries.

A preliminary report of the Interstate Commerce Commission indicated a gain of 1·4 per cent, or more than 12,000, in the number of employees on Class I railroads.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

THE Department of Labour is furnished from month to month with information regarding contracts awarded by various departments of the Government of Canada which include among their provisions fair wages conditions for the protection of the labour to be employed.

The Fair Wages Policy of the Dominion Government was originally adopted in 1900 and was expressed in an Order in Council of June 7, 1922, which was subsequently amended by an Order in Council of April 9, 1924. The Fair Wages Order in Council contains certain conditions marked "A" which are applicable to contracts for building and construction work, and certain other conditions marked "B" which apply in the case of contracts for the manufacture of various classes of Government supplies and equipment.

On December 31, 1934, an Order in Council was passed rescinding the "B" conditions previously in effect and substituting other conditions therefor, the full text of which appeared in the LABOUR GAZETTE for January, 1935, pp. 24-25. Provision had been made in the "B" labour conditions in their original form for the payment of wages rates not less than those generally accepted as current for competent workmen in the district in which the work is to be performed, or if there were no current rates then fair and reasonable rates. This provision was retained in the amending Order in Council of December 31, 1934, but with the added proviso that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents an hour, and for female workers 18 years of age and over, less than 20 cents an hour. It is also provided that in any cases where the provincial Minimum Wages Laws require the payment of higher wages than those set out above, such higher rates shall apply in the execution of federal contracts. With respect to males and females under 18 years of age, it is required that they shall be paid rates of wages not less than those provided for women and girls in the Minimum Wages scales of the respective provinces.

Respecting contracts for building and construction work, the "A" conditions of the Fair Wages Order in Council of 1922 as amended in 1924, were superseded in 1930, in so far as wages and hours are concerned by an Act of Parliament known as "The Fair Wages and

Eight Hour Day Act, 1930." This Act, however, has now in turn been superseded by "The Fair Wages and Hours of Labour Act, 1935," which came into force on May 1, 1936. The clause relating to wages and hours in the last named statute is in the terms following:—

"All persons in the employ of the contractor, subcontractor, or any other person doing or contracting to do the whole or any part of the work contemplated by the contract shall during the continuance of the work be paid fair wages;

"The working hours of persons while so employed shall not exceed eight hours per day or forty-four hours per week except in such special cases as the Governor in Council may otherwise provide, or except in cases of emergency as may be approved by the Minister."

The new Act like the 1930 measure, applies not only to contracts made with the Government of Canada for the construction, remodelling, repair or demolition of any work, but also to workmen employed on works of this nature by the Government direct who are excluded from the operation of the Civil Service Act. It contains, however, a provision which did not appear in the 1930 legislation, which applies the fair wages policy to works of construction, remodelling, repair or demolition that are assisted by Federal grant in the form of contribution, subsidy, loan, advance or guarantee. Thus, with respect to works for the elimination of grade crossings, towards which assistance is granted from Dominion public funds under Orders of the Board of Transport Commissioners, the same labour conditions are enforced which apply to works of building and construction undertaken for the various departments of the Dominion Government.

The practice of the different departments of the Government, before entering into contracts for the construction, remodelling, repair or demolition of any work, is to obtain beforehand from the Department of Labour schedules setting forth the current wage rates for the different classes of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of contract.

Both in the case of contracts for building and construction work and in the case of contracts for the manufacture and supply of fittings and supplies, the Minister of Labour is empowered to determine any questions which may arise as to wages rates for overtime and as to the proper classification of any work for the purposes of wages and hours. In the event of a dispute arising as to what is the current or fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade, or fair and reasonable hours on contracts for governmental supplies and equipment, the Minister of Labour is vested with authority to make binding decisions.

In the case of contracts for building and construction work and also of contracts for governmental supplies and equipment, the contractor is required to post and keep posted in a conspicuous place on the premises where the contract is being executed, occupied or frequented by the workmen the fair wages clause or schedule inserted in his contract for the protection of the workmen employed. The contractor is also required to keep proper books and records showing the names, trades and addresses of all workmen in his employ and the wages paid out and time worked by such workmen, these records to be open for inspection by fair wages officers of the Government, any time it may be expedient to the Minister to have the same inspected.

It is further declared that the contractor shall not be entitled to payment of any money which would otherwise be payable under the terms of contract until he has filed a statement showing: (1) the wages rates and hours of labour which are in force for the various classes of workmen; (2) whether any wages or payments remain in arrears; and (3) that all of the labour conditions of the contract have been complied with. In the event of default being made in the payment of the wages of any workmen employed, claim therefor may be filed with the minister of the department with which the contract has been made and payment of such claim may be made by the latter.

All workmen employed in the execution of these contracts shall be residents of Canada, unless the minister of the department with which the contract has been made is of opinion that Canadian labour is not available, or that other special circumstances exist which render it contrary to the public interest to enforce this provision.

In the case of contracts for building and construction works, clerks of works or other inspecting officers appointed by the Government to ensure the due observance of the contracts are specially directed by the Fair Wages Order in Council to do all in their power to see that the labour conditions are fully complied with and to report any apparent violations to the department with which the contract is made.

In the case of contracts for the manufacture of the classes of supplies coming under the "B" Conditions of the Fair Wages Order in Council, it is required that the contractor's premises and the work being performed under contract shall be open for inspection at any

reasonable time by any officer authorized by the Minister of Labour for this purpose, and that the premises shall be kept in sanitary condition.

Contracts for dredging work also contain provisions for the observance of current or fair and reasonable rates of wages and hours, and empower the Minister of Labour to deal with any dispute which may arise.

During the past month statements were received in the Department of Labour showing that the following contracts have recently been executed by the Government of Canada:

GROUP "A" CONTRACTS

(1) *Works of Construction, Remodelling, Repair or Demolition*

NOTE: The labour conditions of each of the contracts noted under this heading, besides stipulating working hours of not more than 8 per day and 44 per week, provide that: "Where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than 44 per week, such lesser hours shall not be exceeded on this work," and also specify that the rates of wages set out therein are *minimum* rates only and that "nothing herein contained shall be considered as exempting contractors from the payment of higher rates in any instance where such higher rates are fixed by provincial legislation."

BOARD OF TRANSPORT COMMISSIONERS

Construction of a level C.P.R. railway crossing diversion at Third Avenue East, Owen Sound, Ontario, to be undertaken by the city of Owen Sound with the aid of a grant from Dominion public funds. A fair wages schedule was included in the contract as follows:—

	Per hour
Labourers	$0 40
Teamster, team and wagon	0 75
Teamster and team (without wagon)	0 70
Teamsters	0 40
Motor truck driver	0 45
Motor truck driver and truck:	
1 to 2 tons	1 45
3 tons	1 95
Road roller operator:	
Gasoline	0 50
Steam	0 65

Construction of a subway for the Canadian National Railways at Ste. Marguerite street, Montreal, P.Q. Name of contractors, Atlas Construction Co., Ltd., Montreal, P.Q. A grant from Dominion public funds was also made towards this work. A fair wages schedule was included in the contract as follows:—

	Per hour
Brick and hollow tile layers	$0 90
Brick and hollow tile layers' helpers (mixing and tempering mortar)	0 45
Carpenters and joiners	0 70
Cement finishers	0 60
Cement and concrete mixer operators (gasoline or electric)	0 50
Compressor operators (gasoline or electric)	0 50
Crane operators (steam, gasoline or electric)	0 70
Drivers	0 40
Driver, horse and cart	0 55
Driver, team and wagon	0 75
Engineers, operating, steam (single or double drum)	0 65
Gasoline shovel operators	0 85
Labourers	0 40
Hoist operators (gasoline or electric)	0 60
Motor truck driver	0 45

Complete overhaul of Jaguar airplane engine. Name of contractors, Ottawa Car Mfg. Co., Ltd., Ottawa, Ont. Date of contract, November 28, 1938. Amount of contract, $1,204.55. The preceding fair wages schedule was included in the contract.

United States Wage-Hour Law and Apprentices

To meet questions concerning the employment of apprentices at wages less than the minimum rates set by the Federal Fair Labor Standards Act, regulations issued by the Wage and Hour Division of the United States Department of Labor define an apprentice as "a person at least 16 years of age who is covered by a written agreement with an employer, or with an association of employers, which apprenticeship agreement (1) has been approved by the State Apprenticeship Council or other established authority of the State, or if none such exists, by the Federal Committee on Apprenticeship, and (2) provides for not less than 4,000 hours of reasonably continuous employment for such person, for his participation in an approved schedule of work experience through employment and at least 144 hours per year of related supplemental instruction."

The apprentice may only be employed at less than the minimum rates set in the act upon the issuance of a special certificate. Application for the certificate must be signed by both the employer and the apprentice and shall be accompanied by an authenticated copy of the apprenticeship agreement. The certificate when issued authorizes the employment of the apprentice named and specifies the rate or rates and the length of time stated in the agreement. No employer shall employ any apprentice under a special certificate at a wage rate less than that stipulated on the certificate.

General Motors Corporation Lay-off Benefit Plans

According to an Associated Press despatch, General Motors Corporation announced recently the inauguration of two benefit plans effective in 1939 intended to give approximately 150,000 hourly-wage employees in the United States the economic security of assured weekly incomes. It was also announced by the chairman of the Corporation that a similar plan would shortly be introduced applicable to 37,000 salaried employees.

Under the announced plan, hourly-wage workers with five years or more service will be eligible for participation in the "General Motors income security plan" under which the Corporation will advance to each employee in periods of curtailed employment an amount sufficient to give him 60 per cent of his standard weekly earnings including unemployment compensation and pay for any other regular employment. The "standard week" under the plan is to be one of forty hours.

A second plan applies to hourly-wage workers with two or more years of service who are not within the first plan. The second plan known as the "General Motors lay-off benefit plan" provides that the Corporation will advance a sum sufficient to give each worker 40 per cent of his standard weekly earnings, with certain restrictions not included in the plan for five-year employees.

Employees who receive the benefits will repay the Corporation by work performed when production increases. It was explained by the chairman of the Corporation that the plans are only applicable to the employees of the Corporation and wholly owned subsidiaries within the United States.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

INDUSTRIAL agreements and schedules of wages and working conditions received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not always possible because of limitation of space to include all agreements received each month. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of employers and workers are also included. Verbally accepted agreements are so indicated.

Manufacturing: Textiles and Clothing

MONTREAL, QUEBEC.—PLEATING AND EMBROIDERY MANUFACTURERS' ASSOCIATION, INC., AND THE INTERNATIONAL LADIES GARMENT WORKERS' UNION, LOCAL 315 (EMBROIDERY, PLEATERS, STITCHERS AND BUTTONMAKERS).

Agreement to be in effect from August 1, 1938, to July 31, 1940.

Only union members to be employed. A union representative to have access to every shop. No discrimination to be shown employees on account of union activities.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: not more than 2 hours overtime permitted in any one day, nor more than 8 hours in any one week, with no overtime permitted on Friday and Saturday. From August 1, 1938, to November 30, 1938, however, if an emergency arises, 4 hours additional overtime may be worked on Saturday afternoon.

Wages: piece work is prohibited. Minimum weekly wage rates: Bonnaz operators $35, pleaters and patternmakers $20, crochet beaders $15, stampers and special machine operators $14, hand embroidery workers $12.50; floor help, pleater's assistant and covered button and buckle maker $11. All employees, except Bonnaz operators, who before August 1, 1938, received a rate of wages equal to or in excess of the above minimum rates, to receive an increase of $1 per week. In any event wages of employees then receiving a higher rate may not be reduced. Special rates may be fixed for employees whose work is under normal.

"In dull times" when there is not sufficient work for all employees, all available work in the shop to be divided as equally as possible among the employees.

All home work is prohibited. No employer may contract to send work to be manufactured or made at home.

Not more than 15 per cent of employees of a shop may be apprentices.

Apprentice floor helper and machine helper to begin at $8 per week with increase of $1.50 per week each six months until graduation.

Provision is made for settlement of disputes through the shop chairman elected in each shop and by a joint conference board.

(Application was made in October to have the wages, hours, etc. provisions of this agreement made obligatory under the Collective Labour Agreements Act.)

TORONTO, ONTARIO.—A CERTAIN SHIRT MANUFACTURING COMPANY AND THE UNITED GARMENT WORKERS OF AMERICA, TORONTO DISTRICT COUNCIL.

This agreement which came into effect October 7, 1937, for one year has been renewed to October 1, 1939.

Only union members to be employed, if available, others employed to join the union.

Hours: from January 1, 1938, a 44-hour week, either 8 per day and 4 on Saturdays, or 9 per day, 8 on Fridays and no work on Saturdays.

The company agreed to a readjustment of piecework prices, and from January 1, 1938, all time workers were to receive the same wages for a 44-hour week as previously paid for a 48-hour week. All new piecework rates to be agreed upon by the manufacturers and the shop committee.

In slack periods, the available work in the shop to be divided as equally as possible among the employees who are competent for the required work.

Disputes which cannot be settled by the shop chairman and shop committee or by a union representative with the employer to be referred to an impartial arbitrator.

TORONTO, ONTARIO.—CERTAIN CAP MANUFACTURERS AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, LOCAL 47.

This agreement, which came into effect September 30, 1937, for one year, was renewed to September 30, 1939.

Only union members to be employed, if available. Any others employed must join the union. No work to be given out to any non-union shop.

Hours: 8 per day from Monday to Friday, a 40-hour week.

Overtime may only be done on permit from the union. Overtime to be paid at time and one-half.

The system of work is on a piecework basis except cutting which is optional. In settling the price of a new article, a union representative must be present.

There shall be equal division of work among all the workers in a shop at all times. No work to be performed by the employer or any member of the firm while their own employees are laid off.

Manufacturing: Pulp and Paper

THOROLD, ONTARIO.—BRANTFORD FELT AND PAPER COMPANY AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 368) AND THE INTERNATIONAL BROTHERHOOD OF FIREMEN AND OILERS (LOCAL 329).

Agreement to be in effect from April 1, 1938, to April 1, 1939, and thereafter from year to year, subject to notice.

Union men to be employed if available. Any others employed must join the union. Permanent employees paid on an hourly basis inside and outside the mill are to maintain union membership in their respective union and the Company will assist in bringing this condition about.

Hours: for day workers, 9 per day, a 54-hour week; for tour workers, 8 per shift.

Overtime: for day workers, time and one-half; for tour workers, time and one-half for overtime on other than tour work. Time and one-half for work done during shutdown period from 7 a.m. Sunday to 7 a.m. Monday and on three specified holidays.

The wage schedule of this agreement was not received in the department.

In making promotions and in laying men off, preference to be given according to seniority.

No strikes or lockouts to occur. Disputes which cannot be settled between the manager and the union will be referred to an executive of the company and an international officer of the union, and later, if necessary to an arbitration board whose decision will be final and binding.

THOROLD, ONTARIO.—BEAVER WOOD FIBRE COMPANY AND THE BEAVER COMPANY LIMITED AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 192) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPERMILL WORKERS (LOCAL 228).

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1937, page 1152, and November, 1936, page 1076, with this exception:—

Overtime for tour workers while working on repair work to be time and one-half.

The wage schedule is unchanged from the 1937 rates.

DRYDEN, ONTARIO.—DRYDEN PAPER COMPANY, LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 223) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 105).

Agreement to be in effect from August 1, 1938, to May 31, 1939, and thereafter from year to year, subject to notice.

The Company recognizes the unions and will give preference to union members when hiring new employees. It is agreed that any employee who is now a union member or who becomes one should maintain such membership.

Hours: 8 per day, a 48-hour week for both day and tour workers.

Overtime for day workers: time and one-half for all time worked in excess of 9 hours in any day and for all work during the shutdown period on Sunday and the four specified holidays. Day workers working on Sunday or holidays are also to take one day off during the week. Tour workers to be paid time and one-half for all time worked during the regular shutdown periods on Sundays and holidays. No extra overtime pay for Sunday operation of boiler plant and power stations, for oiling machines, for watchmen, nor for any emergency repair work involving breakdown or involving protection of life or property.

In making promotions or in laying off employees consideration to be given to ability and length of service.

No strike or lockout to occur. The local union to appoint a standing adjustment committee to deal with the company over any disputes. Any grievance or dispute which cannot be settled in this way will be taken up by the international president of the union and the Company's representative. If they cannot reach a settlement it will be referred to the Minister of Labour of Canada.

POWELL RIVER, B.C.—THE POWELL RIVER CO., LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS (LOCAL 142) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 76).

Agreement to be in effect from August 1, 1937, to April 30, 1939, and thereafter from year to year subject to notice.

The Company recognizes the unions and will co-operate with them in obtaining and retaining union members.

Hours: 8 per day, 48 per week.

Overtime: for a day worker, time and one-half for work over 8 hours and for work during the shutdown period of Sundays and the four specified holidays; for a tour worker, time and one-half for work during the shutdown period of Sundays and the four specified holidays and time and one-half for overtime except when such overtime is caused by the absence of any of his team mates.

Wage rates: from August 1, 1937, to December 31, 1937, the basic rate for Occidental workers was 51 cents per hour and for Oriental workers 41 cents per hour; from January 1, 1938, these basic rates were raised to 54 and 44 cents per hour respectively. On all wage rates which on July 31, 1937, were higher than the basic rates increases in wages were provided for, making the rates at August 1, 1937, higher than the February, 1937, rates by 6 cents per hour for those paid up to 65 cents per hour, up to 12 cents per hour increase for those paid $1.45 per hour and over. On all rates above the basic rates, a further increase of 2 cents per hour was to be made effective January 1, 1938. It was also provided that if any general adjustment of wage rates is made effective in all Ontario mills of the Abitibi Power and Paper Company during the term of this agreement, corresponding adjustments will be applied to the wage rates of this agreement.

Some of the hourly wage rates resulting from this agreement and reported by the union as being effective from January 1, 1938, are: papermakers—machine tenders $1.16 to $1.59, back tenders 99 cents to $1.42, windermen 79 cents to $1.04, fourth hands 61 to 79 cents, fifth hands 58 to 67 cents, sixth hands 54 and 56 cents, millwrights 87 cents; log pond—boom men and donkey operator 67 cents; sawmill—sawyers $1.10, filers 78 cents to $1.17, scalers 64 cents, certain other classes 54 and 55 cents; barker mill—knife changers 69 cents, knife grinder 58 cents, certain other classes 54 and 55 cents; groundwood—grindermen 58 cents, screen men 64 cents, pulp testers 55 cents; sulphite mill—cooks 78 cents, cooks' helpers 58 and 60 cents, acid makers 74 cents, blowpit men and wet machine men 54 cents; beater rooms—beater engineers 80 cents, beatermen 54 cents; mixing machine operators 64 cents; finishing rooms—scale men 60 and 63 cents, billers 55 and 58 cents, others 54 and 55 cents; core makers 58 cents, rewinder men 69 cents; cutter room—cuttermen 63 to 69 cents, others 54 and 55 cents; maintenance—pipefitter 74 cents, carpenters 78 cents, cement finisher 58 cents, painters 67 cents, millwrights 58 to 78 cents, tinsmiths 78 cents; lumber yard band saw man 55 cents; technical control—laboratory assistants 64 to 77 cents, head tester 62 cents, paper testers 58 cents, pulp testers 55 cents, clerks 61 to 78 cents; electrical—switchboard operators 82 cents, sub-station operators 74 cents, electricians 81 and 87 cents, lineman 81 cents; steam plant—engineer 60 to 82 cents; firemen

54 to 57 cents; docks and storage—checkers and derrick operator 64 cents, hold men and sling men 74 cents; oilers 54 to 64 cents; railways—tram line engineer 76 cents, signalman 58 cents, fireman 54 cents, locomotive drivers 59 cents.

Seniority to govern in making promotions and lay-offs and in re-employment of seasonal workers, other factors being equal.

No strike or lockout to occur. Each union to have a standing committee to take up grievances with the management. Any dispute which cannot be settled in this way or by the president of the Company with the international president of the union will be referred to an arbitration board whose decision will be final.

OCEAN FALLS, B.C.—THE PACIFIC MILLS LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPERMAKERS (LOCAL 360) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS (LOCAL 312).

Agreement to be in effect from August 1, 1937, to April 30, 1939, and thereafter from year to year, subject to notice.

The terms of this agreement are the same as those of the agreement between the unions and the Powell River Co. Ltd., summarized above.

Some of the hourly wage rates resulting from this agreement and reported by the union as being in effect are: logging (summer)—boommen 68 cents; sawmill—boommen (Oriental) 53 cents, pickers (Oriental) 44 cents, millwrights 68 and 82 cents, bargemen (Oriental) 44 and 58 cents; groundwood—grindermen (Oriental) 49 cents, screen tenders (Oriental) 49 cents, pulp testers 58 cents; sulphate—cooks 73 cents, cooks' helpers 46 cents, washroom 60 cents, screen tenders 49 cents, firemen 67 cents, wet machine (Oriental) 44 and 47 cents, chipper mill—feeders (Oriental) 48 cents, screen and utility men (Oriental) 44 cents; sulphite—cooks 73 cents, blow pit men (Oriental) 44 cents, acid makers (Oriental) 53 cents, screen tenders (Oriental) 44 cents; paper mill mechanics—millwrights 82 cents; finishing room—scalemen 60 and 63 cents, cappers 60 cents, cuttermen 60 to 65 cents, helpers 54 cents, female helpers 38 cents; coremakers (Oriental) 49 cents; maintenance—millwrights 68 to 82 cents, millwrights (Oriental) 49 to 58 cents; carpenters 60 to 82 cents, bricklayers 82 cents, labourers 54 cents, painters (Oriental) 51 and 53 cents; pipefitters 76 and 81 cents, plumbers 71 cents; machine shop—machinists 86 cents, blacksmiths 77 and 83 cents, welders 84 cents, tinsmiths 78 and 82 cents; technical control—paper testers 58 cents, pulp testers 54 and 58 cents, laboratory assistant 68 cents; electric maintenance—electricians 86 cents, lineman 82 cents, motor men 61 and 67 cents; steam plant—engineers 82 and 92 cents, firemen 70 cents; handling and warehousing—truckers and cranemen (Oriental) 49 cents, checkers 58 cents; longshoring—boats 73 cents, checkers 65 cents.

VICTORIA, B.C.—SIDNEY ROOFING AND PAPER CO. LTD. AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCAL 367.

Agreement to be in effect from September 20, 1937, to March 31, 1938, and continues thereafter from year to year, subject to notice.

The Company recognizes the union and will co-operate with it in obtaining and retaining as members its employees.

Hours: 8 per day, 48 per week.

Overtime: work by any employees during shutdown period for Sundays and five specified holidays, time and one-half. Overtime at the rate of time and one-half to be paid: to any employee for any work for production purposes after 8 hours except when such work is caused by the absence of the employees' mates or the change of shifts; to boiler room engineers and fuel men on the 11 p.m. to 7 a.m. shift on Sunday night; to men employed on periodical boiler washups.

Wages: it was provided that from January 1, 1938, the hourly rates of pay for the following jobs were to be increased 5 cents: machine tenders, back tenders and third hands, beatermen, powerhouse engineers and fuelmen, saturating plant, and roofing plant, and repair men working on an hourly basis. On hourly rates other than these the management were to give due consideration to adjustment of rates on or before January 1, 1938. The union to have the privilege of discussing with the company rates felt to be in need of reclassification.

Seniority to apply, other things being equal, in making promotions and lay-offs and in re-employment.

No strikes or lockouts to occur. The union to select an adjustment committee to deal with the company over any grievance. If the matter cannot be settled by them nor later by the international president of the union and the president of the company, it will be referred to an arbitration board whose decision will be final. If the representative of the company and the representative of the union cannot agree on a chairman for this board, the provincial Department of Labour will be asked to choose the third member.

Manufacturing: Printing and Publishing

MONTREAL, P.Q.—CERTAIN NEWSPAPER AND COMMERCIAL PRINTING FIRMS AND THE INTERNATIONAL PHOTO-ENGRAVERS' UNION, LOCAL NO. 9.

Verbal agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Only union members to be employed. Foremen also must be union members.

Hours: 8 per day from Monday to Friday, a 40-hour week. It is provided, however, that until three named employing firms have been brought under this agreement, all shops may have a skeleton staff on Saturdays to handle such work as might otherwise go to a shop open on that day, but all men who work on Saturdays to receive four consecutive hours off on any other working day during the following week. (Two of the three firms agreed to the terms but employees of the third firm were unsuccessful in their strike for the 40 hour week as noted in the LABOUR GAZETTE, September, page 977, and November, page 1220). Night work, 7½ hours per night for 5 nights, a 37½-hour week.

Overtime: time and one-half for first three hours, double time thereafter. Work on Saturdays (except as above noted), on Sundays and holidays, double time.

Minimum wage for journeymen photo-engravers for day work: $47.50 per week for first year, $50 for second year. Foremen to receive at least $5 per week over the journeymen's rate. For night work, journeymen to be paid $5 in excess of day workers.

Those employed in a permanent position are not to be laid off temporarily owing to slackness of work. This does not apply to those engaged as extra help for a definite period.

One apprentice allowed to each seven journeymen on the day staff, but it is provided that no new apprentices be indentured during the period of this agreement. Apprentices to serve six years.

Minimum weekly wages for apprentices: from $10 during first year to $45 during second half of sixth year.

Any disputes are to be referred to a joint committee, and, if necessary, to arbitration. No strike or lockout to occur pending such arbitration.

WINNIPEG, MANITOBA.—TWO DAILY NEWSPAPERS AND THE WINNIPEG NEWSPAPER PRINTERS' ASSOCIATION (CANADIAN NATIONAL PRINTING TRADES UNION).

This agreement which came into effect March 1, 1937, and was summarized in the LABOUR GAZETTE, November, 1937, page 1269, and June, 1935, page 584, is in effect to March 1, 1942. Under its provisions the wage scale was brought before an arbitration board, whose decision awarded an increase of $1.50 per week from March 1, 1938, to August 31, 1938, and an additional $1 per week from September 1, 1938, to February 28, 1939. This brings the minimum wage rate for journeymen on day shift to 92.43 cents per hour, and for the night shift to $1.02½ per hour.

WINNIPEG, MANITOBA.—THREE COMMERCIAL SHOPS AND THE INTERNATIONAL PHOTO-ENGRAVERS' UNION, LOCAL 37.

Verbal agreement to be in effect from October 1, 1937, to September 30, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. Others employed to join the union. The foreman must also be a union member.

Hours: one firm's agreement provides for 8 per day from Monday to Friday, a 40-hour week, during six specified months of the year and 4 hours on Saturday, a 44-hour week during the other six months; the other two firms are on the 44-hour week throughout the year.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and statutory holidays, double time.

Minimum wage rate for journeymen photo-engravers: $50 per week (the same rate as previously in effect) until December 31, 1937, and $52.50 thereafter.

One apprentice allowed to each five journeymen on the day shift. Apprentices to serve at least six years. No additional apprentices to be employed or indentured during the life of this agreement unless one of the present apprentices discontinues his apprenticeship.

Wages for apprentices: from $12 per week during first year to $45 per week during sixth year.

Any disputes which cannot be settled by the joint committee will be submitted to arbitration, the arbitrator to be chosen by this committee and his decision to be binding. No strike or lockout to occur during arbitration proceedings.

EDMONTON, ALBERTA.—CERTAIN JOB PRINTING FIRMS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 255.

Agreement to be in effect from December 1, 1937, to December 1, 1938, and thereafter from year to year, subject to notice.

The employers to employ only union members, including the foreman. The employer is entitled to the use of the union label insofar as the pressroom is concerned.

Hours: for day work, 8 per day, 4 on Saturdays, a 44-hour week; for night work, 7 per shift, a 42-hour week.

Overtime: time and one-half for first three hours; double time thereafter and for all Sunday work; time and one-half for work on eight specified holidays.

Minimum wage rates: for journeymen pressmen, 85 cents per hour for day work and 90 cents for night work (no change from the previous rates). For assistants, from 23 cents per hour during first six months to 50 cents beginning fifth year (48 cents until November 30, 1938).

The minimum number of pressmen and assistants to be employed on various types of presses is specified.

One apprentice permitted for four journeymen pressmen or fraction thereof.

Provision is made for settlement of disputes by the joint standing committee, and if they cannot agree, the matter will be referred to a board of arbitration.

CALGARY, ALBERTA.—A CERTAIN NEWSPAPER PUBLISHING COMPANY AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 201.

Agreement to be in effect from July 8, 1938, to July 8, 1941.

Only union members to be employed, if available.

Hours: 7½ per day, a 45-hour week for day work; 42 hours per week for night work.

Overtime: time and one-half; work on Sundays and holidays, double time.

Minimum wage rates for journeymen: 85 cents per hour for day work; $2.40 per week additional for night scale; $4 per week additional for lobster shift.

Not more than one apprentice allowed to each five journeymen; apprentices to serve six years.

Wages for apprentices: from 25 per cent of journeymen's scale during first and second year to 70 per cent during sixth year.

Disputes which cannot be settled by the joint standing committee are to be referred to arbitration.

VANCOUVER, B.C.—PUBLISHERS OF DAILY NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL NO. 226,

Agreement to be in effect from March 1, 1936, to February 28, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed.

Hours 7½ per day or night, 5 days per week, a 37½-hour week for both day and night work.

Overtime: time and one-half.

Wages per hour: from March 1, 1936, to December 31, 1936, 96 cents for day work and $1.05 for night work; for the calendar year 1937, $1.01 for day work and $1.10 for night work; from January 1, 1938, to February 28, 1939, $1.06 for day work and $1.16 for night work. A machinist operator to receive 50 cents extra per shift. When a shift is worked part day and part night, 50 cents in addition to the night scale to be paid.

Learners on machines must be journeymen members of the union, the period being for 17 weeks, with the wage scale 40 per cent of regular scale for first three weeks to 85 per cent during last four weeks.

One apprentice allowed for each eight journeymen or major fraction thereof. Apprentices to serve six years.

Wages of apprentices: commencing with the third year and for a period of 16 months, at least one-third of journeymen's scale; for the next 16 months at least one-half of journeymen's scale; for the last 16 months at least two-thirds of journeymen's scale.

Provision is made for settlement of disputes by a joint standing committee, or if they are unsuccessful, they will select a fifth member and form a board of arbitration. If unable to agree on a fifth member, he will be selected by the international president of the union and the chairman of the special standing committee of the American Newspaper Publishers' Association or their proxies. The decision of such arbitration board to be final and binding.

VANCOUVER AND VICTORIA, B.C.—EMPLOYING PHOTO ENGRAVERS AND THE INTERNATIONAL PHOTO ENGRAVERS' UNION, LOCAL NO. 54.

Agreement to be in effect from May 1, 1937, to April 30, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed, if available. Any others employed must join the union.

Hours: 40 per week for day work and 37½ for night work. When a Saturday morning shift is required, it may be arranged, but those working on Saturday morning will not be required to work on the following Monday morning.

Overtime: time and one-half for first three hours; thereafter, and all work on Saturday afternoons, Sundays and on seven specified holidays, double time.

Minimum wage for journeymen photo engravers: $57.50 per week for day work. Where a night shift is employed, $2.50 per week additional to be paid.

One apprentice allowed for each five journeymen employed on the day shift. Apprentices to serve five years in one shop.

Wages for apprentices: from $12 per week during first year to $40 during fifth year.

A local joint industrial council to be formed, and any disputes will be referred to it. If they cannot reach a settlement, an additional disinterested party to be chosen. The decision of this council to be final and binding.

Manufacturing: Miscellaneous Wood Products

DUNDAS, ONTARIO.—A CERTAIN FURNITURE FACTORY (STORE FIXTURES, SHOW CASES, ETC.) AND THEIR EMPLOYEES.

Agreement reached following strike reported in the LABOUR GAZETTE, September, page 978. Agreement to be in effect from August 31, 1938, to November 30, 1939.

The open shop policy to be continued. The management to consult with the union shop committee (Upholsterers, Furniture, Carpet and Linoleum Employees International Union, Local 211).

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-quarter; work on Sundays and on eight specified holidays, double time.

Hourly wage rates: class A (skilled workers) 52 cents, class B (semi-skilled) 43 cents, and class C (unskilled) 36 cents; boys from 15 cents during first year to 40 cents during fourth year. The number of boys not to exceed 20 per cent of the employees in each department.

The procedure of classification to be determined by a committee consisting of the foreman of each department and a member of the employees' organization of each department, final decision in case of disagreement to rest with the management.

TIMMINS, ONTARIO.—CERTAIN SAWMILL PROPRIETORS AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 2507 (SAWMILL WORKERS).

Agreement signed following strike reported in LABOUR GAZETTE, June, page 612, and July, page 739. Agreement to be in effect from June 7, 1938, to December 31, 1938.

The employers recognize the right of the union representatives to organize, but not on the companies' premises during working hours. A union representative may visit the bunkhouses and cookeries at reasonable hours.

Minimum wage rate for all employees: $3.25 per day (an increase of 50 cents per day over the previous minimum); employees receiving $3 per day were to be increased to $3.35, and those receiving $3.25, to $3.50 per day; those receiving between $3.50 and $4 per day were to receive an increase of 10 cents per day; employees receiving $4 or more per day to be dealt with individually by the employer.

Employers supplying board and lodging under this agreement to furnish such at a charge of not more than 85 cents per day.

Any dispute which cannot be settled by the committee of employees or the union with the management will be referred to a board of arbitration. If the representatives of each party cannot agree on a chairman he will be appointed by the Ontario Minister of Labour.

FORT FRANCES, ONTARIO.—A CERTAIN SAW MILL OPERATOR AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 2558 (SAWMILL WORKERS).

Agreement reached following strike reported in the LABOUR GAZETTE, May, page 485, and July, page 739. Agreement to be in effect from June 4, 1938, to April 10, 1939, and thereafter from year to year, subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1937, page 1153, with this exception:

Wage rates for various classes were reduced about two per cent, making some of the minimum hourly rates as follows: sawyers $1.10, gang sawyers 68 cents, tail sawyers 46½ and 49 cents, edgermen 59½ cents, millwrights 59½ cents, engineers 58½ and 59 cents, lath mill employees 42½, 49 and 52 cents, green lumber workers 46½ to 55 cents, dry lumber workers 42½ to 55 cents, planing mill and dry shed 49 to 59½ cents, labourers 42½ cents.

TRANSCONA, MANITOBA.—A CERTAIN CREOSOTING ESTABLISHMENT AND ITS EMPLOYEES.

Agreement (reached through conciliation by an official of the Manitoba Department of Labour) to be in effect from May 1, 1938, to May 30, 1939, and thereafter subject to 30 days' notice.

The company recognizes the right of employees to bargain through their organization or representatives and agrees to meet a committee representing a majority of the employees to discuss any grievances, etc.

Hours: for employees on hourly rates, 8 per day, a 48 hour week.

Overtime for hourly workers: time and one half. Work on Sundays and holidays for hourly workers other than engineering staff and watchman, and other than emergency work which cannot be done during regular hours, time and one half.

Wages: a schedule of piece work rates is included in the agreement. Wages for certain hourly paid employees: treating men 48 to 52 cents, engineers 53 to 70 cents, firemen or helpers handling bark, ashes and coal 40 cents, switchmen 45 and 48 cents, blacksmith 50 cents, track gang and miscellaneous plant labour 40 cents.

Seniority to be considered in employment.

In case of disagreement between the parties as to the interpretation of the agreement, it will be referred to the Department of Labour.

Manufacturing: Metal Products

OWEN SOUND, ONTARIO.—A CERTAIN METAL PRODUCTS MANUFACTURING COMPANY (BOLTS, SCREWS AND WIRE) AND THEIR EMPLOYEES.

Agreement reached following the strike reported in the LABOUR GAZETTE, September, page 978. Agreement to be in effect from August 24, 1938, to August 24, 1939, and till notice from either party.

No discrimination to be shown on account of union membership.

Hours: 50 per week, divided into 5½ regular days.

Overtime and work on Sundays, time and one quarter.

Wages: those receiving 35 cents per hour or more at time agreement came into effect to be given an increase of 2 cents per hour: those receiving under 35 cents to be increased 3 cents per hour.

In filling vacancies, seniority and ability to be recognized.

Any grievances may be placed before the employees' committee for attention. In the event of reduction in staff, the subject will be discussed between the management and the committee.

GUELPH, ONTARIO.—A CERTAIN STOVE MANUFACTURING COMPANY AND THE INTERNATIONAL MOULDERS' UNION, LOCAL 212.

Agreement to be in effect from June 23, 1938, to February 1, 1939, and thereafter from year to year, subject to notice.

No discrimination against employees for joining or refusing to join the union.

Hours: under ordinary conditions, 45 per week for all employees except moulders for whom there is a 40 hour week. During rush seasons and for rush export shipments the hours for all departments except the foundry may be increased by mutual consent.

Overtime to be paid at time and one half except where concessions have been granted as noted above. Craters, shippers, maintenance men, watchmen, firemen and enamel burners are exempt from overtime rates.

Wages: the wage rates prevailing at time agreement made were to continue during the period of this agreement. The management to meet union committee to adjust piece work prices in all departments and other matters.

The wage rates for apprentices are fixed as a percentage of regular rates for each of the four years of apprenticeship. Beginners over 21 years to be paid 80 per cent of regular wages for the first 90 days and the full rate thereafter.

WINNIPEG, MANITOBA.—A CERTAIN BRONZE AND IRON MANUFACTURING COMPANY AND THEIR EMPLOYEES.

This agreement, which came into effect September 1, 1936, continues in effect until a new agreement is made.

The company recognizes the shop committee of the employees. No discrimination against any employee on account of union affiliation.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one half for first four hours: thereafter and work on Sundays and legal holidays, double time.

The wage schedule in effect at the time this agreement made was to remain in effect for the agreement's duration.

The company and the shop committee to settle any grievances respecting wages and working conditions.

VANCOUVER, B.C.—CERTAIN DRY DOCK AND SHIPBUILDING FIRMS AND THE BOILERMAKERS AND IRON SHIPBUILDERS' UNION OF CANADA, LOCAL NO. 1.

This agreement is summarized below under "Construction: Shipbuilding."

VANCOUVER, B.C.—CERTAIN METAL PLATING AND ORNAMENTAL IRON MANUFACTURING FIRMS AND THE METAL POLISHERS, PLATERS AND BUFFERS' INTERNATIONAL UNION, LOCAL 88.

Agreement to be in effect from October 1, 1938, to October 1, 1939.

Only union members to be employed, if available. Others employed must join the union. No discrimination against employees for union activities.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half. Work on Sundays or seven specified holidays, double time.

Wages: journeymen 65 cents per hour, $5.20 per day.

Apprentices to serve three years.

Wages of apprentices: from $2 per day during first three months, with increases each three months to $4.91 during twelfth three months.

Any dispute which cannot be settled by a meeting of a representative of each party will be referred to a third competent and disinterested party whose decision will be final and binding.

VICTORIA, B.C.—A CERTAIN BOILERMAKING AND SHIP REPAIRING FIRM AND THE INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIPBUILDERS, WELDERS AND HELPERS, LOCAL 191.

Agreement to be in effect from March 1, 1938, subject to 30 days' notice.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and holidays, double time.

Time and one-quarter for dirty work and for work in confined spaces where gaseous conditions exist due to torches, rivet fires, etc.

Wages: mechanics, i.e., anglesmiths, boilermakers, chippers and caulkers, riveters, shipfitters, welders, 86½ cents per hour or $6.92 per day; punch and shearmen, holders-on, drillers and tappers 74 cents per hour or $5.92 per day, reamers and countersinkers 68 cents per hour or $5.44 per day; rivet heaters 66 cents per hour or $5.28 per day; helpers 65 cents per hour or $5.20 per day.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

HAMILTON, ONTARIO.—HAMILTON BY-PRODUCT COKE OVENS LTD. AND THE INTERNATIONAL UNION OF OPERATING ENGINEERS, LOCAL 700.

Agreement to be in effect from November 1, 1937, to October 1, 1939, unless notice of change given 60 days before October 1, 1938.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1936, page 1105, with these exceptions:—

Hours: coke baggers, boat cleaners and common labourers are exempted from the 8-hour day.

Overtime: time and one-half for work on seven specified holidays between 3 p.m. and 11 p.m.

Seniority to be considered in employment and in making promotions, etc.

Wages were increased, retroactive to October 1, 1937. Some of the hourly wage rates in effect from that date are: certain engineers (main boiler house, yard locomotive, etc.) and electricians, 69 cents; machinist, millwright, welders, pipefitter, carpenter, 67 cents; mechanics' helper, 50 cents; circulation operator, 59 cents; mudmen, 51 cents; screenmen, 48 cents; wharfmen, 47 cents; yard cleaners, 44 cents; labourers, 41 cents.

WINNIPEG, MANITOBA.—A CERTAIN BRICK, TILE AND LUMBER FIRM AND THE INTERNATIONAL HOD CARRIERS, BUILDING AND COMMON LABOURERS' UNION, LOCAL NO. 1318.

Agreement reached in settlement of strike reported in the LABOUR GAZETTE, July, page 740. Agreement to be in effect from July 1, 1938, to April 30, 1939. Thirty days' notice of any change to be given by either party.

The company recognizes the union and there shall be no discrimination against any employee for union activity.

Hours: 10 per day, a 60-hour week from May 15 to October 1, 1938; 8 per day, 48 per week from October 1, 1938, to May 15, 1939. These hours may be altered by agreement between the company and the union committee to provide for sharing of employment, but in no case to exceed 10 hours per day.

Overtime: time and one-quarter for overtime on brick manufacturing or the handling of brick or building material.

Wages: An increase of 2½ cents per hour over the rates paid before July 1, 1938, was granted, with a minimum of 35 cents per hour.

The company will meet a union committee for the settlement of any grievances. If they are unsuccessful a joint arbitration board to be formed with an impartial chairman mutually agreed on. The decision of this board to be final and binding.

Manufacturing: Miscellaneous Products

WINNIPEG, MANITOBA.—A CERTAIN UPHOLSTERING COMPANY AND THE UPHOLSTERERS, FURNITURE, CARPET, LINOLEUM AND AWNING WORKERS' INTERNATIONAL UNION, LOCAL 49.

Agreement to be in effect from January, 1938, to January, 1939.

The agreement is applicable only to those employees of the company who are members of the union. No discrimination against any employees on account of union activity.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Overtime to be worked when necessary.

Wages: the various rates of wages, including overtime, being paid when the agreement came into effect were to be continued. The shop committee to have the right to discuss wage scales at any time during the term of the agreement.

Equal distribution of work to be adhered to during the slack period.

Disputes or grievances to be taken up with the company by the shop committee, and, if necessary, a union representative. If they cannot reach a settlement, the matter will be referred to an arbitration board, consisting of a representative of each party and an impartial chairman chosen by them, whose decision will be final.

VANCOUVER, B.C—CERTAIN JEWELLERY MANUFACTURING AND REPAIR FIRMS AND THE INTERNATIONAL JEWELLERY WORKERS' UNION, LOCAL NO. 42.

Verbal agreement in effect from September 15, 1937, to September 15, 1939.

Hours: 8 per day with a half holiday each week, a 44-hour week.

Overtime: time and one-quarter.

Minimum wages: journeymen 75 cents per hour. Journeymen who were receiving 75 cents or more when this agreement came into effect, however, were to be given a 10 per cent increase in wage rate.

Apprentices to be governed by provincial government order. Improvers, that is those with five years service at the bench to be paid 50 cents per hour, with an increase each six months to the full journeymen's rate after two years as an improver.

Construction: Buildings and Structures

KINGSTON, ONTARIO.—CERTAIN CONTRACTORS AND THE BRICKLAYERS, MASONS AND PLASTERERS' INTERNATIONAL UNION, LOCAL NO. 10.

Agreement to be in effect from April 1, 1938, to March 31, 1939, and till notice.

Only union members to be employed, if available. Members of the union to work only for contractors who recognize the terms of the agreement.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime and work on three specified holidays, time and one-half. Work between Saturday noon and Monday at 8 a.m., double time.

Wages for journeymen bricklayers, masons and plasterers: $1 per hour.

Apprentices to be governed by the Ontario Apprenticeship Act.

The mason contractors agree that not more than two members of a contracting firm work on the job and the union agrees that no member be allowed to contract or subcontract any work.

In case of dispute, a joint committee to be formed with power to select an outsider as chairman, if desired, the decision of this committee to be final.

BRANTFORD, ONTARIO.—GENERAL CONTRACTORS AND THE BRANTFORD UNION CARPENTERS (UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 498 AND THE AMALGAMATED BUILDING WORKERS OF CANADA).

Agreement to be in effect from June 1, 1938, to May 31, 1939, and thereafter from year to year, subject to notice.

Only union carpenters to be employed.

Hours: 8 per day, 4 on Saturdays, a 44 hour week. In case of shift work, 8 hours' pay for 7 hours' work.

Overtime: from 5 p.m. to 10 p.m. on Mondays to Fridays inclusive and from noon to 5 p.m. on Saturdays, time and one-half; all other overtime, double time. Work on Sundays and on seven specified holidays, time and one-half.

Minimum wage rate for carpenters and joiners; 70 cents per hour.

REGINA, SASK.—ELECTRICAL CONTRACTORS AND THE UNION OF INSIDE ELECTRICAL WORKERS, REGINA LOCAL.

Agreement to be in effect from September 1, 1938, to March 1, 1940.

The hours, wage rates for journeymen and apprentices and overtime rates are those made binding under the Industrial Standards Act as summarized in the LABOUR GAZETTE, November, page 1304.

Only union members to be employed.

Electrical workers in charge to be paid 10 cents per hour over the minimum rate for journeymen which is 90 cents per hour.

For men hired in Regina for work out of the city transportation and travelling time to be paid for and the employer to pay board and lodging for the first two weeks.

Not more than one apprentice allowed to each journeyman. Apprentices to serve four years.

Disputes to be referred to the yearly joint conference board, whose decision will be final.

EDMONTON, ALBERTA.—EDMONTON PLASTERING CONTRACTORS' ASSOCIATION AND THE OPERATIVE PLASTERERS AND CEMENT FINISHERS INTERNATIONAL ASSOCIATION, LOCAL 372.

Agreement to be in effect from June 1, 1938, to December 31, 1938. The parties to meet in December to formulate a new agreement.

The jurisdiction to be that part of the Province of Alberta north of a line through the city of Red Deer, east and west to the boundaries of the province.

All members of the local union must be employed before any outsiders are hired, and in hiring of outsiders the standing joint committee to be consulted. Members of the union to work only for contractors who supply all material and labour, carry compensation and conform to all municipal and provincial safety and other regulations. They shall not contract or subcontract.

Hours: 8 per day, 4 on Saturdays, a 44-hour week. In case of shift work, the above hours may be deviated from. For night work only 7 hours' work for 8 hours' pay.

Overtime: time and one-half from 5 p.m. to 10 p.m. and double time from 10 p.m. to 8 a.m. All work prohibited on four statutory holidays.

Minimum wage rate: $1 per hour.

Any member sent out of city to work, to have his transportation paid both ways.

Any dispute is to be referred to a joint arbitration committee whose decision is final. If they cannot agree, they may appoint an independent party to give a decision on the matter.

VANCOUVER, B.C.—GENERAL CONTRACTORS' ASSOCIATION OF VANCOUVER AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCALS 452 AND 1251 AND THE AMALGAMATED BUILDING WORKERS OF CANADA, CARPENTERS' SECTION.

Agreements to be in effect from November 7, 1938, to November 6, 1939, and year to year subject to notice.

Job stewards to be recognized on all jobs and shall not be discriminated against. Business agents may visit jobs.

Hours: 8 per day from Monday to Friday, a 40-hour week. In case of shift work, 8 hours' pay for 7 hours' work.

Overtime: time and one-half for first four hours, double time thereafter; time and one-half for Saturday mornings; double time for Saturday afternoons, Sundays and nine specified holidays.

Minimum wage rate for carpenters: 90 cents per hour. Carpenters in charge of work to be paid at least $1 per day of 8 hours above the minimum rate.

Not more than one working employer to be recognized in any one firm of contractors.

VICTORIA, B.C.—VICTORIA BUILDERS' EXCHANGE LTD. AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1598.

Agreement to be in effect from August 25, 1938, until either party gives 90 days' notice of change.

Hours: 8 per day from Monday to Friday, a 40-hour week on new construction. On alteration or repair work, however, 44 hours may be worked when necessary at regular wage rate. For night shift, 8 hours' pay for 7 hours' work.

Overtime: time and one-half; double time for work on Sundays and statutory holidays.

Minimum wage rate for carpenters: 80 cents per hour.

Construction: Shipbuilding

VANCOUVER, B.C.—CERTAIN DRY DOCK AND SHIPBUILDING FIRMS AND THE BOILERMAKERS AND IRON SHIPBUILDERS' UNION OF CANADA, LOCAL NO. 1.

Agreement to be in effect from June 1, 1938, to June 1, 1939, and till 30 days' notice from either party.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, October, 1935, page 951, with wage schedule which came into effect May 7, 1937, and was summarized in the issue of June, 1937, page 689, with the exception that electric welders and boilermakers are now included with the trades being paid a minimum of 90 cents per hour, $7.20 per day.

VANCOUVER, B.C.—CERTAIN DRY DOCK AND SHIPBUILDING FIRMS AND THE INTERNATIONAL ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 170.

Agreement to be in effect from April 1, 1938, to April 1, 1939, and till notice from either party.

Only union members to be employed, if available.

Hours: for day shift, 8 per day, 4 on Saturdays, a 44-hour week. For second and third shifts, 40 hours per week—for second shift, 7 hours and 40 minutes with a 20-minute lunch period, for which 8 hours' pay will be allowed; for third shift 7 hours and 30 minutes, with a 20-minute lunch period, and 9 hours' pay for this shift.

Overtime: time and one-half for first four hours; thereafter and all work on Sundays and holidays, double time.

For all dirty work and for work in confined places full of gas or wet paint fumes, time and one-quarter to be paid.

Wage rates: plumbers and pipe fitters 75 cents per hour, helpers 50 cents.

VANCOUVER, B.C.—A CERTAIN DRY DOCK AND SHIPBUILDING COMPANY AND THE SHIPYARD LABOURERS' FEDERAL UNION, LOCAL 126.

Agreement to be in effect from May 15, 1938, to May 15, 1939, and thereafter subject to notice.

Only union members to be employed, if available.

The provisions as to hours and overtime are the same as noted above for plumbers employed by this company.

Time and one-quarter to be paid for dirty work and for cleaning, painting, cement washing or applying bitumastic in double bottom tanks or confined spaces.

Wages per hour: machine painting 73 cents; rigging 65½ cents; boiler cleaning and scaling, 65 cents; cementers 62½ cents; dockmen and tractor drivers 56¼ cents; chipping, machine painting helper, winchmen, cementing seams, 55 cents; labourers employed on ordinary work, 50 cents.

VICTORIA, B.C.—A CERTAIN BOILERMAKING AND SHIP REPAIRING FIRM AND THE INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIPBUILDING, WELDERS AND HELPERS, LOCAL NO. 191.

This agreement is summarized above under "Manufacturing: Metal Products."

Transportation and Public Utilities: Local Transportation

MONTREAL, QUEBEC.—A CERTAIN CARTAGE COMPANY AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL 730.

Agreement reached following strike reported in the LABOUR GAZETTE, October, page 1087, and later conciliation by an official of the Department of Labour. Agreement to be in effect from October 28, 1938, to December 31, 1939, and thereafter from year to year, subject to notice.

The Company recognizes the union and will not discriminate against any employee on account of union membership. There will be no restraint, interference or coercion by the union against any employee because of non-membership in the union. The company recognizes the union as the sole collective bargaining agency for its members.

Wages for all work on Sundays and four specified holidays, time and one-half, with a minimum of four hours' work if called to work on these days.

Minimum hourly wage rates: truck drivers 33⅓, 35, and 37½ cents, helpers 32½ cents, teamsters (double) 32½ cents, teamsters (single) 30 cents. For work performed between 7 p.m. and 6 a.m., 3 cents per hour extra to be paid. No employee who prior to the date of the agreement was receiving higher than these minimum rates to have his wage rate reduced.

Delegates of the union may present grievances of the employees to the company's representative.

Transportation and Public Utilities: Electric Railways

HALIFAX, N.S.—NOVA SCOTIA LIGHT AND POWER COMPANY LIMITED AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, LOCAL 508.

Agreement to be in effect from June 1, 1937, to May 31, 1938, and continues till notice of change from either party.

This agreement is similar to the one previously in force between the company and its employees, which was summarized in the LABOUR GAZETTE, November, 1936, page 1077, with certain changes, among which are:—

The minimum wage rate for regular employees is increased from 38 to 40 cents per hour.

Wages per hour for car operators: first year of service 48 cents (an increase of 2 cents), second year 51 cents, third year 56 cents, over three years' service 61 cents (increases of 3 cents for these three categories). Men employed on sweeper or leveller, clearing snow from tracks or sand car sanding tracks to be paid time and one-half.

Wages per hour in car house: carpenters and painters, 73, 66 and 59 cents; carpenters' helpers 53 cents; head repairman 73 cents; armature winders 77 cents; pitmen and special repairmen 68, 66 and 61 cents, general utility men 61 and 53 cents, car cleaners 53 cents, general cleaners 51 cents. (These are increases of from 2 to 4 cents per hour over the previous rates.)

Wages per hour in machine shop: machinists 77, 72 and 63 cents, welders 77 cents, blacksmiths 72 cents, blacksmith helpers 55 cents. (These are increases of 3 or 4 cents over the previous rates.)

Wages per hour for rail attendants: 44 cents on week days and 52 cents on Sundays and holidays (increases of 2 cents per hour over the previous rates).

Regular trackmen and chauffeurs to work 8 hours per day, 4 on Saturdays, 44 per week. Overtime and work on Sundays and holidays to be paid at 15 cents per hour over the regular rate.

Wages per hour for power house, line and meter employees: linemen 77, 72 and 66 cents, groundmen 55 and 50 cents; troublemen and meter inspector 77 cents: metermen 72, 66 and 61 cents; lamp repairmen 77 cents, switchboard operators 72 cents, switchboard electricians 82 cents; electricians 77, 72 and 63 cents. (These are increases of from 2 to 4 cents per hour over the previous rates.)

Wages per hour for steam department: masons and boiler repairmen 66 cents, senior steam helpers 64 cents, junior steam helpers 53 cents, firemen 69 cents, assistant firemen 62 cents, firemen helpers 50 cents. (These are increases of 4 to 8 cents per hour.) Firemen to have one day off in every eight days, in regular rotation, except in case of emergency.

Wages per hour for gas department employees: fitters 77 and 68 cents, fitters' helpers 61 cents, meter repairmen 61 cents, meter repairmen's helper 50 cents, blacksmith 66 cents, skilled labour 51/55 cents, common labour 40/50 cents, leading firemen 68 cents, firemen 59 cents. (These are increases of 2 or 3 cents over the previous rates.)

Vacation: as before, all employees after one year's service to be given one week's vacation with pay, but increases have been given in the compensation for this week. For this week, regular street railway operators to receive $24.80, spare operators $18.60, hillmen $20, trackmen $17.20, employees of the shops and light and power employees 75 per cent of weekly pay with a minimum of $18.60 and a maximum of $22.70, gas department employees 75 per cent of weekly pay with a minimum of $16.50 and a maximum of $22.70.

Upon any question or grievance arising between any member of the union and the company, the case may be taken up by the union officials with the manager of the company.

QUEBEC, P.Q.—THE QUEBEC RAILWAY, LIGHT AND POWER COMPANY AND L'UNION FEDERALE DES EMPLOYES DU QUEBEC RAILWAY, LIGHT AND POWER COMPANY, LOCAL 123 (FEDERAL UNION OF THE EMPLOYEES OF THE QUEBEC RAILWAY, LIGHT AND POWER COMPANY, LOCAL 123). (MAINTENANCE OF WAY EMPLOYEES).

Agreement which governs maintenance of way employees, to be in effect from January 1, 1938, to December 31, 1938, and thereafter from year to year, subject to notice.

Hours for sectionmen assigned to work on the hills, morning shift from 4 a.m. to noon; evening shift from noon to midnight; these shifts to be changed so that the average of their hours are 10 per day. Hours for other sectionmen, morning shift from 4 a.m. to 11 a.m., evening shifts from 1 p.m. to midnight; these shifts to be changed so that the average hours are 9 per day. All maintenance of way work to be done as much as possible between 7 a.m. and noon and between 1 p.m. and 5 p.m.

Overtime and work on Sundays and nine specified holidays, time and one-half for work over 10 hours per day. Sectionmen, however, to work 7 days per week at regular rate.

Wages per hour: welders, firemen, compressor and mixer operators 42½ cents, assistant carpenter 41 cents, sectionmen and trackmen 37½ cents, labourers 30 and 32½ cents. After three years service as a labourer, a man to be classified as a trackman.

Seniority to be considered in making promotions.

A committee of three employees to present any grievances to the management, starting with the foreman and then later if necessary to officials including the general manager.

TORONTO, ONTARIO.—TORONTO TRANSPORTATION COMMISSION AND THE EMPLOYEES OF THE ELECTRICAL DEPARTMENT. (MEMBERS OF THE CANADIAN ELECTRICAL TRADES UNION, LOCAL NO. 1).

Agreement to be in effect from April 1, 1938, to March 31, 1940, and thereafter from year to year subject to notice.

Hours for shift employees: 8 per shift, shifts to rotate and each employee to be entitled to the equivalent of one day's rest in seven. For employees other than shift employees, 8 per day, 4 on Saturdays, a 44-hour week.

Overtime for all employees: time and one-half for first four hours if worked within five hours of completing normal day's work; all other overtime at double time. For employees other than shift employees, double time for all work on Sundays and eight specified holidays.

Seniority to govern promotions when considering men of equal efficiency.

Wages per hour: station operators 72 cents, assistant station operators 61 cents, first class linemen 79 cents, second class linemen 72 cents, electric switchman 64 cents, first class station mechanic 79 cents, second class station mechanic 72 cents.

WINDSOR, ONTARIO.—SANDWICH, WINDSOR AND AMHERSTBURG RAILWAY COMPANY AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, DIVISION 616.

Agreement to be in effect from April 20, 1938, to December 31, 1938.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1937, page 576, with certain changes, among which are:

All new employees coming under the provisions of this agreement must become members of the union. The union not to refuse applications of any of the employees who were in the company's employ when the agreement came into effect, provided that all employees must make application to the union within 60 days of the date of the agreement. Effective from May 1, 1938, the company agrees to the check-off of all dues and special assessments levied by the association on its members and is to deduct from the wages all such dues and assessments and remit same to the union.

Wages per hour for motormen, conductors, one man car and bus operators: 52 cents for first six months, 56 cents for second six months and 60 cents after first year. These are increases of 2 cents per hour over the previous rates.

PORT ARTHUR, ONTARIO.—THE PUBLIC UTILITIES COMMISSION OF PORT ARTHUR AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION 966 AND ALL OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT OF THE CITY OF PORT ARTHUR.

Agreement to be in effect from May 1, 1938, to April 30, 1939, and thereafter from year to year, subject to notice.

The Commission recognizes the union as the bargaining agency for employees.

Hours in transportation department to be 48 hours per week or as near as possible to it. Regular spare operators working less than 6 hours a day to be paid an average of 6 hours per day, 6 days per week. Hours in car house and track departments, 44 per week.

Overtime for transportation department: time and one-half on their regular day off and on ten specified holidays and for all time over regular scheduled run. For regular operators, overtime allowed for all time worked in excess of regular schedule time. For short run and spare operators, overtime allowed for all time worked in excess of 48 hours per week. For car house and track departments, overtime and work on Sundays and ten specified holidays, time and one-half.

Wages per hour in transportation department: for two-man cars, 45 cents first six months, 50 cents second six months and 54½ cents thereafter; for one-man cars, 7½ cents per hour over two-man car rates. Wages per hour in car house department: carpenter, painter, machinist and blacksmith, 65 cents, first class pitmen 62 cents, second class pitmen 57 cents, car cleaners 50 cents; after two years' service and if capable, car cleaners to receive second class pitmen's rate of pay. Wages per hour in track department: track bonder 51 cents, regular trackmen 49 cents.

Seniority to be considered in making promotions and in choice of runs and in laying off men.

Uniforms to be supplied to operators by the company.

Free transportation to be given employees.

Any employee who feels he has been unjustly dealt with may have the matter considered by a committee of employees and the manager, and later if necessary by the Public Utilities Commission whose decision will be final.

FORT WILLIAM, ONTARIO.—THE CITY OF FORT WILLIAM AND THE AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION 966 AND ALL OTHER EMPLOYEES OF THE STREET RAILWAY DEPARTMENT.

Agreement to be in effect from May 1, 1938, to April 30, 1939, and until a new agreement is made.

No discrimination to be shown against any employee because of his connection with the union. The manager will at any time meet a committee of employees to discuss matters of mutual interest.

Hours to be in accordance with the requirements of the Ontario statutes governing street railways. Regular spare operators working less than 6 hours in any day will be paid an average of 6 hours per day, 6 days per week.

Overtime: overtime allowed all regular operators for all work in excess of 8 hours per day where the schedule calls for 8 hours per day or less, but if the schedule time calls for more than 8 hours, then overtime allowed for time over the schedule time; for short run and spare operators, overtime allowed for all time in excess of 48 hours per week. For car house department and track department, time and one-half for all hours over regular working hours and for all work on Sundays and ten specified holidays.

Wages per hour in transportation department: for two-man cars, 45 cents first six months, 50 cents second six months and 54½ cents thereafter; for one-man cars, 7½ cents per hour over two-man rates. Wages per hour in car house department: carpenter, machinist and blacksmith 65 cents, painter 61 cents, first class pitman 60 cents, second class pitman 55 cents, car cleaners 50 cents; after two years service and if capable, cleaners to receive second class pitman's rate of pay. Wages per hour in track department: track bonder 51 cents, regular trackmen 49 cents.

Seniority to be considered in making promotions and in choice of runs and in laying off men.

Uniforms to be supplied to operators by the company.

Free transportation to be given employees.

The manager will be willing at any time, after notice to interview the employees or a committee of them on any subject of mutual interest. Any employee who feels he has been unjustly dealt with may have the question considered by a committee of employees and the manager, and later if necessary by the Utilities Committee whose decision will be final.

WINNIPEG, MANITOBA.—THE WINNIPEG ELECTRIC COMPANY AND THE MOTORMEN, CONDUCTORS AND BUSMEN IN THEIR EMPLOY.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 572, with this change:

The wage rates for motormen, conductors and busmen are all increased one cent per hour over the previous rates.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE MECHANICAL DEPARTMENT.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 573, with this exception:

The wage rates for all classes of work are increased one cent per hour over the rates which were in effect from November 1, 1937, to April 30, 1938.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE TRACK DEPARTMENT.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

This agreement is the same as the one previously in effect and summarized in the LABOUR GAZETTE, May, 1938, page 573, with this exception:

The wage rates for all classes of work to be increased one cent per hour over the rates which were previously in effect.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF (1) THE POWER PLANT, (2) SUBSTATIONS MAINTENANCE AND CONSTRUCTION DEPARTMENT AND TELEPHONE AND SIGNAL SECTION AND (3) SUBSTATION OPERATIONS DEPARTMENT.

These agreements are summarized below under "Transportation and Public Utilities: Electricity and Gas."

REGINA, SASKATCHEWAN.—CITY OF REGINA, STREET RAILWAY DEPARTMENT AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION NO. 588.

Agreement (dated June 10, 1937) to be in effect from January 1, 1937, to December 31, 1937, and continues thereafter subject to 30 days' notice.

This agreement is similar to the one made November 1, 1936, and summarized in the LABOUR GAZETTE, March, 1938, page 333, with these exceptions:

The wages of all classes of work which were noted in the March LABOUR GAZETTE were increased 2½ cents per hour for hourly paid employees and $5 per month for monthly paid employees.

Sick leave, when certified by a medical certificate is granted to hourly paid employees as follows: for the first two days of each illness, no pay; for each succeeding day, not exceeding ten days in any one year, full pay is granted.

CALGARY, ALBERTA.—CITY OF CALGARY AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION 583.

The terms of this agreement are those recommended by a Board of Conciliation and Investigation under the Alberta Labour Disputes Act, 1926. Agreement to be in effect from October 16, 1937, to December 31, 1938, and thereafter from year to year subject to notice.

The city recognizes the union and will not discriminate against any employee because of his connection therewith.

Hours for motormen, conductors and busmen: An 8-hour day to be observed as far as operating conditions permit, but straight time to be paid for 8½ hours if required. A working week to consist of a minimum of 44 hours guaranteed to all regular motor conductors and bus operators according to seniority. A six-day week to be in effect.

Hours for barn staff and track maintenance men 8 per day. A minimum working week of 40 hours guaranteed to all regular employees except car cleaners and switch cleaners when a 44-hour week shall apply.

Wages: the agreement provides for the partial restoration of existing wage reduction, which in the rates given below results in the basic rates being paid in full for all rates of 68 cents per hour or less, and a deduction of 2 per cent from all basic rates over 68 cents per hour.

Basic wages per hour for motormen, conductors and busmen: motormen and conductors (2-man cars) from 57½ cents during first six months to 65 cents after one year; motor conductors (one-man cars) and busmen from 60 cents during first six months to 70 cents after one year, work car operator 65 cents; motor conductors to receive 5 cents per hour extra for training students.

Basic wages per hour for shop and barnmen (subject to reduction of 2 per cent on rates over 68 cents): carpenters, blacksmiths, motor mechanics, air brake and wheel lathe operators and painters 85 cents, fitters 72 cents; truck and car repairers from 60 cents during first six months to 70 cents after one year; cleaners, washers and yardmen 54 cents. Leading hand 5 cents per hour extra, foreman 10 cents extra.

Basic wages per hour for track maintenance: switch repairmen 60 cents, trackmen 57½ cents, greasers and switch cleaners 54 cents.

Seniority to govern in choice of runs and when filling a vacancy and when laying off men.

Uniforms to be supplied by the city at half cost during first year of employee's service and without cost to the employee thereafter.

Other clauses, such as overtime pay: vacation, etc., are the same as in the general agreement governing all civic employees as noted below under: "Service—Public Administration."

Transportation and Public Utilities: Water Transportation

NORTH SYDNEY, N.S.—CERTAIN EMPLOYERS AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1259.

Agreements to be in effect from January 1, 1938, to December 31, 1938, and thereafter from year to year, subject to notice.

Only union members to be employed.

Double time for work on Sundays and eight specified holidays.

Wages: 45 cents per hour for day work and 55 cents for night work. The agreement with one employer also includes a contract rate for the handling of salt.

Provision is made for the settlement of disputes by a joint arbitration committee.

HALIFAX, N.S.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1341 (STEAMSHIP CHECKERS).

This agreement, which came into effect December 6, 1937, for one year, and thereafter from year to year, subject to notice, has been automatically renewed to November 30, 1939.

The union to furnish employers with sufficient competent checkers.

The holidays agreed upon are Sundays and seven specified holidays. All work on Saturday after 6 p.m. and on Christmas Eve night to be paid at time and one half.

Wages: 72 cents per hour for day work, that is between 8 a.m. and 6 p.m.; 83 cents per hour for night work, that is between 6 p.m. and 8 a.m.

Provision is made for payment for waiting time: from 7 a.m. to midnight, full time for first hour and half time for succeeding hours until midnight; after midnight, full rate to be paid.

Disputes which cannot be settled between the union and the management of the steamship company concerned will be brought before the chairman of the Steamship Committee and a meeting of all the steamship companies will be called to settle the matter.

HALIFAX, N.S.—CERTAIN STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1533 (CARGO REPAIR MEN).

This agreement, which came into effect December 6, 1937, to November 30, 1938, and thereafter from year to year subject to notice, has been automatically renewed to November 30, 1939.

The union agrees to furnish the employers with a sufficient number of competent cargo repair men.

The hours of work, meal hours, holidays and rates of pay are the same as for longshoremen, which are noted in the LABOUR GAZETTE, February, 1938, page 213, the wage rates being 77 cents per hour for day work and 88 cents for night work.

HALIFAX, N.S.—CERTAIN STEAMSHIP AND COAL COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1546 (COAL HANDLERS, OPERATORS AND FIREMEN).

Agreement to be in effect from January 1, 1938, to January 1, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed, if available.

Hours: 9 per day.

Double time to be paid for work on Sundays and seven specified holidays; time and one half for work on Saturdays and Christmas Eve after 6 p.m.

Wages: 60 cents per hour for day work; 65 cents for night work up to 11 p.m.; after 11 p.m., time and one-half.

Waiting time to be paid at full rates. Double time for work during meal hours.

PUGWASH, N.S.—A CERTAIN STEVEDORING CONTRACTOR AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1531.

Agreement to be in effect from March 3, 1938, to January 1, 1939, and thereafter from year to year, subject to notice.

The employer recognizes the union as the bargaining agency for the longshoremen. Only union men to be employed, if available. The employer will deduct union dues from wages if requested by the union.

Hours: regular hours are from 7 a.m. to noon and from 1 p.m. to 5 p.m.

Overtime: all working time other than the above hours to be considered overtime and paid at time and one-half. Work on Sundays and Christmas day, double time, other holidays time and one-half.

Wages per hour: hatch tenders and water boy 30 cents, winchmen 35 cents, all other classes of work 40 cents, all head-foremen stevedores and gang-foremen stevedores to work at regular rate of longshoremen's wages.

PARRSBORO, N.S.—CERTAIN LUMBER EXPORTERS AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1472.

Agreement to be in effect from April 19, 1938, to December 31, 1938, and thereafter subject to notice.

The employers recognize the union as the bargaining agency for the longshoremen. Only union men to be employed if available. No discrimination against workers because of union connections.

Overtime to be paid after 9 hours' work; overtime at 10 cents per hour extra; work on Sundays and legal holidays, double time.

Wages per hour: for loading steamers or sailing vessels, all classes of work with lumber, pulpwood laths, piling or other cargo, 40 cents; for loading scows and building rafts, 35 cents per hour.

Work will not be interrupted because of disagreements.

CHARLOTTETOWN, P.E.I.—UNION WAGE SCHEDULE OF THE LABOUR PROTECTIVE UNION, LOCAL 9568 (LONGSHOREMEN).

Schedule to be in effect from April 1, 1938, to March 31, 1939.

Double time to be paid for work on Sundays and statutory holidays and for work during meal hours.

Wages per hour: for general wharf and warehouse work, 40 cents for day work and 50 cents for night work; for working steamers with general cargo, 60 cents per hour for day work and 70 cents for night work; for working on sailing vessels with general cargo, 40 cents per hour.

Rates are also included in the schedule for special cargoes.

SAINT JOHN, N.B.—VARIOUS STEAMSHIP COMPANIES AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 1039 (STEAMSHIP HORSE AND CATTLE FITTERS, SEALERS, LINERS AND CLEANERS).

Agreement to be in effect from November 1, 1938, to October 31, 1939, and thereafter from year to year subject to notice.

This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1935, page 1155, and May, 1938, page 573, with a change in the wage rates and other minor changes.

The wage rate is increased from 65 to 70 cents per hour for day work and from 97½ cents to $1.05 per hour for night work.

MONTREAL, QUEBEC.—SCHEDULE OF WAGES AND WORKING CONDITIONS ADOPTED BY THE NATIONAL HARBOURS BOARD FOR THE MONTREAL HARBOUR.

Schedule to be in effect from May 1, 1938, to April 30, 1939.

The conditions of this schedule are similar to those previously in effect, which were summarized in the LABOUR GAZETTE, June, 1937, page 691, July, 1936, page 659, and June, 1935, page 584, with certain exceptions.

The wage rates for foremen and assistant foremen are not included in the wage schedule although it is still provided that sub-foremen and leading hands be paid five cents per hour more than the men under their control.

In case of any dispute between an employee and a foreman or superintendent, the employee has the right to a hearing before the superintendent. If no settlement is reached, he may appeal to the head of his department or to the port manager.

MONTREAL, QUEBEC.—CERTAIN STEAMSHIP COMPANIES (INLAND NAVIGATION) AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (CHECKERS AND COOPERS).

Agreements to be in effect from April 18 and May, 18, 1938, during the 1938 navigation season and thereafter from year to year subject to notice.

The employers recognize the union and will give preference in employment to its members. No discrimination against employees on account of union activities.

Time and one-half for work on Sundays, and five specified holidays. When employees are required to work through meal hour, they will be paid at time and one-half for all time after the meal hour has elapsed.

Wages per hour: checkers 50 cents for work between 7 a.m. and 7 p.m. and 52 cents from 7 p.m. to 7 a.m.; coopers 49 cents between 7 a.m. and 7 p.m. and 51 cents between 7 p.m. and 7 a.m.

Seniority to govern employment and laying off men.

A local protective committee to be formed by the employees for the settlement of any disputes with the company officials. No strike or lockout to occur pending such settlement.

TORONTO, ONTARIO.—CERTAIN STEAMSHIP, WAREHOUSE AND LOCAL TRANSPORTATION COMPANIES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN, CHECKERS AND SHEDMEN).

Agreements to be in effect from April, 1938, for the 1938 navigation season and thereafter from year to year, subject to notice.

The Company recognizes the union and all longshoremen, checkers and shedmen must be members of the union. The union will furnish sufficient workers. If none available, others employed to join the union. No discrimination against any employee on account of union activities. The number of men required to take care of the normal operations to be agreed upon between the parties.

Time and one-half to be paid for work on Sundays and four specified holidays.

Wages: longshoremen and shedmen 49 cents per hour from 7 a.m. to 7 p.m., 51 cents from 7 p.m. to 7 a.m.; checkers $118 per month based on a 10-hour day.

Waiting time for longshoremen: first half hour free, next hour to be paid at half time and thereafter at full time. If longshoremen required to work through meal hour, regular rate of pay from beginning of meal hour for one hour and a half, but if required to work beyond this time, time and one-half to be paid for whole period from beginning of meal hour.

Seniority to govern employment and reduction in staff for checkers and shedmen.

A local protective committee to be formed by the employees for the settlement of any disputes, with company official. No strike or lockout to occur pending such settlement.

HAMILTON, ONTARIO.—CERTAIN STEAMSHIP COMPANIES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES (LONGSHOREMEN).

Agreements to be in effect from April and May, 1938, for 1938 season of navigation, and thereafter from year to year, subject to notice.

These agreements are similar to the ones summarized above for longshoremen at Toronto

PACIFIC COAST.—CANADIAN NATIONAL STEAMSHIPS (PACIFIC) AND THEIR EMPLOYEES OF THE STEWARDS DEPARTMENT.

Agreement to be in effect from June 1, 1938, until 60 days' notice from either party.

No discrimination against any employee on account of union membership.

Hours and overtime: all employees to be given 24 consecutive hours clear of the ship each week, in the employees' home port where ship calls at such port, or at Vancouver where the ships do not call at such port. Where not possible to allow this time, it will accrue to the employee and be given him when possible. During the summer season, employees to be paid 3 hours overtime per day at a rate computed *pro rata* to the monthly rate of pay based on 9 duty hours per day within 16 consecutive hours. Overtime outside of summer service, when worked, will be paid in addition by time off or otherwise.

Monthly wage rates: linenkeeper (and waiter) $65 and $70 for summer, $60 for winter; printer (and waiter) $65 and $75 for summer, $55 and $70 for winter; saloonsmen $55 to $65 for summer, $55 and $60 for winter; waiters and bedroom stewards $55 and $60 for summer, $55 for winter; steerage stewards $45 to $60 for summer, $45 and $55 for winter; deck stewards $60 for summer, $55 for winter; mess stewards $40 and $60 for summer, $40 and $55 for winter; stewardesses $55 for summer, $50 for winter; bellmen $60 for summer, $55 for winter; janitor $40; porters $35 for first year, $40 after one year's experience; bell boys $25; cooks and bakers $60 to $115; pantrymen $45 to $75; dishwashers $40 and $45. During the period in which the Alaska service is being operated, cooks to be paid bonuses of $2.50 to $10 per month.

Vacation: after one year's continuous service, employees to be given one week's vacation, each year; after three years' service, two weeks' vacation each year.

Seniority to govern in filling vacancies when merit and ability are sufficient.

Employees with established seniority to be provided with uniforms and shall pay half the cost thereof; after five years' service the company to pay total cost of uniforms supplied.

Any employee who considers he has a grievance may appeal to the officers of the ship in order of their rank, and if necessary to the higher officers of the company.

When questions are submitted to the management by the employees' committee as to interpretations of this agreement, such interpretations when negotiated to be signed jointly by the proper officer for the company and the committee of employees.

Transportation and Public Utilities: Electricity and Gas

HALIFAX, N.S.—NOVA SCOTIA LIGHT AND POWER COMPANY AND UNION.

Employees of this Company's electric power and gas departments are included in the agreement summarized above under "Electric Railways."

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE POWER PLANT.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Neither the company nor the employees to discriminate against any employee for being or not being a member of the employees' organization.

Hours: for operating staff, 8 consecutive hours per day, 48 per week, each employee being entitled to 4 days in every 28 days in lieu of Sundays; for maintenance staff, 8 per day, a 48-hour week.

Overtime required to be compensated for by allowing equivalent time off.

Wages per month for operating staff: operators $145, relief operators $135, assistant operator $124, floormen $115, relief floorman $112, oiler $121, relief oiler $112, cleaner $103. Wages for maintenance staff: electrician $164 per month, blacksmith and machinist $140, utilityman $148, outside foreman 59½ cents per hour.

Vacation: monthly paid employees, after one year's continuous service to be entitled to two weeks' vacation with pay: hourly paid employees to be entitled to vacation in proportion to the number of days worked in the previous year, and amounting to 12 days for those working 289 or more days in the year.

Seniority with efficiency to govern all promotions. In reduction in staff and in re-employment, seniority to be a governing factor.

A grievance committee of employees may discuss any grievances with the superintendent and if necessary with higher officers of the company.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE SUBSTATION MAINTENANCE AND CONSTRUCTION DEPARTMENT AND TELEPHONE AND SIGNAL SECTION OF THE RAILWAY DISTRIBUTION DEPARTMENT.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Hours: for day men, 8 per day, 4 on Saturdays, a 44-hour week; for shift men 8 per day, 88 per two-week period.

Overtime: for day men, time and one-half to midnight and double time thereafter, and double time for work on Sundays and eight specified holidays; for shift men, time and one-half for first four hours and double time thereafter.

Wages per hour for substation maintenance and construction department: foreman 90 cents, sub-foreman 86½ cents, station maintenance man (journeyman) 81½ cents, helpers and apprentices from 38 cents during first year to 63½ cents during fourth year, labourer with established seniority 42 cents. Wages per hour for telephone and signal section of the railway distribution department: senior repair man 77½ cents, machinist and welder 69 cents, signal maintainer 64½ cents, assistant signal maintainer 53 cents, helpers from 28 cents during first year to 50½ cents during fourth year.

One apprentice helper allowed to each five journeymen, and they will be allowed to complete their four years' apprenticeship without being subject to layoff.

Employees to be given free transportation on street cars and buses of the company.

Employees sent out of city to work to have transportation and board paid and travelling time, except those returning the same night whose board will not be paid.

Other clauses relating to discrimination on account of union membership, vacation, seniority and grievance committee are similar to those summarized above for the employees of the power plant of the company.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES, OF THE SUBSTATIONS OPERATIONS DEPARTMENT.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Hours: in the three shift stations, 8 consecutive hours per day, a 48-hour week; in two shift stations, 9½ hours per day for 5 days a week; for city patrolman 8 per day, 4 on Saturdays, a 44-hour week; for country patrolmen 48 hours per week with one day off in seven.

Overtime for operators: time and one-half for first four hours, double time thereafter; time and one-half for work on employee's day off.

Wages per hour for operating staff: relief chief operator 74½ cents, assistant operator (one station) 69 cents, senior operator 63 cents, operators at two other stations 57½ cents, operator at another station 51½ cents; floormen 42 and 46½ cents, floorman apprentice 37 cents. Wages per month for patrolmen $131 per month.

Other clauses are similar to those summarized above for employees of the power plant.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR ELECTRIC METER DEPARTMENT EMPLOYEES.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

Hours: 8 per day, 4 on Saturdays, a 44-hour week.

Overtime: time and one-half to midnight; thereafter double time; work on Sundays and eight specified holidays, double time.

Wages per hour: instrumentman and installer 78½ cents, metermen from 38 cents during first year to 63½ cents after two years.

Other clauses of this agreement are similar to those summarized above for the power plant employees of the company.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND THEIR EMPLOYEES OF THE GAS WORKS.

Agreement to be in effect from May 1, 1938, to April 30, 1940, and thereafter from year to year, subject to notice.

The terms of this agreement are similar to the one previously in effect and summarized in the LABOUR GAZETTE, March, 1937, page 361, with these exceptions:—

Wages per hour: shift engineer 61½ cents; heaters, producer operators, pusher operators and door lifter operator 58½ cents, quenching car operators 57 cents, utility operator 48½ cents; repairmen, known as blacksmith and fitter, machinist and fitter and pipefitter 60 cents; repair helpers and laboratory helper 45 cents; yard men and labourers with established seniority, employed in purifying house or any part of the gas works 41½ cents, boiler washer 49½ cents, boilerman 50½ cents, coal elevator and mixer operator 54½ cents, coal unloaders and oiler 45 cents. (These are increases of one cent per hour in most cases.)

The annual vacation in proportion to number of days worked in previous year is now allowed all employees with at least one year's experience.

REGINA, SASK.—CITY OF REGINA AND UNIONS.

Employees of the light and power department of the city of Regina are included in the civic agreement summarized below under "Service: Public Administration."

CALGARY, ALBERTA.—CITY OF CALGARY AND UNIONS.

Employees of the light and power department of the city of Calgary are included in the civic agreement summarized below under "Service: Public Administration."

Transportation and Public Utilities: Miscellaneous

PORT ARTHUR AND FORT WILLIAM, ONTARIO.—CERTAIN GRAIN ELEVATOR COMPANIES AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT HANDLERS, EXPRESS AND STATION EMPLOYEES, LOCAL 650 (GRAIN ELEVATOR EMPLOYEES).

Agreement reached with the assistance of a conciliation officer of the Department of Labour, to be in effect from September 1, 1938, to July 31, 1939, and thereafter subject to notice.

The employers recognize the union and will show no discrimination against union members.

Hours for hourly paid employees: a 10-hour day to prevail. During the open season of navigation, a minimum of 48 hours to constitute a week's work and during the closed season of navigation, a minimum of 40 hours and the employers to endeavour, as long as work is available, to provide every man employed each week with a week's work.

Overtime for hourly paid employees: at least 15 cents extra to be paid for all overtime over 10 hours; time and one half for work on Sundays and seven specified holidays.

Minimum hourly wage rates for hourly paid employees: shovellers, assistant oilers and ordinary labourers, 50 cents; all other classes of experienced labour, including assistant weighmen, assistant electricians, assistant millwrights, cleanermen, bin floormen and oilers, 55 cents. Employees receiving higher wage rates at the time the agreement came into effect are not to have their wage rates reduced during the period of this agreement.

During the term of this agreement the employers agree to discuss with a committee of monthly paid employees matters concerning them and the wages of monthly paid employees are not to be reduced.

Seniority to be considered in laying-off men and in making promotions and filling vacancies.

Vacation: two weeks' vacation with pay each year after one year's service.

A shop committee at each elevator to be formed for the settlement of all disputes with the employers, and if necessary a union representative to take part.

WINNIPEG, MANITOBA.—A CERTAIN COLD STORAGE COMPANY AND THEIR EMPLOYEES.

Agreement reached following strike reported in the LABOUR GAZETTE, July, page 741. Agreement to be in effect from June, 1938, to July 1, 1939.

The Company recognizes a committee representing the majority of the employees.

Wages per hour: regular employees 45 cents, night men 37½ cents, seasonal employees 35 cents, mechanics 60 cents while so employed.

A seniority list of seasonal employees to be adhered to as far as practical.

The Company will deal with the employees' committee to settle any disputes. If disputes cannot be settled in this way they will be referred to the Manitoba Department of Labour.

Trade

VANCOUVER, B.C.—A CERTAIN RETAIL CHAIN STORE COMPANY AND THE RETAIL CLERKS' INTERNATIONAL PROTECTIVE ASSOCIATION, LOCAL 279.

Agreement reached following lockout reported in the LABOUR GAZETTE, July page 742. Agreement to be in effect from June 1, 1938,

to June 30, 1939, and thereafter from year to year subject to notice. The agreement applies to Greater Vancouver, that is, Vancouver, New Westminster, Burnaby, North Vancouver and West Vancouver.

Only union members to be employed, if available. Any others employed must join the union. The company agrees to deduct from the pay of the employees and pay over to the union the monthly dues, etc., of the union.

Wages: managers $30 per week, assistant managers $27, butchers (who have at least three years' experience in cutting and selling meat in a retail shop) $24, senior clerks $22, junior clerks $18; part time employees, that is those who are employed not more than five days per week, 45 cents per hour. The union agrees that no bonuses to be paid in addition to these salaries.

The number of junior clerks employed by the company not to exceed one third of the total number of clerks, exclusive of managers. The company to name an assistant manager in any store having four or more employees including the manager.

Vacation: after one year's service, a clerk to be entitled to one week's vacation with pay each year and if he so requests an additional week without pay.

Provision is made for settlement of disputes by a joint committee, and later if necessary, by reference to the Minister of Labour.

Service: Public Administration

REGINA, SASKATCHEWAN.—CITY OF REGINA AND THE REGINA CIVIC EMPLOYEES ASSOCIATION, LOCAL 21 OF TRADES AND LABOUR CONGRESS.

Agreement to be in effect from January 1, 1938, and continues subject to three month's notice from either party.

No discrimination against any employee on account of membership in a trades union.

Seniority to be considered in filling vacancies and when necessary to reduce staff.

Overtime: except for administrative staff, any employees on monthly salaries, who work overtime to be allowed an equal number of hours off or be paid for such overtime; employees paid on an hourly basis to be paid time and one half for first five hours of overtime, and thereafter double time. For work on Sundays, double time to be paid unless another day is given instead. Permanent and seasonal employees to be paid for all of the ten specified holidays.

Vacation: after one year's service, two weeks annual vacation with pay to be granted.

Sick leave: employees paid on hourly basis to receive no pay for first two days of an illness, but will be paid for each succeeding day not exceeding 10 days in any year.

The heads of departments shall and the Association may annually recommend to the city Commissioners for increases in salary to certain persons.

Any committee of the Association shall upon request be given a prompt hearing by the heads of departments, the city Commissioners and by the city council.

Light and Power Department

For outside electrical employees, hours are 8 per day, 4 on Saturdays, a 44-hour week except the Saturday afternoon trouble shift who may work Saturday afternoon at straight time.

Every outside electrical employee to be considered a journeyman if he has four years' experience as a lineman, wireman, troubleman or meterman. Not more than one apprentice lineman allowed to each four journeymen linemen.

Wages per hour for outside electrical workers: lineman from 73 cents during first year to 88 cents during third year, journeymen 93 cents, journeymen with cable experience 98 cents, mechanics and utility man 70 cents, groundmen 63 cents, street light attendants 70 cents, sub station operator 77 cents, street light attendants 70 cents, substation firemen 60 cents, engine room cleaner 60 cents, janitor 58 cents; meter testers and repairmen from 75 cents during first year to 80 cents during third year and 83 cents for senior men, meter installers from 68 cents first year to 78 cents third year.

For power house employees, hours are 8 per day, 4 on Saturdays, a 44 hour week, with double time for work on weekly day of rest or holidays.

Wages for power house employees: operating engineers from $175 to $195 per month, boiler room operators $160 and $170 per month, coal and ash conveyor attendants 73 cents per hour, assistants 61 cents, boiler cleaner 63 cents, room cleaners 58 cents, plant electricians $185 per month; leading mechanics, machinists and carpenters 83 cents; mechanics, machinists and carpenters 73 cents, electricians' assistant 62 cents, mechanics' and fitters' assistant 58 cents.

Health Department

Hours: 9 per day, 5 on Saturdays, a 50-hour week for the day shift and 9 per day, a 54-hour week for the night shift.

Wages: motor broom operators $5.50 per day. Wages per hour: truck drivers 52½ cents, truck helpers 45 cents, teamsters 50 cents, street cleaners 45 cents, repairman 65 cents, other classes 45 to 55 cents.

Engineer's Department

Hours: 8 per day, 4 on Saturdays, a 44 hour week. The regular Saturday afternoon shift to work four hours at straight time. Employees required to start work earlier than the regular shift to prepare for the day's work may also be paid at straight time.

Wages per month: patrolmen $115, mechanic and welder $125. Wages per hour: foremen and rollermen 75 cents, other classes 50 and 55 cents; skilled and regular seasonal employees 45 cents.

Sewage Disposal Works

Hours: 9 per day on regular or rotating shifts.

Wages per month: pumpmen $120, utility man $115. Wages per hour: permanent labourers 47 cents, casual labourers 45 cents.

Parks Department

Hours: 8 per day, except employees on shift work.

Wages per month: nursery lead man $132, bath house attendant, mechanic, carpenter and boulevards and parks lead man $115, truck driver $114, plant grower $100, night watchman $70. Wages per hour: teamsters, grave diggers, spare truck driver 55 cents; parks policemen and labourers 50 cents.

Waterworks Department

Hours: 8 per day, 4 on Saturdays, a 44-hour week. Employees in attendance at telephone on week days and Sundays to be paid straight time; those in attendance on holidays to be given one other day off with pay. When weather conditions prevent construction or

maintenance being carried on, work to be provided indoors or employees will be allowed to stand by to deal with emergencies and paid therefor at usual rates.

Wages per month: meter mechanics $125, night stand-by men $110 and $115. Wages per hour: mechanics and truck driver 60 cents, skilled labour 57 cents, labourers 50 cents.

Administrative Staff

Hours: 6¾ per day, 4 on Saturdays, 37½ per week. For overtime required, the City Commissioners may authorize the payment of such compensation as may be determined.

Salaries are divided into six grades: grade 1 from $2,100 to $2,400 per year; grade 2, $1,800 to $2,040; grade 3, $1,560 to $1,740; grade 4, $1,200 to $1,500; grade 5, $780 to $1,140; grade 6, $540 to $720.

REGINA, SASKATCHEWAN.—CITY OF REGINA AND THE CITY FIRE FIGHTERS ASSOCIATION, LOCAL 181.

Agreement to be in effect from January 1, 1937, to December 31, 1937, and continues in effect subject to 30 days' notice.

The city recognizes the union and will not discriminate against any employee because of his connection with it.

Vacation: all employees after one year's service to be given 21 days' vacation.

Salaries per month: firemen from $100 during first year to $126 during fourth year; captain's from $131 during first year to $142 during third year: mechanic $142, alarm superintendent $134, telephone operators $117, chief's secretary $98. In addition to the above all employees to receive an increase of $5 per month for each five years' service, the period of service to commence July 1, 1929.

Employees to be provided with uniforms at the expense of the department.

In filling vacancies and new positions, merit and ability being sufficient, seniority will govern.

CALGARY, ALBERTA.—CITY OF CALGARY AND THE CALGARY FEDERATION OF CIVIC EMPLOYEES.

The terms of this agreement are those recommended by a Board of Conciliation and Investigation under the Alberta Labour Disputes Act, 1926. Agreement to be in effect from October 16, 1937, to December 31, 1938, and thereafter from year to year, subject to notice.

General

The City will not show discrimination against any employees because of their connection with a union.

Hours: the regular hours to be 8 per day, 40 per week except for shift work and except where otherwise noted.

Overtime: time and one quarter for first hour, time and one half for next three hours and double time thereafter; double time for work on Sundays and eight specified legal holidays or on an employee's regular day off. No deduction from the wages or salary of any employee on account of these legal holidays occurring during regular work periods.

Vacation: all permanent employees to be given two weeks vacation each year, after one year's service.

Sick leave: permanent employees are covered by sickness and accident pay towards which they contributed 75 cents per month and the city contributes the balance needed.

The basic wage rates of over $130 per month and 68 cents per hour are still subject to wage deductions varying from 2 per cent to 11 per cent according to salary or wage.

Seniority and efficiency to govern promotions, filling of vacancies, etc.

The city commissioners shall at all times grant interviews to a grievance committee representing the federation or any of its affiliated locals.

International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local 528

Hours: 8 per day, 5 days per week, a 40-hour week. Eight hours' pay for 7 hours' work for night work. No deduction from pay for loss of time through inclement weather.

Wages (subject to deductions as noted in general clauses above): truck drivers $110 per month, truck helpers $105, motor broom operator 70 cents per hour, garage mechanic $150 per month.

International Brotherhood of Electrical Workers, Local 348

Hours 8 per day, 40 per week; for shift work 8 per day, with at least one day off duty per week.

Overtime: except for shift work, all work on Saturdays at double time.

Basic wage rates (some subject to deduction as noted in general clauses above): journeyman cable splicer $8.20 per day, journeymen (line, repair and testing, maintenance and trouble, welding, trolley station, inside and car wiring, armature winders) $7.55 per day, apprentices to these journeymen from $3 per day during first year to $6 during fourth year, journeymen in charge of rig of two or more journeymen $8.05 per day, groundmen $5.35, arc trimmers $6.10; station operators $158 to $175 per month, apprentice operators from $75 per month during first year to $100 during third year; track welders (temporary) 80 cents per hour, motor and controller man 80 cents per hour.

Apprentices must first have worked at least three months at some branch of the electrical trade, and must serve four years.

Calgary Civic Employees' Association, Local 37

Wages (subject to reductions for those over $130 per month as noted above under general clauses): in parks department—mechanics $150 per month, assistant mechanic and gardener 67½ cents per hour, grave diggers and labourers 54 cents; in paving department—steam engineers (roller, paving plant, concrete mixer) 87½ cents per hour, mixer man 75 cents, form setters and concrete finishers 72½ cents, special labourers 62½ cents, labourers 54 cents; in public works department—carpenters 80 cents, district men 62½ cents, street cleaners and labourers 54 cents; in sewer department—service trouble men $140 per month, specialists 60 cents per hour, diggers 54 cents, sewage disposal plant operators $135 per month; waterworks department—chief operator $158 per month, trouble men $140 per month, relief operators 70 cents per hour, hydrant repair man and pipe men 62½ cents per hour, labourers and ditch diggers 56½ cents for permanent men, 54 cents for semi-permanent; at dam—filter plant operators $143 per month, chemical plant operators $135, chemist $175.

City Hall Staff Association, Local 38

The classification of positions had not been completed when this agreement was made but both parties agreed to later incorporate such classification into this agreement.

International Association of Fire Fighters, Local 255

Hours: firemen to have a 66-hour week under the two-platoon system; fire alarm operators to work 8 hours per day, 44 per week.

Overtime: when called in for duty on the off shift, equivalent time off to be given for day time work and time and one-half off for night work.

Vacation: all members of the active fire-fighting force entitled to a vacation to receive an additional week in lieu of legal holidays, making a three weeks' vacation for them.

Uniforms and equipment to be supplied by the city.

Free transportation granted on the municipal street railway when men are on duty in uniform.

Basic wage rates (subject to reductions for those over $130 per month as noted above under general clauses): chauffeurs and firemen from $115 per month first year to $145 after four years; lieutenants $155, captains, $165, motor mechanic $170, assistant motor mechanic $155; fire alarm operators from $115 during first year to $125 during third year; lineman, plumber, carpenter, painter $10 per month above firemen's scale.

International Brotherhood of Blacksmiths, Drop Forgers and Helpers, Local 585

Basic wage rates (subject to deduction as noted in general clauses): blacksmiths 85 cents per hour, helpers 65 cents.

Blacksmiths must have served an apprenticeship of five years and be efficient in the work.

City Hospital Employees' Association, Local 8

Hours: 40 per week for plumber, carpenter, chief engineer, painter, floor polisher and laundry staff; 44 hours for shift engineers, orderlies, cooks, kitchenmen, chef, porters, elevator men, corridor cleaners and maids, with one day off in seven; for clerical and office staff, same as city hall staff, except switchboard operators and admitting and discharging clerks who work on 8-hour shifts, a 44-hour week.

Uniforms to be supplied free of charge to orderlies, cooks, chef, kitchenmen, ward and kitchenmaids.

Salaries per month (subject to deduction for salaries over $130 as noted above under general clauses): admission and discharging clerks $100, switchboard operators $90, painters $150, laundry help (female) $15 and $16 per week, washerman $115 per month; elevator men, porters, floor polishers $117, plumber $170, carpenter $160, orderlies $105 to $117, cooks $90 and $103 with board, kitchenmen $80 with board, maids (dining-room, kitchen, wards and nurses' quarters) $55 with board.

Service: Recreational

OTTAWA, ONTARIO..—CERTAIN THEATRE PROPRIETORS AND THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE MACHINE OPERATORS, LOCAL 257 (MOVING PICTURE MACHINE OPERATORS).

Agreement to be in effect from September 1, 1937, to August 31, 1939.

Only union members to be employed.

Hours: 36 per week in some theatres, 42 in others.

Overtime and work on Sundays and holidays: $1.50 per hour.

Wages per week for moving picture machine operators: from $32 to $45.

Service: Business and Personal

MONTREAL, QUEBEC.—A CERTAIN COMMERCIAL FIRM AND THE OFFICE EMPLOYEES ASSOCIATION, LOCAL 18748 OF THE AMERICAN FEDERATION OF LABOUR.

Agreement to be in effect from February 11, 1938, to February 10, 1939, and thereafter from year to year, subject to notice.

Only union members to be employed. Any others employed must join the union. No discrimination to be shown against any employee on account of union activity.

Hours: for female staff, 7½ per day, 4 on Saturdays, a 41½ hour week except that one stenographer work 6½ hours on Saturday; for male staff, 8 per day, 6½ on Saturday, a 46½ hour week.

Overtime: time and one-half, with a minimum of 50 cents per hour. Five holidays observed with no deduction from salaries. Any work on such days to be paid at double time.

Vacation and sick leave: each employee with one year's service or more to have two weeks' vacation with pay each year; those employed 6 months but less than one year to receive one week's vacation with pay. One week's sick leave with pay is allowed.

Promotions to be made by seniority, where qualifications are equal.

Disputes which cannot be settled between the parties will be referred to arbitration.

TORONTO, ONTARIO.—CERTAIN EMPLOYERS AND THE INTERNATIONAL UNION OF ELEVATOR CONSTRUCTORS, OPERATORS AND STARTERS, LOCAL 116 (ELEVATOR OPERATORS).

Agreement to be in effect from various dates in March and April, 1938, to the same dates in 1939.

Only union members to be employed.

Hours: 51 per week, with ½ hour period off each morning and each afternoon.

Overtime and work on Sundays and eight specified holidays: 50 cents per hour.

Minimum wage rate for elevator operators $20.50 per week.

Vacation: one week's vacation with pay to be given employees who have had six months' service prior to July 1, 1938.

Uniforms required to be supplied by employer.

Disputes are to be referred to arbitration.

PORT ARTHUR, ONTARIO.—CERTAIN HOTELS AND RESTAURANTS AND THE HOTEL AND RESTAURANT EMPLOYEES INTERNATIONAL ALLIANCE, LOCAL 761 (HOTEL AND RESTAURANT EMPLOYEES).

Agreement to be in effect from September 10, 1937, to May 1, 1938, and continues thereafter subject to notice from either party.

Preference in employment to be given to union members. Any others employed to join the union. The union representative may visit the premises.

Minimum wages: bartenders (skilled) $21 per week; extra help (skilled) 50 cents per hour for one day or less; chef $75 per month, other cooks $45 and $50; extra cooks called in for one day or less, 50 cents per hour plus board; waitress (experienced) and kitchen girls $32.50 per month with one day off per week; extra help (male and female) 25 cents per hour for one

day or less. Those receiving higher than the above rates at the time the agreement came into effect are not to have their wages reduced.

Vacation: after one year's service, female employees to be entitled to two weeks' vacation with pay.

Seniority to be considered when laying off employees.

Uniforms required to be furnished and laundered at the expense of the employer.

Disputes which cannot be settled between the parties will be referred to arbitration.

VANCOUVER, B.C.—BRITISH COLUMBIA HOTELS' ASSOCIATION AND THE HOTEL AND RESTAURANT EMPLOYEES INTERNATIONAL ALLIANCE, LOCAL 676 (BEVERAGE ROOM EMPLOYEES).

Agreement to be in effect from January 24, 1938, to January 1, 1941, and thereafter from year to year, subject to notice.

No discrimination to be shown against any employee on account of union activity. All help must be hired through the union office.

Hours: 8 per day, which must be worked within 12 consecutive hours with not more than one split in the shift, a 48 hour week. No split allowed on shifts of less than 8 hours.

No deduction from wages of steady men for time lost on legal holdays which affect the hotels.

Minimum wages: tap man $31.50 per week, floor men $28.50 per week; short shift steady man working 4 hours, 62½ cents per hour up to 8 hours; extra men for floor on holidays, eve of holidays and Saturdays $5.50 per shift of 8 hours, $2.80 per shift of 4 hours.

Uniforms to be supplied and laundered at the expense of the employer.

VICTORIA, B.C.—EMPLOYING BARBERS AND THE JOURNEYMEN BARBERS' INTERNATIONAL UNION, LOCAL 372.

Verbal agreement to be in effect from May 20, 1938.

Hours: 47 per week.

Minimum wages: $18 per week plus 65 per cent of receipts over $28. Employees working less than 40 hours to be paid at daily rate, that is $3.60 per day of 8 hours plus 65 per cent of receipts over $5.50, Wednesday $2.25 per day of 4½ hours plus 65 per cent of receipts over $4; short shift of 4 hours or less, $1.80 per shift plus 65 per cent of receipts over $3.50.

A price list for each piece of work is included.

Collective Labour Agreements Act, Quebec

The following agreements and amendments to agreements have recently been made obligatory by Orders in Council and are summarized in the next article:

Granite Industry, Province of Quebec (amendment).

Building Trades, Montreal (amendment).

Longshoremen (ocean navigation), Montreal,

Shipliners (ocean navigation), Montreal,

Checkers and coopers (ocean navigation), Montreal.

Garage and Service Station Employees, Quebec (amendment).

Barbers and Hairdressers, Montreal (amendment).

Industrial Standards Acts

The following schedules have recently been made binding by Orders in Council and are summarized in a special article below:

ONTARIO

Logging Industry, Rainy River zone.
Painters, Kingston.

SASKATCHEWAN

Bakers, Moose Jaw.
Hairdressers, etc., Estevan.
Barbers, North Battleford.
Shoemakers, Regina.

ALBERTA

Bakers, Calgary.
Bakers, Edmonton.

COLLECTIVE LABOUR AGREEMENTS ACT, QUEBEC

Recent Proceedings Under the Act

THE Collective Labour Agreements Act which was assented to March 18, 1938, amends the Act respecting Workmen's Wages, 1937, by changing the title of the Act and by certain other changes which are summarized in the May issue of the LABOUR GAZETTE, page 503. Agreements and regulations under the Act respecting Workmen's Wages and under the original Act, "The Collective Labour Agreements Extension Act, 1934," continue in effect for the period for which they were made or have been renewed or amended. Under the Collective Labour Agreements Act, any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant-Governor in Council through the provincial Minister of Labour to have those terms of such agreements which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant-Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published and thirty days is then allowed for filing of objections and the Minister may hold an

inquiry. After this period, if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette,* or its provisions may be made retroactive for a period not exceeding four months. The Order in Council may be amended or revoked at any time by the Lieutenant-Governor in Council and such amendment or revocation must be published in the *Quebec Official Gazette.* Unless otherwise stipulated, these agreements do not apply to provincial government departments or services or to work done by a third party for the provincial government under a contract providing for a scale of minimum wages. A joint committee must be formed by the parties to an agreement made obligatory under this Act and the Minister may add to such committee representatives nominated by employers and employees not parties to the agreement. The committee is to make its own by-laws and when these are approved by Order in Council and published in the *Quebec Official Gazette,* the committee is constituted a corporation. A joint committee may require certificates of competency from workers within the scope of the agreement in cities and towns of 5,000 or more, and such by-law must be approved by Order in Council and published in the *Quebec Official Gazette.* Proceedings under the Collective Labour Agreements Extension Act were summarized in the LABOUR GAZETTE from June, 1934, to July, 1937. Proceedings under the Workmen's Wages Act were noted in the issues from July, 1937, to April, 1938. Proceedings under the Collective Labour Agreements Act are noted in the issues beginning May, 1938.

Recent proceedings under the Act include: the extension by Orders in Council of agreements affecting longshoremen, shipliners and checkers and coopers at Montreal and amendments and corrections to other agreements, all of which are summarized below. Requests for the extension of new agreements affecting the paper box industry and the corrugated paper box industry throughout the province were published in the *Quebec Official Gazette* of November 19 and one affecting the granite industry throughout the province in the issue of November 26. In addition, Orders in Council were passed approving the constitution and by-laws of certain joint committees and others cancelling the obligations of workers in certain industries to have certificates of competency and were published, as listed below.

Manufacturing: Boots and Shoes

SHOE INDUSTRY, PROVINCE OF QUEBEC.—An Order in Council, approved October 29, and published in the *Quebec Official Gazette,* November 5, amends the previous Orders in Council for this industry (LABOUR GAZETTE, October, 1937, page 1156, March, 1938, page 335 and June, page 691) by adding two further employing companies to the parties to the agreement.

Manufacturing: Non-Metallic Minerals, Chemicals, Etc.

GRANITE INDUSTRY, PROVINCE OF QUEBEC.—A correction to the Order in Council summarized in the LABOUR GAZETTE, June, 1937, page 694, was published in the *Quebec Official Gazette,* November 5, changing the districts in which the 70 cent per hour rate applies to include the Island of Montreal.

Construction: Buildings and Structures

BUILDING TRADES, MONTREAL.—A correction is published in the *Quebec Official Gazette,* November 12, which does not affect the summary of the last Order in Council for these trades (LABOUR GAZETTE, November, page 1300).

Transportation and Public Utilities: Water Transportation

LONGSHOREMEN (OCEAN NAVIGATION), MONTREAL.—An Order in Council, approved October 29, and published in the *Quebec Official Gazette,* November 5, makes obligatory the terms of an agreement between certain steamship lines and the International Longshoremen's Association and its affiliated local 375.

The Order in Council to be in effect from November 5, 1938, to December 31, 1938, and thereafter until a new agreement is sanctioned. It applies to all operations of loading and unloading ocean going vessels in the harbour of Montreal. It does not affect in any way the Orders in Councils for coal handlers nor for longshoremen engaged in inland and coastal navigation (LABOUR GAZETTE, June, page 695 and July, page 799 respectively).

Double time for work during meal hours and thereafter until discharged for meals and for all work on Sundays and two specified holidays, except that men will handle mail, baggage and express at all times (except Labour Day) at regular rates.

Wages per hour: from 7 a.m. to 12 noon and from 1 p.m. to 6 p.m., 77 cents; from 7 p.m. to 11 p.m., 87 cents from midnight to 5 a.m., 97 cents. For certain work 15 cents per hour extra to be paid, that is for men working on nitrate, bulk sulphur, full cargoes of china clay, and fertilizer, shifting bunker coal and

handling cargo in refrigerators which is to be transported at 32° Fahrenheit or less, for grain trimming and bagging and for all workmen of the gang working in open 'tween deck where there is grain running in a hatch connected with said open deck.

Men called for 9 a.m., for 7 p.m. or for Sundays to receive a minimum of one hour's pay at the prevailing rate. Men ordered out to work at night must be ordered out for 7 p.m. and be paid full time at the prevailing rate from that hour until discharged or set to work.

The running of grain in the pipes to be stopped while the men go down in the hold to work. Two men to stand on deck during that time, if necessary.

Regulations in the agreement as to working conditions specify the number of men for gangs, weight and size of slingloads, etc.

Any dispute as to the interpretation of the working conditions which cannot be settled will not be cause for stoppage of work but will be referred to a joint arbitration board whose decision will be final.

SHIPLINERS (OCEAN NAVIGATION), MONTREAL. An Order in Council, approved October 29, and published in the *Quebec Official Gazette*, November 5, makes obligatory the terms of an agreement between certain steamship companies and the International Longshoremen's Association and its affiliated local 1552.

The Order in Council to be in effect from November 5, 1938, to December 31, 1938, and thereafter until a new agreement is sanctioned. It applies to all shiplining operations on ocean going vessels in the harbour of Montreal, for grain and cattle and all wood work in connection with the stevedoring gear except where permanent gear men are employed.

Conditions as to work during meal hours, on Sundays and holidays, minimum of one hour's pay if called at certain hours, payment of waiting time at night, stopping of running of grain while men go down in the hold are the same as in the longshoremen's agreement summarized above.

Wages per hour for ordinary work are the same as for longshoremen, that is 77 cents per hour between 7 a.m. and noon and between 1 p.m. and 6 p.m., 87 cents between 7 p.m. and 11 p.m. and 97 cents between midnight and 5 a.m. For work performed in holds of steamers, in which bulk sulphur or bulk fertilizer has been stowed and where the old wood is being used in whole or part, 10 cents per hour extra to be paid, but if the work is done with new wood, the regular wage rates to prevail.

A minimum gang of twelve men to be employed when holds require shifting boards fore and aft and have no permanent longitudinal bulkheads.

CHECKERS AND COOPERS (OCEAN NAVIGATION) MONTREAL.—An Order in Council, approved October 28 and published in the *Quebec Official Gazette*, November 5, makes obligatory the terms of an agreement between certain steamship companies and the steamship checkers and coopers of the harbour of Montreal.

The Order in Council to be in effect from November 5, 1938, to December 31, 1938, and thereafter until a new agreement is sanctioned. It applies to all steamship checkers and coopers on ocean going vessels in the harbour of Montreal. The employers have the right to use their regular weekly or monthly paid employees for any checking and coopering work to be done on the wharves, such employees not to be governed by this agreement.

Double time for work during meal hours and thereafter until discharged. Double time for work on Sundays and three specified holidays. Work with mail, express or baggage on Sundays and holidays, however, will be done at regular rates from time of reporting to work with a minimum of one hour's pay.

Wages per hour: from 7 a.m. or 9 a.m. to 12 noon and from 1 p.m. to 6 p.m., 64 cents for checkers, 63 cents for coopers; from 7 p.m. to 11 p.m. and from midnight to 5 a.m., 74 cents for checkers and 73 cents for coopers. Checkers employed temporarily as head checkers and checkers employed in office work on stowage or as warehousemen to be paid 5 cents per hour extra.

When men do not begin at 7 a.m., they may be called for 9 a.m.: in such cases they shall be put to work and paid for the period between 9 a.m. and noon. Employees put to work during the day or night to receive full time for which they have been called except: in case of discontinuance of work because of adverse weather conditions when employees will be paid for one hour in addition to time already worked; and except for work with mail, express or baggage on Sundays and the three specified holidays for which they are paid from the hours they are called to report and do report with a minimum of one hour's pay at prevailing rates.

Service: Custom and Repair

GARAGE AND SERVICE STATION EMPLOYEES, QUEBEC CITY.—A correction is published in the *Quebec Official Gazette*, November 5, to the Order in Council for this industry, which does not affect the summary which was given in the LABOUR GAZETTE, June, page 696.

Service: Personal and Domestic

BARBERS AND HAIRDRESSERS, MONTREAL.—An Order in Council, approved October 29, and published in the *Quebec Official Gazette*, November 5, amends the previous Orders in Council for these trades (LABOUR GAZETTE, September, page 1045, and November, page 1301) by enlarging the territorial jurisdiction to include the municipality of St. Antoine de Longueuil.

Joint Committees

The constitution and by-laws of the joint committees set up under the following agreements were approved by Orders in Council and published in the November 5 issue of the *Quebec Official Gazette*:

Graphic Arts, Quebec (Amendment).

Clerks, Magog.

Barbers, Sherbrooke.

Certificate of Competency

The Orders in Council making obligatory certificates of competency in the following industries and trades have been cancelled as noted in the *Quebec Official Gazette* for November 5 and 12:

Lithographing Industry, Province of Quebec (cancellation).

Printing trades, Montreal (cancellation).

Aluminum Industry, Arvida (cancellation).

Aluminum Industry, Shawinigan Falls (cancellation).

INDUSTRIAL STANDARDS ACTS

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Ontario, Saskatchewan and Alberta

IN four provinces—Ontario, Alberta, Nova Scotia and Saskatchewan—legislation provides that, following a petition from representatives of employers or employees in any industry, the Provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council on all employers and employees in the industry in the zone designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. The administration and enforcement of the Act is placed in Ontario under the Industry and Labour Board, assisted by industrial standards officers; in Alberta under the Board of Industrial Relations; in Nova Scotia under the Minister of Labour, who may appoint inspectors; in Saskatchewan under the Commissioner of Labour and Public Welfare. Reviews of these Acts and amendments have been published in the LABOUR GAZETTE, as follows: Ontario, in the issue of June, 1935, page 530, May, 1936, page 410, May, 1937, page 505, and May, 1938, page 501; Alberta, in June, 1935, page 504, June, 1936, page 501, June, 1937, page 640, and June, 1938, page 633; Nova Scotia, in June, 1936, page 604; Saskatchewan, in the issue of June, 1937, page 635, and May, 1938, page 507. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Ontario

Logging

LOGGING INDUSTRY, RAINY RIVER ZONE.—An Order in Council, dated November 3, and published in *The Ontario Gazette*, November 12, makes binding the terms of a schedule of wages and hours governing the logging industry in the Rainy River Forestry Division, from November 22, 1938, to September 1, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, January, 1938, with these exceptions:

Minimum wages for cookees and kitchen help employed in pulpwood and logging camps, $40 per month with board and lodging (the previous rate was $42.50); for barn bosses employed in small pulpwood camps $45 with board and lodging (formerly $49). The wage rates for handymen and for blacksmiths are omitted from the latest schedule. All other monthly wage rates are the same as previously in effect.

Construction: Buildings and Structures

PAINTERS, KINGSTON.—An Order in Council, dated November 3, and published in *The Ontario Gazette*, November 12, makes binding the terms of a schedule of wages and hours for the painting and decorating industry in the city and adjacent area from November 12, 1938, "during pleasure". The schedule exempts work by persons who are regularly (and not casually or intermittently) engaged in the work required for the repair, maintenance and upkeep of the premises normally used by the employer for the purposes of his business.

Hours: 8 per day, 4 on Saturdays, a 44 hour week.

Overtime: time and one half from 5 p.m. to 10 p.m. and from noon to 5 p.m. on Saturdays; thereafter and all work on Sundays and five specified holidays, double time. The Advisory Committee may, however, issue permits allowing overtime work on Saturdays at regular rates of pay if the work cannot be done during regular hours. No overtime may be done on Sundays or the holidays except with permit from the advisory committee.

Minimum wage rates for painters and decorators: 70 cents per hour, spray painters 85 cents per hour. The advisory committee may fix a lower rate for any handicapped worker.

Apprenticeship to be governed by the Ontario Apprenticeship Act.

Saskatchewan

Manufacturing: Vegetable Foods, Etc.

BAKERS, MOOSE JAW.—An Order in Council approved October 29, and published in *The Saskatchewan Gazette*, November 15, makes binding the terms of a schedule of wages and hours for the baking industry in the city of Moose Jaw from November 25, 1938, "during pleasure".

Hours: 54 per week. The maximum hours allowed on the day immediately preceding a statutory holiday is 14. Employees allowed

seven specified holidays or a day instead of each of them.

Overtime: time and one quarter.

Minimum weekly wage rates: foreman $30, doughman $25, ovenman and bench hand $23, shippers $18, bakery salesmen $18 or 20 per cent commission on all retail and 8 per cent on wholesale sales, whichever is greater.

One apprentice or improver may be employed for each three journeymen or fraction thereof.

Wages for apprentices from $10 per week during first six months to $15 during second half of third year.

Employees now in the industry and not classified in the above classification shall be classed as improvers at a rate of $18 per week; length of service for improvers not to exceed two years.

Vacation: after one year's service, each employee to have one week's vacation with pay.

Service: Custom and Repair

SHOEMAKERS, REGINA.—An Order in Council, approved November 22 and published in *The Saskatchewan Gazette,* November 30, makes binding the terms of a schedule for the shoemaking industry in the city of Regina, from December 10, 1938, "during pleasure."

Hours: 9 per day on Mondays, Tuesdays, Thursdays and Fridays, 4 on Wednesdays and 12 on Saturdays, a 52 hour week.

Overtime: time and one-half.

Minimum wage rates: journeyman either $18 per week or the total amount earned by him during any week at a piece work scale of one-third of the minimum prices whichever is greater. Minimum prices which must be charged for each piece of work are included in the schedule. Inexperienced employees from $7 per week during first six months to $13.50 during second year. The minimum rate for any employee working less than one week is 40 cents per hour.

Service: Personal and Domestic

HAIRDRESSERS, ETC., ESTEVAN.—An Order in Council, approved October 29, and published in *The Saskatchewan Gazette,* November 15, makes binding the terms of a schedule for the beauty culture industry in the town of Estevan and within five miles of it, from November 25, 1938, "during pleasure."

Hours: 51 per week. Shops are open from 8 a.m. to 6 p.m. on Mondays, Tuesdays, Thursdays and Fridays, from 8 a.m. to 10 p.m. on Saturday, and from 8 a.m. to noon on Wednesdays except Wednesday of the week in which one of the nine specified holidays occurs.

Minimum wage rates: for full time experienced workers, $13 per week plus 30 cents per hour for any hours in excess of 51 per week or 50 per cent of the proceeds taken in by the employee, whichever is greater; for part time experienced workers, 30 cents per hour or 50 per cent of the proceeds taken in by the employee, whichever is greater. Inexperienced workers, that is those with less than 18 months' experience under tuition, 25 cents per hour or 50 per cent of proceeds taken in by the employee, whichever is greater.

A schedule of minimum prices which must be charged for each operation is included in the agreement.

BARBERS, NORTH BATTLEFORD.—An Order in Council, approved November 9, and published in *The Saskatchewan Gazette,* November 30, makes binding the terms of a schedule governing the barbering industry in the city of North Battleford, from December 10, 1938, "during pleasure."

The regular working period is that during which barber shops are permitted to be open under the municipal by-laws. No work on eight specified holidays nor on the afternoon of Wednesday, when a civic holiday, except the Wednesday of a week in which a holiday occurs.

Minimum wage rates: for those given full time employment, $13 per week of 48 hours, plus 30 cents per hour for all hours in excess thereof or 60 per cent of the proceeds taken in by the employee, whichever is greater; for those given part time employment, 30 cents per hour or 60 per cent of the proceeds taken in by the employee, whichever is greater.

A scale of minimum prices which must be charged customers is included in the schedule.

Alberta

Manufacturing: Vegetable Foods

BAKERS, CALGARY AND DISTRICT.—An Order in Council, dated November 23, and published in *The Alberta Gazette,* November 30, makes binding the terms of a schedule governing the baking industry in a zone which includes the city of Calgary and surrounding district, from December 10, 1938, to December 9, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1937, page 1391, and December, 1936, page 1184, with these exceptions:

The weekly hours are reduced from 54 to 52.

Minimum weekly wage rates: doughman and ovenman $26 (an increase of $3), bench hand $24 (an increase of $1), helper, $18 (an increase of $1).

BAKERS, EDMONTON AND DISTRICT.—An Order in Council, dated November 24, and published in *The Alberta Gazette,* November 30, makes binding the terms of a schedule governing the baking industry in the city of Edmonton and surrounding district from December 10, 1938, to December 1, 1939.

This schedule is similar to the one previously in effect and summarized in the LABOUR GAZETTE, September, 1938, page 1048, June, 1938, page 701, and June, 1937, page 697, with these exceptions:

Hours are reduced from 54 to 52 per week for all inside male employees.

Minimum weekly wage rates: doughman, ovenman and bench hand $25 (an increase of $1), helpers and truckers $19 (an increase of $1), shippers $20 (an increase of $2), cake wrappers $13.50 (no change), bread wrappers $15 (an increase of $1.50).

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1938.

Cost of Living, Prices of Staple Articles and Index Numbers

THE movement of prices during November continued downward. The cost per week in terms of retail prices, of a list of staple foods, fuel and rent entering into a family budget was lower than in the two previous months while the Dominion Bureau of Statistics index number of wholesale prices has been downward with only minor interruptions since July, 1937.

The cost per week of a list of twenty-nine staple foods for an average family of five in terms of retail prices in sixty-nine cities was $8.38 at the beginning of November as compared with $8.45 for October; $8.79 for November, 1937; $8.32 for November, 1936; $6.67 for March, 1933 (the low point in recent years); and $11.75 for November, 1929. Seventeen items in this list of twenty-nine were lower in cost at the beginning of November than at the beginning of October, six were higher and six were unchanged. Most of the changes were slight the most important being advances in the cost of eggs and potatoes and declines in the cost of meats, bread and flour. Including the cost of fuel and rent with that of foods the total cost was $17.29 at the beginning of November as compared with $17.35 for October; $17.58 for November, 1937; $16.96 for November, 1936; $15.41 for June, 1933 (the low point during recent years); $22.03 for November, 1929; $20.89 for November, 1922; $26.92 for July, 1920 (the post war peak); and $14.36 for November, 1914.

In wholesale prices the Dominion Bureau of Statistics weekly index number on the base of 1926 as 100 changed little during the month, the tendency, however, being downward week by week during most of the period. Certain figures are 73·4 for the week ended December 2; 73·9 for the week ended October 28; and 74·5 for that ended September 30. The latest figures available on a monthly basis are for October when the index number was 74·1 as compared with 83·1 for November, 1937; 77·2 for November, 1936; 63·5 for February, 1933 (the low point during recent years); 95·7 for November, 1929; 98·6 for November, 1921; 164·3 for May, 1920 (the post war peak); and 67·2 for November, 1914. Of the eight principal groups in the classification according to chief component materials the Iron Products group was slightly higher at the end of November as compared with the last week in October. All other groups were lower the largest declines being in the Non-Ferrous Metals group, the Animal Products group and in the Wood Products group. The index for grains was down from 43·2 at the end of October to 42·2 at the end of November, as compared with 85·1 a year earlier. Livestock prices advanced during the month and eggs were higher during the first half and then declined. Raw wool was little changed during the month at a level about

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913 TO 1938*

(Average prices in 1913=100)

*The figures for "all items" were calculated by giving the following weights to each group; Food, 35%; Fuel, 8%; Rent, 18½%; Clothing, 18½%; Sundries, 20%.

25 per cent below November, 1937. In non-ferrous metals copper and zinc were considerably lower.

Explanatory Note as to Retail Prices

The table of retail prices and rentals shows the prices at the beginning of November of seventy-two staple foodstuffs, groceries, coal, wood and coal oil and the rent of six-roomed houses in sixty-nine cities throughout Canada. All prices are for delivered goods. The exact quality for which the quotations are given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. Information as to prices of milk, bread and fuel and the rates for rent is secured by the correspondents of the LABOUR GAZETTE, and also by the Bureau of Statistics.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts with good modern conveniences. The second class is of houses in fair condition, less desirably located but still fairly central, without modern conveniences.

The figures as to rentals are the rates in the leases or agreed upon between landlords and tenants. It is reported in many of the cities that tenants seriously affected by unemployment are not paying rent or are paying only part of the amount due.

The cost of a list of staple foods, fuel and lighting and rent, entering into the budget of a family of five is calculated in terms of the average prices in the cities for which reports are received and includes twenty-nine staple foods, laundry starch, coal, wood, coal oil and rent, these being the items for which figures were available when the publication of retail prices statistics was begun, that is for January, 1910, in the LABOUR GAZETTE for February, 1910. The quantities of each commodity included are modifications of those employed for similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportions of expenditure on the various classes of foods tend to be maintained. In fuel and lighting, the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. The figures for rent are those for six-roomed houses with modern conveniences. While the calculation serves to show the increases or decreases from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province.

Index Numbers of Changes in the Cost of Living

The accompanying table of index numbers of changes in the cost of living, based on prices in 1913 as 100, shows the percentage changes for the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the list of foods entering into the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, differences in rates in the various cities being greater in these items than in the others. An index number of rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and cost of the various items from 1913 to 1926 weighted according to the importance of each item in workingmen's family expenditure and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

Retail Prices

Meat prices were again lower in the average, decreases being reported in most of the cities. Sirloin steak declined from 26·8 cents per pound in October to 25·7 cents in November, rib roast from 19·4 cents per pound to 18·8 cents, mutton from 23 cents per pound to 21·7, fresh pork from 24·8 cents per pound to 23·1 cents and breakfast bacon from 34 cents per pound to 32·5 cents. Egg prices were generally higher, the Dominion

(Continued on page 1436)

COST PER WEEK (IN TERMS OF THE AVERAGE PRICES IN SIXTY-NINE CITIES IN CANADA) OF CERTAIN STAPLE FOODS, FUEL AND LIGHTING, IN THE QUANTITIES STATED, AND RENT ENTERING INTO A FAMILY BUDGET.

The budget is intended to show the changes in the cost of the items included, not to show the minimum cost or the quantities of different foods required for an average family

price per cord from price quoted. f. Petroleum coke. g. Natural gas used extensively. h. Including lignite. i. In and conveniences. r. Mining company houses in district $5-$10 per month; others, five and six rooms, $10-$35. s. Delivered

(Continued from page 1428)

average for fresh grades being up from 39·7 cents per dozen to 43·9 cents. Creamery butter at an average price of 27·3 cents per pound was little changed from the previous month but was lower than at any time during the year. The average price in November, 1937, was 32·5 cents. Bread and flour again averaged fractionally lower the former at 6·8 cents per pound and the latter at 3·3 cents. Potatoes were higher in most localities except in the prairie provinces where declines were substantial. United States anthracite coal was up in the average from $14.37 per ton in October to $14.60 in November, seasonal increases being reported from several cities in Ontario.

Following are the prices per ton reported for Welsh coal, "cobbles" and "French nut": Halifax $15.50; Charlottetown $13.50; Moncton $16; Saint John $14.50; Quebec $14; Three Rivers $15 and $14; Sherbrooke $14.75; St. Hyacinthe $15; Montreal $15.25 and $15.50; Ottawa $16.50; Kingston $15; Belleville $15.50; Peterborough $16.75; Oshawa $15; Toronto $15; St. Catharines $15; Hamilton $15 and $14.50; Brantford $16.25; Galt $16.50; St. Thomas $16; Cobalt $19.25; Timmins $19.50; Port Arthur $17.75; Fort William $17.75; Winnipeg $20.

†The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada); quarterly, Price Movements in other Countries; annually, Prices and Price Indexes (Canada and Other Countries).

‡For the week ended December 2, 1938; monthly figures not yet available.

*Prior to 1926 number of commodities was 236, 1926 to 1933 inclusive 502, and since January, 1934, the number is 567.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes afford information as to recent changes in prices in Great Britain and other countries. Tables giving the official and certain other index numbers of cost of living, wholesale and retail prices in Great Britain and several of the principal commercial and industrial countries appeared in the October issue of the LABOUR GAZETTE.

Great Britain and Northern Ireland

WHOLESALE PRICES.—The Board of Trade index number, on the base 1930=100, was 99·1 for October as compared with 98·4 for September, an increase of 0·7 per cent for the month. Prior to this rise, prices had fallen almost without interruption, since July, 1937, when the index was 111·5. The index of food prices which was 92·6 showed an increase of 0·8 per cent for the month due to increases in the prices of all food groups with the exception of cereals. The index of prices of industrial materials increased 0·7 per cent during the month to 99·1; with the exception of iron and steel which declined slightly all the sub-groups showed increases.

The *Statist* index number, on the base 1867-1877=100, was 88·8 at the end of October, as compared to 88·6 at the end of September. The combined foodstuffs group index declined 2·8 per cent. The "all materials" index increased 1·9 per cent, there being increases in all its sub-groups. Compared with the figure for 1937, the general index for October, 1938, showed a decline of 11·9 per cent.

COST OF LIVING.—The Ministry of Labour's index number, on the base July, 1914=100, was 156 at the first of November as compared with 155 at the first of October. The index of food prices increased from 139 to 140 due mainly to seasonal increases in the prices of eggs. The price of milk also was higher in many small villages and towns. On the other hand, prices of potatoes, flour, bacon, and butter were slightly lower than at the first of October. Slight increases occurred in the rent and fuel and lighting materials indexes. As compared with the general index for the same month last year, this year's figure showed a reduction of 2·5 per cent.

France

WHOLESALE PRICES.—The General Statistical Office index number, on the base 1914=100, was 654 for October as compared with 646 for September. The index of food prices increased from 628 to 635 during the month, decreases in vegetable foods being more than offset by increases in animal foods. The index of prices of industrial materials was 672 as compared with 663 the previous month, there being increases in the prices of textiles and minerals. The index based on gold currency, 1914=100, was 53 for October as compared with 52, the revised figure for September.

COST OF LIVING.—The official index number of the expenditure of a workingman's family of four persons at Paris, on the base 1914=100, was 689 for the third quarter of 1938, a decrease of 0·4 per cent from the figure for the previous quarter. The index of food prices declined from 732 to 723, or 1·2 per cent during the three month period.

Germany

WHOLESALE PRICES.—The index number of the Federal Statistical Office, on the base 1913 = 100, was 105·7 for October as compared with 105·6 for September. The index of prices of agricultural products was 105·7 as compared to 105·6 the previous month. The index for raw materials and semi-manufactured goods increased from 94·0 to 94·2 during the same period, while that for manufactured goods was unchanged at 125·6.

COST OF LIVING.—The official index number on the base 1913-1914=100, was 124·9 for October as compared with 125·2 for September, a decline of 0·2 per cent for the month. The index of food prices declined 0·5 per cent during the month, while that for fuel and lighting materials increased by a like percentage and that for clothing increased 0·2 per cent; the indexes for rent and for sundries showed no change from the figures for the previous month. Compared with October, 1937, when the general index was 124·8, the October, 1938, index showed an increase of 0·1 per cent.

India

WHOLESALE PRICES.—The index number of the Labour Office, Government of Bombay, on the base July, 1914 = 100, was 100 for August showing no change from the figure for the previous three months. The index for food prices declined from 101 to 100 while the index of the non-food groups declined from 100 to 99. As the general index is given in whole numbers the decreases in the individual groups were not sufficiently large to cause a change in it.

COST OF LIVING.—The official index number of the working class cost of living at Bombay, on the base July, 1933 to June, 1934=100, was 105 for September showing no change from the previous month. The index of food prices

decreased from 113 to 112 while that for the fuel and lighting group declined from 106 to 104. The three groups which were unchanged were, clothing at 85, rent at 100 and sundries at 96.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number, on the base 1926 = 100, was 78·3 for September as compared with 78·1 for August, an increase of 0·3 per cent for the month. Of the ten groups which make up this index, five showed increases, four showed decreases, and one, sundries, was unchanged. The most important increases were those in food, which increased 2·1 per cent, and in farm products, which increased 1·2 per cent; three groups, hides and leather products, metals and metal products and building materials each increased 0·1 per cent. The groups which showed decreases were as follows: chemicals and drugs, 0·5 per cent, fuel and lighting materials, 0·3 per cent, textile products and house furnishing goods, 0·2 per cent each. The general index for September was 10·4 per cent below the level for September, 1937.

COST OF LIVING.—The index number of the Bureau of Labour Statistics on the base 1913 = 100, was 144·2 on September 15, 1938, as compared with 145·2 on June 15, a decrease of 0·7 per cent for the quarter. With the exception of the fuel and light group which increased 1·5 per cent during the quarter, all groups contributed to the decline, the individual decreases being as follows: food, 1·9 per cent, house furnishing goods, 1·4 per cent, clothing 0·7 per cent, and rent, and sundries 0·1 per cent each. Since September 15, 1937, when the general index was 148·2 it has declined 2·7 per cent.

The index number of the Industrial Conference Board on the base 1923 = 100, was 85·8 for October as compared with 85·9 for September. The seasonal increases in coal prices were offset by decreases in the prices of food and clothing. The index in October was 4·1 per cent lower than that for the same month last year, 14·3 per cent lower than in 1929, but 19·7 per cent higher than at the low point of 1933.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Quebec Court Reverses Judgment Awarding Damages against Owners of Building for Accident due to Carpenter's Negligence

On April 30 the Quebec Court of King's Bench in a majority judgment dismissed the plaintiff's claim and allowed with costs the appeal of the defendants, owners of a dwelling in which the respondent and his wife resided, from a judgment for $819.50 awarded by the Superior Court of Montreal as damages for injuries sustained by the plaintiff's wife when she was struck by a block of falling wood during repairs to the building.

The appellants had entrusted the administration of the property to one Savoie who delegated the collection of rent and supervision of repairs to one Laporte. The latter made a contract with a carpenter, Séguin, to repair the balconies for a fixed amount using material supplied by Laporte.

The question involved in the appeal was whether Séguin was an independent contractor, or whether he was an employee of Laporte's, the latter being the appellants' representative. A written agreement was produced and was considered by four members of the Court to constitute Séguin an independent contractor. They held, therefore, that the appellants were not responsible for his negligence and dismissed the claim. Mr. Justice Hall, dissenting, felt that the evidence as to the relationship between Laporte and Séguin was conflicting, that the mere form of the agreement was not sufficient to constitute him a contractor, an essential element of that status being freedom to employ another to perform the work. As Séguin appeared to have been working under orders from Laporte, the dissenting judge expressed the opinion that he was a journeyman carpenter engaged by the latter, and not a contractor. He therefore agreed with the trial judge and would have dismissed the appeal. *Ouellette et al., Appellants v. Korenstein, Respondent,* (1938) 65 Rapports Judiciaires de Québec, Cour du Banc du Roi, 293.

Claim of Quebec Workmen's Compensation Board for Priority in Case of Bankruptcy Upheld

On September 16 Mr. Justice Belleau of the Superior Court of Quebec allowed the application of the Quebec Workmen's Compensation Board for priority of its claim against the estate of a bankrupt over other claims except the costs of the trustee. The contention of the Board was that its claim should rank before the claims for municipal taxes and school assessments and not after these charges.

The Dominion Bankruptcy Act provides that claims must be paid in a certain order.

Wages owing for work performed within the preceding three months and assessments under the Workmen's Compensation Act rank third, coming after (1) the expenses of the custodian and the fees of the trustee and (2) the costs of the garnishing or judgment creditor. The Act also provides that nothing in the sections on priority of claims is to interfere with the collection of any taxes, rates or assessments levied on the debtor or his goods under any federal or provincial law.

As regards the provincial law, the Quebec Civil Code lays down the order of priority of claims on movables and immovables in each case giving first place to "law costs and expenses incurred for the common interest of the creditors" followed by other claims including municipal taxes and school rates. But the Quebec Workmen's Compensation Act stipulates that the amount of any assessment or compensation for which the employer is liable is to constitute a privileged claim on all the property of the employer, ranking immediately after law costs. The Civil Code defines law costs as the expenses arising from the seizure and sale of property and from the judicial proceedings necessary to enable the creditors to obtain satisfaction of their claims. The Court held, then, that the expenses of the trustee and assignee were properly included as law costs and that the claim of the Workmen's Compensation Board should rank immediately after these costs and before the claims for municipal and school taxes. *Gosselin v. Pomerleau et Commission des Accidents du Travail de Québec et Corporation de la Paroisse de St. Luc de Dijon et Autres* (1938), 76 Rapport Judiciaires de Québec, Cour Supérieure, 421.

Quebec Court Decides that Wages of Workman Employed on Provincial Relief Works are Liable to Attachment

Mr. Justice Prevost of the Superior Court of Quebec, refusing the defendant's application to the contrary, allowed the plaintiff to proceed with a writ for seizure of wages of the defendant who was employed by the Provincial Government as a labourer in the construction of a stadium in Quebec city, a work undertaken to relieve unemployment and paid for from provincial funds.

The defendant relied on an amendment of 1934 in article 599 of the Quebec Code of Civil Procedure which exempts from attachment the wages of workers on relief works undertaken with the aid of the Federal and Provincial Governments. The Court pointed out that exemption from seizure for debt is a special privilege which can be allowed only by statute and the statute must be strictly construed. In this case, the law specifies works aided "by the Federal and Provincial Governments" and this cannot be interpreted as meaning Federal *or* Provincial. However, as article 693 of the Code of Civil Procedure entitles the defendant to six days in which to contest the declaration of the third party, the Minister of Labour, no judgment on the writ itself was given. *Samson v. Pageau and Hon. William Tremblay, Minister of Labour of Quebec,* Cour Supérieure, Quebec, October 18, 1938.

Injunction Restraining Quebec Railway Company from Holding Ballot Among its Employees Quashed

A case arising from a dispute involving certain members of the Brotherhood of Railroad Trainmen and the Order of Railway Conductors employed by the Quebec Central Railway was disposed of by Mr. Justice White of the Superior Court of Quebec on May 20, 1938. For over thirty years the working conditions of both classes of employees had been determined by one agreement, the conductors employed by the Company being members of the Brotherhood of Railroad Trainmen. When the committee of the union requested a revision of the agreement in 1936, they learned that a separate agreement was requested by a new committee which had been formed by certain employees who professed to be conductors and had joined the Order of Railway Conductors. When the former committee objected to the Company recognizing the new body and entering into a separate agreement, the management took the position that the employees must settle the dispute before any agreement would be made.

As the dispute was affecting the public interest the Minister of Labour, acting in accordance with section 65 of the Industrial Disputes Investigation Act, commissioned Judge Constantineau, County Court Judge of Prescott and Russell, to investigate it under the Inquiries Act. The Commissioner concluded that the conductors had a right to a separate agreement provided the majority of the conductors desired such an agreement. To determine their wishes, he recommended that those regularly employed as conductors and those working as conductors for at least 50 per cent of their time in the last year should vote on the question. (LABOUR GAZETTE, 1937, p. 1316.)

On the application of the plaintiff in this case an interim injunction restraining the taking of the vote as arranged by the defendant company was granted by Mr. Justice Verret on January 24, 1938. At the trial it was held that the Company had acted

reasonably in trying to carry out the Commissioners' recommendations and in drawing up the list of voters in accordance with his suggestions and that neither the Company nor the Brotherhood of Railroad Trainmen had committed any act which could be enjoined.

The ballot provided for was then taken, 16 of the 17 voting being in favour of a separate agreement for conductors. *Morin v. Quebec Central Railway Company and the Brotherhood of Railroad Trainmen,* Cour Supérieure, Québec, May 20, 1938.

Order to Compel Quebec Attorney-General to Authorize Prosecution under Collective Agreements' Act Refused

On October 4, Mr. Justice Demers in the Superior Court of Montreal refused a petition for an order of the court compelling the Attorney-General of the province to authorize the petitioner to claim the penalty provided by the Collective Labour Agreements' Act for the dismissal of an employee on the ground of membership in a trade union. The petitioner had been employed as assistant telegraph editor or in other capacities by the Gazette Printing Company for nine years and he alleged that the reason for his dismissal was his membership in a workers' association, the Newspaper Guild of Montreal. Application to be reinstated in his position was refused except on condition that he abandon his office and membership in the Guild.

As it was enacted in 1937, section 39 of the Workmen's Wages Act or Collective Labour Agreements' Act, as it is now called, provides that "whosoever, directly or indirectly, prevents an employee from becoming a member of an association commits an unlawful act" and provides penalties for infraction of the Act. The section allows suit to be brought by the Minister of Labour, a committee set up to enforce the decree making binding any collective agreement, or by any person having a written authorization from the Attorney-General. It was alleged that when the petitioner requested the Minister to proceed against the Company he refused to do so, but suggested verbally that he apply for authorization from the Attorney-General, which he did. No reply except an acknowledgment of his letter was received from the Attorney-General but there was evidence to show that the respondent had addressed a letter to another member of the Guild in which he refused to authorize proceedings against the Gazette Printing Company and this letter was seen by the petitioner.

Reference was made to Art. 87*a* of the Code of Civil Procedure of Quebec which prohibits any proceeding by way of injunction, mandamus or other special or provisional measure against the Government of the province or any Minister of the province for anything done or omitted to be done in the exercise of his duties. The petitioner claimed this article was constitutionally invalid.

The Court held, however, that it was unnecessary to consider Art. 87*a* since the Workmen's Wages Act allows the Attorney-General to exercise discretion in the matter of authorizing prosecution and he had availed himself of that power. The only ground for complaint was that a letter had not been sent to the petitioner. *Ballantyne v. Honourable M. Duplessis,* (1938) 76 Rapports Judiciaires de Québec, Cour Supérieure, 448.

Claim for Classification as Structural Steel Workers under Quebec Collective Agreement Dismissed

An action by three workmen against the Foundation Company of Canada for the difference between the wages received for employment as riggers and wages at the rate fixed for structural steel workers by an agreement under the Collective Labour Agreements' Act was dismissed with costs by Mr. Justice Chase-Casgrain of the Superior Court of Quebec. The plaintiffs had submitted their claims to the joint committee of employers and unions set up under the Act which first decided to institute proceedings and then reversed its decision. The work involved in the dispute was the construction of concrete pillars and the making of a man-shaft. The plaintiffs were engaged in putting together metal forms which when bolted so as to form one piece constituted the moulds into which the concrete was to be poured and in bolting together metal pieces for the man-shaft.

Several cases were cited to show that the onus was on the plaintiffs to prove that the work in question was properly considered structural steel work rather than rigging and in this the plaintiffs were held to fail. Had they been able to show that it was really structural steel work on which they were engaged and not rigging, although they were hired as riggers, they would have been entitled to the hourly rate of 75 cents, in spite of a contract of hiring fixing the wage at the riggers' rate. Structural steel workers are often called on to do riggers' work and are qualified riggers but the reverse is not true. On the other hand, the arguments of the defence that since only bolting was done and no riveting, the work was that of riggers and that structural steel work involves permanent construction and not something to be removed before completion of the structure were considered not sound. The purpose of the construction or the length of time required did

not affect the nature of the work. The provision in the agreement that "steel fabrication work of any description done in the field and the installation of tanks, boilers, etc.," shall be regarded as structural steel work was held not to cover the work in question as there was no erection of tanks or boilers and "etc." could only include things similar to tanks and boilers.

The Court rejected also the plaintiffs' alternative suggestion that they be considered sheet metal workers for whom an hourly rate of 60 cents was fixed by the agreement, it being felt that only those working at the manufacture of metal sheets were included in that class. *Thibeault et al v. Foundation Co. of Canada Ltd.,* Superior Court of Quebec, Montreal, November 17, 1938.

Maintenance Men Employed by Dominion Textile Company not Subject to Building Trades Agreement; Action against Company for Employing Unlicensed Pipefitter also Fails

In the magistrate's court at Sherbrooke two cases against the Dominion Textile Company were dismissed. The joint committee charged with the enforcement of the Eastern Townships building trades agreement claimed that the Company had refused to furnish it with a list of its building employees as required by the Collective Labour Agreements' Act to permit the collection of the levy of one-half of one per cent on the wages of these employees. A charge brought by the Crown at the instance of an Inspector of the provincial Department of Labour was based on an alleged violation of the Pipe Mechanics Act of 1933 by the employment of an unlicensed pipefitter.

As to the first case, the company employs regularly carpenters, electricians, plumbers and others who are engaged in repair and maintenance work in the plant and the contention was that these workers are governed by the collective agreement applying to the building trades and the employer is therefore liable to contribute to the fund for enforcing the agreement which was made legally enforceable by order in council on May 7, 1938. Section 12 of the agreement fixes minimum weekly rates of wages for maintenance men who are employed in factories or manufacturing establishments or certain other places. Maintenance men are defined as skilled or unskilled building workers employed throughout the year and engaged on the upkeep of building property. On the other hand, the defence was that as the company is undoubtedly governed by Order 8 of the Fair Wage Board of May 19, 1938, relating to the cotton textile industry and the company is, therefore, liable to the levy imposed by the Fair Wage Board, which is at the same rate, it would be contrary to the Fair Wage Act to impose a double levy on the same company. Wage Order 8 applies to persons whose wages "are calculated by the hour or by the piece but not to employees paid by the month nor the office employees or all other employees." Maintenance men, under this order, are to be paid on a 55-hour week basis with overtime rates after 55 hours.

The magistrate concluded that the agreement under the Collective Labour Agreements' Act was intended to cover building contractors and since there was at least a reasonable doubt as to its application to the company, the latter had the right to the benefit of the doubt.

In the second case, concerning the employment of an unlicensed plumber, the testimony of the man who had worked for the company from February to June, 1938, was that before he undertook the work he applied for a licence. He was told by the inspector that to obtain it he must qualify on certain examinations, but that in the meantime he could work as a plumber, provided he did not do certain work described in an extract from the Pipe Mechanics Act which was given to him and which defined "public buildings" but did not contain the section defining "industrial establishments." The defendant company objected to this evidence as hearsay but the magistrate admitted it. It was his opinion that as the inspector had thus given Beaulieu temporary permission to perform the work and as the latter and the foreman hiring him had acted in good faith, the charge should be dismissed with costs. *Building Trades Joint Committee of the Eastern Townships v. Dominion Textile Ltd. Le Roi v. Dominion Textile Ltd.,* Superior Court, District of St. Francis, November 4, 1938.

* For electric street railways, by cities, see Table I (*d*)

WAGES AND HOURS OF LABOUR IN CANADA 1929, 1936 and 1937*

THE present bulletin, the twenty-first in the series on Wages and Hours of Labour, contains data for the years 1929, 1936 and 1937, but the tables on building, printing, metal trades and electric street railways give figures for 1920, 1926, and 1930 to 1937, while the table on steam railways is for the years 1920 to 1937 inclusive. In the appendices information is given as to minimum wage rates and maximum hours of labour under provincial legislation, also as to the federal government fair wage policy, wages in agriculture in 1936 and certain previous years, average earnings of steam railway employees in recent years with numbers employed in 1936, average earnings of coal miners with numbers employed and days worked from 1921 to 1936 and also average earnings of employees in merchandising and service establishments in 1936.

The table of index numbers of rates of wages contains figures showing changes in a number of occupational groups, from 1901 to 1937, and for certain other groups from 1911 to 1937, the base year being 1913. Index numbers for other groups have not been calculated as figures back to 1913 have not been compiled and published.

Changes in Wages

The recovery in wages, which first appeared in logging and sawmilling and in common factory labour in 1934 and extended to all groups in 1935, continued during 1936 and 1937. The average increases in 1937 were most important—in metal trades 10 per cent, on steam railways nearly 7 per cent, factory labour about 8 per cent, and in logging and sawmilling about 13 per cent. In building trades the increase was less than three per cent and in the remaining groups the increases were smaller. In coal mining rates were increased in Nova Scotia. On steam railways the deduction from earnings in effect since 1931 was partly cancelled. In manufacturing industries the important increases appeared as follows: automobiles and automobile parts 15 per cent, cotton 11 per cent, meat packing 19 per cent, pulp and paper 12 per cent, crude, rolled and forged iron and steel products 14 per cent,

* The first report in this series was issued as a supplement to the LABOUR GAZETTE for March, 1921, and contained figures as to wages and hours of labour for certain trades in various cities in Canada from 1901 to 1920, with index numbers by groups based on wages in 1913 as 100. It also contained samples of wage rates for common labour in factories, miscellaneous factory trades in a small number of industries, and wages in lumbering from 1911 to 1920, with index numbers. Subsequent reports, in most cases issued as supplements to the LABOUR GAZETTE for January each year, brought these figures down to date with extensions from time to time to include additional industries and classes of labour.

The present report includes data as to wages and hours on steamships on the Atlantic and Pacific coasts and on the Great Lakes and St. Lawrence River, a transportation industry not hitherto covered.

Certain of these reports, however, contained special features. Report No. 5 (1923) dealt with Hours of Labour in Canada and Other Countries. Report No. 3 (January, 1922) included an appendix with statistics of wages and hours in coal mining in Canada from 1900 to 1921 with index numbers for the three principal districts. Report No. 7 (January, 1925) included an appendix with figures for agriculture from 1914 to 1923. Report No. 11 (January, 1928) contained an appendix on wages of employees of steam railways, considerably increasing the information for the years since 1917 with a more extensive record from 1901 to 1927 and also a new series of index numbers. Each report from No. 7 (January, 1925), to No. 14 (January, 1931), contained data not only for the previous year but back to 1920, except that figures for 1922, 1923 and 1924, the years of least change, were omitted from some of the tables owing to lack of space. Report No. 15, issued in January, 1932, contained data for the years 1926, 1930 and 1931, with figures for 1920 also in some cases. Report No. 16, issued in January, 1933, afforded figures for 1930, 1931 and 1932 with figures for 1920 and 1926 also in some tables. Subsequent reports in each case have included figures for the calendar year just ended, for the preceding year and for 1929.

In Report No. 15 (January, 1932) the number of cities for which data were given in Table I as to building trades and electric railways was increased to approximately forty, and in the case of printing trades to fifteen, and these cities have since been covered in subsequent reports. Previously this table covered only thirteen cities, except that data for building trades in Windsor, Ont., were included, beginning with the report for 1928. Sheet metal workers employed in building and construction have been included with building trades since 1927, while sheet metal workers in factories have been included in the table on manufacturing industries. The section of the table on metal trades previously given was omitted from Reports Nos. 15 and 16 for 1931 and 1932 but figures for these trades appeared in the tables of sample rates of wages and hours in the sections of Table X on foundries and machine shops and other metal manufacturing industries. This section of Table No. 1 was, however, included in Report No. 17 with figures for 1920, 1926 and 1930 to 1933 and has been continued in subsequent reports. As in previous reports figures on wages for the metal trades in mines and on railways appear in the tables on those industries.

The appendix on wages and hours under provincial minimum wage legislation, included in recent years beginning with Report No. 12, issued in January, 1929, was enlarged in Report No. 18, January, 1936, and in subesquent reports, to include also date as to wage rates in certain collective labour agreements enforceable under legislation in several of the provinces. Report No. 20, January, 1937, contained a section on hours of labour under provincial legislation.

foundry and machine shop products 8 per cent, agricultural implements and stoves and furnaces 7 per cent, furniture 9 per cent, electrical apparatus, batteries and radio receiving sets and parts 7 to 10 per cent, rubber products, ready-made clothing and flour 7 per cent. Wages in all of the other manufacturing industries were up from 3 to 5 per cent.

For previous years it will be seen from the table of index numbers that by 1920 wages had reached levels about 100 per cent higher than in 1913, in some groups the increase being over one hundred per cent while for building and printing trades the increases were appreciably less, being only about 80 per cent. After 1920 all groups showed some decreases, although printing trades and coal mining reached the peak in 1921 instead of 1920, declining somewhat thereafter. The decreases in coal mining in 1925 were comparatively steep and tended to reduce the average for the six groups averaged for the period back to 1901. From 1925 to 1930 the movement was upward in each group.

In 1930 the index numbers for most of the groups were slightly higher but that for lumbering declined slightly. In 1931 all groups were downward except printing trades and coal mining. In 1932 and 1933 all groups were down, the greatest decreases being in lumbering and building trades.

TABLE OF INDEX NUMBERS OF RATES OF WAGES FOR VARIOUS CLASSES OF LABOUR IN CANADA
1901-1937
(Rates in 1913=100)

* Average of previous six columns.
** Weighted according to average numbers of workers in each group in 1921 and 1931.
† Including some increases effected near the end of the year.
‡ Including a ten per cent decrease for certain classes toward the end of the year.
(a) Seven trades from 1901 to 1920, eight from 1921 to 1926, nine for 1927 to 1937,13 cities to 1927, 14 cities to 1930, there after 31 to 42 cities.
(b) Five trades from 1901 to 1926, four for 1927 to 1937.
(c) Two trades from 1901 to 1920, four for 1921 and 1922, six from 1923 to 1937.
(d) Two classes from 1901 to 1920, five classes 1921 to 1937.
(e) Twenty-three classes.
(f) Four classes 1901 to 1920, twelve classes 1921 to 1937.
(g) The number of samples (and industries) increased from time to time since 1920; machine operators, helpers, etc., also included.

In 1934 lumbering showed substantial increases, factory labour also advanced appreciably and coal mining slightly while the other groups were lower. In 1935 all groups were appreciably higher and the upward movement continued during 1936 and 1937.

Building Trades

In the building trades up to 1919 there were smaller increases than in any of the other groups, but in 1920 there were considerable increases. In 1921 decreases of 10 cents per hour were general and in 1922 decreases of 5 cents per hour were numerous. In 1923, 1924 and 1925, while there were upward movements in the average, it was due to increases in particular trades and in certain cities, and not to a general upward movement for most of the trades and localities. From 1926 to 1930, the upward movement was somewhat more general. During 1931 there were numerous decreases, in some localities the reduction being general while in others it was confined to certain trades. During 1932 and 1933 the decreases were general, averaging about 10 per cent, while in 1934 there were decreases in some trades in certain cities but no general downward tendency appeared. In some cases there were increases so that the average decrease was about 3 per cent. In 1935, increases occurred chiefly in Quebec and Ontario, some of them due to agreements which established minimum wages under provincial legislation as outlined in Appendix E. In 1936 the upward movement continued with, however, decreases in certain trades in a few localities. In 1937 there were increases in several of the localities.

Metal Trades

In the metal trades the increase in wage rates from 1915 to 1918 was greater than in most of the other groups, there being a good demand for labour in the manufacture of munitions. During the industrial activity in 1919 and 1920 further increases were made, but in 1921 and 1922 considerable decreases occurred. In 1923 and 1924 some recovery was experienced, in 1925 there was practically no change, from 1926 to 1930 there were some slight changes upward, but during 1931 the changes were downward, while during 1932 and 1933 the decreases averaged 5 per cent and 3 per cent respectively. In 1934 there were comparatively few decreases, with some increases, so that the average was down less than one per cent. In 1935 wages recovered, being slightly higher than in 1934, and this slight recovery continued in 1936 and became substantial in 1937.

Printing Trades

In the printing trades up to 1920 increases were somewhat less than in most of the other industries but in 1921 when many of the three or five-year agreements between employers and the unions expired, rates were advanced and hours were reduced in many cases. Increases appeared each year thereafter down to 1931. During 1932 decreases of 10 per cent were general in the western provinces and were made in some cities in the east. In 1933 the decreases were general, averaging 5 per cent. In 1934, while there were further decreases, there were some increases, the average being down less than one per cent. In 1935, 1936 and 1937 there were a few increases.

Electric Street Railways

In electric railway service, rates had almost doubled by 1920, but declined slightly in 1921 and 1922, recovering somewhat in 1923 and very gradually each year thereafter until 1931 after which reductions occurred each year.

Since 1930, on many of these railways, with reduced traffic, operating costs were lowered to some extent by reducing hours per day, and therefore daily wages, instead of reducing hourly rates. In 1934 very few changes in wages were made so that the index number was practically unchanged. In 1935, 1936 and 1937 there were a few increases.

Steam Railways

In steam railway employment, wage increases were considerable in 1918, 1919 and 1920, but in 1921, decreases averaging about 12 per cent for all classes were made and in 1922 decreases for shop crafts, maintenance of way employees and for freight handlers, clerks, etc., were made, averaging about 10 per cent. In 1926, at the end of the year, wages of conductors, trainmen, brakemen, baggagemen, and yardmen were advanced about 6 per cent, that is, by half the amount of the reduction in 1921, and during 1927 similar increases were made in rates for other classes. In 1929, increases were secured by shop and maintenance of way employees and by certain classes of train crews on some lines. In 1931, while practically all classes were to a great extent on short time, changes in rates were not made until the end of the year when a 10 per cent deduction from each employee's pay was made for train, engine and telegraph service employees from December first. In the early months of 1932 the same deduction was applied to other classes.

In 1933, earnings of employees in engine, train and telegraph services were subjected to a deduction of 20 per cent from May to October, inclusive, and 15 per cent thereafter. The deduction for most of the other classes was increased to 15 per cent in December.

Toward the end of 1934 amendments to the agreements between the railway companies and the employees provided that the general deduction of 15 per cent would be changed to one of 12 per cent on January, 1935, and to 10 per cent on May 1, 1935. Early in 1937 an amendment to each agreement provided that the deduction would be as follows: February 1, 9 per cent; April 1, 8 per cent; June 1, 7 per cent; August 1, 6 per cent; October 1, 5 per cent; December 1, 4 per cent; February 1, 1938, 2 per cent; April 1, 1938, none.

Coal Mining

In coal mining the index number reached its peak in 1921, increases having been made in the closing weeks of 1920. In 1922 decreases were made in Nova Scotia and Vancouver Island and in 1923 and 1924 slight decreases occurred in the latter. A substantial decrease occurred in Alberta and southeastern British Columbia in 1924. In 1925 decreases occurred in the three principal districts, being especially steep in Alberta and southeastern British Columbia. Slight increases, however, were provided for a number of classes in some of the mines in Alberta toward the end of the year. In 1926, reductions were effected in Nova Scotia but wages in the other fields were practically unchanged. Slight increases were made in some mines in Alberta in 1928. In Nova Scotia in February, 1930, rates for labourers were changed by increases of 5 cents to 15 cents per day and certain other datal classes were slightly increased. During 1931 rates of wages were steady but the industry suffered greatly from short time, that is, collieries were operated less than six days per week to a great extent. In 1932 in Nova Scotia rates were reduced 10 per cent in March, except that a minimum of $3.25 per day was provided for in the principal mines. In the other districts rates were reduced only in a few of the smaller mines. In 1933, wages in the Drumheller district in Alberta were reduced more than 10 per cent. In Nova Scotia, rates were unchanged in the principal mines but there were reductions of about 15 per cent in certain mines of medium size. In 1934 partial restorations of these reductions were made in some Nova Scotia mines, while decreases occurred in New Brunswick. In 1935, increases of about 5 per cent were made in Nova Scotia and in Alberta in the Drumheller and Alberta districts. In 1937 datal rates in several of the principal mines in Nova Scotia were increased by nearly 10 per cent.

The index number for 1901 to 1935 does not include New Brunswick, Saskatchewan and the Princeton district in British Columbia. The inclusion of these figures for 1934, when weighted according to numbers of miners employed, made no change in the result.

Factory Labour

Factory labour had shown almost the greatest percentage increases up to 1920, both for common labour and for the various trades, but steep decreases appeared from 1921 to 1923 after which the trend was upward until 1931 when a considerable number of decreases occurred. In 1932 decreases in rates were numerous and steep in some cases. There was, however, a pronounced tendency to reduce hours per week or per day or both, frequently on a short time basis, with relatively small reductions in hourly rates. In some cases, where hours per day were reduced more than daily wages, the hourly rate became higher. In 1933, rates were again generally downward but less steeply. In 1934 there were numerous increases in nearly all of the manufacturing industries but comparatively few decreases so that the index number rose by nearly 3 per cent. In 1935 the upward movement continued. In Ontario and Quebec this was due to some extent to agreements establishing minimum rates in various localities and industries under provincial legislation. These are outlined in Appendix E. In 1936 wages were increased in many establishments in all manufacturing industries and in 1937 the upward movement continued being greatest in the automobile, cotton, meat packing, pulp and paper, iron and steel, furniture, electric goods, rubber, ready-made clothing and flour milling industries.

Logging and Sawmilling

In logging and sawmilling steep increases in wages appeared up to 1920, followed by particularly steep decreases in 1921, after which substantial increases occurred in 1923 and 1924, with a decrease in 1925 and slight increases each year thereafter until 1930 when more decreases than increases appeared. During 1931 decreases were general, and again in 1932, wage reductions of 20 per cent being quite common. In 1933, wages were still downward but there was a pronounced upward trend toward the end of the year for the ensuing season. In 1934, substantial increases in wages were general both in logging and in sawmills so that the index number rose by about 20 per cent. In 1935 the increases averaged 5 per cent. In 1936 wages were again upward, the increases averaging nearly 9 per cent. In 1937 the average increase was over 13 per cent.

Nature and Scope of Report

The main object of these reports is to show the changes in wages rates and in hours of labour during the periods covered. The figures given in each report afford a continuous record for the years included, the data being from the same sources as far as is possible. Whenever a new source of information becomes available,

the figures for previous years are secured, if possible, and the record is revised accordingly.

Information is compiled from reports secured annually from representative employers and trade unions, and also from union agreements. The information is obtained in June for building trades, civic employees, steamships, trucking and cartage, longshoremen, logging and sawmilling, pulp and paper mills, and for automobile manufacturing, while for other trades and industries the information is secured chiefly in September. For the classes covered in June, later information is frequently received and used.

Figures are secured from practically all the large establishments in the various industries and from a representative number of the smaller establishments. These reports are supplemented by figures obtained by officers of the Department and by resident correspondents of the Labour Gazette in the principal industrial centres.

Wages in manufacturing are shown by samples numbered one, two, etc., each sample showing the predominant rate in a certain establishment; in some cases, for large establishments two or three samples are given. In the present report additional samples of rates above or below the predominant rates have been included where an appreciable number of workers were receiving such rates; where it appears to be preferable a range of predominant rates is used. For common labour in factories, sample rates are given by localities for the principal manufacturing centres. The locality in each case is not given as it would in many instances make possible the identification of the particular establishment.

For the following industries wages are given in the form of samples as in the case of factory labour: steamships, grain elevators, electric current production and transmission, telephones, laundries, logging and sawmilling, and metal mining.

Figures for particular localities are given for building, metal, and printing trades, electric railways and civic employees in Tables I and II, and for trucking and cartage, and longshoremen in Table III, also for common labour in factories in Table IX.

The statistics as to building trades show the prevailing rates of wages and hours of labour for nine classes of labour for the years 1920, 1926, 1930, 1931, 1932, 1933, 1934, 1935, 1936, and 1937, for the building season beginning in the spring of each year. During the year 1931, however, changes occurred later in the season more extensively than is usual, and the rates in effect at the end of the year were therefore obtained and included. For 1933 a similar survey was made again toward the end of the year in several cities. As in all previous years, changes in rates reported down to the end of the year, from the sources mentioned above, are included. In Nova Scotia, Quebec, Ontario, Saskatchewan and Alberta, these include agreement rates made obligatory on all employers affected under provincial legislation as to collective agreements and industrial standards; in British Columbia they include minimum rates for the construction industry under the Male Minimum Wage Act; and in Manitoba under the Fair Wages Act. Such rates of wages and hours of labour are given in Appendix E.

On steam railways, wages of employees on the regular staffs are fixed according to agreements between the several railways and the employees, members of the organizations of railway employees, the principal railways having the same rates for nearly all the principal classes. The figures published are taken from these agreements.

In water transportation the organization of various classes of employees negotiate scales of wages, hours and working conditions with many of the steamship companies although agreements are not always signed; other operators tend to pay about the same rates.

In coal mining, the wages in the principal districts are arranged by agreements between the coal mining operators and the employees, in most cases represented by unions and in others by committees of employees. The figures published from 1920 to 1933 were taken from such agreements. The figures for average earnings of contract miners, however, were received from representative employers in each district. In some of the mines in these districts the wages of unorganized employees are somewhat lower than the rates in such agreements. For Report No. 18, and subsequent reports, statements as to wage rates and hours of labour have been requested from the operators of all the larger mines throughout Canada and the figures so secured have been compiled by provinces or districts. The resulting figures include those for many mines not operated under agreements as to wages and working conditions, and cover the mines in New Brunswick, Saskatchewan and the interior of British Columbia for which figures were not previously published.

In metal mining the rates of wages and hours of labour are shown as samples for mines in the various parts of Canada, secured from representative employers.

In logging, Table VII, the data each year is for the season beginning in the autumn and ending in the spring in Eastern Canada.

Data as to Hours

In earlier reports the hours of labour shown throughout were the standard or regular hours per week, per day, etc., and did not indicate the hours actually worked either

overtime or on short time. During 1931 a number of establishments in many of the manufacturing industries reported operations on a short time basis. In the report covering that year, No. 15, wages for such establishments were given on an hourly basis or brought to a basis of full time earnings per week, per day, etc., the resulting figures as to wage rates being therefore on the same basis with those for 1926 and 1930 in the tables.

In Report No. 16, with figures for 1930, 1931 and 1932, in the tables on manufacturing industries, the hours of labour for these years were those reported by employers, whether short time or regular hours, and the wage rates were brought to an hourly basis, except in certain industries, clothing, bread, cake, biscuit, candy, brewing and paper box making for which regular hours were reported chiefly. The same procedure has been followed in subsequent reports except that wages for boot and shoe manufacturing are given on a weekly basis with the hours shown as reported. In this industry, as in some instances in clothing manufacturing, the hours actually worked by individual piece workers are usually not reported and the hours shown are those on which the department or factory is operated.

Index Numbers of Wage Rates

In Report No. 1 tables of index numbers were given in order to show the general trend of the movement in rates of wages. The first set of index numbers was for the rates of wages from 1901 to 1920 in the thirteen selected cities. For each series of rates, that is, for each trade or occupation in each locality, index numbers were calculated both from the hourly rates and from the weekly rates, and these index numbers were averaged for all localities, by groups, thus indicating the relative changes in weekly rates and in hourly rates. The year 1913 was taken as the base period, that is the rate for 1913 in each case was taken as 100, so that the index numbers showed the percentage changes in rates from time to time prior to and since that date. An average was also made for all of the series in these tables, in order to indicate the general trend in wages in such trades as a whole. In making the average index numbers for the six groups the simple arithmetical averages were taken, no allowance being made for the importance of each trade or group by using a system of weighting. In Report No. 3 this table of index numbers for the thirteen cities was brought down to September, 1921.

In subsequent reports the index numbers of hourly rates from 1901 to 1921 have been reproduced, with figures since 1921 calculated by ascertaining the average increase or decrease per cent in the figures for each group each year from the figures for the preceding year and adjusting the group index number accordingly. The index numbers therefore show approximately the movement of wage rates in each group for the past year as compared with the movement in previous years and show current levels as compared with levels in 1913. In Report No. 3 index numbers of daily wages in coal mining were given, calculated in the same manner as the index numbers in Report No. 1. The index number for the coal mining group since 1921 has been calculated in the same manner as those for the other groups. The index numbers for metal trades, previously calculated from Section *b* in Table I, omitted for 1931 and 1932, were calculated from the average percentage changes in the samples for such trades in Table X for those years.

A table of index numbers of wages for factory trades, for common labour in factories, and for lumbering (logging and sawmilling) calculated from the sample rates published was also given for the period 1911 to 1920 in Report No. 1. These figures have been brought down to 1937 in the same manner as the other index numbers since 1921 were calculated.

The classes of labour for which rates were used for the calculation of index numbers for the period 1901 to 1937 are, in the main, skilled trades; and practically all of these classes, including the unskilled, are organized to a great extent in trade and labour unions. The index numbers for these six groups therefore show the trend of wage rates in a number of organized occupations whose members, except coal miners and steam railway employees, work chiefly in cities. They do not, however, indicate the changes in wages outside of industrial centres.

The index numbers calculated from sample rates of wages in factories show the trend of wages for labour in manufacturing industries in which there are many establishments in small centres as well as in cities. The figures for lumbering cover sawmilling in both large and small centres and logging in the principal districts.

Weighted Average Index Numbers

Beginning with Report No. 19, in addition to the simple average for the six groups with figures from 1901 to 1937, weighted averages have been calculated for these six groups and also for all nine groups in those years for which figures are available. The index number for each group is weighted by the average number of wage-earners in the industry represented, as shown by the decennial or the annual indus-

trial census of 1921 and of 1931, the average of the figures for these two dates being taken in each case.

The weights were as follows (in thousands): building trades 143; metal trades 131; printing trades 25; electric railways 18; steam railways 161; coal mining 28; common factory labour 110; miscellaneous factory trades 363; logging and sawmilling 77.

It will be observed that this weighting has most effect in modifying the effect on the general averages of the figures for coal mining and lumbering in which from time to time since 1920 the changes have been quite different from those in the other groups.

Weighting, within groups, although desirable, has not been done. In such groups by occupations or industries weighting makes comparatively little difference as rates of wages for the various classes of labour tend to rise and fall to the same extent even in different localities. In the three groups, Common Factory Labour, Miscellaneous Factory Trades, and Logging and Sawmilling, the index numbers, being calculated from samples, the averages are automatically weighted by the number of samples which vary according to the number of workers in the various occupations and industries.

* Rate and hours approved under Industrial Standards Act, Nova Scotia, 1936.

** Beginning in 1934 agreements approved by Order in Council under the Collective Labour Agreements Extension Act, Quebec, 1934, established minimum rates of wages for various trades in cities, towns and other defined jurisdictional territory throughout the province. On May 1, 1937, the Collective Labour Agreements Extension Act, Quebec, 1934, was replaced by the Act entitled an Act Respecting Workmen's Wages. In 1935, 1936 and 1937 the minimum rate in each range is that approved under these Acts.

* The range of hours shown are full-time weekly hours; from 1931 to 1935 actual shop hours in many establishments were on a short time basis as low as 24 hours per week; a 40 hour week has been reported as standard in many cases. Data for metal trades on steam railways and in mines appear in tables for those industries.

* Maximum rates based on length of service; in most cities bus drivers, on lines operated in connection with street railways, receive the same maximum rates of wages as one man car operators.

‡ Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

† Including armature winders, wiremen, etc.

§ Including troublemen, and groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

§§ Where a range appears, figures represent predominant rates.

(a) Deduction from earnings, 10 per cent.

(b) Deduction from earnings: 10 per cent in 1932 and 1933; 15 per cent in 1934; 10 per cent in 1935 and 1936; starting Feb. 1, 1937, rate of reduction reduced by 1 per cent every two months (Dec., 1937, 4 per cent to Feb. 1, 1938).

(c) Deduction from earnings, 5 and 7½ per cent.

(d) In summer 54 cents per hour, two men cars, 59 cents, one man cars, 42 hours per week.

(e) Deduction from earnings: in 1932, 5 per cent and up; in 1933, 6 per cent and up; in 1934, 1935, 1936, 4 per cent and up in 1937, 3·3 per cent and up.

(f) Deduction from earnings: in 1932, 4 per cent; in 1933, 1934 and 1935, 10 per cent; in 1936, 7 per cent; in 1937, 5 per cent.

(g) Deduction from earnings: in 1932, 4 to 8 per cent and up; in 1933 and 1934, 4 to 10 per cent; in 1935, 4 to 9½ per cent.

(h) Deduction from earnings, Dec. 1, 1932, also 1933, 1934, 5 per cent; 1935, 2½ per cent.

(j) On Oct. 1, 1920.

(k) On Oct. 1, 1920, 50 cents per hour.

(l) On June 1, 1920, 50 cents per hour.

(m) No two men cars in operation in Regina since 1921; in Calgary very few.

(n) Per month.

Shop labourers, per hour	cents	48½	40	35	38	40	40–42

*For electric street railways by cities, *see* Table I*(d)*. ** Differentials on certain lines or divisions above these rates. Nearly all classes are on the basic 8-hour day with time and one-half for overtime, but in some cases some other consideration has been arranged.

† Machinists; boilermakers; blacksmiths; plumbers, etc.; sheet metal workers; cabinet makers; carpenters, coach, locomotive and bench; welders, etc. ‡ Freight car carpenters; freight car painters; car inspectors, car repairers, etc. §Since 1918 employees are allowed one minute extra, for checking in and out, for each hour actually worked, thereby increasing earnings approximately one cent per hour.

(a) On Western lines Port Arthur and west, until 1929 in addition to these rates boilermakers' helpers received 5½ cents; blacksmiths' helpers, 4 cents, and other helpers 3 cents; since May 1, 1929, the differentials on western lines were boilermakers' helpers 4 cents, other helpers 2 cents.

(b) Deductions from each employee's earnings on basic rates effective as follows. Train, engine and telegraph service, 10 per cent Dec. 1, 1931; 20 per cent May 1, 1933; 15 per cent Nov. 1, 1933; Maintenance of way and bridge and building, 10 per cent May 1, 1932; 15 per cent Dec. 1, 1933; Locomotive and car shops, 10 per cent April 1, 1932; 15 per cent Dec. 16, 1933, with certain exceptions. Deduction amended for all classes effective as follows: Jan. 1, 1935, 12 per cent; May 1, 1935, 10 per cent. In 1937: Feb. 1, 9 per cent; April 1, 8 per cent; June 1, 7 per cent; Aug. 1, 6 per cent; Oct. 1, 5 per cent; Dec. 1, 4 per cent; Feb. 1, 1938, 2 per cent; April 1, 1938, none.

† Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight hour day.

Carpenters	Day	3.67	9	3.12	8-9	3.12	8-9
Blacksmiths	Day	3.92	9	3.38	8-9	3.38	8-9

* The figures given for contract miners are the average earnings at piece rates and for some mines the figures include helpers and loaders on piece work; the figures given for machine and hand miners are rates per day.

‡ Higher rates are paid in two or three mines for some of these classes; also in the large mines for certain positions. In 1935 and 1936 nearly all surface employees were put on the eight hour day.

* In Yukon Territory a few hundred tons of coal have been mined each year employing two to four miners, usually from 50 to 100 days; in 1933 wages averaged $12.38 per day for 51 days, four miners; in 1934 wages averaged $7.04 per day for 71 days, three miners; in 1935 wages averaged $7.00 per day for 50 days, three miners; in 1936 wages averaged $10.90 per day for 44 days, three miners. For 1921 the figures were included with British Columbia. In Manitoba, coal mining operations were commenced in 1931 employing 38 men for an average of 23 days, wages averaging $3.46 per day; in 1932, the average number of miners was 6, averaging $2.84 per day, 1,128 man working days; in 1933 the average number of miners was 10, average wage $2.10 per day, 2,056 man working days; in 1934 the average number of miners was 12, average wage $2.03 per day, 3,132 man working days; in 1935 the average number of miners was 12, average wage $1.15 per day, 2,571 man working days; in 1936 the average number of miners was 15, average wage $1.22 per day, 3,212 man working days.

† Prolonged dispute during year.

‡ Figures calculated by dividing number of man days worked into total wages paid.

§ Prior to 1933 the figures for Nova Scotia included certain employees handling coal at a distance from the mine.

APPENDIX D

Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1936

A report issued by the Dominion Bureau of Statistics entitled "Weekly Earnings of Employees in Merchandising and Service Establishments in Canada, 1936," 77 pp., afforded data as to the average weekly earnings of employees with numbers employed for three classes of establishments: independent retail stores, chain stores, and wholesale trade. The first report of this nature covered the year 1935 and a summary table of the figures was given in Report No. 20 of this series. Figures for motion picture theatres were given in the report for 1935 but not in that for 1936. The figures as to independent retail stores were chiefly from those which had an annual business of $20,000 or more in 1930 as shown in the census of 1931. This section included department stores, restaurants, gasoline filling stations, garages, as well as retail businesses of various kinds. The information on chain stores was secured from all companies operating four or more units in the same or similar lines of trade and included earnings of store managers, clerks, cashiers, delivery and any other store employees but not for head office staff, warehouse and transportation employees. For the section on wholesale trade information was secured from all the larger wholesale dealers and from a number of sales offices and distribution branches maintained by manufacturers.

In addition to the data as to the numbers of employees and average weekly earnings the report contained tables showing the percentages of employees in each kind of business by provinces whose weekly earnings fell within specified ranges: under $6, $6 to $6.99, etc. Part time employees were included in this analysis but not in the other tables. Earnings by quartile groups were also given.

The accompanying table shows the average weekly earnings and numbers of employees, male and female by kinds of business and by provinces. The figures as to each kind of business by provinces are not included.

‡ Includes millinery and shoe stores.

APPENDIX E

WAGES AND HOURS OF LABOUR UNDER PROVINCIAL LEGISLATION AND ON FEDERAL GOVERNMENT CONTRACTS IN CANADA

Legislation providing for the regulation of wages and hours of labour has been enacted by various provinces in Canada with respect to: minimum wage rates for females to be set by government boards in all provinces except Prince Edward Island which is not extensively industrial; minimum wage rates for males to be set by government boards in British Columbia, Manitoba, Alberta, Ontario and Quebec, or under special regulations for certain industries such as forest operations in Quebec and New Brunswick; the extension by Order in Council of minimum rates of wages, maximum hours of labour and certain other working conditions in a collective labour agreement between employers and groups of workers to all engaged in the industry in the same district, in Quebec; the establishment, by Orders in Council, of minimum wage rates and maximum hours agreed upon at conferences of representatives of employers and employees convened by governmental authorities, in Ontario, Alberta, Nova Scotia and Saskatchewan.

The last report in this series contained a section on "Maximum Hours of Labour as Limited by Provincial Legislation." A special bulletin on the legal regulation of hours of labour in Canada is in course of preparation and is expected to be issued in a short time. Such information is, therefore, not included in the present report. Many of these provisions, however, are mentioned in this appendix, in connection with the tables and statements as to minimum wages, etc. The most important of the provisions not so shown are the eight hour day and forty-eight hour week law of British Columbia applicable to most of the industries except agriculture and domestic service, and the eight hour day legislation for underground miners in most of the provinces where mining is carried on.

Minimum Wage Rates on Federal Government Contracts

In accordance with a Resolution of the House of Commons in 1900, the Fair Wages Policy of the Federal Government has provided for the observance of rates of wages generally accepted as current for competent workmen in the district where the work was performed or, in the absence of current rates, for fair and reasonable rates. This policy applied to building and construction work and to the manufacture of government supplies.

In 1922 the application of this policy by the various departments of the government was standardized under an Order in Council, setting forth the labour conditions to be inserted in contracts for building and construction and for the manufacture and supply of fittings for public buildings, harness, saddlery, clothing and other outfit for the military and naval forces, Royal Canadian Mounted Police, letter carriers, and other Government officers and employees; mail bags, letter boxes, and other postal stores.

In 1930, the Fair Wage and Eight Hour Day Act was passed, applicable to all contracts for construction, remodelling, repair or demolition of any Federal work. This statute provides for the observance of current rates of wages and requires also that wages shall in all cases be such as are fair and reasonable and that the working hours are not to exceed eight a day.

On December 31, 1934, the labour conditions previously applicable to contracts for the manufacture of various classes of Government supplies as listed above, were rescinded and new conditions substituted therefor. (Labour Gazette, January, 1935, page 24.)

The requirement for the payment of wages not less than current rates, or fair and reasonable rates if there are no current rates, is retained, but it is also provided that males and females under 18 years of age will be entitled to rates of wages not less than those provided for women and girls in the minimum wage scales of the respective provinces. In certain of the Maritime Provinces where no minimum wage legislation is in effect, the contractors are required to pay the males and females under 18 years of age wages not less than those provided for women and girls under the Minimum Wage Act of the Province of Nova Scotia.

It is also provided that in no event shall the wage rate for male workers 18 years of age and over be less than 30 cents per hour, and for female workers 18 years of age and over, 20 cents per hour, but in any cases where the Provincial Minimum Wage laws

require the payment of higher wages than those set out above, such higher rates shall apply in the execution of Federal contract work. For instance for a 50 hour week on a Federal Government contract a male 18 years of age and over, whether experienced or inexperienced, must be paid not less than $15 and a female $10 even if the provincial minimum scale may provide $6, $7, $8, etc., but if the provincial minimum scale is in excess of $15 in the case of male and $10 in the case of female workers then the provincial scale must prevail.

The Fair Wages and Hours of Labour Act, 1935

During the 1935 session of Parliament the Fair Wages and Hours of Labour Act, 1935, was passed, to come into effect on May 1, 1936, repealing the Fair Wages and Eight Hour Day Act, 1930. The new statute provides for the forty-four hour week and for other labour conditions in work under federal government contracts for building and construction and on works towards which federal aid is granted by way of subsidy, loan, etc., as before, but extends the list of such works to include those carried out by any provincial and municipal authority if financial aid is given by the federal government "unless the grant or payment is by statutory authority or by agreement with the Government of Canada excepted." It is also provided that regulations may be made to require the furnishing of any necessary information to ensure the enforcement of the statute. Any contract may be exempted from the Act by Order in Council before being entered into.

Minimum Wages for Female Employees

Between 1918 and 1930 statutes providing for the establishment of minimum wage rates for females by boards or commissions had been passed in all of the provinces except Prince Edward Island, which is not to a great extent industrial, the dates being as follows: British Columbia and Manitoba, 1918; Quebec and Saskatchewan, 1919; Nova Scotia, Ontario and Alberta, 1920; New Brunswick, 1930. In Quebec the Act was not put into force or orders issued until 1926, in Nova Scotia not until 1930. The New Brunswick statute comes into force on proclamation and has not yet been proclaimed.

Under the New Brunswick Fair Wage Act, 1936 (amended in 1937), minimum wages may be set by the Fair Wage Board as referred to in the section on minimum wages for male employees. The Female Minimum Wage Act of Quebec was repealed in 1937, being replaced by the Fair Wage Act, which is applicable to male workers as well as female. Under this statute the orders as to minimum rates for females have been continued and extended to male workers. In 1937 the Minimum Wage Act of Ontario was amended to replace the Minimum Wage Board by an Industry and Labour Board and to provide for setting minimum wage rates for male employees.

The following tables give data as to minimum rates of wages for females under orders of the various provincial boards in effect at the end of 1937. The figures as to hours are those for which the minimum rates are payable under such orders, subject to certain modifications, or are the maximum hours under the minimum wage or other legislation, as explained in footnotes.

The more important of the rules for the application of the rates under the orders have been given in footnotes. For complete information it is necessary to refer to the orders as issued by the various provincial boards. These have been given in summary form in the Labour Gazette from time to time as issued. In some provinces these orders include regulations as to employment conditions, sanitary conditions, etc. The boards have power to fix lower rates for inexperienced workers, to issue licences for lower rates of pay for handicapped workers and to meet special conditions in the nature of emergencies.

I.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN NOVA SCOTIA*

Industries and Occupations	Minimum Wages per Week			Hours per week for which minimum wage rates payable ‡
	Experienced workers	Inexperienced workers over 18 years †	Young Girls under 18 years †

Food Trades including making of confectionery biscuits, chocolates, grocery specialties, together with bakeries and all allied industries: (a)				
Cities and towns of 17,000 population and over	11.00	9.00 & 10.00*b*	7.00–10.00*c*	44–50
All towns under 17,000 population	10.00	8.00 & 9.00*b*	6.00– 9.00*c*	44–50
Textile and Needle Trades and allied sewing trades, including weaving, knitting, spinning, making of wearing apparel and the working in and on leather goods, boots, shoes, furs, etc.: (a)				
Cities and towns of 17,000 population and over	11.00	9.00 & 10.00*b*	7.00–10.00*c*	44–50
All towns under 17,000 population	10.00	8.00 & 9.00*b*	6.00– 9.00*c*	44–50
Employees in all Factories not dealt with in other orders, and the Paper Trades (which include printing, book binding, paper box making, paper bag making, manufacturing stationery and other trades making paper or paper products): (d)				
Cities and towns of 17,000 population and over	11.00	9.00 & 10.00*b*	7.00–10.00*c*	44–50
All towns under 17,000 population	10.00	8.00 & 9.00*b*	6.00– 9.00*c*	44–50
Employees in Shops and Stores, including millinery, dressmaking, tailoring and fur sewing, situated or in any way connected with a shop or store: (a) (e) (f)				
Cities and towns of 17,000 population and over	11.00	8.00–10.00*c*	7.00–10.00*c*	44–50*g*
All towns under 17,000 population	10.00	7.00– 9.00*c*	6.00– 9.00*c*	44–50*g*
Operators in the Telephone Companies:				
Halifax, Sydney, Dartmouth and Glace Bay	11.00	9.00 & 10.00*b*	8.00–10.00*c*	44–50
Amherst, New Glasgow, North Sydney, Truro, Yarmouth, Sydney Mines and Westville	10.00	8.00 & 9.00*b*	7.00– 9.00*c*	44–50
All other incorporated towns	9.00	7.00 & 8.00*b*	6.00– 8.00*c*	44–50
Office work including stenographers, book-keepers, typists, filing and billing clerks, cashiers, cash girls, checkers, invoicers, comptometer operators, auditors, ticket sellers, attendants in physicians' and dentists' offices and similar services: (j)				
Cities and towns of 17,000 population or over	11.00	9.00 & 10.00*b*	8.00–10.00*c*	48*h*
All towns under 17,000 population	10.00	8.00 & 9.00*b*	7.00– 9.00*c*	48*h*
Employees in Hotels, Restaurants, Refreshment Rooms, Boarding or Rooming Houses, Tea Rooms, Ice Cream Parlours and Light Lunch Stands: (a), (i)				
Cities and towns of 17,000 population and over	11.00	9.00 – 10.00*k*	9.00–10.00*k*	44–50
All towns under 17,000 population	10.00	8.00 – 9.00*k*	8.00– 9.00*k*	44–50
Employees in Laundries, Dry Cleaning Establishments and Dye Works: (a)				
Halifax	11.00	9.00 & 10.00*b*	7.00–10.00*c*	44–50
Sydney and Glace Bay	11.00	9.00 & 10.00*b*	7.00–10.00*c*	44–50
All other incorporated towns	10.00	8.00 & 9.00*b*	6.00– 9.00*c*	44–50
Beauty Parlours or any Establishment where Hairdressing, Manicuring, Permanent Waving and similar occupations, connected with beauty culture is carried on: (i)				
Cities and towns of 17,000 population and over	11.00	7.00–10.00*c*	7.00–10.00*c*	48*h*
All towns under 17,000 population	10.00	6.00– 9.00*c*	6.00–9.00*c*	48*h*

*Minimum wage orders apply to cities and incorporated towns, Permits may be issued for handicapped workers to work for lower wages and also for variation or suspension of the regulations in exceptional conditions.

†Number of inexperienced adults or young girls or both not to exceed 25 per cent of total female working force except where total working force is less than four.

‡Except where otherwise noted, hours for which minimum rates payable to be not less than 44 nor more than 50 per week; work in excess of 50 hours to be paid at proportionate rates; for less than 44 hours deductions may be made at proportionate rates. Employees required to wait on the premises to be paid for such waiting time. Under Nova Scotia Factories Act, there is no restriction on the normal hours for women in factories but in case of emergency the inspector may permit hours up 12½ a day and 72½ a week for not more than 36 days in the year.

(a) In these occupations, if lodging is furrished, not more than $2 may be deducted from wage; if board is furnished not more than $4 per week for board nor 25 cents for each meal may be deducted. In the case of laundries, not more than $4.50 may be deducted for board and lodging in Halifax and other towns, except in Sydney and Glace Bay where not more than $1.50 for lodging and $4.50 for board may be deducted. In the case of shops and stores, the only provision is for a deduction of a maximum of 25 cents per meal.

(b) After one year, minimum rate for experienced adult to be paid.

(c) After 18 months, minimum rate for experienced adult to be paid, but no young girl on reaching age of 18 to receive less than rate for inexperienced adult.

(d) Pieceworkers to be paid minimum wage scale for first six months. For pieceworkers of more than six months' experience, it is sufficient if at least 80 per cent receive the minimum established rate.

(e) A probationary period of three months is allowed for which no wages are stipulated.

(f) Seats to be provided in the proportion of at least one seat for every four employees or fraction thereof.

(g) From December 15 to December 31 the hours in shops and stores for which the minimum wage must be paid may be extended up to 60 a week. Hours in excess of 50 per week, except between December 15 and December 31, must be paid for at not less than one and one half times the minimum rate calculated on the basis of a 50 hour week. The minimum wage for all part time workers is the experienced workers minimum.

(h) The wage rates are payable for 48 hours per week or for the usual number of hours normally worked in the establishment if less than 48.

(Footnote concluded at foot of page 125

(*Table III continued on next page.*)

Footnote to Table II—

* Minimum Wage Orders apply throughout the Province unless otherwise noted in this table. Since November, 1937, they apply to male as well as female workers. In allocating the workers on wage rates according to percentages of numbers employed, males and females are counted separately. Permits may be issued by the Fair Wage Board for lower wage rates for workers who are handicapped. A new Order, applicable to all industries except agriculture and private domestic service, was issued, to be effective from February 15, 1938, (Labour Gazette, January, 1938, page 38), but the effective date has been postponed. Wage rates for female workers are also included in certain agreements under the Workmen's Wages Act outlined under "Wages and Hours of Labour under Collective Agreements, etc."

† Hours worked less or more per week than those shown below must be paid at proportionate rates, except where noted. Any employee required to wait on the premises shall be paid for the time thus spent. Under the Industrial and Commercial Establishments Act, maximum hours per week in industrial establishments for females are 55 and in commercial establishments in cities or towns of over 10,000, 60 per week (except last two weeks of December) but permits to work up to 65 hours in cases of emergency may be granted by the inspector under this Act for not more than 6 weeks in a year.

‡ Per hour.

(a) At least 65 per cent of the employees must be paid the higher minimum rate.

(b) After two years' apprenticeship, experienced workers' rate must be paid.

(c) The number of apprentices must not exceed half of the total female working force.

(d) Pieceworkers to be paid the minimum wage rate for beginners during their first six months of apprenticeship. For those pieceworkers of six months' experience or more, it is sufficient if at least 80 per cent (90 per cent in the tobacco industry) receive these minimum wage rates.

(e) The Board may grant permits of variation or suspension of any of these regulations in exceptional conditions.

(f) If a special uniform required, it shall be furnished and laundered at the expense of the employer.

(g) At least two thirds of employees on piecework must be paid the minimum rate.

(h) Overtime to be paid for at one and a half times the regular minimum rates; short time to be paid for *pro rata* of the regular minimum rates.

(i) At least 65 per cent of employees must be paid the highest minimum rate, another 25 per cent the intermediate rate and the remaining 10 per cent the lowest minimum rate.

(j) At least 70 per cent of employees must be paid the highest minimum rate, another 20 per cent the intermediate rate and the remaining 10 per cent the lowest minimum rate.

(k) At least 70 per cent of the employees must be paid the highest minimum rate, another 15 per cent the intermediate rate and the remaining 15 per cent the lowest minimum rate.

(l) In the first three zones, the minimum rates are payable for a week of 40 to 48 hours, except in stores employing not more than two female employees where they are payable for a week of 40 to 54 hours. Overtime, over 48 hours (or 54 in the latter stores) in the first three zones and over 54 hours in the fourth zone must be paid at time and one half, except for employees whose weekly wage is over $15. Employees in the first three zones who are employed less than 40 hours per week may be considered as part time employees, in which case they are entitled to a bonus of 12½ per cent over their regular wage. Extra employees, that is those engaged exclusively on Fridays or Saturdays or occasionally any other two days in the week, must be paid 25 cents, 20 cents, 18 cents, 16 cents or 14 cents per hour respectively according to the five zones provided in this Order. Employees engaged temporarily for the Christmas and New Year's trade, between November 1, and December 31, only, may be paid a minimum of 20 cents per hour on the Island of Montreal and 15 cents in the rest of the Province.

(m) Gratuities cannot be retained by the employer nor included as part of the wage.

(n) At least 65 per cent of the employees must receive the highest rate, another 15 per cent the intermediate rate and the remaining 20 per cent at least the lowest rate.

(o) At least 65 per cent of employees must be paid the highest rate, another 20 per cent the intermediate rate and the remaining 15 per cent at least the lowest specified rate.

(p) Not more than $1 per week for lodging, $3 per week for board and lodging or 10 cents per meal may be charged employees in the seasonal canning industry. For employees of commercial establishments, corresponding charges are: $2, $5 and 20 cents in the first zone, $1.50, $4 and 15 cents in the next three zones; and $1, $3 and 12 cents in the fifth zone.

(q) At least one half of the employees must be paid the higher minimum rate.

(r) Employees employed less than 48 hours per week must be paid at least 35 cents per hour on the Island of Montreal and 30 cents in the other cities of a population of over 25,000.

(s) Overtime over 55 hours must be paid at time and one-half.

(t) Room and board included; if employee is not given lodging, she will be entitled to a supplement of $8 per month; if she receives neither lodging or board, to a supplement of $18 per month.

(u) Meals included.

(w) The number of apprentices must not exceed one third of the total number of female employees.

(x) At least 60 per cent of employees must be paid the highest minimum rate, a further 15 per cent the intermediate rate and the remaining 25 per cent at least the lowest rate.

(y) Time and one half must be paid for all work over 48 hours per week, and where a collective agreement is in force providing for extra payment for night shift, holidays, etc., the same is made obligatory by this order.

(z) The number of inexperienced workers in an establishment must not exceed 40 per cent of the total number of employees.

Footnote on page 129

* Minimum wage rates apply throughout the Province unless otherwise stated in the order. No male worker may be employed in a class of employment for which a minimum wage is fixed for women at less than that minimum wage. Special permits may be issued to handicapped workers or those over 60 years to work for lower wages. A new Minimum Wage Act came into effect in 1937, but the orders here noted had not been replaced in 1937. Minimum wage rates for female employees are also included in certain schedules under the Industrial Standards Act outlined under "Wages and Hours of Labour under Collective Agreements, etc."

† No young girl worker on reaching age of 18 years is to receive less than rate fixed for inexperienced adult.

‡ Minimum weekly rates are payable for these hours or for the usual number of hours per week normally worked in the establishment, if less than this number. No deduction below minimum wage for absence is to exceed value of the time lost. Overtime to be paid at proportionate rates. An employee required to wait on the premises to be paid for such time. Under Factory, Shop and Office Building Act, maximum hours for females are 60 per week, but in factories permits to work up to 12½ hours per day or 72½ hours per week in cases of emergency may be given by the factory inspector for not more than 36 days in the year.

(a) For indentured apprentices, no wage stipulated for first three months, the lowest rate here shown is for the second three months; after two years, experienced workers' rate to be paid.

(b) All beginners on piecework to be paid not less than the time work rates for beginners during first six months (first three months in laundries, etc.) For pieceworkers of more than six months' (three months' in laundries, etc.) experience, it is sufficient if at least 80 per cent earn the minimum rate.

(c) After one year, full rate for experienced worker to be paid.

(d) After 18 months, full rate for experienced worker to be paid.

(e) Lodging not to be charged at more than $2.00 per week and board at $5.00 per week in Toronto and at $1.50 and $4.50 in the rest of the province, except in the canning industry where not more than $1.50 for lodging and $4.50 for board may be charged throughout the province; single meals at not more than 25 cents.

(f) For piecework in the canning industry, it is sufficient if 60 per cent of the pieceworkers earn the minimum rate.

(g) All workers between the ages of 18 and 60 years.

(h) All workers under 18 or over 60 years of age.

(i) Not more than one-third of employees to be apprentices, except when staff is less than four.

(j) An employment of ten weeks or more in any period of six months to be deemed sufficient for that of six months in computing time of apprenticeship.

(k) After 3 years, full rate for experienced worker to be paid.

(l) After 2 years, full rate for experienced worker to be paid.

(m) The number of employees paid as inexperienced shall not exceed 40 per cent of the total female working force except where there are less than four employees (less than five employees in laundries, etc.)

(n) An employee working less than 40 hours per week to be paid on hourly basis.

(o) In custom or merchant tailoring establishments in Toronto, Ottawa, Hamilton, London and Windsor, a learner in this trade may be employed for three months with no minimum wage rate prescribed.

(p) After 9 months, full rate for experienced worker to be paid.

(q) Any office worker with a diploma from an accredited business college or commercial department of a high school to be paid experienced worker's rate.

(r) If employed a year or more in an office before reaching the age of 18 years, a worker to receive experienced worker's wage rate on reaching age of 18 years. If working less than a year when reaching age of 18 years, experienced worker's rate to be paid as soon thereafter as the year's experience has been completed.

(s) A learning period of two weeks with no prescribed wage before minimum wage rates applicable.

(t) No deduction may be made from wages for the use, purchase or laundering of uniforms.

* Minimum wage orders apply to women and to boys under 18 in cities only, except where otherwise noted. (Special rates for boys and men in some industries are shown on page 136). In any class of industry where a minimum wage is established, no person 18 years or over to be employed at less than 25 cents per hour except where regulations of the Board provide for different rates. The Board may issue a permit granting modification of or exemption from the regulations in case of exceptional conditions.

† Maximum hours per week, except that specified numbers of hours of overtime are permitted by the Minimum Wage Board regulations for stores and hotels, and by the Bureau of Labour for other occupations. Payment for such overtime to be at regular rates. Any employee required to wait on the premises, is to be paid for such waiting time.

(a) The number of learners and minors not to exceed 25 per cent of the number of experienced female employees in the case of laundries, etc., and hotels and restaurants; and not to exceed 25 per cent of the total number of employees in departmental stores and retail and wholesale stores; and not to exceed 25 per cent of the total number of female employees in other orders.

(b) If board or lodging furnished by employer, the cost to the employee is not to exceed $2 per week for lodging, $4.50 for board or $6 for both; in hotels, restaurants, etc., and for general employees, not more than $2.50 for lodging and $4 for board may be charged employees; in retail and wholesale establishments 25 cents per meal may be charged.

(c) After six months, minimum rate for experienced worker to be paid.

(d) After one year, (after 16 months in retail and wholesale stores), minimum rate for experienced worker to be paid.

(e) After 18 months, full minimum rate for experienced worker to be paid. (In furriers' establishments, if a minor reaches age of 18 years before this period, she is to serve only one half of the remainder of the learning period before receiving experienced worker's rate.)

(f) After 24 weeks, full minimum rate fo r experienced worker to be paid. Minors to be classed as learners.

(g) After four seasons of at least 10 weeks each, minimum rate for experienced worker to be paid.

(h) If establishment is associated with a shop or store, the same hours to be observed as by the selling staff of the shop or store. In establishments which remain open Saturday evenings, hours may be increased to 11½ for Saturday with a maximum of 49 per week except for millinery establishments in the month of December when maximum is 54 hours.

(Footnotes concluded on next page.)

(i) After two years, minimum rate for experienced worker must be paid.

(j) Work in excess of 9 hours a day or 48 hours a week to be paid at 30 cents per hour unless the wages paid equals at least 30 cents per hour for the actual hours worked.

(k) Employees who have been working one year or more to be considered experienced adults on reaching the age of 18 years.

(l) This Order covers all departments including manufacturing and special service departments except where another Order of the Board applicable to the same work in other industrial classes exists which is more favourable to the employee, in which case that more favourable to the employee prevails

(m) From November 1 to December 24, workers in mail order department, and from December 15 to December 24, the sales force may work 9 hours per week overtime; also at stocktaking one additional night may be worked.

(n) Except that 10½ hours may be worked on Saturday. Overtime must be paid at the rate of at least 5 cents per hour over minimum rates. All part time workers engaged for 16 hours or less in a week must be paid at the minimum hourly wage rate for experienced workers.

(o) Uniforms required must be furnished and laundered at the expense of the employer.

(p) No minor (under 18) to be employed. Ticket sellers and ushers working less than 40 hours per week must be paid at least 30 cents per hour.

(q) Or 25 cents per hour.

(r) A probationary period of 3 months with wage rates not stipulated; after 18 months further experience, full rate for experienced worker to be paid.

(s) After three months, full minimum rate for experienced worker to be paid.

(t) Or 20 cents per hour, except for "General Employees" for whom the rate is 21 cents.

(u) Where more than 8 female workers are employed, not more than 25 per cent of the total office staff to be learners or minors. A business course is to be the equivalent of experience.

(v) Girls of 15 years $8, of 16 years $9, of 17 years $10, of 17½ years, $10.50.

(w) In places of a population of less than 1,000, from November to April inclusive, this minimum rate may be reduced by 10 per cent.

(x) Female cooks and male employees of 18 years or over in hotels may work more than 48 hours, with all such overtime at the hourly rate specified.

(y) Farm and market garden workers and private domestic workers are excepted and this Order is not effective if a lower rate is permitted by any other regulation under the Act.

(z) Hours for which minimum wage rates payable.

* The Minimum Wage Orders apply only in cities and within a radius of five miles of them. Both male and female workers are governed by them. The Board with the approval of the Lieutenant-Governor in Council, has the power to extend the Orders to any other part of the Province. New minimum wage orders replacing all these become effective January 10, 1938, and are summarized in the LABOUR GAZETTE, January, 1938, page 42.

† The stated minimum wage rates are payable for a maximum of 48 hours per week or for the usual number of hours normally worked per week in the establishment if less than 48 in the case of the orders governing factories, etc., hotels, etc., and beauty parlours and barber shops. For the other minimum wage orders (shops and laundries, etc.), the minimum weekly rates are payable for a maximum of 48 hours per week or for the usual number of hours normally worked per week in the establishment if less than 48 and more than 43.

(a) Not more than one third of total number of employees may be employed as inexperienced workers, except where total number is less than four, when one inexperienced worker may be employed.

(b) If indenture of apprenticeship to learn a skilled trade is entered into, wage rates stipulated in the indenture may prevail, if filed and approved by Minimum Wage Board.

(c) Part time and overtime (beyond 48 hours in the week) must be paid at 30 cents per hour for experienced workers and 25 cents for inexperienced workers, with a minimum of two consecutive hours for part time.

(d) After 18 months' experience, the minimum rate for experienced worker must be paid.

(e) Part time work must be paid at not less than minimum hourly rate, providing that no employee working less than 43 hours may be paid less than 20 cents per hour with a minimum of three consecutive hours.

(f) Number of workers working less than 43 hours not to exceed 25 per cent of total number of employees, except if less than four workers, when one part time worker may be employed.

(g) Overtime over 48 hours must be paid at not less than the minimum hourly rate, but in no case hours to exceed 56 hours in any week except with permit from secretary of the Board.

(h) No deduction from minimum weekly wage may be made for statutory holidays.

(i) After two years, the minimum rate for experienced workers must be paid.

(j) For part time work and overtime, experienced workers must be paid 30 cents, inexperienced workers 25 cents per hour, with a minimum of two consecutive hours for part time.

(k) After 6 months, minimum rate for experienced worker must be paid.

(l) Or 25 cents per hour for experienced workers, 16½ cents per hour for inexperienced workers for first six months and 21 cents for second six months.

(m) Where a special uniform other than white is required and not supplied by employer, all the minimum wage rates to be increased 50 cents per week.

(n) Number of workers employed less than 48 hours may not exceed 25 per cent of the total number of workers regularly employed, except where less than four full time workers, where one part time worker may be employed.

(o) Where lodging and 21 meals per week furnished and accepted, minimum wage rates are $5.50 per week for experienced workers, $3.50 for workers with from 6 to 12 months' experience and for experienced bell boys, porters, elevator operators and dish washers, $1.50 per week for workers with less than 6 months' experience; where meals only are furnished by employer, corresponding minimum wage rates are $7.50, $5.50 and $3.50 per week; where lodging only is furnished, corresponding minimum wage rates are $10, $8 and $6 per week; where less than 21 meals or 7 days' lodging furnished, the minimum rate is as provided above in this clause, plus 20 cents for each meal and 30 cents for each day's lodging which is not furnished.

(p) After one year, the minimum rate for experienced worker must be paid.

(q) Inexperienced workers under 21 years of age may be paid a minimum of $6 per week of 48 hours for first six months, before beginning to receive the regular scale for inexperienced workers.

(r) Not more than one indentured apprentice or one inexperienced worker may be employed for every experienced worker in a shop.

(s) Any worker who performs services for a customer for which the customer is required to pay is to be considered an employee.

(t) An employee required to wait on the premises of the employer between appointments is to be paid for such time.

(u) All employees working part time or overtime (over 48 hours) are to be paid a minimum of 30 cents per hour if experienced workers, 25 cents if inexperienced workers over 21 years and 20 cents if inexperienced workers under 21 years, provided that in no case may hours exceed 57 in any week without a special permit from the secretary of the Board and provided that no period of employment may be less than two consecutive hours.

(v) Under the Factories Act, a permit to work longer hours must be secured from the factory inspector who may, in emergencies, permit a maximum of 12½ hours in any one day, 72½ hours in any one week, for 36 days in the year.

VI.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN ALBERTA*

Industries and Occupations	Minimum Wages per Week†		Hours‡	
	Experienced workers	Apprentices§	Per day	Per week
	$	$		
Factories:				
Bookbinding, embossing, engraving and printing	12.50	7.00–11.00*a*	8	48
Dressmaking, tailoring and fur sewing	12.50	6.00–10.00*b*	8	48
Millinery	12.50	4.00–10.00*b*	8	48
Other manufacturing	12.50	6.00–10.00*c*	8	48
*Telephone exchanges:**	14.00	7.50–12.00*b*	8	48
Wholesale and retail shops, stores and mail order houses	12.50	7.50–11.00*d*	8	48
Theatres, including motion picture houses, music halls, dance halls, cabarets and places of amusement	14.00*e*	14.00*e*	8	48

* Minimum wage orders apply throughout the Province except that for telephone exchanges (public and private exchanges) which order is applicable only in cities, towns and villages of a population of 600 or over. During the first part of the year 1937 under the Factories Act and from May 31 to September 30, under the Male Minimum Wage Act, it was provided that wherever a minimum wage had been fixed for female workers, no male workers might be employed in such class at a less wage. From October 1, 1937, separate minimum wage orders were made effective for male workers as noted on page 139.

† The minimum weekly wage rates are payable "for a week of six days". Except for employment in theatres, etc., in case of employment by the hour or by the day for any period less than six consecutive days in a calendar week, a minimum of 30 cents per hour must be paid, "and in any such case where the consecutive number of hours during which such employee is employed is not more than four hours, that employee shall be paid for four hours at a rate of 30 cents per hour" even if employed for less than four hours.

‡ Maximum hours ordinarily permitted under the Hours of Work Act (1936). Payment for overtime may be at the rate of wages ordinarily payable if such overtime does not exceed one hour in any one day and does not exceed the maximum weekly hours permitted. Payment for overtime is to be at one and one half times the rate of wages ordinarily payable if the total amount of overtime exceeds one hour in any one day or exceeds the maximum weekly hours ordinarily permitted under the Hours of Work Act.

§ Not more than 25 per cent of the total female staff may be apprentices.

(a) After 18 months, minimum wage for experienced worker is to be paid.

(b) After the first month, for which no minimum rate is set, 11 months may be worked at the apprentice scale.

(c) In some cases, minimum rate for experienced worker is to be paid after 9 months' apprenticeship and in other cases after one year's apprenticeship.

(d) After one year's apprenticeship, minimum rate for experienced worker is to be paid.

(e) If employed by the hour or day or for any period less than six consecutive days in a week, the minimum rate is 50 cents per hour, and if the period is for less than two consecutive hours payment must be made for at least two hours.

(f) Where board is furnished to an employee, not more than $5.00 for a full week or 75 cents per day may be charged.

(g) After 6 months, minimum wage for experienced worker is to be paid.

VII.—MINIMUM WAGE RATES FOR FEMALE EMPLOYEES IN BRITISH COLUMBIA*

Industries and Occupations	Minimum Wages per Week			Hours†	
	Experienced Workers	Inexperienced Workers, 18 years and over‡	Young girls under 18 years‡	Per day	Per week
Fishing Industry, including the washing, preparing, preserving, drying, curing, smoking, packing of fish, except canned fish	$ 15.50	$ 12.75–14.75*a*	$ 12.75–14.75*a*	.....	.....

Personal Service (includes employees in manicuring, hairdressing, barbering, etc., ushers in theatres, attendants at other public places of amusement, garages and service stations and drivers of motor cars and other vehicles):					
Manicuring, hairdressing, barbering, etc. *(p)*	14.25	10.00–13.00*a*	10.00–13.00*e*	.....	48
Ushers in theatres, music halls, lecture halls, etc.	14.25	14.25	14.25	.....	48*m*
All others	14.25	14.25	14.25	.....	48

* Minimum wage orders apply throughout the Province. No male worker over 18 years except indentured apprentices may be employed at a class of employment for which a minimum wage for women is fixed at less than this minimum wage. These orders do not apply to indentured apprentices.

† Under Hours of Work Act, maximum hours per week except with permit from the Board of Industrial Relations. Overtime is to be paid *pro rata*. For the manufacturing industry, permission to work overtime must be secured under the Factories Act.

‡ Special licences may be granted by the Board for employment of adult learners at wage rates fixed in the licences but the number of such licensed employees not to exceed one-seventh of the total number of female employees in the establishment, except if less than seven employees when one adult learner may be allowed. The aggregate number of female workers with special licences and employees under 18 may not, however, exceed 35 per cent of the total number of female workers in the establishment.

(a) After one year, minimum rate for experienced worker to be paid.

(b) Workers are to be paid a minimum of 30 cents per hour up to 10 hours in a day, 45 cents for hours over 10 and up to 12, and 60 cents for any hours in excess of 12, except that 10 per cent of employees may be paid lower rates, viz., 25 cents, 37½ cents and 50 cents respectively. An exception was made for tomato canning from September 2, to September 30, 1937, for which the minimum rates of 30 cents for 90 per cent of employees and 25 cents for the other 10 per cent were payable for all time worked.

(c) For some classes of manufacturing the scale for inexperienced employees is from $8 to $12 covering a period of 6 months, in other classes also from $8 to $12 but covering a period of one year and in a third class which includes printing and bookbinding, dressmaking, tailoring, manufacture of jewellery, furs, leather goods, boots and shoes, hand-made millinery, and other products the scale is from $7 to $13 and covers a period of 18 months.

(d) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 35 cents with a minimum of $1.40 in any one day for experienced workers, 25 cents to 35 cents with a minimum of $1.25 in any one day for inexperienced adults and from 20 cents to 30 cents with a minimum of $1 in any one day for young girls under 18 years. Employees of any age employed temporarily between December 1 and December 31, 1937, were to be paid a minimum of $12.75 per week for a week of 40 hours or more or 35 cents per hour if working less than 40 hours per week.

(e) On reaching age of 18 years after 18 months' experience in case of offices and 21 months in the mercantile industry, minimum rate for experienced workers to apply.

(f) After 9 months, minimum rate for experienced workers to apply.

(g) In an emergency, maximum hours may be increased up to 56 per week, and such overtime to be paid at one and one-half times the rate. Employees customarily on duty between 10 p.m., and 8 a.m., may work 10 hours instead of 8 per day.

(h) After one year, minimum rate for experienced worker to be paid.

(i) Apprenticeship of two years and rate of $12 to continue until reaching age of 18 years. If age of 18 is reached before completion of one year's apprenticeship, rate for experienced worker to be paid as soon thereafter as the year is completed.

(j) If board or lodging furnished by employer, not more than $3 per week for lodging and $5.25 for board to be deducted from wages.

(k) After three months, minimum rate for experienced worker is to be paid. For young girls, $12.00 is to be paid until age of 18 years.

(l) In an emergency, hours may be increased to 52 hours a week, with time and one-half being paid for all work over 48 hours. In summer resorts, between June 15 and September 15, 10 hours per day, 54 hours per week are permitted, with time and one-half for all work over 48 hours in any one week.

(m) $14.25 for over 36 and not more than 48 hours per week; $10.80 for over 18 hours and under 36 hours per week. For ushers employed after 6 p.m., on legal holidays and special matinees, 30 cents per hour with a minimum of 75 cents.

(n) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 37½ cents with a minimum of $1.50 in any one day for experienced workers and 30 cents with a minimum of $1.20 in any one day for inexperienced workers and for young girls under 18 years.

(o) This Order includes janitresses, janitress-cleaners and janitress-firemen. Monthly wage rates are: $22 per month in apartment buildings of 5 residential suites, with an increase of $3 per month for each additional suite up to $75 for buildings with 23 suites; $77 for buildings with 24 suites with an increase of $2 per month for each additional suite to a maximum of $125 for buildings with 48 suites or more; 37½ cents per hour for all other janitresses. Maximum rentals of $20 or $25 are set for janitress apartments

(Footnotes concluded at bottom of next page.)

Minimum Wage Rates for Male Employees

The following statements afford information as to rates of wages and hours of labour established under provincial legislation as to minimum wage standards for male workers.

Prince Edward Island

The provincial legislature in 1936 amended the Charlottetown Incorporation Act to permit the Charlottetown City Council to pass a by-law setting a minimum wage of 35 cents per hour for labourers and workmen for any work done in the city by or under a contractor or for similar work, except when managed or directed by the owner of the property on which such work was being done. A city by-law giving effect to this minimum wage law was passed in May, 1936.

New Brunswick

New Brunswick Forest Operations Act

Under the New Brunswick Forest Operations Act, 1934, a Forest Operations Commission was constituted with powers to make final decisions in labour disputes, subject to the approval of the Minister of Lands and Mines, and to fix minimum wage scales for the industry. The Act does not apply to work on Christmas trees or firewood operations. The Act permits the employment of men inexperienced or physically unfit for a full day's work at wages below the minimum rates established, if agreements approved by the Commission are signed by the employers and the men concerned.

From March 20, 1937, the Commission established, for stream driving, an average rate of wages of $3 per day and board or its equivalent in the case of piece work, but the wages paid to cooks were not to be included in determining the average rate. Foremen, book-keepers and clerks are not within the scope of the Act and their wages are not considered in determining the average. For booming and sorting, the minimum rate is 28 cents per hour without board, provided however, that where board is furnished by the employer, not more than 50 cents per day may be charged the employee.

Effective May 1, 1937, for cutting, yarding and hauling, the average wage rate paid by any employer to his employees must be at least $40 per month and board net, and the minimum rate for each employee $34 per month and board net. Wages paid to cooks and truck drivers and the amounts paid to employees for piece work are not to be included in determining the average wage.

Fair Wage Act

The Fair Wage Act, 1936, which provided that the Board of Commissioners of Public Utilities could establish fair rates of wages and the maximum hours for which such wages should be paid in any trade, was amended in 1937 to provide for a Fair Wage Board to administer the Act. The Board has established minimum wages and maximum hours for a number of individual establishments but no orders of general application in any trade have been made.

Quebec

Fair Wage Act

Under the Women's Minimum Wage Act, it was provided that no male employee might be employed at work which, in the opinion of the Minimum Wage Commission, is ordinarily and by custom performed by women, at a lower wage than that fixed by the Commission for women at such work. On September 1, 1937, the Fair Wage Act came into effect, repealing the Women's Minimum Wage Act but providing that all orders in force under that Act should be continued in force until amended or replaced by orders under the new statute. Such minimum wage orders are noted above under "Minimum Wage Rates for Female Employees in Quebec." The first order of the Fair Wage Board in October continued existing orders of the Women's Minimum Wage Board in effect until changed. A later order provided that from November 20, these minimum wage rates should be payable to male wage-earners even when not replacing female workers. The minimum wage rates shown above for female workers in Quebec are, therefore, applicable to all male employees in the industries so covered.

Wages in Forest Operations

Under the Act to Assure Reasonable Wages for Workmen engaged in Forest Operations, 1937, an order in council, approved July 3, 1937, makes it obligatory on all employers engaged in forest operations except on private lands belonging to farmers or settlers to pay to all workers a minimum wage of $45 per

(p) The weekly rates for this industry are for a week of 40 hours or more. Hourly rates are set for those working less than 40 hours in a week, these rates being 37½ cents with a minimum of $1.50 in any one day for experienced workers, from 27 cents to 37½ cents with a minimum of $1.25 in any one day for inexperienced workers and for young girls under 18 years. Time spent waiting on call for employment as required by the employer must be paid for.

(q) Weekly rates are for a week of 37½ hours or more. Hourly rates for those working less than 37½ hours are: 40 cents per hour for experienced workers, 30 to 37½ cents for inexperienced workers. A minimum of 4 hours' pay in any one day must be paid to such part time workers.

(r) In an emergency, hours may be increased to 52 hours a week, with time and one-half being paid for all work over 48 hours. In summer resorts, between June 15 and September 15, 10 hours per day, 54 hours per week is permitted, with time and one-half for all work over 48 hours in any one week.

month of 26 days, with the exception of inexperienced youths from 18 to 20 years of age, incapacitated persons and men of 60 years or over for whom the minimum is $30 per month of 26 days. It is, however, provided that in no case may the number of such men in a shanty paid less than $45 per month exceed 10 per cent of the total number of workers. The employment of any person under 18 years is prohibited. In addition to the above wage rates, board and suitable lodging must be supplied free of charge to the worker. For those on piece work, minimum prices for such work are set and they may be charged 60 cents per day for board and lodging, but all piece workers must receive at least $45 per month of 26 days in addition to board and lodging. No deduction may be made from wages for medical assistance, cots, blankets, etc., and prices for goods sold to workers are subject to regulation. Regular hours are limited to 60 per week, with time and one-quarter for overtime and time and one-half for indispensable work on Sundays except for necessary work by cooks, cookees, stablemen and carters.

Ontario

Minimum Wage Act

Under the Minimum Wage Act in effect until 1937, it was provided that wherever, as determined by the Board, any male employee replaces any female employee in any class of employment for which a minimum wage is established, such male employee must be paid at least such minimum rate. (The minimum rates established for female employees are shown above in the table of "Minimum Wage Rates for Female Employees in Ontario.")

The Minimum Wage Act, 1937, repeals the previous Act and applies to all wage-earners in any business, trade or occupation except farm workers and domestic servants, the Act to be administered by an Industry and Labour Board. No orders under the new Act were issued in 1937. The first order under this Act is that covering the cotton and wool textile industry effective from March 1, 1938. The orders under the previous Act, noted above under "Minimum Wage Rates for Female Employees in Ontario" therefore remain in effect, applying to female workers and to male workers when replacing females except after March 1, 1938, in the cotton and woolen industries.

Commercial Vehicles

The Public Commercial Vehicle Act, 1934, gives to the Lieutenant-Governor in Council power to fix minimum rates of pay for drivers of vehicles transporting goods. No rates have been fixed under this authority.

Manitoba

Minimum Wage Act

Prior to 1931, the Minimum Wage Act applied to female workers in cities only. By amendments, the scope of the Act has been extended to include all workers, male and female, in any or all offices, vocations, pursuits, trades, industries, businesses or callings. The Minimum Wage Board is empowered to recommend, and the Lieutenant Governor in Council to declare that any Order of the Minimum Wage Board or that the provisions of the Act apply to any or all industries or trades and to any other part of the Province or to the whole Province. The Act provides that when minimum wages are established for employees in any class of industry, no person of the age of 18 years or over shall be permitted to work as an employee in the industry at a rate less than 25 cents per hour except in cases where the Board has passed specific regulations providing for a different rate. The industries in which minimum rates have been established are shown in the table on a previous page under "Minimum Wage Rates for Female Employees".

Orders of the Minimum Wage Board governing manufacturing and general occupations, departmental stores and mail order houses, retail and wholesale stores and general employees apply to both male and female employees and are shown in the above mentioned table. Certain other Orders include separate wage scales for male workers or apply exclusively to male workers and these are noted below:

In the Order governing employment in hotels, restaurants, clubs, victualling houses and refreshment stands throughout the Province: in the area within the Greater Winnipeg Water District and the City of Brandon at any time, and in the City of Portage la Prairie from May to October inclusive, and in any summer resort from June to September inclusive, for male employees 18 years or over, the minimum is $12 per week or 25 cents per hour; for male employees under 18 years, $8 during the first six month period of employment in the occupation, $9 during the second six month period and $10 until such employee reaches the age of 18 years; and for bell boys of any age $8 per week; in the City of Portage la Prairie during the remainder of the year $10 per week or 21 cents per hour for male employees 18 years or over; in any other part of the Province, for male employees of 18 years and over the minimum is $10 per week or 21 cents per hour, except in places with a population of less than 1,000 where the minimum rates may be reduced by 10 per cent from November to April inclusive. Hours are limited to 10

per day, 48 per week, with one day or two half days off in the week, except for cooks and male employees over 18 years of age in hotels, for whom time worked over 48 hours must be paid for at the hourly rate specified. In hotels of 100 rooms or more, hours of such employees may not exceed 54 in a week.

The Order relating to manufacturing and general industries, as noted under "Minimum Wages for Female Employees," governs all workers in these industries throughout the Province. A separate Order is, however, in effect for boys under 18 years in the manufacturing industries in Greater Winnipeg and Brandon, which includes the work of boys in garages and filling stations, providing for the minimum wage rates of $8 per week for the first six months of employment, $9 for the second six months and $10 after one year's employment. Hours are limited to 9 per day, 48 per week. Each boy must receive one-half day off each week.

Another Minimum Wage Board Order governs the employment in cities of men performing work generally done by boys. Work generally performed by boys is stated to be delivering telegrams or other messages, hand bills or advertising matter, delivering parcels on foot or on bicycle, office boys, shining shoes, delivering newspapers, setting up bowling alley pins, and other work of a similar nature when ruled as properly coming under this Order by an Inspector of the Bureau of Labour and when employers hold a certificate by said inspector. If such work is performed by a man over 18 years of age he shall be paid at the established rate for adult workers unless such man was in the employer's service in any such occupation on March 1, 1935, or after that date reaches the age of 18 years while in the employer's service in any such occupation, in either of which cases he may be retained by the same employer until an opportunity for promotion occurs and be paid at not less than the established rate for boys for a 48 hour week, that is $8 per week during the first six months of employment, $9 during the second six months and $10 after one year's employment.

The Order also provides that for workers employed on a part-time or piece work basis, all time in which the employee is required to be available for duty must be paid for, and that such employees must be paid for at least four consecutive hours any day they are required to report for duty.

This same Order provides that duly indentured male apprentices may be paid at the wage rates stipulated in the indenture rather than the wage rates in the Minimum Wage Board Order, providing the Board approves such indenture and provided the wage rates are not less than the rates established in the industry for persons under 18 years.

Highway Traffic Act

A regulation made by the Municipal and Public Utility Board constituted under this Act provides for a minimum wage rate for drivers of public service vehicles certificated for passenger transportation of $20 per week for a 6-day week for drivers employed by the week, or $80 per month for drivers hired by the month; those employed otherwise than by the month or week to be paid at least at the same rate. If wages are proposed to be paid on any other basis than those provided for, the scale must be approved by the Board. Hours are limited to nine per day for driving, 12 per day in any capacity, with a six-day week.

Taxicab Act

This Act applies only to taxicabs in Greater Winnipeg. It limits hours on duty to 12 a day on not more than 6 days a week. A minimum wage of $17.50 per week was fixed for drivers employed by the week from February 15, 1937. For a driver employed otherwise than by the week, a minimum of $1.60 per day must be paid for each day he is on duty. If he is on duty for more than four hours on any one day, he must be paid at least $1.60 and, in addition, not less than 40 cents an hour for each hour in excess of four. From May 1, 1937, it was stipulated that a driver employed by the year or month must be paid a wage equal to what he would receive if paid by the week; that where he is hired by the week, he must be paid the prescribed minimum for the week whether he has four, five or six days of work, unless he is absent through illness or by arrangement.

Fair Wage Schedule for Public and Certain Private Construction Works in Manitoba

Under the Fair Wage Act, the Minister of Public Works (Manitoba) approved a schedule, effective June 1, 1937, and amended September 1, 1937, establishing minimum wage rates and maximum working hours for workers employed on certain public and private works. "Public work" includes work, authorized by the Minister of Public Works for which a contract or contracts have been made between the Minister and an employer, consisting of construction, including remodelling, demolition or repairing or painting of buildings in Manitoba and highway, road, bridge or drainage construction outside the Greater Winnipeg Water District. "Private work" means the building, construction, remodelling, demolition or repairing of a building or construction work for which a contract or contracts have been made exceeding $100 within the Greater Winnipeg Water District or any city or town of a population over 2,000 or any other part

of the Province to which the provisions of the Act are extended by the Lieutenant Governor in Council. The term does not include work which is done on property by or under the immediate direction and control of the owner, tenant or occupant, if no more than three men are employed in addition to the regular maintenance staff, and if such work is not undertaken with a view to the sale or rental of the property. Neither does it include work which is done by a maintenance man, or men, employed by the month. The accompanying tables show the minimum wage rates so established.

MANITOBA FAIR WAGE RATES FOR BUILDINGS AND STRUCTURES*

Occupation	Winnipeg and radius of 30 miles	Other than Winnipeg and radius of 30 miles	Maximum hours per week (a)

Over two ton to three ton capacity	1.90	1.75	48
Over three ton to four ton capacity	2.40	2.25	48

* All men hired in Winnipeg to go into the country to work on buildings shall be paid the city schedule rate excepting where other definite agreements are made.

(a) It was agreed between the Winnipeg contractors and tradesmen that 40 hours per week only be worked during July and August, 1937.

(b) For wood lathers, work may be paid for on a square yard basis at not less than 6 cents per square yard.

(c) Engineers in charge of hoisting engines of three drums or more operating any type of machine; or operating trenching machines, clamshells or orange peels, regardless of capacity; or operating steam shovels or draglines of one yard capacity or over; or operating drop hammer pile drivers; in all cases irrespective of motive power.

(d) Engineers in charge of hoisting engines having only two drums or of single drum if used on a building of three stories and over, used in handling building material; or steam shovels and draglines not specified in Class "A" hereof; irrespective of motive power.

(e) Engineers in charge of any steam operated machine not specified in class "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provisions of "The Steam Boiler Act"; or air compressor delivering air for the operation of riveting guns on steel erection work, or pumps in caissons, or concrete mixers of over 1/3 yard capacity; irrespective of motive power.

(f) Operators of gas or electric engines for machines not otherwise specified in class "A", "B" or "C" hereof, or men firing boilers of machines classified in class "A", "B" or "C" hereof or assisting engineers in charge of same.

(g) If employed on the construction or demolition of the building by owner, contractor or sub-contractor.

MANITOBA FAIR WAGE RATES FOR ROAD AND BRIDGE CONSTRUCTION

Occupation	Minimum rate per hour	Maximum hours per week
	$	
Labourers	.30	48
Teamsters	.30	48
Teamster and two horse team	.55	48
Teamster and four horse team	.80	48
Grader and tractor operators (excepting permanent municipal employees)	.60	48
Truck drivers (regardless of basis for payment for truck)	.40	48
Combined rate—truck and driver when paid by the hour—		
1 ton rated capacity	1.25	48
Over 1 ton to 2 tons	1.35	48
Over 2 tons to 3 tons	1.75	48
Over 3 tons to 4 tons	2.25	48
Combined rate—truck and driver when paid at a rate per yard mile— If a rate per yard mile is the basis for payment a minimum rate shall be fixed by the Chief Engineer of the Public Works Department for each contract, which rate shall be based on the Departmental Schedule.		
Timber men—timber work where use of hammers, saws, axes and augers only are required	.50	48

NOTE.—Men occupied on subsistence work projects such as Forestry work, The Pas-Mafeking Highway, Grassmere Drain and similar undertakings—not less than the minimum wage rate set by the Minimum Wage Board.

SASKATCHEWAN

Minimum Wage Act

By Order in Council the Minimum Wage Act has been extended to male as well as female employees. The minimum wage rates effective thereunder are shown on a previous page in Table V—Minimum Wage Rates for Female Employees in Saskatchewan.

The Coal Mining Industry Act, 1935, empowers the Lieutenant-Governor in Council to establish standards as to hours of labour and wages of persons employed in the industry, but no such regulations have been made. Hours are limited to eight in a day by the Coal Miners' Safety and Welfare Act as amended in 1932, except when otherwise agreed between employer and employee.

The Public Service Vehicles Act grants the Highway Traffic Board the power to regulate the wages and hours of drivers of public service and commercial vehicles. No regulations under this Act have been issued.

ALBERTA

Male Minimum Wage Act

The Male Minimum Wage Act, 1936, applies to all male persons engaged in any industry or business except farm labour and domestic service and is administered by the Board of Industrial Relations appointed under the Hours of Work Act, which Board is authorized to fix minimum wage rates, hours of labour, overtime pay, etc.

Until the clause was repealed in 1937, the Factories Act, 1926, provided that wherever a minimum wage had been fixed for female workers employed in factories, office buildings, shops, hotels and restaurants, no male worker (except identured apprentices) could be employed in such class of employment at a lower wage. By Order in Council of May 17, 1937, under the Male Minimum Wage Act similar provision was made for all occupations under the Act and it was stipulated further that any overtime permitted under The Hours of Work Act should be paid for at the rate of time and one-half. The Order in Council was to remain in effect only until the Board made an order fixing a minimum wage for male workers.

From October 1, 1937, an Order was made setting minimum wage rates for all adult male employees within the scope of the Act except: those employed in industries working under agreements established under the Industrial Standards Act; casual, seasonal or temporary work for employers not engaged in the industry, business, trade or occupation for which such labour is hired; and except such employees as might from time to time be declared exempted by the Board.

An order effective October 5 and amended in December made special provision as to logging and wood-working in rural districts and as to fire-fighting. The accompanying table gives the minimum rates fixed under these orders.

Public Service Vehicles Act

Under the Public Service Vehicles Act, 1936, an order of the Highway Traffic Board provided that from December 15, 1936, in the cities of Edmonton and Calgary, a driver of a taxicab or livery must be paid a minimum of $15 per week for a week of six days, or if employed otherwise than by the week, must be paid at not less than at the same rate. When taxi drivers in Edmonton were brought under an Order in Council under the Industrial Standards Act (page 156), this order of the Highway Traffic Board was amended August 4, 1937, so as to apply to Calgary only.

MINIMUM WAGE RATES FOR ADULT MALE EMPLOYEES IN ALBERTA*

Classes of employees	Wages per hour
	$
†*General Order (a)*—	
Those employed by the week or any period in excess of a week—	
Employees 21 years of age and over:	
Those with one or more years' experience in that or a similar occupation	.33⅓
Those with less than one year's experience—	
First six months	.28
Second six months	.30
Employees under 21 years of age:	
Those with two or more years' experience in that or a similar occupation—	
First six months	.28
Second six months	.30
After one year	.33⅓
Those with less than two years' experience in that or a similar occupation—	
First year	.20
Second year	.23
Those employed in any other manner than by the week or any period in excess of a week—	
Employees 21 years of age and over:	
Those with one or more years' experience in that or a similar occupation	.40
Those with less than one year's experience—	
First six months	.30
Second six months	.35
Employees under 21 years of age:	
Those with two or more years' experience in that or a similar occupation—	
First six months	.30
Second six months	.35
Those with less than two years' experience in that or a similar occupation—	
First year	.23
Second year	.25
Special Order re Woodworking, Etc., in Rural Districts (b)—	
Employees in sawmills, box factories, woodworking, logging and tie-cutting: *(c)*	
Those with one or more years' experience	.28
Those with less than one year's experience	.25

* Minimum wage rates for certain classes of workers under the Industrial Standards Act are included in the next section on "Wages and Hours of Labour under Collective Agreements, Schedules, etc.".

† For exceptions, see accompanying text.

(a) If employed by the week or longer period, not less than 42 hours to be paid for; if employed for 4 hours or less, not less than 4 hours to be paid for at 40 cents per hour.

(b) If employed for 4 hours or less, to be paid for 4 hours at not less than 30 cents per hour.

(c) In rural districts more than 10 miles from any city or in towns or villages of less than 1,000 population. The order also applies to forest and prairie fire fighting. If board and lodging are furnished by employer, not more than 75 cents per day or 25 cents per meal may be charged. On January 19, 1938, the minimum hourly wage-rates for these workers were rescinded and a minimum monthly rate of $30, plus board and lodging, to all employees whether paid by the time or by the piece was established. Forest and prairie fire fighting are not mentioned in the new order.

British Columbia

Minimum Wage Acts

The Female Minimum Wage Act of 1934 provides that where a minimum wage has been fixed for employees in any industry, business, trade or occupation, no male person over 18 years of age may be employed in work usually done by female employees at less than the minimum wage fixed for such female employees. Similarly where a rate has been fixed for female employees under 18 years of age, no male employee under 18 years may be employed at a lower wage. The table showing minimum rates for female employees in British Columbia is given above.

Under the Male Minimum Wage Act of 1934 (Labour Gazette, June, 1934, page 510; June, 1935, page 523; December, 1936, page 1129), minimum rates of wages in various industries and occupations have been established by the Board of Industrial Relations. This Act applies to all employees and their employers in any industry, business, trade or occupation except farm labourers and domestic servants. In the case of handicapped, part-time and apprenticed employees, the Board may authorize the payment of a wage less than the fixed minimum rate, and also may limit the number of such employees to whom wages lower than the minimum may be paid. The following table shows rates in effect under regulations made under the Male Minimum Wage Act:—

MINIMUM WAGE RATES FOR MALE EMPLOYEES IN BRITISH COLUMBIA*

Industry	Wages per hour
	$
Logging Industry (includes the cutting of poles, ties, shingle-bolts, mining-props and piles, and all operations in or incidental to driving, rafting and booming) *(a)*:	
Cook and bunk-house occupations	2.75 per day
Making of shingle bolts (felling, bucking and splitting)	1.30 per cord
Grade and track occupations—	
East of Cascade Mountains and that portion of the basin of the Skeena River lying east of the mouth of and including the Khyex River	.35
Rest of the province	.37½
All other employees—	
East of Cascade Mountains and that portion of the basin of the Skeena River lying east of the mouth of and including the Khyex River	.35
Rest of province	.40
Sawmill Industry (includes sawmills and planing mills): *(a)*	
Male persons 21 years or over *(b)*	.40
Male persons under 21 years	.30
Shingle Industry (excludes shingle-bolt operations)	.40
Box Manufacturing Industry (wooden boxes, barrels, kegs, casks, tierces, pails and other wooden containers):	
Male persons 21 years or over *(b)*	.35
Male persons over 18 and under 21 years of age	.25
Male persons under 18 years	.20
Woodworking Industry (includes the making of sash and doors, cabinets, show cases, office and store fixtures, wood furniture, wood furnishings, veneer products and general millwork): *(k)*	
Male persons 21 years and over	.40
Male persons over 18 and under 21 years of age	.30
Male persons under 18 years	.25
Household Furniture Manufacturing Industry: (l)	
Male persons 21 years and over	.40
Male persons 20 years of age	.35
Male persons 19 years of age	.30
Male persons 18 years of age	.27½
Male persons 17 years of age	.25
Male persons under 17 years of age	.20
Baking Industry (manufacture and delivery of bread, biscuits and cakes):	
Male persons, 21 years and over	.40
Male persons of 18 years of age	.25
Male persons of 19 years of age	.30
Male persons of 20 years of age	.35
Fruit and Vegetable Industry (includes all canning, preserving, drying, packing, etc., of any kind of fruit, vegetable or seed): *(c)*	
Tomato Canning (between September 2, and September 30, 1937)—	
Male persons 21 years and over	.38 (minimum of $1.14 in any one day)
Male persons under 21 years	.28 (minimum of 84 cents in any one day)
All other canning, preserving, drying, packing, etc.—	
Male persons 21 years and over:	
Hours up to 10 hours in any one day	.38
Hours in excess of 10 and up to 12 hours in any one day	.57
Hours in excess of 12 hours in any one day	.76
Male persons under age of 21 years:	
Hours up to 10 hours in any one day	.28
Hours in excess of 10 and up to 12 hours in any one day	.42
Hours in excess of 12 hours in any one day	.56
Construction Industry:	
In Vancouver, Victoria, New Westminster, Nanaimo, Prince Rupert, Esquimalt, Oak Bay, Saanich, West Vancouver, Burnaby and North Vancouver:	
Male persons, 21 years and over	.45
Male persons over 18 and under 21 years of age	.35
Rest of province:	
Male persons 21 years and over	.40
Male persons over 18 and under 21 years of age	.30
Carpentry Trade (except indentured apprentices), (construction or alteration of buildings and structures), in Victoria and defined district in southerly part of Vancouver Island	.70
Shipbuilding (e):	
Male persons 21 years and over employed as ship-carpenters, shipwrights, joiners, boat builders, or wood-caulkers	.67½
All other male persons 21 years and over	.50
Male persons under 21 years *(e)*	.25

MINIMUM WAGE RATE FOR MALE EMPLOYEES IN BRITISH COLUMBIA*—*Continued*

Industry	Wages per hour
	$
Transportation Industry (other than by rail, water or air and excluding passenger transportation):	
Male persons of any age: *(f), (j)*	
Operators of motor-vehicles of 2,000 pounds net weight or over and of horse-drawn vehicles (other than bread or milk retail deliverymen):	
Week of not less than 40, and not more than 50 hours	.40
Week of less than 40 hours	.45
For every hour in excess of 50 and up to and including 54 hours per week	.60
Operators of motor-vehicles of less than 2,000 pounds net weight (other than bread or milk retail delivery-men and motor-cycle drivers):	
Week of not less than 40 and not more than 50 hours	.35
Week of less than 40 hours	.40
For every hour in excess of 50 and up to and including 54 hours per week	.52½
Motor-cycle operators:	
Week of not less than 40, not more than 48 hours	.25
Week consisting of less than 40 hours	.30
Bicycle riders and foot messengers employed exclusively on delivery or messenger work (but not those employed exclusively by wholesale or retail trade establishments):	
Week of not less than 40 and not more than 48 hours	.17
Week of less than 40 hours	.20
Swampers and helpers:	
Week of not less than 40 and not more than 50 hours	.35
Week of less than 40 hours	.40
For every hour in excess of 50, up to and including 54 hours per week	.52½
Drivers of retail milk or bread delivery vehicles	.40
Drivers of horse drawn vehicles other than retail delivery of bread and milk:	
Week of not less than 40 and not more than 50 hours	.40
Week of less than 40 hours	.45
For every hour in excess of 50 up to and including 54 hours per week	.60
Bus Drivers in Victoria, Esquimalt, Oak Bay and Saanich:	
Male persons of any age in charge of or driving motor vehicle with seating accommodation for more than 7 passengers used as a public conveyance for which service a charge is made—	
Week of not less than 40 and not more than 50 hours	.45
Week of less than 40 hours	.50
Every hour in excess of 9 hours in any one day or 50 hours in any one week	.67½
Taxicab Drivers of any age in Vancouver, Victoria, Esquimalt, Oak Bay and Saanich *(j)*	2.75 per day
Mercantile Industry (wholesale and retail establishments): *(g)*	
Male persons, 21 years and over, for week of 37½ hours or more	15.00 per week
Male persons, 21 years and over, for week of less than 37½ hours	.40 (minimum of 1.60 in any one day)
Male persons 21 years and under 24, inexperienced or partly experienced, with permit from the Board, for week of 37½ hours or more	9.00 per week 1st 6 months to 13.00 per week 3rd 6 months
Male persons, 21 years and under 24, inexperienced or partly experienced, with permit from the Board, for week of less than 37½ hours	.24 1st 6 mths. to .35 3rd 6 months (minimum of .95 in any day 1st 6 months to 1.40 in any day 3rd 6 months)
Male persons, 18 and under 21 years, inexperienced or partly experienced, with permit from the Board, for week of 37½ hours or more	8.00 per week 1st year to 13.00 for 3rd year.
Male persons, 18 and under 21 years, inexperienced, or partly experienced, with permit from the Board, for week of less than 37½ hours	.21 1st year to .35 for 3rd year (minimum of .85 in any day 1st year to 1.40 in any day 3rd year).
Male persons, 18 and under 21 years employed not more than 5 days a month	.30 (minimum of 1.20 in any day)
Male persons commencing under 18 years, for week of 37½ hours or more	6.00 per week if under 17 years to 13.00 for age 20
Male persons commencing under 18 years, for week of less than 37½ hours	.16 if under 17 years to .35 for age 20 (minimum of .65 in any day if under 17 years to 1.40 in any day for age 20)

MINIMUM WAGE RATES FOR MALE EMPLOYEES IN BRITISH COLUMBIA*—*Concluded*

Industry	Wages per hour
	$
Stationary Steam Engineers (i):	
With certificate of competency under Boiler Inspection Act, where required	.50
With special or temporary certificate or where certificate of competency not required	.40
Barbering (excludes those employed in beauty-parlours or hairdressing shops while working on women or children only):	
Week of 40 hours or more	18.00 per week
Week of less than 40 hours	.45 (minimum of $1.80 in any one day)
Elevator Operators:	
Male operators over the age of 18 years:	
Week of 40 hours or more	14.00 per week
Week of less than 40 hours	.37½ (minimum 1.50 in any one day)
First Aid Attendants (male) of any age with certificate of competency (assistant first aid attendants to be paid *pro rata*):	4.00 per day *(d)*
Janitors (including janitors, janitor-cleaners or janitor-firemen):	
Janitor on premises, apartment building of 48 suites or more *(h)*	125.00 per month
Janitor residing on premises, apartment building of 23 to 47 suites *(h)*	75.00 to 123.00 per month *(m)*
Janitor residing on premises, apartment building of 5 to 21 suites *(h)*	22.00 to 73.00 per month *(n)*
All other janitors	.37½

* The orders do not apply to apprentices indentured under the Apprenticeship Act.

(a) Watchmen employed in camps where operations are entirely suspended are exempt from these minimum wage orders. In British Columbia Census Division No. 1 (southeast mountain area) a maximum sum of $1.25 per day for board and lodging may be deducted from wages.

(b) A number not exceeding 10 per cent of the total number of employees over 21 years of age may be employed at less than the minimum rate, but at not less than 30 cents per hour in the sawmill industry and 25 cents in the box manufacturing industry.

(c) The number of male persons paid at wage rates less than the minimum for male persons over 21 years shall not exceed 15 per cent of the whole number of male employees of any age.

(d) A minimum of 50 cents per hour for overtime pay.

(e) Male persons under 21 years may be paid a minimum of 25 cents, providing the number receiving less than the regular minimum rates does not exceed 10 per cent of the total number of male employees of any age.

(f) If vehicle is provided by the employee, all reasonable costs of operation are to be paid by the employer. Waiting time is to be paid for at regular rates.

(g) Where the employee provides his own bicycle, all reasonable costs of operation while used in the employer's service are to be paid by the employer.

(h) Not more than $20 per month may be deducted from wages as rent for a suite of 2 rooms and bath, not more than $5 for each additional room with a maximum of $25 per month; not more than $4 per month may be deducted for electricity and gas where no meters are installed.

(i) This order does not apply to steam engineers in apartment buildings who are to receive wages not less than those fixed for janitors.

(j) Uniforms, if required, are to be furnished free of charge by the employer.

(k) From November 15, 1937, the total number of male employees receiving less than 40 cents per hour in any establishment may not exceed one third of the total number of male employees in the establishment.

(l) The total number of male employees receiving less than 40 cents per hour in any establishment may not exceed 40 per cent of the whole number of employees in the establishment.

(m) $73 for 22 suites with increase of $2 per month for each additional suite up to 47 suites.

(n) $22 for 5 suites with increase of $3 per month for each additional suite up to 21 suites.

Wages and Hours of Labour Under Collective Agreements and Schedules of Wages and Hours Made Obligatory by Orders in Council in Certain Provinces

In certain provinces, legislation provides that the wage rates and hours of labour agreed upon by representatives of employers and workers in a trade or industry for a locality, district or the whole province may be made obligatory on all employers and employees concerned by Order in Council on the recommendation of the Minister in charge of the administration of labour legislation. Such rates of wages and hours of labour are noted below and are applicable to both male and female workers unless otherwise stated.

Nova Scotia

Industrial Standards Act of Nova Scotia

This Act, which was summarized in the Labour Gazette, July, 1936, page 604 with amendments in Labour Gazette, August, 1937, page 861 is similar to the Industrial Standards Act of Ontario as noted below. It is, however, restricted to the building and construction industry in Halifax and Dartmouth, excluding government and municipal employees and any employee performing temporary work the total amount of which does not exceed $25.

Four schedules were made binding by Orders in Council under this Act, September 1, 1936, (Labour Gazette, September, 1936), and were still effective at the end of the year 1937. The wage rates and hours so in effect are as follows:

—	Minimum hourly wage rate	Hours per week
	$	
Bricklayers	.97½	44
Carpenters	.60	44
Electrical workers	.80	44
Plumbers and Steamfitters	.75	44

Provision is made in all schedules for extra pay for overtime.

Quebec

Workmen's Wages Act

The text of this Act, which replaces the Collective Labour Agreements Extension Act, was summarized in the Labour Gazette, July, 1937, page 745. Under this Act any party to a collective agreement made between the representatives of an association of employees and the representatives of an association of employers or one or more employers may apply to the Lieutenant Governor in Council through the provincial Minister of Labour to have those terms of such agreement which govern wages, hours of labour, apprenticeship, classification of operations, determination of classes of employers and employees and all such provisions as the Lieutenant Governor in Council may deem in conformity with the spirit of the Act, made obligatory on all employers and employees in the trade, industry, commerce or occupation within the district determined in the agreement. Notice of such application is published, and thirty days is then allowed for filing of objections and the Minister may hold an inquiry. After this period if the Minister considers that the terms of the agreement "have acquired a preponderant significance and importance" and that it is advisable, with due regard to economic conditions, an Order in Council may be passed granting the application, and making the provisions of the agreement obligatory from the date of publication of the Order in Council in the *Quebec Official Gazette*. The agreement may be amended through the same procedure. The agreements under this Act are enforced within the industry itself by joint committees composed of representatives of both employers and employees. Proceedings under the Collective Labour Agreements Extension Act were summarized in the Labour Gazette from June, 1934, to July, 1937; proceedings under the Workmen's Wages Act in the issues beginning July, 1937.

The wages and hours in effect under agreements so made obligatory in various industries in the whole or part of the Province are noted below.

Iron Oxide Mining.—All mines now producing iron oxide (ochres) in the province of Quebec are covered by an obligatory agreement. (Labour Gazette, December, 1937.) Minimum hourly wage rates are 32½ cents for workers working in the mines, 35 cents for those working in the establishments and 42½ cents for millers. Hours are limited to 48 per week.

Baking Industry.—Agreements approved by Order in Council as to wages and other working conditions in this industry provide for the following minimum weekly wage rates and maximum hours: Quebec City and Levis—bakers $20, foremen bakers $23, apprentices $7, salesmen $16. Hours for bakers 65 per week (Labour Gazette, December, 1937). Three Rivers—bakers $15 to $22, apprentice bakers $5 to $10; delivery salesmen $9 plus commission (Labour Gazette, February, April and October, 1935, January and March, 1936). Sherbrooke—bakers $13 to $20, apprentices $6 (Labour Gazette,

March, 1935). Montreal—bakers $18 to $22, helpers $15, apprentices $10 to $12, with a 60 hour week; salesmen $15 (Labour Gazette, February, 1937). Sorel—bakers $12 to $18 with a 60 hour week; salesmen $12 (Labour Gazette, September, 1937). Hull—bakers $12 to $28, confectioners $20, apprentices $6 to $12; hours 60 per week; salesmen $12 (Labour Gazette, June and October, 1935).

Butcher Shops.—One agreement is in effect under an Order in Council for butchers in the city of Sorel and the village of St. Joseph de Sorel. Hours are limited to 48 per week and the minimum wage rate for journeymen butchers is 35 cents per hour; apprentices may be paid 10 cents per hour during first year, 15 cents during second year and 20 cents during third year. (Labour Gazette, August, 1937.)

Shoe Manufacturing.—A new agreement was made covering both male and female employees in the boot and shoe manufacturing industry throughout the province (Labour Gazette, October, 1937). Employees are divided into six trade classes according to the skill required for the operation. Minimum hourly wage rates for each class and for the apprentices to the first four classes are as follows:

Class	Minimum Wage Rate Per Hour Zone I	Zone II	Zone III
I	·55	·52½	·48
Apprentice	·33	·31	·29
II	·45	·42½	·39
Apprentice	·26	·25	·23
III	·35	·33	·31
Apprentice	·21	·20	·18
IV	·25	·24	·22
Apprentice	·18	·17	·16
V	·18	·17	·16
VI	·13	·12½	·11½

Minimum wage rates for women or men who take the place of women employees on an operation not mentioned in the classified list of operations are as follows:

	Minimum Weekly Wage Rates Zone I	Zone II	Zone III	Zone IV
20% of female employees	$ 7.00	$ 6.00	$ 6.00	$ 6.00
15% of female employees	9.00	8.00	7.50	7.00
65% of female employees	11.00	10.00	9.50	9.00

Fur Industry, Montreal and District.—An Order in Council which was summarized in the Labour Gazette, June and November, 1936, provides for the following minimum weekly wage rates in the district comprising the Island of Montreal and the area within 50 miles of it: Cutters—first class $35, second class $28; operators (male)—first class $28, second class $20; operators (female)—first class $20, second class $15; finishers (female)—first class $18, second class $14; apprentice cutters, trimmers, blockers and nailers—first class $20, second class $12; examiners—first class $24, second class $12; finishers (male)—first class $24, second class $20. Hours: 40 per week on the Island of Montreal and a radius of 10 miles from its limits and in the rest of the district for establishments with more than three workers; 48 per week in the area within a radius of 40 miles of the first area for establishments with three workers or less.

Glove Manufacturing (Fine Gloves) Province of Quebec.—The agreement approved by Order in Council for this industry covers the entire province. (Labour Gazette, June, 1937). Hours are limited to 49 per week. Wages are fixed on a piece rate basis. From October 1, 1937, these rates were increased 10 per cent over the previous rates. In towns of population of less than 15,000 the minimum piece rates are 15 per cent lower than in the larger centres.

Glove Manufacturing (Work Gloves) Province of Quebec.—This agreement was summarized in the Labour Gazette, August, 1937, page 920. Maximum hours are reduced to 44 per week and an increase was made in the piece rates of 15 per cent over the previous scale.

Men's, Boys', Youths', Children's and Juveniles' Clothing Industry, Province of Quebec.—This industry throughout the Province is covered by an agreement made obligatory by Orders in Council, the last one coming into effect November 20, 1937 (Labour Gazette, December). (The manufacture of shirts, overalls, mackinaw coats, etc., is not included in the agreement.) The province is divided into three zones: Zone I is the Island of Montreal and the area within 10 miles of its limits, Zone II is the area within 75 miles of the boundaries of Zone I, Zone III is the rest of the province. The hours are 44 per week in Zone I and 48 hours in Zones II and III; overtime pay is time and one-half in Zone I and time and one-quarter in Zones II and III.

Piece work rates may be fixed instead of hourly rates, provided that such rates do not yield less than the hourly rates established in this agreement.

In the coats, pants and vests departments, class AA consists of skilled cutters in all three departments; class A, of head operators and shape sewers or underbasters by machine in the coat department and pocket makers and tape sewers in the vest department; class BB, of pocket makers and skilled trimmers in the coat department, back and front pocket makers, trimmers and seamers in the pants department and skilled trimmers and second operators in the vest department; class B, of fitters and

off-pressers in the coat department, leg pressers in the pants department and off-pressers in the vest department; class C, of edge basters, second basters, shapers and top collar makers in the coat department and lining stitchers in the pants department; class D, of examiners, joiners, second operators, lining makers and pocket tackers in the coat department, lining sewers and top pressers, cloth waistband sewers in the pants department, fitters in the vest department; class EE, of steam machine pressers and underpressers in the coat department and general underpressers in the vest department; class E, of choppers, lining basters, machine edge basters and undercollar basters in the coat department, pocket makers and outside seamers on boys' shorts and bloomers and juvenile pants, lining sewers and attachers on boys' shorts and bloomers and juvenile pants in the pants department; class FF, of underpressers in the pants department; class F, of armhole basters, buttonhole makers, lapel makers, sleeve makers in the coat department, buttonhole makers, fitters, inside seamers on boys' shorts and bloomers and juvenile pants and trimming makers in the pants department, buttonhole makers, basters, lining makers and vee sewers in the vest department; class G, of bottom of collar and leaf of collar fellers, canvas basters, canvas makers, coat finishers, general hands, inside coat tackers, button sewers in the coat department, button sewers, examiners, finishers, fly makers, loop makers, pocket sergers and tackers in the pants department, brushers, button sewers, examiners, finishers, general hands, ticket sewers in the vest department; class H, of buttonhole tackers, fellers of bottom of sleeve linings, pocket closers, sleeve lining tackers and basters, ticket pocket makers in the coat department, buttonhole tackers and cleaners in the pants department and buttonhole tackers and cleaners in the vest department; class K, of basting pullers (male).

Women's Cloak and Suit Industry, Province of Quebec.—The Order in Council approving the agreement for this industry governs conditions throughout the Province in the production, for women and girls over 14 years, of cloaks, coats, suits and of woollen skirts (Labour Gazette, October, 1937). The hours are 40 per week.

The following minimum wage rates apply to these occupations:—

Class	Wages per hour
	cents
Fully skilled cutters	80
Semi-skilled cutters	55
Trimmers	60
Fur tailors	65
Assistant fur tailors	44
Button sewers, general hands and examiners	34

In the following crafts, work may be done on a piece work or time work basis, but in either case the following minimum wage rates will apply:—

Class	Wages per hour
	cents
Skilled operators (male)	80
Skilled operators (female)	64
Section operators (male or female)	80
Top pressers	80
Machine pressers	80
Under pressers	75
Piece pressers	45
Lining makers	42
Finishers	42
Skirt makers	42
Machine basters, hand basters and special machine operators	44
Semi-skilled operators (male)	55
Semi-skilled operators (female)	49½

The Joint Committee may determine a special rate for employees whose production is under normal.

Apprentices are limited to 5 per cent of the number of those employed in an establishment. Apprentice operators, pressers and cutters to start at $7 per week, with advances every six months to a minimum of $22 at the end of three years.

Dress Cutters, Province of Quebec.—The obligatory agreement for this trade (Labour Gazette, October, 1936), covers throughout the province of Quebec, the cutting departments of manufacturers, contractors, jobbers and retailers engaged in the production of women's and misses' dresses, dress ensembles, blouses, etc., and all separate skirts not included in the cloakmakers agreement, but does not include smocks, aprons, uniforms, etc. Hours are limited to 44 per week. Minimum weekly wage rates: cutters $30, choppers $20, apprentices $15. The number of apprentices is limited to 20 per cent of total employees.

Women's and Children's Millinery Industry, Montreal and District.—The agreement approved by Order in Council for this industry (Labour Gazette, August, 1935, March, 1936 and June, 1937) covers the Island of Montreal and an area within a distance of 50 miles from its limits. Hours are 40 per week. Wages per week for qualified operators are: hand blockers $32; straw operators, fabric operators, blockers and cutters $29; drapers $20, draper-trimmers $17, trimmers $15. Workers not yet qualified may be paid at rates fixed by the Joint Committee until they are qualified, but not more than 25 per cent of employees in a certain class of work in any establishment may be paid at less than the above minimum rates.

Printing Trades, Quebec and Chicoutimi.—The Order in Council extending an agreement as to wages and working conditions in the printing trades in the judicial districts of Quebec, Beauce and Montmagny (Labour Gazette, November, 1935) provides for a 48-hour week for day work and a 45-hour week for night work. Minimum wage rates in the judicial district of Quebec for journeymen typographers, pressmen, stereotypers and bookbinders: $25 per week for day work and $27 for night work. In the judicial districts of Beauce and Montmagny these rates may be reduced 15 per cent.

For the judicial districts of Chicoutimi, Lake St. John, Roberval and Charlevoix-Saguenay, the Order in Council (Labour Gazette, November, 1936) provides for a 40-hour week. The minimum wage rate for journeymen typographers, pressmen, bookbinders and stereotypers is 52 cents per hour, with a 10 per cent reduction on this rate for work in municipalities of a population of less than 2,000.

Printing Trades, Montreal and District.—The Orders in Council covering the printing trades with the exception of work on daily newspapers and certain work in job offices (duplicating, etc.), in Montreal and district, which were summarized in the Labour Gazette, June and December, 1936, and November, 1937, include in their jurisdiction the Island of Montreal and the area within 100 miles of its limits. It is divided into four zones, of which Zone I comprises the Island of Montreal and within 10 miles of its limits, Zone II the municipalities of Three Rivers, Sherbrooke, Sorel, St. Hyacinthe, Valleyfield, Joliette, Granby, Saint Jean d'Iberville, Laprairie, St. Jerome and within 2 miles of their limits, Zone III

the remainder of the area, and Zone IV is made up of establishments owning and printing a weekly or semi-weekly newspaper in the territory comprising Zones II and III. The hours are 48 per week. Minimum weekly wage rates are shown in the accompanying table.

Furniture Industry, Province of Quebec.—The Order in Council making obligatory the agreement in this industry throughout the province is summarized in the Labour Gazette, December, 1937. The province is divided into four zones: zone I is the Island of Montreal and within 15 miles of it; zone II, municipalities of a population of 3,000 or more in the rest of the province except the county of Chicoutimi and establishmens with 50 workers or less in any part of the province outside of zone I; zone III is the rest of the province; zone IV covers the manufacture of summer furniture made of wood assembled by nuts and bolts and using textiles in their manufacture. The latest agreement (Labour Gazette, December, 1937) provides for certain increased wages in November and further increases from January 1, 1938. Hours are limited to 55 per week except for shippers, maintenance and repair men.

MINIMUM HOURLY WAGE RATES IN THE FURNITURE INDUSTRY FROM JANUARY 1, 1938

—	Zone I	Zone II	Zones III and IV
	cents	cents	cents
10% of employees	45	40	36
A further 10% of employees.	40	35	30
" 60% " ..	35	30	25
" 7% " ..	28	25	20
" 7% " ..	22	20	16
Remaining 6% " ..	18	15	12

Until May 31, 1938, female employees, although included in the general schedule in effect before December 31, 1937, are to be paid at least the following minimum rates: in Montreal and the Island of Montreal and within 10 miles of it, 14½ cents per hour during first year, 19 cents during second year, 23 cents after two years; in the rest of the province, 12½ cents during first year, 17 cents during second year and 21 cents after two years. From June 1, 1938, female workers to receive the same wage rates as men for the same work, and to be included in the general wage schedule shown above.

Aluminum Smelting Industry.—This industry, consisting of plants at Arvida and Shawinigan Falls only, is governed by an agreement for each of the two plants (Labour Gazette, November, 1937) and provides as regular hours for an 8 hour day, averaged over the regular working days of each calendar month.

Minimum hourly wage rates for a few of the many classes of work at Arvida; bricklayers 75 cents, machinists 65 cents, mechanics (general maintenance) 60 cents, millwrights 60 cents, millwrights' assistants 50 cents, electricians 60 cents, pipefitters 55 cents, carpenters 55 cents, head potmen's assistants 55 cents, pot-

men 49 cents, carbon changers 51 cents, cranemen 47 cents, analysts from 35 cents during first year to 45 cents during third year, construction labourers 40 cents, general labourers 45 cents.

Minimum hourly wage rates for a few classes at work at Shawinigan Falls: head potmen's helper 54 cents, potmen 48 cents, tapper 52 cents, cranemen 48 cents, wire drawer 48 cents, pourer, catcher, electrician and millwright 46 cents, labourer and sweeper 40 cents.

Ornamental Iron and Bronze Industry (Shop Work), Quebec and Montreal Districts.—In the city of Quebec and neighbouring counties (Labour Gazette, December, 1937), hours are limited to 50 per week. Minimum hourly wage rates for this district are 50 cents for mechanics, 40 cents for adjusters and 30 cents for helpers in the city of Quebec and Levis and within 10 miles of their limits and in Thetford Mines; in the rest of the district, 42½ cents for mechanics, 34 cents for adjusters and 25½ cents for helpers.

In the Island of Montreal and neighbouring counties (Labour Gazette, August and December, 1937), hours are limited to 44 per week. Minimum hourly wage rates for this district are 66 cents for mechanics, 55 cents for fitters and 45 cents for helpers.

Granite, Marble and Stone Industry, Province of Quebec.—The agreement for this industry includes both quarrying and cutting throughout the Province (Labour Gazette, June and September, 1937).

Maximum hours are: for granite cutting, a 45 hour week for granite cutters, 44 hours for blacksmiths working in granite cutting plants, 50 hours for blacksmiths in quarries, all other trades including surface machine operators and quarrymen, 50 hours per week; for marble cutters, stone cutters and their apprentices, a 44 hour week; for all others engaged in the marble and stone cutting industry, 55 hours per week.

Minimum hourly wage rates for certain classes of work in the granite industry: granite cutters 70 cents in the cities of Montreal, Quebec, Three Rivers and Sherbrooke and 60 cents in the rest of the province; blacksmiths, machine polishers, surface machine operators in the granite industry 50 cents, carborundum machine operators, crane operators in granite industry 45 cents, granite quarrymen 40 cents, labourers 30 cents.

Certain minimum hourly wage rates in the marble industry: marble cutters 60 cents, apprentice cutters from 25 to 50 cents, carborundum machine operators 50 cents (apprentices 35 to 45 cents), millwrights 40 cents, sawyermen and cranemen 40 cents, hand polishers 35 cents.

Certain minimum hourly wage rates in the stone industry: stone cutters 60 cents, apprentice cutters 20 to 50 cents, planermen 45 cents, apprentice planermen 35 and 40 cents, carborundum machine operators 40 cents, stone turners 45 cents, sawyermen 40 cents, cranemen 40 cents, helpers 30 cents.

Stevedoring, Montreal and Sorel.—At Montreal (Labour Gazette, June, 1937) an agreement covers longshoremen, checkers and coopers loading and unloading vessels engaged in inland and coastal navigation except the handling of grain and provides for wage rates of 45 cents per hour for day work, 46 cents for evening work and 48 cents for night work. At Sorel (Labour Gazette, August, 1937), all longshoremen work is included in the agreement which provides for the following hourly wage rates: for loading grain 50 cents for day work, 60 cents for evening work and 70 cents for night work; for unloading grain out of lake and ocean steamers into the elevator 45 cents for day work, 48 cents for evening work and 55 cents for night work; for handling dynamite 60 cents; for general cargo 50 cents. Both ocean and inland and coastal navigation are included in the Sorel agreement.

Taxicab Service and Trucking, Sorel.—The obligatory agreement for these workers in the city of Sorel (Labour Gazette, August, 1937) provides for a maximum of 10 hours work per day, 60 per week, with no work for truck drivers on Sundays or holidays. Taxi drivers to be paid 25 per cent of money taken in, and truck drivers 40 cents per hour, with a minimum of $15 per week for both, whatever the hours worked. The minimum weekly wage for private chauffeurs is $18.

Office and Clerical Work (Offices and Shops), Jonquière, Kenogami, St. Joseph d'Alma and Arvida.—Male clerks, bookkeepers, stenographers, etc., employed in financial, industrial and commercial establishments in these four towns of the Lake St. John and Chicoutimi districts are under an obligatory agreement which provides for a 44 hour week, except in retail stores where 63 hours is permitted and in restaurants. Minimum weekly wage rates in all except retail stores include

$45 for manager, $37.50 for assistant manager, $35 for accountants; clerks, stenographers and typists from $10 to $22 during first four years and $25 after four years in financial and industrial establishments and municipal service, from $7 to $18 during first four years and $22 after four years in commercial establishments (other than retail). Minimum weekly wage rates in retail commercial establishments: $35 for manager, $25 for accountant, bookkeeper and cashier, from $7 to $22 for salesmen (male) during first six years and $30 after ten years, from $7 to $15 for delivery workers during first three years and $18 during fourth year. (Labour Gazette, December, 1937.)

Blacksmithing.—An agreement for horseshoers and wheelwrights (Labour Gazette, December, 1937) effective in Victoriaville and the counties of Arthabasca, Nicolet, Richmond Megantic, Wolfe and Drummond provides for qualified workmen a minimum of $12 per week, $2.25 per day; for apprentices $6 per week in first year, $9 during second year.

Shoe Repairing.—Two agreements are in effect by Order in Council. For the Island of Montreal (Labour Gazette, August, 1937) hours are limited to 64 per week, with minimum weekly rates of $12 for finishers and $15 for experienced workmen, except for four winter months when the corresponding rates are $9 and $10. For Victoriaville and vicinity (Labour Gazette, September, 1937), hours are as determined by municipal by-law. Minimum wage rates are $10 per week for finishers and $12 for other experienced workers, except in four winter months when the corresponding rates are $7.50 and $8.

Barbers.—Agreements made obligatory by Orders in Council in the barber or the barber and hairdresser trades cover several districts. The hours vary in the several localities, each agreement specifying the time shops are to be open with periods off for each employee. Piece or job rates for each piece of work in the barbering, hairdressing, manicuring trades, etc., are specified in the agreements. For barbers employed by the week, the agreements specify a minimum weekly wage and in addition provide that barbers receive a certain percentage of their individual receipts above a specified amount taken in during the week. The following minimum wage rates for barbers and hairdressers are payable in the following centres and in their surrounding districts:

MINIMUM WEEKLY WAGE RATES FOR BARBERS AND HAIRDRESSERS

Winter months	12.00	20.00*e*	.....

(a) Towns of Chicoutimi, Arvida, Bagotville, Port Alfred, Grand-Baie, Jonquière, Kenogami and Ste. Anne de Chicoutimi.

(b) Journeymen barbers $12 during first year, $15 with two years' experience, plus 10 per cent of gross receipts.

(c) Or $18 without commission.

(d) And Cap de la Madeleine, Pointe du Lac, Yamachiche, Louiseville, Champlain, Bastican and St. Anne de la Pérade.

(e) 65 per cent of receipts over this amount.

Building Trades.—The agreements in the building trades in various sections of the province, which have been made obligatory by Orders in Council, have been summarized in the Labour Gazette during 1934, 1935, 1936 and 1937. In most cases the agreements cover specified sections of the province, each comprising several counties as well as the principal cities and towns. With the exception of six rural counties in or adjoining the Gaspé Peninsula and four in the Eastern Township section, the whole province is now covered by building trades agreements. The minimum wage rates for the principal trades, which were in effect at the end of the year 1937 under Orders in Council are shown in the accompanying table.

The agreements in many cases also specify minimum weekly rates, lower than the standard hourly rates, for workmen permanently employed on maintenance work for religious, charitable or educational institutions, hotels, office buildings and manufacturing or industrial establishments. These weekly rates are not shown in the table. Minimum wage rates for apprentices which are set in many of the agreements are also omitted from this table.

(b) And municipalities of 5,000 or more.

Ontario

The Industrial Standards Act

The Industrial Standards Act of Ontario, the text of which was printed in the Labour Gazette, June, 1935, page 534, with amendments in the issue of May, 1936, page 410, and May, 1937, page 505, provides that the Minister of Labour for Ontario may, upon petition of representatives of employees or employers in any industry, convene or authorize an officer to convene a conference or series of conferences of employees and employers in the industry, in any zone or zones to investigate the conditions of labour and practices in such industry and to negotiate standard rates of wages and hours of labour. The employees and employers in attendance may formulate and agree upon a schedule of wages and hours of labour for all or any class of employees in such industry or district. If, in the opinion of the Minister, a schedule of wages and hours for any industry is agreed upon in writing by a proper and sufficient representation of employees and of employers, he may approve of it, and upon his recommendation, the Lieutenant-Governor in Council may declare such schedule to be in force "during pleasure" or for the period, not exceeding twelve months, stipulated in the schedule, and thereupon such schedule is binding upon every employee or employer in such industry in the whole or any part of the Province designated by the Minister and is published in *The Ontario Gazette*. The Industry and Labour Board has authority to enforce the provisions of the Act and of the regulations and schedules. The following is a summary of the wage rates in effect under these Orders in Council at the end of the year 1937. Certain other schedules, which were shown in last year's report (No. 20), were in effect during part of 1937 but had expired before the end of the year and were not renewed. They are not therefore shown this year.

Logging Industry.—Schedules of wages for this industry were made effective by Orders in Council in four districts in 1937, namely the Massey Zone (vicinity of Sudbury), Timmins Zone, Port Arthur Zone and the Rainy River Zone (Labour Gazette, June and December, 1937, and January, 1938). For those working on a time rate basis, the minimum monthly rate for cookees and kitchen staff is $40 per month for the Massey, Timmins and Port Arthur zones and $42.50 for the Rainy River zone; for general bushmen the minimum is $42.50 and for loaders $45, in all four zones; the minimum rates for teamsters are $50 to $55 in all four zones; for river drivers, the rate is $2.60 per day except in the Rainy River zone where it is $3. Free board and lodging must be provided by employers to all workers employed on the time rate basis. For those employed on piece rates, the prices are set in all zones and the maximum amount which the employers may charge each employee working on piecework for his board is 85 cents per day in the Timmins, Port Arthur and Rainy River zones and 75 cents in the Massey zone.

Baking Industry.—One schedule is in effect (Labour Gazette, January, 1938), which provides for the city of Ottawa and immediately adjacent area a 56 hour week, with the following minimum weekly rates: $23 for cake makers, doughmakers, machine operators, bench hands and ovenmen; $20 for salesmen, drivers and checkers, $14 to $20 for helpers.

Brewing Industry, Province of Ontario.—A schedule is in effect throughout the Province (Labour Gazette, July, 1935, and September, 1936), and provides for a regular working week, between April 1, and September 30, of 50 hours, except transport drivers whose week is 54 hours. Between October 1, and March 31, the regular working week is 45 hours. Minimum weekly wage rates are: coopers $30; truck drivers $25; helpers $22.50; bottlers operating machines $24.50; other bottlers $22.50; watchmen, fermenting room and cold storage, brew house, washhouse $24.50.

Men's, Boys' and Youths' Clothing, Province of Ontario.—The schedule which regulates this industry throughout the province (Labour Gazette, October, 1936), applies to the manufacture of men's, boys' and youths' pants, coats, vests and suits, etc., except work shirts, overalls, mackinaw coats, etc., and except clothing for infants and children up to the age of 6 years. Regular hours are limited to 44 per week.

Employees of "stock manufacturers" are divided by classes, as follows: Class A, skilled cutter and head operator; class B, finish presser; class C, pocket operator and front pocket and back pocket maker on pants; class D, skilled trimmer, edge taper, 1st operator on vests and 2nd operator on vests; class E, shaper and leg and bottom presser on pants; class F, seamer on pants, top stitcher on pants, lining maker on pants, waistband maker on pants, fitter, under-baster, top collar baster and finish presser on vests; class G, lining maker, edge stitcher, joiner and pocket tacker, shoulder joiner, general operator, gorge sewer, fitter on vests, top presser on pants and chopper; class H, edge presser, edge baster by hand, lining baster, facing baster by hand, collar setter, and examining brusher; class I, shoulder and undercollar baster, alteration tailor, seam presser, under presser and back presser on vests, pocket maker and outside seamer on boys' longs, shorts and bloomers and lining sewer and stitcher on boys' shorts, longs and bloomers; class J, sleeve maker and separator of coats; class K, buttonhole maker (machine), edge baster (machine), fitter on pants, trim-

ming maker on pants, seam presser on pants, separator of vests and ticket pocket maker; class L, facing and bottom tacker, special machine operator, lapel and collar padder, facing baster (machine), armhole serger, lining and back maker on vests, operator on vests, baster on vests and separator of pants; class M, canvas baster (machine), special machine operator on pants, buttonhole maker (hand), canvas baster (hand), finisher and button sewer; class N, bottom trimmer on pants, thread marker, canvas maker (machine), buttonhole tacker, binder, cleaner and basting puller, pocket and piecer on vests, general helper and busheller on pants.

MINIMUM HOURLY WAGE RATES IN ESTABLISHMENTS OF "STOCK MANUFACTURERS"

" F	33	28·9
" G	28·5	24·9

*Counties of Ontario, York, Peel, Halton and Wentworth

Any employer may submit to the advisory board the name of any employee who has less than the average skill and ability, and the board may set a special wage rate for such employee for a defined period. In the case of employees performing more than one operation they are to receive the wage rate for the highest classification of work they perform, unless a special rate is fixed by the advisory board.

Women's Cloak and Suit Industry, Province of Ontario.—The schedule made binding by Order in Council under the Act for the women's cloak and suit industry, that is the manufacture, for females, of cloaks, coats or suits and of woollen skirts of specified weight was summarized in the Labour Gazette, February, 1937, and February, 1938. The terms of this schedule relating to working hours and minimum wage rates are the same as in the agreement which is in effect in the Province of Quebec and is summarized above under the Workmen's Wages Act, except that the provisions relating to apprentices are not in the Ontario schedule, and except that the Board set up under the Industrial Standards Act is to determine rates for handicapped workers.

Millinery Workers, Province of Ontario.—The manufacture of millinery throughout the province is governed by this schedule, as noted in the Labour Gazette, November, 1936. Retail custom millinery is exempt from the provisions.

Minimum wage rates per week in Toronto and within 50 miles of its limits: class A (hand blockers) $32, class B (blockers, pouncers and buffers, operators, cutters) $29, class C (drapers) $19, class D (trimmers and preparers) $15. For establishments situated more than 50 miles from the limits of the city of Toronto, these minimum rates may be reduced by 12½ per cent. A special wage rate may be fixed by the Advisory Board for any employee whose skill and ability is found by the Board to be below the average. The Board may also fix a special wage rate for any employee performing more than one operation or who does work partially covered by this schedule and partially not so covered. Hours are 40 per week.

Furniture (Wood) Industry, Province of Ontario.—Under the schedule made binding for this industry for the whole province (Labour Gazette, April, 1937), the manufacture of all wood products known as furniture for houses, offices, schools, churches, theatres, institutions and public buildings, radio cabinets and frames for upholstered goods, is included. The province is divided into two zones: zone B includes the cities of Toronto, London, Woodstock, Kitchener, Guelph, Hamilton, St. Thomas and Stratford

and the areas adjacent to them; Zone A is the rest of the province. Regular hours are limited to 47 per week.

MINIMUM HOURLY WAGE RATES IN FURNITURE (WOOD) INDUSTRY

—	Zone A	Zone B
	cents	cents
Skilled workers	47	49
Semi-skilled workers	37	39
Unskilled workers	32	34
Average for above three classes	37	39
Beginners commencing under 21 years of age*—		
First year	18	18
Second year	21	21
Third year	24	24
Fourth year†	27	27

*The total of these employees may not exceed 20 per cent of the total number of employees in the plant or 25 per cent in case of plants in which more than half of the production consists of wooden chairs.

†After four years' experience such employees must be classed as skilled, semi-skilled or unskilled workers as shown above.

Soft Furniture Industry, Toronto District.—The schedule for this industry (Labour Gazette, November, 1937), covering the entire or partial manufacture or rebuilding or recovering of all forms of upholstered or soft furniture except the making of frames is binding in the Toronto district (the townships of York, East York, North York, Scarboro and Etobicoke). Regular hours are limited to 44 per week. The minimum hourly wage rates are: upholsterers 65 cents; cutters, springers, operators, cushion-fillers, finishers, trimmers 55 cents; labourers 40 cents.

Barbering Trade.—The accompanying table shows minimum wage rates for barbers established by schedules under this Act. The rates there shown are for those employed full time, and in all cases minimum prices which must be charged for each operation are included in the schedule. Special provision of higher proportionate rates are stipulated for barbers working part time.

(*d*) Or 65 per cent of proceeds.

(*e*) Those employed full time on commission must be paid 65 per cent (70 per cent in St. Thomas) of the receipts taken in, with no minimum weekly rate stipulated.

BUILDING TRADES.—Schedules governing wage rates and hours in the building trades in various localities, which are in force under the Act, have been summarized in the LABOUR GAZETTE during 1935, 1936 and 1937. The schedules apply to the immediately surrounding district as well as to the city named. The wage rates and hours for journeymen stated in these Orders are given in the accompanying table. (Apprentices are to be employed according to the conditions of the Ontario Apprenticeship Act.)

(a) Union agreement from September 1, 1937, provides for journeymen 85 cents per hour until December 31, 1937, and 90 cents thereafter, and for fifth year junior mechanics corresponding rates of 57 and 60 cents.

Saskatchewan

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The Saskatchewan Act was summarized in the Labour Gazette, June, 1937, page 635. The following schedules have been made binding under this Act:—

Sign Painting, Moose Jaw.—A schedule for sign painters at Moose Jaw (Labour Gazette, January, 1938), provides for a 44 hour week and a minimum wage for experienced sign painters of 65 cents per hour or 42 per cent of the amount taken in at the job prices specified in the agreement, whichever is greater; sign shop helpers to be paid a minimum wage of 40 cents per hour.

Shoemaking and Repairing, Regina.—For the city of Regina a schedule in effect (Labour Gazette, November, 1937), provides for a 52 hour week with a minimum wage of $16 per week or payment according to a specified minimum scale of piece work, whichever is greater; apprentices from $8 during first six months to $13.50 during second year.

Barbers and Hairdressers.—Schedules governing barbers in four cities and beauty parlours employees in three cities were made binding during 1937. In all cases the minimum weekly wage is either the stated minimum rate or a percentage of the proceeds taken in by the barber or beauty parlour employees, whichever is greater. Minimum wages for barbers: at Moose Jaw either $15.70 for a 57 hour week or 60 per cent of proceeds; at Regina, either $16 per week or 60 per cent of proceeds; at Weyburn, either $16 per week or 65 per cent of proceeds; at Swift Current either $15.70 for a 57 hour week or payment by stipulated piece rates. Minimum wages for hairdressers and other beauty parlour employees: at Moose Jaw, $13 or 50 per cent of proceeds, with a 45 hour week; at Weyburn, either $13 or 50 per cent of proceeds, with a 48 hour week; at Swift Current, either $13 or payment by certain stipulated piece rates, with a 50 hour week.

Building Trades.—Four schedules are in effect, as follows:—

	Minimum hourly wages	Hours per week
	$	
Carpenters, Regina	.75	44
Electrical workers, Regina	.80	44
Carpenters, Moose Jaw	.70	44
Plumbers, Saskatoon	1.00	40

Alberta

Industrial Standards Act

This Act is similar to the Industrial Standards Act of Ontario which is noted above. The text of the Act was published in the Labour Gazette, June, 1935, page 534, with amendments noted in the issues of June, 1936, page 501 and June, 1937, page 640. The following notes give information as to schedules of wages and hours in effect at the end of 1937. Certain other schedules were effective in 1936 and part of 1937, but expired before the end of the year and were not renewed. These were, therefore, shown in last year's report (No. 20) but are omitted here.

Baking Trade, Edmonton and Calgary.—Schedules were in effect in Edmonton and Calgary at the end of the year (Labour Gazette, June and December, 1937). At Edmonton, the minimum weekly wage is: for doughmen, ovenmen and bench hands $23; helpers, shippers and packers $17; wrappers $12.50; apprentices from $8 for first three months to $16 for third year; salesmen $16.50 for first three months' experience, $21 thereafter; a 54 hour week for all outside work. At Calgary, the minimum rates are: doughmen, ovenmen and benchhands $23, helpers $17, apprentices from $8 for first three months to $15 for third year. A 54 hour week is also in effect in Calgary.

Creosoting, Calgary.—At Calgary a schedule is in effect (Labour Gazette, September, 1937) establishing a regular week of 48 hours in creosoting plants, except for checkers, foremen and watchmen who may work a 54 hour week. Minimum wage rates are set on a piece rate scale for stacking and loading ties, and a minimum of 40 cents per hour for all hourly workers.

Taxi Driving, Edmonton.—A schedule is in effect at Edmonton (Labour Gazette, July, 1937), setting a maximum of a 6 day week, 12 hours per day to be worked consecutively except for a one hour rest period. Minimum wage rates are $12.50 per week guaranteed plus 25 per cent commission on all proceeds over $50, from April 1 to September 30; $15 per week plus 25 per cent commission on all proceeds over $60, between October 1 and March 31.

Building Trades.—Two building trades are affected by schedules in Calgary and two in Edmonton as shown in the accompanying table.

WAGES AND HOURS OF LABOUR FOR CERTAIN BUILDING TRADES IN ALBERTA

PRICES IN CANADA AND OTHER COUNTRIES DURING 1937*

Wholesale prices index numbers advanced generally during the first half of 1937, continuing a movement which commenced about the middle of 1936. During the last half of 1937 the indexes in most countries recorded declines. The movement during the year was influenced substantially by price changes in grains, non-ferrous metals and other raw materials. From the beginning of the year until the high point was reached the largest increases occurred in France, Italy, and Japan, being 26 per cent, 16 per cent and 15 per cent respectively. In Canada, Belgium, Great Britain, Netherlands and India the increases were from 8 to 10 per cent. In the United States the official index was 4 per cent higher and in Germany 2 per cent. The upward trend in 1936 and 1937 followed a period of relative stability after the advance from the low levels of 1933 except in those countries which remained on a gold basis. In these the recovery in prices did not commence until 1935 becoming more pronounced following devaluation in 1936. The cost of living in the principal countries was upward during 1937 continuing the trend toward higher levels which developed in most cases in 1933 following the recovery in wholesale price levels.

The Movement of Retail Prices and Cost of Living in Canada during 1937

Table I brings down to the end of 1937 the index number of changes in the cost of living in Canada, based on prices in 1913 as 100, and shows the percentage changes in the principal groups of expenditure for workingmen's families in cities since 1913. The figures for food are calculated from the cost of the food group in the weekly family budget. For the fuel and light group each month the index number is calculated from the cost of coal, wood, coal oil, gas and electricity, the figures for the last two being weighted according to population, as differences in rates in the various cities are greater in these items than in the others. An index number for rent is calculated for each city from the rates for six-roomed houses with modern conveniences, the Dominion average being weighted according to population in each city. The index numbers for clothing and sundries were calculated from the prices and costs of the various items from 1913 to 1926, weighted according to the importance of each item in workingmen's family expenditure, and have been brought down to date each month from data compiled by the Dominion Bureau of Statistics.

The movement of the index was irregularly upward during 1937 with little change of a seasonal nature, the high point being at the end of the year and the low at the beginning. From December, 1936, to December, 1937, the increase was about 4 per cent. Of the principal groups of family expenditure, foods and rent each advanced about 5 per cent in the twelve months' period while there were also moderate increases in clothing and sundry items. Fuel was slightly lower. Since the recovery in prices began in the summer of 1933 the index number of the cost of living has advanced about 11 per cent, influenced much more in this movement by advances in foods than in the other groups though clothing and rent also showed considerable advance while fuel was slightly lower in this comparison also. In spite of this advance in the cost of living since 1933 the index even at the high point of the recovery period (December, 1937) was still 17 per cent lower than in December, 1929, the figures being 133 and 160 respectively.

The food group in addition to having the greatest weight in the construction of the index number has recorded much greater changes in recent years than any of the other groups. It has, therefore, been the most important factor in the movement of the index number since 1929. From 114 in December, 1936, the index for the group rose gradually during 1937, with minor interruptions, to 120 in December. Of the twenty-nine items included all were higher in cost except two which were unchanged and five which were lower, the only important decrease being in potatoes during the last half of the year. The largest increases were recorded in the cost of meats, butter, bread, flour and rolled oats. Between March, 1933, the low point in many years for the group, and December, 1937, the cost of foods rose 32 per cent. The December figure was, however, still 25 per cent below the level of December, 1929.

In the fuel and light group the movement during 1937 was slight, as in recent years,

*The Dominion Bureau of Statistics issues reports on prices with comprehensive figures, as follows: —weekly, Index Numbers of Wholesale Prices (Canada); monthly, Prices and Price Indexes (Canada): quarterly, Price Movements in other countries; annually, Prices and Price Indexes (Canada and other countries).

*The figures for "all items" were calculated by giving the following weights to each group: Food, 35%; Fuel, 8%; Rent, 18¼%; Clothing, 18¼%; Sundries, 20%.

there being an increase in the indexes of gas and wood and a decrease in anthracite coal. The index for the group, now about 8 per cent below 1929, has changed little since 1934, there being, however, a downward tendency over this period as contrasted with the advance in other groups.

Rent for workingmen's houses advanced about 5 per cent during 1937, continuing the movement in progress since the autumn of 1934, the low point for the group having been in the summer of that year. The advance from the low point down to the end of 1937 was 9 per cent but the index is still 15 per cent below the level at the end of 1929.

The index for the clothing group was about 2·5 per cent higher at the end of 1937 than at the beginning. The figures are 118 in December, 1937, and 115 in December, 1936, as compared with 107 in June, 1933, the low point for the group, and 156 in December, 1929.

Tables II and III show the cost of a weekly family budget of foods, fuel and lighting, and rent in terms of the average prices for the Dominion and by groups for each province.

Retail prices of meats were higher month by month in 1937 than in 1936. The advance commenced at the beginning of the year and continued until the summer or the autumn when there was some decline. Prices were, however, higher at the end of the year than at the end of 1936. In beef, sirloin steak rose from an average price of 22·1 cents per pound in December, 1936, to 29·3 cents in July, 1937, and then declined to 25 cents per pound in December. The yearly average price was 26·2 cents per pound in 1937 as compared with 23·1 cents in 1936 and the pre-depression level of 36·3 cents in 1929. The price of fresh roast of pork moved between a low of 20·6 cents per pound in January and a high of 24·6 cents in September. The average price for the year was 22·2 cents per pound as compared with 21·4 cents in 1936, 15·1 cents in 1933, and 30 cents in 1929. Breakfast bacon averaged 30·1 cents per pound in 1937, 29·5 cents in 1936, 18·4 cents in 1932, and 39·9 cents in 1930. Wholesale prices of beef and pork were considerably higher in 1937 than in 1936, factors in this being the substantial increase in the figures as to inspected slaughterings of cattle and hogs during most of the year, as well as improvement in the export movement of hogs, pork, bacon and beef.

The price of fresh eggs averaged lower during the early months of 1937 than in the corresponding months of 1936, but during most of the remainder of the year the condition was reversed. The yearly average price was 33·4 cents per dozen in 1937, and 33·8 cents in 1936. The production of creamery butter during 1937 was only slightly less than the record production in 1936, and stocks in storage at the end of 1937 were about 25 per cent lower than at the end of 1936. There was little seasonal movement in prices, the level at the end of the year being, however, about 5 cents per pound higher than at the end of 1936. The yearly average price was 30·9 cents per pound in 1937, 28·3 cents in 1936, 25·3 cents in 1932, and 47 cents in 1929. Milk averaged 10·8 cents per quart in 1937, 10·3 in 1936, 9·3 cents in 1933 and 12·3 cents in 1929.

The price of flour reflecting higher wheat prices which prevailed during 1937, was at the highest level recorded since the summer of 1930. Comparative figures are 4·5 cents per pound for 1937, 3·6 cents for 1936, 4·6 cents in September, 1930, and 5·1 cents for 1929. The price of bread also rose gradually during the year, being 7·3 cents per pound in December as compared with 6·6 cents in December, 1936.

The potato crop in Canada was somewhat greater in 1937 than in 1936 while in the United States the total yield was reported to be one of the largest on record. The price in Canada was much lower at the end of the year than at the beginning, being 95 cents per ninety pounds in December as compared with $1.55 in January. The price in December, 1929, was $2.26. United States anthracite coal was lower month by month throughout 1937 than in the previous year the price being $14.42 per ton in December, as compared with $14.77 in December, 1936, while bituminous coal was little changed.

Wholesale Prices in Canada, 1937

The accompanying tables V, VI and VII show the index number of wholesale prices in Canada calculated by the Dominion Bureau of Statistics, the commodities being arranged according to "chief component materials," in table V, "purpose" in table VI and "origin" in table VII.

The upward movement in prices which commenced in June, 1936, following a period of more than two years of relative stability, was continued irregularly during the first half of 1937. In July the index number was at the highest point reached since June, 1930. During the last half of 1937 there was considerable decline but the index number at the end of the year was still about 4 per cent higher than in December, 1936, and 30 per cent higher than in February, 1933, the low point during the depression. It was, however, 14 per cent lower than in December, 1929. The advance in the twelve months' period which ended in

‡‡An allowance for the cost of clothing and sundries would increase the figures by about 50 per cent.
†Kind most sold since October, 1922.

July, 1937, and the subsequent decline were both due in large part to price changes in grains, live stock, hides, raw cotton, raw wool and certain other farm products as well as in non-ferrous metals, lumber, pulp, iron and steel.

The price levels for primary products retained the relatively higher position reached about the end of 1936 as compared with that of manufactured products. Since the recovery in prices commenced in March, 1933, the index of "raw and partly manufactured goods" moved from a level 24 per cent lower than that for "fully and chiefly manufactured goods" to a point 7·5 per cent above it in July, 1937, and then downward to only slightly above in December, 1937.

In the grouping according to chief component materials the Vegetable Products group advanced from 84·3 in December, 1936, to 95·3 in July, 1937, and then declined to 85·3 in December, 1937, influenced mainly by the movement in prices of grains, milled products and fruits. The Animal Products group rose

irregularly from 73·9 in December, 1936, to 81·7 in September, 1937, and then declined to 78·2 in December, 1937, due chiefly to the rise and subsequent fall in the prices of hides, leather, live stock and meats. In the Textile Products group the largest changes occurred in the prices of raw cotton and raw wool the index for this group being lower in December, 1937, than in December, 1936, following the decline from the high point for the year reached in July. The Iron and Its Products group was 14 per cent higher at the end of 1937, than at the end of 1936, there being only a slight decline in this group from the level of September while the Non-ferrous Metals group was substantially lower at the end of 1937, than in December, 1936. after having reached a peak in March, 1937, due mainly to the movement in the prices of copper, lead, zinc, tin and aluminium.

Less movement was recorded during the year in "consumers goods" than in "producers goods." The former rose from 76·9 in December, 1936, to 81·1 in July, 1937, and then

(a) Revised from Jan. 1920 to Jan. 1931, substituting bituminous coal for anthracite.
*Coal, wood and coal oil, no allowance is made for the varying extent to which these are used in the different provinces.
†Including also laundry starch.

declined to 79·1 in December, 1937, while the latter was 80·4 in December, 1936, 90·3 in July, 1937, and 82·7 in December 1937. In "consumers goods" bakery products, meats, milk and its products, sugar, clothing and household equipment were substantially higher at the end of the year than at the beginning while vegetables and eggs were lower. In "producers goods" in the same comparison building and construction materials as well as materials for the meat packing industries and for the milling industries were higher while materials for the textile, the furs and leather goods, the metal working and the chemical using industries were lower.

Table IV on page 9 gives the wholesale prices of certain commodities on primary markets and is compiled from information in the monthly bulletins on "Prices and Price Indexes," issued by the Dominion Bureau of Statistics.

RENT IN TERMS OF THE AVERAGE RETAIL PRICES IN THE DOMINION AND IN EACH PROVINCE

Prices in Great Britain and Other Countries

The accompanying tables numbered VIII to XXIII give index numbers of retail prices of foods and cost of living and of wholesale prices in several of the principal commercial and industrial countries for 1937 and for preceding dates to show the movements of prices in comparison with those in Canada. The information in the following tables is obtained for the most part from publications of the governmental or other authority compiling the index number, but in some cases from the Monthly Bulletin of Statistics of the League of Nations, Geneva, which publishes figures for many countries. The quarterly supplement to Prices and Price Indexes issued by the Dominion Bureau of Statistics, Ottawa, also contains index numbers for many countries.

Great Britain

Cost of Living.—The Ministry of Labour's index number (Table X), based on the pre-war standard of living of a workingman's family (food expenditure weighted 60 per cent) stood at 151 at the first of January, 1937, and rose to 160 at the first of December, an increase of 6·0 per cent for the year. An upward movement began in June, 1936, when the index stood at 144. During 1937 the index for food rose from 136 to 146, an increase of 7·4 per cent for the year. The index of the rent group has been unchanged since May, 1936, at which time it reached 159. The index for the clothing group rose from 190-195 at the beginning of 1937 to 210 at the end of the year. The fuel and light group rose from 175-180 to 180-185 during the same period, while the sundries group rose from 170 to 175.

Wholesale Prices.—The index number of wholesale prices published by the Board of Trade (Table XI) stood at 107·6 in December, 1937, as compared with 102·9 at the beginning of the year. The high point for the year, 111·5, was reached in July, and there have been small decreases each month since. The high point for the index of wholesale food prices was reached in October at 105·3 as compared with 99·4 for January. The index for "Industrial Materials and Manufactures" reached the high point this year in July when it stood at 116·1 as compared with 104·6 at the beginning of the year and 109·2 for December.

France

Cost of Living.—The latest available figures showing cost of living fluctuations in France are those compiled by the Central Statistical Office for the second quarter of 1937 (Table XII). At this time the general index was 606 as compared with 497 for the same quarter of 1936. During the same period the food index rose from 514 to 629, the index for the heat and light group rose from 530 to 606, that for rent from 363 to 375, that for clothing from 483 to 692 and that for sundries from 575 to 617.

Wholesale Prices.—The general index of wholesale prices compiled by the General Statistical Office (Table XIII) rose from 513 in January to 611 in October, the December figure showing a slight decrease at 601. As noted in this supplement last year prices in terms of national currency have risen considerably since France left the gold basis in 1936. During 1937, the index in terms of gold (not included in this table), rose from 73 in January to 75 in March, since which time it has decreased to 62 in December.

Germany

Cost of Living.—The index of cost of living compiled by the Federal Statistical Office (Table XIV) has not shown any very great fluctuation during 1937. The general index rose from 124·5 in January to 126·2 in July and declined to 124·8 by December. The high point in the food index was also reached in July when it was 124·5 as compared with 121·4 for January and 121·1 for December, The index for clothing prices which was 124·2 in January showed an increase each month, being 127·9 in December.

Wholesale Prices.—The index numbers of wholesale prices published by the Federal Statistical Office (Table XV) showed that with the exception of the "Industrial Raw Materials and Semi-Manufactured Goods" prices in all groups increased slightly during 1937. The general index was 105·5 for December as compared with 105·3 in January, a high point of 106·7 being reached in August. The "Industrial Materials and Semi-Manufactured Goods" group stood at 96·8 in January, increased to 98·1 in March, decreased to 94·1 in November, and was 94·3 in December.

United States

Cost of Living.—The latest available index number of cost of living compiled by the Bureau of Labour Statistics (Table XXII) is that for September, 1937, at which time the index for all items was 148·2 as compared with 143·6 for the corresponding date in 1936, an increase of 3·2 per cent for the year. During the same period the indexes for all the sub-groups with the exception of that for fuel and light showed increases.

Wholesale Prices.—The latest available index numbers of wholesale prices as published by the Bureau of Labour Statistics (Table XXIII) are those for November, 1937, when the all commodity index stood at 83·3, as compared with 82·4 for November, 1936. The highest point during the current year was in April when the all commodity index was 88·0.
